Protocol extracts from the *Menetekel* brochures of 1956 - 1975

Theme : **Ufology**

Part 3 from 1967 to 1975

Preface

When *psychic* LAWS are harmonised with *physical* laws, “miracles” can take place that represent insoluble and unexplained riddles to today’s sciences. The harmonising process takes place through certain ceremonies and rites that are however ridiculed and derided by the press, by academic science and so-called “enlightened people”.

The sciences do not shy away from anything apart from the supernatural, they do however do so because the supernatural has something to do with GOD’S existence.

Experts rate *higher* than the other faculties. The diagnosis made by a specialist for instance rates higher than that of a general practitioner. The specialist in *spiritualism* is however supposed to be *eliminated*. You can see where this leads to!

The *Psychic Peace Circle, Berlin* always endeavoured to provide the sciences with certain motivations. The study group does not shy away from allowing the press, television and also scientists to gain access to its séances. Why not? This study group has nothing to hide. Its intentions were always to serve a needy mankind.

The *dissemination* of the formulated spiritual insights was not solely in the hands of this Berliner study group. This circle had to depend on the assistance of other people.

Bad Salzuflen, December 2007

Questions and answers

January 1967

Question : A truck driver had to defend himself with a knife against a small, hairy UFO pilot near *Caracas, Venezuela*. He felt as if he was jabbing at steel. Do UFO pilots come to Earth in some sort of armour?

AREDOS : The whole thing is a *fantasy*. I find the fact that the pilot is supposed to have been “hairy” impossible. It might have been the hairstyle. The author of this story might have heard about the protection the SANTINER employ. The SANTINER, ergo extraterrestrials, can erect a *wall of rays* around themselves.

- *The SANTINER will never attack a terrestrial human being. Therefore nobody has to defend themselves against them with a knife.*

Genesis 19, 11: “Then they struck all the men outside with blindness so that they couldn’t find the door”. This is a passage from your Old Testament. We are dealing here with an attack on the SANTINER by the population of Sodom.

Question : Can terrestrial people be injured by the protective rays of the SANTINER?

AREDOS : No, not directly. We are dealing with *paralysation* here. The attacker is incapable of concentrating. He suffer some kind of blackout.

Question : How extensive is the reach of the paralysing zone?

AREDOS : It depends on its deployment by the SANTINER. A larger group of SANTINER can naturally paralyse a larger assembly of people.

Question : Why are UFO flyovers over South America particularly prolific?

AREDOS : This is a mistake! Sightings there are more *officially published*.

Question : Are there really extraterrestrial in the universe that can travel through space even though their development is *very negative*?

ELIAS : *Yes, such human races do exist. But these* astronauts are a long way away from Earth. They do not come here.

Question : How is it possible for such negative people to have such a high level of technical development that allows them to fly in UFOS?

ELIAS : These people had better insights *once upon a time*. They have *unfortunately* taken a *retrograde* step – this can also happen.

Question : As you are aware, a lot of nonsense is disseminated about this subject matter. Are there certain signs one can *recognise* these *false* reports by?

ELIAS : *Experience and logic are the yardsticks*. – We established that every time we talk about the vastness of the universe no boundaries can be set. People’s fantasy cannot be reined in either, because faced with billions of stars, the reality is far greater than any fantasy.

- *Reports about negative, antagonistic spaceships seen on Earth are only bandied about to cause unrest.*

Question : Do invisible UFOS fly across planet Earth?

ELIAS : When objects fly so fast that the eye can no longer register them, they become invisible to you. UFOS *can* fly that fast! You therefore can only see slow moving UFOS. Three or five UFOS are sometimes seen simultaneously, even though one is only dealing with *one* UFO. This is the result of the way they rapidly change positions.

Question : How can extraterrestrials deal with these rapid zigzag speeds?

ELIAS : A terrestrial human being could not bear such exertions. The SANTINER can only bear them in a *dematerialised* state. You cannot yet comprehend what this state is all about. But there are also UFOS that carry out some very daring manoeuvres. These particular UFOS are *unmanned* – they are *remote controlled*. Their own electro-magnetic force field allows them to perform fantastic manoeuvres, but boundaries are set just the same when they're in a *materialised* state.

- *The vacuum bubble they float in disperses fire and water and besides, all meteorites in space are repelled.*
- *An electromagnetic force-field like the one UFO possess does not allow any projectile to penetrate. This makes them impregnable.*
- *UFOS cannot be destroyed with terrestrial weapons.*

One should therefore not engage in a war with the SANTINER. UFOS naturally also have a chink in their armour. You will however never find out what it is. Something that is perfect does not exist. Their installed tele-eyes have an extraordinary rage.

- *As they are also using ultraviolet rays, no atmosphere can hinder them.*

They have indeed some very complicated instruments on board. We are however not allowed to talk about them.

February 1967

Question : From the numerous letters that we receive we glean that most people are surprised that extraterrestrials do nothing to ease the great crisis we are in. This makes them lose their trust in the SANTINER. What do you say to that?

ELIAS : When these extraterrestrials indent to do something they find that it does *not solely* rely on their own intent. They require a HIGHER COMMAND for it. They had plenty of reasons in the past to interfere, but the COMMISSION for it is still lacking. But if they had undertaken something, a war between terrestrial and extraterrestrial people would have developed. Nothing would have been gained by this. Planet Earth should on no account lose its independence.

- *If the SANTINER would prevent all wars they would slow down terrestrial mankind's development in the process.*

The Earth is after all a planet of development and redemption and it is absolutely imperative that this is taken into consideration. GOD would certainly like to see terrestrial mankind develop further *of their own accord*. Good advice is certainly at its disposal, but no coercion.

Mankind is in possession of the key to further development, namely the COMMANDMENTS from Mount Sinai.

- *The SANTINER will only forcefully intervene in case a global war with nuclear weapons is about to take place. The terrestrial and extraterrestrial world will otherwise encounter one another in space in a friendly manner.*

The progress in terrestrial space travel is reaching forms these day that make an encounter possible.

- *As terrestrial man takes its first step into space, they automatically have the right to make contact with other planets.*

Mankind does however also have its free will *in this respect* and the fact that this human race is *affected with such a degree of blindness* is distressing and woeful at the same time.

May 1967

The exploration of the realm of the spirit (By Herbert Viktor Speer)

The longer we have contact with the realm of the spirit the more convinced we become that a *permanent* world peace is only possible through a *scientifically based religion*. This is probably the reason why extraterrestrial people offer us a UNIVERSAL RELIGION. This offer is not new. It began at biblical times. If this offer is repeated these days it will have been *adapted* to our present development.

Just how necessary the comprehension of this RELIGION really is confirms the “*Miracle of Fatima*”. This spaceship phenomenon, one that is beyond doubt, was *falsely apprehended* and *misinterpreted* into the bargain by the Catholic Church. Theology attacked our elucidations in regards to it. They resent our confutation of the Mother Mary miracle.

- *We can ascertain in regards to this that religious fanatics always turn aggressive when their dogmas are infringed upon – it usually ends up in hysterics.*

That we are *actually* dealing with an extraterrestrial spaceship phenomenon in the case of *Fatima* can be easily verified with the help of ufology. But the “*Miracle of Fatima*” was accompanied by a message. The question is whether this message stems from the occupants of a spaceship or from Mother Mary?

We heard that the SANTINER work hand in hand with the realm of the spirit and this in a way we still find impossible to do ourselves. All messages from extraterrestrials are divine revelations and have always been that – something the Bible verifies. This is the extraterrestrials actual MISSION. This is the reason why it is absolutely inconsequential whether a message stems from MARY or whether these revelations stem from ASHTAR SHERAN or some other MESSENGER. These spaceships are an extraterrestrial *technical* miracle. The messages on the other hand are *divine* miracles. This is the reason why the *Fatima revelations* have not really been done an injustice, on the contrary – the phenomenon of *Fatima* only gains it *correct* pertinence through correct observation and valuation.

So-called “divine miracles” are strictly rejected by atheists, because they can usually not be sufficiently verified. But this SANTINER phenomena *can be verified*. No atheist will be proselytised through irrationality or medieval thought processes. Proving that logical evidence is

rather more inclined to convince them.

The exploration of the realm of the spirit is a natural science in its *own* right and it demands a high degree of intuitive ability and a high degree of general knowledge. We are convinced that this *psycho-science* towers over all *philosophies*, because it deals with components of experience whilst *philosophies* are based on lots of dogmas and thought associations.

Psycho-science has naturally also been discredited during the course of its development, because it has been managed by *incapable* mediums and advocates. All types of church dogmas represent a danger to this science. Only false results are gleaned when GOD'S image or the divine HIERARCHY are misinterpreted. There is hardly another special science that demands such a high degree of studying and mental processing the like we see necessary with *psycho-science*.

- *Real psycho-science – in the right hands – has fewer superstitions than any other religion or cult.*

It is specifically difficult to introduce this science to laymen *because* it requires such a high degree of studying and mental processing and most of them want to avoid all initial studies. Besides, there is no support from any federal agency.

Questions and answers

May 1967

Question : Has mankind in its atheism not reached a point where the time for an extraterrestrial correction is already *given*?

ELIAS : We have to admit that we share this sentiment. The SANTINER are now also becoming impatient. But the time is *not ripe* in a divine sense. There is a huge difference between people's thought processes and GOD'S THOUGHT PROCESSES. You have to take this into account. ETERNITY measures things with a *different* yardstick. To put it in words, HE uses a different timetable.

Compare the Bible: You'll find one prophesy there that states that only GOD knows *Day X*, ergo *Zero Hour*. Taking the horrors of WWII into account and also events in Vietnam one has to conclude that this *Day X* is not too far away. The content of strontium in the atmosphere has considerably increased since the Chinese performed nuclear tests.

August 1967

Question : Are testing rockets condoned by the SANTINER? Do they meet with their approval?

ELIAS : All planets throughout the universe populated by human beings, having reached a technological age, enter this phase of development. These people will then always endeavour to advance into space.

Question : We recently read that leading authorities, professors etc. risk losing their authority and dignity if they would publicise the truth about UFOS. Why do the SANTINER not engage in educating the populace themselves?

ELIAS : They have been doing this for years. The difficulty lies in the *conversion of terrestrial religions*. You must not forget that the SANTINER virtually come to you as GOD'S MESSENGERS. One is unfortunately not prepared to believe something that is dictated by somebody else. *Acceptance presupposes belief* and belief is bred into people.

The SANTINER have turned into a legend – become legendary. People begin to see the SANTINER as extraterrestrials bathed in divine LIGHT. One waits for them the way one waited for the MESSIAH 2,000 years ago. It is quite alright for people to have this view, because there is some truth in it. The time will soon be right for the indoctrination they presented terrestrial human beings with to fall on fertile ground.

People have suspected for a long time that one *cannot* believe *everything* governments and scientists tell us. A lot of people were convinced a long time ago that *climatic changes* are tied to nuclear tests. These changes do not have anything to do with radioactivity. But take the enormous air-displacement created by a nuclear explosion into consideration. The atmosphere is rapidly torn apart to then collapse with enormous energy. This creates *new* air currents. The incredibly high temperatures that are released should not be forgotten either. – *Subterranean tests triggered great earthquakes*, even though earthquakes have always been around. But these are *additional* ones. There is no excuse for this.

Question : Is it possible that a SANTINER is reincarnated on Earth?

ELIAS : The possibility *exists* if a SANTINER has *founded* in his spiritual development .But a highly evolved soul can decide to incarnate here *of its own volition*.

Attention!

Dear reader, as you are unable to attend our séances, we think it is imperative that you read our latest ASHTAR SHERAN brochure titled:

Messengers of the future

This message from extraterrestrials is conspicuous evidence that mankind on Earth is under divine CONTROL. These solemn words by ASHTAR SHERAN are of the greatest importance. There are no similar scripts in the whole wide world that are as *logical* and as *meaningful*.

ASHTAR SHERAN does not speak like an educated person from Earth, but like one of GOD'S ANGEL who would like to save us from the worst. A brochure one is talking about. ASHTAR SHERAN'S formulations are crystal clear. The content of this new brochure cuts like a diamond, even the hardest.

November 1967

Question : Why do extraterrestrials not make direct contact with the leaders of terrestrial mankind?
Nobody can quite understand this behaviourism.

ELIAS : The SANTINER could have made direct contact with Earth, that is to say engaged in negotiations with governments a long time ago. But they find that terrestrial governments are still *too immature* for such negotiations. Nothing would eventuate from them, something you can observe in all your disarmament and peace negotiations amongst your nations. Ergo only an invasion could come into consideration.

- *Such an invasion is kept in reserve in case there is an extreme emergency. The outbreak of a nuclear war would for instance be such an emergency.*

Well, let's assume that they landed on masse on Earth in spite of this, they would have come here as liberators, that is to say enslavers, because liberators always end up as the enslavers of free will. The SANTINER can naturally not condone everything that takes place here on Earth. The Earth would be placed under their *protectorate*.

It is however GOD'S will that terrestrial mankind retains its free will if at all possible. Every individual human beings is supposed to gain better insights *of their own accord*. The SANTINER are absolutely determined to not interfere in GOD'S handiwork under any circumstances. Planet Earth is a *very hot potato indeed*, great intellects are at work here, but also boundless dullness.

Planer Earth is a *planet of egotists*. Egotism is the driving force behind all basic problems. When people think of somebody else in order to perform a good deed on them without the egotistical agenda that their deed will be requited *with interest*, this mankind can compare itself to the human race called the SANTINER.

The fact that terrestrial mankind will also advance further into space must be taken into consideration. The SANTINER intend to get in contact with authoritative representatives in the near future because of this fact.

The SANTINER are naturally prepared for all eventualities. They also possess a so-called war potential, even though they have not yet utilised it. They possess an apparatus for instance that looks similar to a flashlight. This apparatus emits a bundled blue light. When this beam of light hits a certain area, for instance the head of a human being, this person turns completely will-less as if in a deep hypnosis. When in this state, it will then do whatever the other person demands of him.

(Comment: This is where many of our readers might think that they are dealing with pure fantasies here. This would however be a mistake, one that can be refuted through a passage in the Bible. It states for instance in **Genesis 19, 11**: "*Then they struck all men outside with blindness, so that they couldn't find the door.*" This apparatus must have already been in use in biblical times. One has to assume that their weapons of defence are *far more* sophisticated these days.)

Such a device is part and parcel of every SANTINER'S equipment. I know what you are thinking, namely to irradiate a particular political leader. This weapon is at least better having that person experience some act of violence.

- *It isn't only human beings that react to this device, but all animals also.*
- *Something the SANTINER are however afraid of are bacteria. This is one reason why they are not keen on carrying out a lading on Earth. Planet Earth has particularly dangerous kinds of bacteria and its atmosphere is particularly well suited for harbouring such bacteria.*

- *There is also the danger that unfamiliar bacteria are introduced from the Moon and that they could in a fashion “defrost” here. The Moon harbours a series of bacterial mutations that developed through a slow process of cooling-down, because they had to assert themselves against an enormous process of cooling-down. If one is not sufficiently careful, these bacteria could cause incredible epidemics here on Earth.*

December 1967

Question : There are lots of contradictions in respect to speed and size when it comes to UFO sightings. Why is this so?

ELIAS : One cannot accurately define a UFO:

- *A very large object can be very far away or also close by, but seem rather smaller.*
- *No human being can determine their speed based on their own estimation, because UFOS travel at great heights. Objects flying closer to earth never fly very fast.*
- *The glow UFOS emit feigns a different size.*

January 1968

Question : How can we best support the mission of the SANTINER?

ELIAS : By trying to encourage mankind to engage in better and more sensible thought processes. It is also very important to take people’s fear of extraterrestrials and the supernatural away from them.

- *The MISSION of the SANTINER mainly consists in making mankind mature enough to deal with an encounter with the SANTINER.*

February 1968

Question : Will the SANTINER interfere in our terrestrial affairs?

ELIAS : These extraterrestrials will naturally pay attention to Earth if *it is faced with an absolute danger*. They will then interfere the way they did a few thousand years ago.

March 1968

Question : How will terrestrial physical matter behave if it happens one day that it is taken to another planet?

ELIAS : It will remain unchanged, but its weight will be influenced by the prevailing gravity. This applies unless it is taken to a different type of atmosphere, the structure of terrestrial materials can then change. There are planets with an *ammoniac atmosphere*.

Question : Can creatures live in an *ammoniac atmosphere*?

ELIAS : Yes, because an *ammoniac atmosphere* is not necessarily hostile. These creatures are naturally adapted accordingly. It is of course not suitable for terrestrial human beings.

- *Life in an ammoniac atmosphere looks entirely different. It cannot be compared to planet Earth.*

June 1968

Question : Some time ago we received the LAW of HEAVEN from the SANTINER, respectively from ASHTAR SHERAN and we published it. What can we do to have this LAW find the kind of dissemination that people will actually take notice of it?

ELIAS : This LAW of HEAVEN *will* come into effect, even if this doesn't seem to be the case at this point in time. These words will however be followed by actions. Mankind is very impatient and the most disobedient under the sun. But time can produce miracles. Now pay attention:

- *There was once a race of people that thought exactly the way you do. These people wanted to interfere with the wheel of development, but all they accomplished was to bring this wheel to a standstill. Impatience is a very big human evil.*

July 1968

Something about ASHTAR SHERAN

We have been receiving enormously informative messages from an extraterrestrial source for about 10 years. The name "ASHTAR SHERAN" has become world-renowned in the meantime. UFO specialists could no longer do without it.

An adjustment to all religions is exceedingly logical and worthwhile if we accept the existence of the SANTINER. This is unfortunately not the case to the required degree. This specifically led to create doubters, even though the Bible furnishes very good basics for the existence of extraterrestrials.

One is particularly affronted by the *occult behaviourism* of UFOS: They appear on radar screens to then suddenly disappear without reason. They are sighted by lots of people to then suddenly dissolve into nothing in front of their eyes. These are the major reasons why one will not accept that UFOS really exist. Due to this behaviourism one is inclined to dismiss them as a *mass-suggestion* or a product of human fantasy. Scientists say that UFO sightings are the "wishful thinking of a frightened humanity". We do however know from our own, convincing experience that the objective truth is *suppressed* by the press, radio and television. We also know that one *scrupulously lies*. We also know that there are lots of scientists that allow themselves to be part of these lies.

- *The major governments of this world stem against any moral criticism with all their might, particularly when the criticism comes from the DIVINE REGIONS or from a human race that is far superior to us.*

ASHTAR SHERAN explained reasonably accurately in his last message called "*Via Terra*" why UFOS are an occult experience for us. All of ASHTAR SHERAN'S messages contain some *remarkable schooling*. An extraordinary indoctrination runs like a thread through these messages

and it is incrementally *adapted* to our own development.

ASHTAR SHERAN is a UNIVERSAL TEACHER and he is in his own way a “CHRIST” for our times. International attention clearly recognised this. One has for instance undertaken some serious studies in regards to the name ASHTAR SHERAN in France. The result, formulated by a committee of an eminent esoteric journal, really surprised us. The editors of the French journal “*Ondes Vives*” handed us the following results:

“Studying the Bible and mythologies established that the great “Ages” play an important role in mankind’s life. We find ourselves at the end of such an Age of 2,000 years, one in which CHRIST manifested himself in order to bring in the HARVEST of the SOULS.

The name ASHTAR SHERAN, according to the anagram, connotes the highest values one can calculate from a name, namely: CHRIST, HERO, LEADER, ANGEL, CHOSEN ONE.”

This assessment, based on an esoteric and scientific basis, is of enormous importance to the future of this planet. The “*Cart of Zeus*” also enters the picture: We can only be dealing with a spaceship of the SANTINER here.

The editors of “*Ondes Vives*” asked us to question the SANTINER in order to establish whether ASHTAR SHERAN is the re-manifestation of the man from Nazareth JESUS CHRIST? We fulfilled their request, but did not receive a conclusive answer.

ASHTAR SHEERAN is an extraterrestrial UNIVERSAL TEACHER and SAVIOUR of great renown, he does however preserve the secret of his personality.

* * * * *

July 1968

One step towards the truth

Russian scientists have taken our publications about extraterrestrial space travel into consideration. Particularly the things ASHTAR SHERAN had to say about the SANTINER and their MISSION made sense to them.

The modification of all religions thereby gains credibility.

French and *Italian* experts have also shown a specific interest and promoted our contact reports. This is a great and meaningful step towards the truth.

The leader of a UFO study group, *Hermann Ilg*¹, has also come up with some very positive observations in respect to this problem. Mr. *Ilg* combined these thoughts in a booklet titled: “*The path and aim of UFO research*”. These observations were very much to our liking and they fit in very well with our own mission. We can therefore recommend this booklet, because it makes a contribution towards awakening our understanding of our extraterrestrial visitors. With the help of this small booklet we can see just how important any knowledge about Ufology really is. It will become problem number one for our world in the foreseeable future.

Deriders and atheists will laugh on the other side of their faces; we are certain of this.

¹ The well-known UFO researcher, certified engineer *Hermann Ilg* from Reutlingen died earl May 1999 aged almost 80 years.

Questions and answers

August 1968

Question : Is it correct for us to still use the old terminology of UFO (Unidentified Flying Objects) even though flying saucers have been *identified* as *extraterrestrial* flying objects a long time ago?

AREDOS : The terminology "UFO" can be maintained, because they are indeed *Universal Flying Objects*. The word "Unidentified" must be replaced with "Universal". This is the correct terminology.

October 1968

Question : A book appeared in bookshops that is paid great attention to by people interested in UFOS. The author is *Erich von Däniken*. The book is titled: "*Chariots of the Gods*" ("*Erinnerungen an die Zukunft, ungelöste Rätsel der Vergangenheit.*") – Can we hear your comments to this book?

AREDOS : The book is known to me. The author went to great length to shed some light on the past. *A lot of his observations and evidence is correct.*

- *Earth was indeed visited by alien human beings thousands of years ago and they did come to Earth from other planets.*

Because they were so superior to terrestrial human beings and because *they came from Heaven*, they were regarded as *Gods*. This is where the sciences should analogously concentrate. It is very important! This author naturally still lacks a lot of the insights our readers already have.

Question : To what degree does the Christian religion concur with ufology?

ELIAS : There are no objections here, because there is concordance in regards to the MISSION, it is called *brotherly love*. But global elucidation is unfortunately still lacking.

February 1969

Question : Does the name "ASHTAR SHERAN" have a *specific* meaning for us terrestrial people?

ELIAS : *Yes, absolutely!* – Like the name CHRIST, it is mystical. – His archetype is also significant. The imaginary, mystical and incredible has a great influence on mankind. What is important is that the greatest range is given to people's power of imagination in regards to these things. This is the only possible way for ASHTAR SHERAN to carry out his MISSION under the prevailing conditions and opportunities.

- *ASHTAR SHERAN does fulfil the same assignment CHRIST was entrusted with here on Earth. Both of them are UNIVERSAL TEACHERS of great renown. But: Both universal teachers are not GOD himself!*

This terrestrial human race would like to have the truth served *beautifully garnished*; it is affronted by its *simplicity* and its *modesty*. There are indeed a few exceptions, but the general public unfortunately thinks that way.

Lies about UFOS

The *University of Colorado* was charged with elucidating the UFO phenomenon.

The just published explanation reads:

“Flying saucers cannot always be explained. There is no evidence that UFOS transport visitors from other solar systems to Earth.”

And they spent *millions* to come up with this conclusion!

We can see once again that academic arrogance and dogmatic parochialism is incapable of solving phenomena that have a spiritual, occult or messianic character. These self-same scientists have always *rejected* or *gibed* GOD’S and the realm of the spirit’s existence. There are *neither* a heaven *nor* a hell, *neither* SPIRITS *nor* SOULS or MESSENGERS of LIGHT as far as they are concerned. No other religion exists for these scientists than the *glorification of matter*.

- *This is definite “evidence” that UFOS with a messianic character may not exist and this for the very same reason why GOD may also not exist.*

Professor Dr. Hans Bender recently described spook phenomena that shocked the whole world in a very similar fashion, namely as “subconscious externalisations of nervous, hypertensive people”. We can ascertain that university science has led mankind up the garden path for millennia, something CHRIST already ascertained in his days.

- *The incapability of certain scientists offers the basis for this endless shedding of blood on this Earth.*

The American scientists at the *University of Colorado* probably never heard of ASHTAR SHERAN and probably also never read the Bible that actually represents a document of ufology.

Our battle continues!

Taken from a speech by ASHTAR SHERAN

Instead of planning a reformation one plotted a revolution against GOD – and another generation endeavours to continue this to the terrible demise of a whole planet.

Ask your ingenious generals and conquerors the question:
Does absolute security against a mighty opponent actually exist?
 These strategists will not be able to answer this question with certainty.
 A great risk will always endure.

But I will now ask *all* of you the question:
Does such absolute security exist at all or taking it further, does the slightest chance to fight against

GOD and actually be victorious exist?

Do not underestimate the greatest POWER throughout the universe, even if you do not have the PERSONALITY of this POWER tangibly in front of your eyes. We are its messengers and maybe also its executioners.

You will have to admit that it *doesn't* make sense to continue the plotted revolution against the CREATOR, because as you do not have the weaponry you will never be the victors. Our weapons are far superior to yours, but we would never entertain the thought of using them against GOD.

Only *you* are *insane enough* to try!

Even LUCIFER with his DARK ANGELS and immeasurable ARMIES has not been able to win this BATTLE against the CREATOR and he is constantly on the run from justice.

You too will have to run! – And you will not find one single place throughout the universe where you will be save from justice.

* * * * *

Nothing is impossible in the universe

Extract from our brochure "*From Star to Star*".
Author ASHTAR SHERAN.

We do have far more experience than the people on Earth in any case. Our own negative period of development was *not as long* as yours. To use your own words, mankind finds itself right in the middle of what might be called an "awkward adolescent phase". You don't have anything positive to say about your adolescents and you call them "yobbos". This appellation is of special significance because it accurately describes *all of you* and this with only a few exceptions.

There is no need for me to list all the details here in order to verify this assertion, because you are aware of all of them. One must have the ability to move invisibly within the physical world.

The things we hear and see are absolutely terrible from our point of view. Even the things one can publicly observe are shocking enough. But behind closed doors, well even in government offices, castles and parliaments, things take place that one gets the idea that you never ever heard the word "GOD" mentioned. - This is why I can't even say: "Hang your head in shame in front of ANOTHER WORLD." I know that you are absolutely *incapable* of such an emotion and it takes a lot of self-conquest and LOVE to help you.

The fate of this Earth and the life it accommodates is no reason for a drinking bout to then discuss the opportunities of disarmament in a nicotine contaminated environment with benumbed senses. The fuller the belly, the emptier the brain! One cannot comprehend GOD when one is full of alcohol!

Due to our assiduous study of the universe, always filled with respect for the CREATOR and HIS CREATION, we have come up with a *science of dematerialisation*. If we were to introduce you to this science, we would have to relocate a whole university city from our home planet to your Earth. But in order to give you some idea about the possibilities of such a bodacious opportunity, I will gladly mention a few things in *your* own words. I am aware that this has already been discussed on numerous occasions, but it still seems all too fabulous to you. – You will never be able to comprehend this.

- *The divine cosmos, outside of physical matter, contains a mysterious SUBSTANCE, an immaterial SUBSTANCE of incredible lightness and ENERGY. This SUBSTANCE, let's call it JAHWUS for the moment, contains no gaps and in its consistency is like the yolk of an egg and it has similar characteristics to water. One can neither carve a gap into this substance, nor jab into it and it is impossible to send rays or other energies through it. This is possible with water, but not with the SUBSTANCE JAHWUS.*
- *This universal HOMOGENOUS SUBSTANCE can vibrate in a fashion you're not familiar with. This self-contained ENERGY continuously vibrates the whole universe and it does not require dissemination. Every corner of the universe vibrates exactly the same as at the place of its conception within a micro fraction of a second. Formula: $A = O$; $O = A$. There are not reflections, because A and O always have the same capacity. Everything is contained within this unit, even the negative and the positive, well even GOD, GOD'S FEELINGS and THOUGHTS as well as every life form within the universe.*

The material plane has its *physical* laws and the SPIRITUAL PLANE also has its *physical* LAWS; I therefore ask you: What are these laws of physics? –Nothing else but *explanations* in our eyes.

Questions and answers

May 1969

Question : One often wonders about Day “X”. Is there actually such a point in time?

ELIAS : Day “X” is not too far away, but nobody knows this point in time accurately. Even the ANGELS do not know the hour. But extraterrestrials do play a major role in it.

- *The “Son of Man” is not a supernatural beings, but a human being born of human beings.*

August 1969

Question : Do the SANTINER play a specific role within the *terrestrial reorganisation*?

ELIAS : This is certainly the case. The Earth was supposed to be put under a *protectorate*. This is however unnecessary at present.

Question : Can you tell us the reason that would have led to this *protectorate*?

ELIAS : You have no inkling of the abyss mankind of this Earth has once stood upon. The whole Earth was in danger during the *Cuba crisis*. If the Russians had not retreated, the fireworks would have gone off everywhere. The SANTINER would then *have been forced* to interfere. But I am convinced that Earth would now have a *different countenance* because of this.

December 1969

Question : You will have become aware in the meantime that our Italian friends have published three more ASHTAR SHERAN brochures. These translations constitute further success of our concerted efforts. Do you also see this in this light?

ELIAS : Inexorably, the track to HIGHER INSIGHTS advances step by step. From an initial brook that turns into a river and eventually in a stream that carries everything in front of it.

As Christmas is only days away a lot of you will feel that the year has gone *much too fast*. It was however a *dangerous* year. But world peace has been maintained after all.

January 1970

Question : The UFO problem still occupies first place. We do however get the impression that a lot of people that were *initially* enthused fans of the SANTINER, gradually *lose* their enthusiasm, because allegedly *nothing happens*, at least not the way they hoped for. How do you see this problem?

ELIAS : The UFO problem will naturally remain as it is. If you hold the opinion that nothing is happening you are mistaken. The SANTINER do not abandon their intentions, but they do pursue a very specific plan.

We are specifically dealing with *underpinning*, because this is a *lot more effective* than major demonstration flights, because they would only conjure up animosities.

- *People's attention in regards to UFOS was specifically awakened in 1947 (Rothwell incident). This was followed by a rest period.*
- *Contacts were the order of the day after this rest period followed by major messages. Demonstration flights took place in between.*
- *This was eventually followed by major blackouts in the USA and in a few other countries. Again followed by another period of rest.*
- *The SANTINER then transmitted further important messages.*
- *Mass-demonstration-flights followed thereafter.*

You can see that the SANTINER have not let off pursuing their plan. Your impatience is difficult to comprehend. What do you believe is still in front of you? Another major message will be transmitted. The whole thing never stands still, because things are still being investigated and discussed during these periods of rest.

Question : Did government circles actually regard these major *blackouts* as an extraterrestrial phenomenon?

ELIAS : One took something like this into consideration, but one refrained from expressing these assumptions. The things one could not keep quiet trickled through.

- *In any case, one was able to observe a large, shining orb over the electrical power stations.*

The Pentagon showed a lot of photos and other material to reporters, things they had already declared as “non-authentic”. They kept the *actual* UFO mystery to themselves. There are *millions of eyewitnesses* that have seen real UFO sightings; this goes back millennia.

Question : What is the reason for people to doubt the existence of UFOS to such a high degree?

ELIAS : ASHTAR SHERAN gave you the answer to this:

- *You are being lied to on a daily basis by your fellow men who pretend to be your trustworthy leaders. This is where your mistrust comes from.*

Objection : This UFO MISSION reaches way back to the handing over of the LEGISLATION on Mount Sinai. The SANTINER have however not been successful in introducing world peace here on Earth during the past millennia.

ELIAS : The SANTINER would dearly like to establish an extraterrestrial *protectorate* on this Earth in order to force mankind to change to the way they are. But this may not be. GOD decided that *no coercion* was to be applied to this Earth. The last decision is with HIM.

Question : ARGUN once told us that it doesn't harm unruly, unteachable children to be physically chastised. Would this not be a suitable means to apply to adult human beings?

ELIAS : The SANTINER are *not* your teachers in the *same sense* as your teachers at school are. GOD does however continuously rap you over your knuckles. But you are not aware that it is HE that warns you. There are such a lot of opportunities for GOD if HE *wanted* to punish you, like earthquakes, cyclones and other global catastrophes.

Question : Is it possible to capture a SANTINER? He would make an extraordinary study subject.

ELIAS : I do not believe that this can be done. A SANTINER will not allow himself to be caught in such a situation. Looking at your own attitude towards suicide, something we do not propagate, a SANTINER would *destroy himself* if the danger existed that he could end up in captivity. A UFO would dissolve into nothingness. But I have *never ever* heard of such a case, because UFOS can switch to *anti-matter* and thereby disappear *in an instant*.

If one side or another should assert that one captured a SANTINER, you are *dealing with a lie*. The moment an extraterrestrial spaceship creates a magnetic force-field around itself it becomes unassailably secure. One often talks about *dematerialisation*. This word is however not applicable, because we are dealing with the *process of switching to anti-matter*, a process that does not constitute dematerialisation.

It is important for the world to have more people convinced about the existence of extraterrestrial spaceships. The chaff will have to be separated from the wheat first. I mean to say that the fantasies of certain writers have to be separated from the truth.

February 1970

Question : We received the following request for an answer: “Are the SANTINER actually allowed

to despise anyone? The brochure “Via Terra” states: “Such behaviourism can only find our complete contempt.”

AREDOS : The SANTINER certainly do not show contempt for people, ergo *no individuals*. They justifiably despise the incredibly negative behaviourism of *a lot* of people. This is the major difference!

March 1970

Question : It was asserted that UFOS established bases on our terrestrial Moon. But our astronauts did not see such facilities. Is there any truth in this?

ELIAS : *The Moon was indeed an important base for extraterrestrials. But as we mentioned before, the Moon was evacuated for strategic reasons. There are some hangars there in spite of this, but they are camouflaged very well.*

Question : Is the interest in UFOS greater in the USA than here in Germany?

ELIAS : *Absolutely!* There are lots of magazines in the USA in this direction and they are available at all kiosks. These magazines have a fantastic presentation and motivate people to contemplate things. The population there has the opportunity to observe UFOS *more often* than here in Germany.

Question : What is the reason that a country of researchers and poets like Germany shows so little interest?

ELIAS : German researchers are very critical, but also *very prejudiced* and *quickly prepared to express preconceptions*. But the greatest mistake they make is: The German scientist regards himself *smarter* than all other nationalities.

Question : A UFO was also sighted and photographed in Grunewald, Berlin. This object was also called into question. But one would find it more difficult to dispute their existence if they would fly somewhat lower. Or?

ELIAS : The SANTINER are no longer interested in showing something special. They know all too well that any attempt would only be talked out of existence by so-called “*experts*”.

- *If the SANTINER wanted to be more demonstrative you would find that this could get to be very dangerous, not to say catastrophic, for a city like Berlin. This is something the SANTINER want to avoid. This is the reason why they prefer deserted regions where the least amount of damage can occur.*

July 1970

Question : We get the impression that we can no longer extricate ourselves from the strained situation here on Earth without your help. What can we do?

ARGUN : Your assignment consists in that you continue to point out the consequences. The SANTINER are also devastated. *This is where the support will come from.*

June 1971

Question : Friends in *France* would like to hear *even more* about ASHTAR SHERAN. Can you help us here?

ELIAS : Enough has been said about ASHTAR SHERAN. There is nothing else to add. We can however not prevent all the other things people *invent* about him. ASHTAR SHERAN has turned into one of the greatest mystical figures of our time, his nimbus grows from day to day.

Question : We were asked whether we might be dealing with the return of JESUS CHRIST.

ELIAS : You already know the truth: There are *more* REDEEMERS than just the one. Everybody naturally thinks the things that *suit them best*. But a TEACHER is *not* a REDEEMER for as long as his DOCTRINES as a REDEEMER are not noticed.

CHRIST performed a lot of miracles that were unfortunately not recorded. CHRIST is *supposed* to have performed miracles that were recorded even though they only took place in people's *fantasy*. You are familiar with these evidence accounts. If one had *not* turned him into a mystical figure, nobody would talk about him these days. This does however help to retain his esteem.

- *CHRIST is one of GOD'S REPRESENTATIVES just the same and I can reveal to you that he is not identical to the SANTINER ASHTAR SHERAN.*

Are you satisfied?

It does however no harm to assume lots of things. ASHTAR SHERAN is a COSMIC TEACHER. He is in the process of ridding terrestrial mankind from aberrations and of enlightening it.

July 1971

Question : The astronauts are supposed to have seen flashes of light with their eyes closed during their trip to the Moon. Can you tell us what they were dealing with?

ELIAS : They were dealing with *cosmic particles that had an impact on their retina*. But these astronauts *also saw UFOS* that accompanied them during their journey in spite of this.

Question : Can these flashes of light have an effect on their health?

ELIAS : This is pretty certain, because terrestrial spaceships are *not yet radiation proof*. Therein lays the danger for the astronauts.

Question : Can this also lead to other illnesses?

ELIAS : It can lead to hallucinations, an *optic echo* for instance, that is to say, the astronauts will perceive light apparitions later on that other people *cannot* see. We do not know what else can arise from this.

Question : Are the astronauts clear about the fact that they have seen UFOS?

ELIAS : Not everything the astronauts know may reach the public. There is a taboo in place for all such news. The astronauts naturally make their own deliberations about this.

September 1971

Question : The authorities released an order that states that all materials stemming from the cosmos must be confiscated. Do they expect the possibility of extraterrestrial interferences?

ELIAS : Yes. This actually makes them admit that they *know* about these things. These extraterrestrials with their legions are a “*Space-watch*” ensuring that terrestrial man does not attack the universe.

- *These extraterrestrials are however authorised, in case the self-destruction of terrestrial mankind and the whole planet is eminent, to swart any such attempt.*

The main assignment of the SANTINER presently consists in the *preparation of improved thought processes*. This in turn gives you a not to be underestimated role as *procurers of these indoctrinations*.

Question : For how much longer will this go on, namely that governments avoid, respectively not openly admit the UFO problem, ergo that they are of extraterrestrial origin?

ELIAS : If they want to remain in power, they can actually do nothing else but *deny* the existence of UFOS. Just how long this will continue depends on how things develop, that is to say, whether they will aggravate the situation.

You have little patience. – Time is relative.

I will *explain the relativity of time* to you with an example: The evolutionary process throughout the universe, the rise and fall of stars, is an infinite process. The multitude of objects is enormous, like sand on the shore. Everything is timeless, volatile and in rapid motion. Stars are almost stationary as far as you are concerned. But everything is in unrest, like the surge of the seas.

Man, through the grace of GOD, has been wrenched from this whirl to find shelter on this Earth. An artful trick allows man to experience these enormous cosmic events like an instant photo. One thousandth of a second and a projectile seems to stand still. People no longer perceive the surge.

People want to apply a cosmic time scale to this *apparent* standstill, ergo a fraction of a second wherein human beings live *one* life of *many* lives on an Earth that, from a cosmic point of view, flares up and burns itself out within that time frame. Everything is supposed to happen *even faster*. Man’s impatience is beyond a logical explanation. – I only wanted to give you an idea about what time looks like to *us*. It is completely different for you.

Question : We try to adapt to cosmic thought processes, but chaotic circumstances forbiddingly increase, therefore our misgivings. Are these misgivings justified?

ELIAS : No.

- *Let us assume that the SANTINER establish an extraterrestrial protectorate here on Earth with the result that the situation would instantly change. The spiritual development and particularly the redemption process would however not continue, because everything would be affected by coercion and fear.*

The SANTINER are still contemplating the possibility of effecting the redemption process through *different* means.

- *The BATTLE of ARMAGEDDON would be lost and GOD'S antagonist could claim victory over planet Earth if no redemptions would take place.*

All spiritual endeavours would come to nothing. All the many hours spent here in this circle would also have been futile.

- *It isn't all about the redemption of the whole terrestrial human race, because that is completely impossible. It is about the redemption of a minority that can then assume leadership.*

An extraterrestrial space flotilla stands at our side in order to provide the WORLD of SPIRIT with *physical* support.

- *What happens here on this Earth is an object lesson for those inhabited planets that are not as developed as the planet of the SANTINER.*

November 1971

Question : According to a TASS communication, the Soviets want to send radio and television signals into space. One assumes that extraterrestrial intelligences might intercept these broadcasts. What do you make of these attempts?

ELIAS : It's at least some *progress* in the way they think. One thereby admits that there must be human creatures out there in space.

- *Extraterrestrials hardly utilise developments that are based on electrical waves, because they are much too low for their purposes. They therefore adjusted their development towards telepathy and they have been very successful in this endeavour.*
- *Electromagnetic energies forfeit a lot of energy across vast distances. There are no such losses with telepathy. Telepathic waves bridge any distance, penetrate all obstacles and forfeit no energy in the process.*

Electro-magnetic waves are very proficient in the *terrestrial* region, but not when dealing with *great* distances. But *laser light* can become very important in the future.

- *Laser light can also be utilised as a prime mover for spaceships. The pressure of light also plays a role with extraterrestrials. When I talk about laser light I naturally mean blue rays.*

The SANTINER are very experienced in respect to bundled rays. They can even *bundle thoughts* to then send them in any direction. Sound waves can also be bundled. The SANTINER also utilise bundled x-rays.

Question : What can happen when sound waves are bundled?

ELIAS : The kind of device the SANTINER possess can burst a planet apart. All major inventions represent a *double-edged sword*. It depends on *how one utilises them*. And another thing:

- *Teleportation, ergo the transmission of physical matter is unthinkable without a laser effect. The arbitrarily separated atoms may not be lost in space. These atoms must travel undisturbed in a bundled beam. The spirit can give these atoms a direction, because the spirit rates higher than physical matter.*

One has naturally already undertaken experiments with laser beams in order to have a weapon in one's hands. One can burn a person's garments from its body at a distance of 1,500m with a laser gun. The SANTINER on the other hand possess apparatuses that cannot be explained with your vocabulary.

Question : Is it true that the spaceships of the SANTINER that we see emanate enough heat to burn grass here on Earth?

ELIAS : *Yes, that is correct.* These extraterrestrial disks often radiate *great heat*. This is due to the atoms that are accelerated to such a high degree.

- *You must bear in mind that that the shell of UFOS is not constructed. It develops the way crystals come into being. These UFOS are cast in an enormous mould. A substance is prepared that contains the relevant information. The hull of UFOS shapes itself through crystallisation once this programming is completed.*

The SANTINER hold sway over the subject of information. They can give *physical matter a code* so that it behaves this way or that way. This allows a lot of things to develop of their own accord. What is important however is that one *knows the key to information*. The SANTINER are ahead of you in this respect by a number of millennia.

Question : Is it true that fish are drawn to the water's surface when a UFO flies over it?

AREDOS : *Yes, that's correct.* UFOS exercise a kind of "magnetic force" so that suchlike creatures are drawn to the water's surface. The Bible mentions such an event. CHRIST was aware of the force of extraterrestrial spaceships. He saw UFOS in flight and indicated to fishermen where fish were going to be drawn to the surface.

Question : There are a number of cases where it virtually rained small aquatic creatures. Are these phenomena tied to UFOS?

AREDOS : That is true, where else would they come from? This kind of magic does not exist.

Objection : We cannot comprehend that one still attempts to deny the existence of UFOS these days faced with all this evidence.

AREDOS : There also exists *completely different* evidence and it is doggedly disputed, because it *does not fit the concept* of the powerful. The Churches are also part of this; they defend their dogmas.

Question : Why do extraterrestrials not appear *more conspicuously* in order to verify their existence?

AREDOS : This question is based on purely *terrestrial* thought processes. The SANTINER undertake *nothing* that could trigger a panic on Earth. They do however fly in sufficient numbers in spite of this and have been doing this for years. A lot of scientists will gradually become aware of this.

- *If a redemption for Earth is at all possible, it can only come from the SANTINER.*

Objection : A lot of people *make fun* of UFOS, because we call them “flying saucers”.

AREDOS : One could not find a *dumber* name for extraterrestrial flying objects than to use the comparative term of “flying saucers”. Taking the eminent importance of this MISSION by the SANTINER into account, one can clearly see that EVIL lies in wait in order to *mock* this divine ASSIGNMENT. EVIL does indeed work intelligently – but *hastily*.

- *Where a direct attack on goodness does not suffice, one blasphemes and derides instead.*

As people do not like to be seen as dumb, they immediately react to such scornfulness, because propaganda tells them that UFOS are *figments of their imagination*. One applies the same measures to the hereafter and to otherworldly BEARERS of THOUGHTS. Those that believe in an afterlife are branded dumb. The success of this method is abnormally great. Psychic connections are thought off as *gross nonsense*. The SANTINER naturally possess magic powers that you are not aware of and this makes the whole subject inexplicable to you. But things will gradually change in this respect also.

- *When people talk about “the end of times”, they can only mean the end to ignorance – and never the end of this world of yours.*

Question : There is presently a series about UFOS on television that depicts extraterrestrials as people’s *enemies*. Why is an important problem like this always depicted so negatively?

AREDOS : GOD’S ANTAGONIST sees a *great danger for his intentions* in the MISSION of the SANTINER. He *suggest* and *inspires* all that are involved in this wherever he can. The dialogue of this series has been *formulated* by a well-known space-technology expert. This famous professor of renown and name would however like to remain anonymous. This shows how they fear the public, particularly when it is about the truth.

Objection : Because the distances involved are *too great*, one continues to assert that most scientists reject the UFO problem, as they regard it an *impossibility* that extraterrestrial spaceships could come to our Earth. All our endeavours and our understanding fails to leap that hurdle.

AREDOS : This opinion naturally also exists. But there a numerous scientists that are *already willing to admit* that velocities *must* exist in the universe that are *much faster* than the speed of light. These scientists would however also like to keep their opinion anonymous, because they fear the mockery of their colleagues.

But this ice will also gradually melt away and the truth will see the light of day. Professors and pundits do not simply say “balderdash”, they rather use more selected words like saying that the sciences are still confronted by an unsolved mystery. The greatest problems for the dissemination of the truth is a *financial* one.

December 1971

Question : We were once told that an *encounter* between terrestrial human beings and extraterrestrial human beings would take place in space. This point in time was supposed to be the time when terrestrial man steps onto the Moon. Is there any truth to this?

ELIAS : Nothing has changed so far in this respect. An encounter *is intended*. But the SANTINER do not want to this encounter to be *with only one nation*. They will therefore wait until a spaceship offers the opportunity for *a number* of nations to experience this encounter simultaneously. This has its very specific reasons.

February 1972

Question : Spaceships must have been very active during biblical times. One still sees these kind of spaceships nowadays, but their inhabitants do not proclaim any important activities. Why is this so?

ELIAS : This has a very specific reason. The activities of these spaceships was then due to a completely different MISSION. The demonstrations by these spaceships was an *intervention* to benefit mankind – but it failed. The next *intervention* is therefore still ahead of us.

Question : Is there a reason for the delay of this *intervention* by the SANTINER?

ELIAS : Yes. It would constitute an interference in the fermentation process terrestrial mankind finds itself in. Besides, the BATTLE of ARMAGEDDON still rages. The spirits already separate themselves from one another: *Good and evil people form two opposing camps*.

An immediate interference by the SANTINER would result in lots of people being able *to hide* their true feelings. One should even be able to clearly recognise with a mass of people *who* is good and *who* is evil. One can already establish relatively clearly where people actually stand.

Question : People in biblical times were not as powerful as they are these days. Could terrestrial mankind possibly represent a great danger to extraterrestrials now?

ELIAS : No, not directly. But people in biblical times regarded extraterrestrials as “*Gods*” and as “*angels*”. They therefore showed *more* respect, whilst this is no longer the case these days. One now rather believes in *monsters* from other stars. But ANGELS were GOD’S MESSENGERS and one did not expect anything evil from them. One was rather more

inclined to accept the doctrines of the SANTINER.

One is absolutely not prepared to see the SANTINER as GOD'S MESSENGERS these days. One no longer believes in GOD or ANGELS or GOD'S MESSENGERS. The SANTINER were absolutely happy to be seen as ANGELS, because it lend support to their MISSION. They are *at best* just astronauts these days.

April 1972

Question : Was the "*Phenomenon of Fatima*" a divine miracle or an extraterrestrial demonstration?

AREDOS : The "*Miracle of Fatima*" was a divine miracle.

- *The SANTINER did not instigate it of their own volition, it took place under orders from MARY. Its major purpose lay in the psychic sector.*

Question : We heard that we were dealing with a miracle of the SANTINER who sent a spaceship down to Earth. What is correct?

AREDOS : The SANTINER only played a modest role, something they have done quite often with such events. The SANTINER did however make this miracle *visible for all and sundry*. You should therefore not confuse the things that happen from a divine source with those that happen through the own initiative of the SANTINER.

- *CHRIST was a SANTINER. He stems from the development within the solar system called Alpha Centauri.*

Question : (The following question was put at our séance in December 1959 and published in the Menetekel brochure in January 1960.) It is asserted that a Brazilian contactee published a book that contains accurate details of the *propulsion system* of UFOS. This book is supposed to have ended up in the hands of Soviet scientists who utilised its content. Is this true?

ARGUN : The Soviet Union is an expert in regards to the development of spaceship technology, but not because of such books. We know for certain that the Soviet Union is an expert in the fields of space technology, research, medicine and the arts. Those that doubt this are beyond help. This is the reason why *the mystery of the realm of the spirit will also be scientifically revealed* to the Soviet Union.

- *The philosophy of the Soviet Union's leadership is negative – and this is a dangerous worm that has to be removed absolutely. This is the only way the "apple" becomes palatable; it must be cut to pieces because it will otherwise spread all over the world. This worm must be ruthlessly removed, GOD will grasp it and remove it so that no trace is left behind.*

The SANTINER, that heavenly police force you are familiar with, are destined to carry out this operation. This operation will be carried out along terrestrial scientific insights with the *telepathic* and *suggestive* support by the SANTINER. A start has already been made. – Two researchers from the USA have already been awarded the Nobel Prize for lifting the veil from the *mystery of anti-matter*. We are dealing with the substance the

realm of the spirit utilises for its construction and the immortality of intelligence, ergo building blocks of the spirit.

July 1972

Question : We heard from somewhere that a UNIVERSAL BROTHERHOOD is supposed to exist between various planets. Is this designed to have humanities from other planets follow a common path UPWARDS?

ELIAS : Communications between planets, respectively between human beings is of great importance. They are then able to exchange their different experiences.

October 1972

Question : There are hundreds of thousands all over the world that believe in the MISSION of UFOS. Most of these people however believe that UFOS will perform a *tribunal* here on Earth. All of them become impatient, because the tribunal is not forthcoming. What do you say to that?

AREDOS : That's correct, but all of these people have been *influenced* by the prophesies contained in the Bible. They believe that an apocalypse *must* come, because such a lot of things go awry here on Earth. UFO flyovers have nothing to do with an apocalypse. This catastrophe will only eventuate if they are powerfully attacked by terrestrial mankind; this however is something they absolutely want to avoid. The SANTINER are *very tolerant*. Extraterrestrials dip into all peaceful means in order to enlighten mankind. What these people are hoping for, namely to see their revenge fulfilled, will hopefully not eventuate.

I told you once before that one should *not* depend on the Bible; it is not correct in all its statements, it has been falsely interpreted and it is virtually outdated. Apart from its UFO messages there is hardly anything else to replace it.

Comment: There is no better information about the MISSION of UFOS available than the three brochures "*Cosmic Giants*". These ASHTAR SHERAN – brochures were sent to members of governments throughout the world. They were also sent to universities, chief editors, UFO experts and religious control centres. We help the SANTINER!

December 1972

Question : Does UFO research actually make progress?

ARGUN : The progress made consists in the fact that people's *open-mindedness is increasing*. The assumption that one is dealing with fantasy gradually disappears. One is also generally aware these days that planet Earth might not be the only inhabited planet. The powerful on this Earth are naturally against such a truth, because their conscience is not clear.

Question : Is the damage the rejection of UFOS causes very considerable?

ARGUN : The damage the abuse of ufology causes *is* considerable. A lot of things are *made up*. This makes the truth lose credibility. When people believe in something with all their heart and then find out that they believed in a lie it becomes infinitely more difficult to convince them that something else is true. This is *particularly the case* with religious

beliefs, because their most sacred feelings are hurt in the process.

January 1973

Question : The future of planet Earth probably depends on UFOS. Governments all across the world however behave *as if they were no longer interested in the UFO problem at all*. They do however know that they are *very well* informed, even if they are not prepared to admit it. How do you assess the situation?

ELIAS : The world at large believes that the SANTINER must stage major demonstration flights in order to draw the attention of governments to UFOS. But this is a fallacy. *Psychological* interests occupy the SANTINER first and foremost. They try over again to encourage people's willingness for closer contact through selective messages.

Demonstration flights are a part of their program. They are regarded as an alternative to a non-functioning program. UFO contacts must be established on the *broadest* possible basis in order to guide this Earth along the right tracks so that trust and acceptance can be achieved.

The establishment of an extraterrestrial *protectorate* is last on the program. A protectorate is *not aimed for*, it is only seen as an indispensable possibility.

Planet Earth can be affiliated with the INTERPLANETARY BROTHERHOOD if the mission of the SANTINER succeeds. But planet Earth will under certain circumstances have to wait for further development for millennia if this missions fails.

If order can be established on Earth, the knowledge Earth gained from this can be of importance to a number of other planets. This order is imperative, because it represents the opposite of chaos. Religion must however also experience order. This is something the SANTINER also intent to do. Order is one of life's principles and it occupies the *highest* rank for all life.

The most important discoveries and inventions are those that are *timeless*. These things can be of major importance to *other* humanities also. It can be a case where they fit into their plan of development like a piece of mosaic. This is why the integration of planet Earth into this BROTHERHOOD is extremely important.

These are things that have to be made comprehensible to terrestrial leaders. Spiritual knowledge in itself is of *enormous importance*, because it can completely change the whole human race.

The exchange of thoughts and ideas between different planets *is possible*, but *not* the way one imagines it. At least *not* based on radio telegraphy.

Creation *has not yet been completed*; it will still take eons to do so. Terrestrial people have unfortunately no inkling of universal creation, rather only of creation here on Earth. Communication between planets can produce great insights.

- *This is something GOD'S ANTAGONIST wants to prevent absolutely. This is why he looks for instruments that turn against the SANTINER and against UFOS everywhere.*

A forcefully introduced peace has no chance of bearing fruit. The message of salvation proclaimed by CHRIST was a message from the SANTINER. Today's message for salvation of the SANTINER is also:

PEACE on EARTH!

Question : What type of communication between planets will be successful?

ELIAS : Naturally *only telepathy*. There are *no* obstacles in the way of thoughts, neither spatial nor temporal. Thoughts can be *technically amplified* – but they can also be *conserved*. This is of course a technical development that is still an alien concept to you.

Question : Thoughts must indeed be *stored*, because people could otherwise remember nothing. What can you tell us about this?

ELIAS : *The human brain is a relay, one that makes the interrelationship between spirit and body possible*. This fact is *wrongly* recognised by your sciences. *Only 10 percent* of the brain's capacity, as a relay, is utilised anyway. But the brain has been prefabricated by Mother Nature to a degree where it is already capable of enormous feats. But human beings must accept that they do *not live just the once* here on Earth and that they *survive death* with all their memories intact.

An ocean of insights and inventions still awaits mankind. There is practically no limit to the development of human beings. Human beings only make the mistake of continuously *interfering* and intermittently *arresting* their development.

One has finally reached the point where one takes ESP factors *into consideration*, something that has not been the case at all up to now. The disadvantage at the moment consists in the fact that the general public *knows too little* about it and this is why the masses still assess things according to old prejudices and dogmas.

There is a large difference between something that is thought of, written or spoken. This is why the conserved thoughts one can buy are something very special. The written word cannot express feelings the way recorded thoughts can remember them. The SANTINER *developed this extremely well* and this is why they are masters in this field.

March 1973

Question : There is a so-called “triangle” near the *Bermuda Islands*, a zone where a lot of ships and planes have disappeared without trace for many years. Can you tell us something about these mysterious events?

ELIAS : We are *not* dealing with abductions from space. UFOS have *nothing* to do with it. It has indeed happened that a plane in this zone was taken by a UFO, but only because it was in danger of having an accident.

- *But planes can certainly crash and ships can certainly sink in this zone, because it is a highly magnetic zone. A change in gravity sometimes takes place there with a catastrophic result. Sub-oceanic cliffs cause also dangerous currents.*

There are a *number* of points on Earth where magnetic fields interfere with navigation. These changes appear *periodically*. Sub-oceanic iron deposits can emit radiations. *One should keep away from the Bermuda Triangle.*

UFOS are very careful when they fly over land because they could leave traces of radiation behind can still represent a danger years after. Technical equipment under the flyover path could fail.

Question : Can UFOS *trigger* catastrophes when they fly across the planet?

ELIAS : *This is possible*, but it is *not* intended by the SANTINER. Anti-gravity and changes to gravity can influence or even change physical matter on Earth. It can happen that radiation caused by UFOS is still present a 1,000 years later. All of this is tied to their incredible speed; it does have natural consequences. A low flight over the ground requires specific measures, but they do not always suffice.

- *The SANTINER do not want to be seen as your enemies and therefore avoid unnecessary confrontations. This is why they select very isolated areas for their landings.*

April 1973

Question : More and more UFOS are sighted. They mainly fly over North and South America. But one still derides the speed they are travelling. One cannot imagine that they can fly faster than the speed of light. What do you say to that?

ARGUN : People believe that only small objects come to you. This is however a mistake!

- *Objects of enormous dimensions also come to Earth. But these flying objects can never travel through the air at their top speed. You wouldn't be able to see them in the first place, because your eyes could not follow them and its top speed would not bode you well either. The Earth's gravity would change and people would lose their balance.*

Scientists have no idea about the things UFOS could get up to here on Earth. This however doesn't mean that they are your enemies by a long shot. *You* on the other hand behave as if you were theirs.

May 1973

Question : One still argues about whether planet Mars is inhabited. Can you tell us something about it?

ARGUN : The SANTINER established a base there.

- *Aboriginal Martians do not exist.*
- *The moons of Mars are captured celestial bodies that were brought into Mars's orbit.*

Question : What does this mean? These celestial bodies are gigantic.

ELIAS : Yes, that's correct. But the SANTINER possess large motherships. The powerful magnetic force of these flying objects can tow such celestial bodies from place to place.

- *These so-called moons have been fitted out as support bases. These are the UFO'S closest bases to Earth.*

June 1973

Question : Why do UFOS fly over South America *more often* than anywhere else?

AREDOS : Flyovers by extraterrestrials take place *everywhere*. Sightings in South America are however *better observed* and *registered* by the population there. But higher authorities there are also more impressed.

Question : Are there UFOS manned by *negative* beings?

AREDOS : There are naturally negative humanities out there in the universe capable of undertaking journeys through space.

- *The SANTINER that visit you are a kind of "SPACE POLICE". These extraterrestrials do not allow UFOS to come to Earth, if they are of a negative nature.*

You therefore do not have to fear hostilities from UFOS, you can expect only FRIENDSHIP. If the word negativity should enter the conversation, you only have to think of *yourselves*, because you do represent a serious danger to UFO occupants. Your behaviourism *complicates* the desired extraterrestrial attempts to establish a FRIENDSHIP with you.

August 1973

Question : In a report by *Adamski*, one that he personally signed, it literally states that:

"The brothers from other stars are not interested in terrestrial politics and also not in religion."

This assertion does not harmonise in any way with the messages from ASHTAR SHERAN. How is this possible?

ARGUN : This opinion is a *personal comment* by *Adamski*. It is certainly not the opinion of the extraterrestrials! *Adamski* hereby expresses a *very negative* and *atheistic* attitude. The SANTINER tried millennia ago to communicate a solid, objective faith in GOD.

- *All we can say is that the base world of the hereafter musters all its reserves to prevent the indoctrinations of the SANTINER to get a foothold. The SANTINER are an incredible help to you!*

Question : Can you tell us why there are *hardly any direct contacts* with the SANTINER? This does not help to secure people's faith in the SANTINER.

ELIAS : There *are* direct contacts! There are cases where the SANTINER met up with terrestrial people by standing with them face to face. But if this happens only rarely and under

specific circumstances that are seen as mysterious most of the time, you'll find that this is *intentional*, because the SANTINER require a *nimbus* for their MISSION. This mythos will one day play an enormous role in your global religion. The SANTINER do not want to be seen as too human, because they might otherwise lose the respect of terrestrial human beings. This was already the case many years ago. They already placed great importance to being seen as Gods in biblical times.

Question : What are the SANTINER really? Are they angels or similar beings?

ELIAS : They are divine MESSENGERS and a kind of "COSMIC POLICE". People do however like to glorify things and they get very excitable sometimes. They do so in regards to either good things or evil things and if people get an opportunity, they will take it.

- *The moment people believe that somebody stands way above them, they can become incredibly excitable – fanatical in fact.*

Question : Are the SANTINER therefore different from the way we see them?

ELIAS : Their MISSION is to provide DIVINE HELP, because they convey the *truth, knowledge* and *belief* to you.

Question : *Eric von Däniken* tried to strengthen people's belief in extraterrestrials. He neither damaged their nimbus nor their mythos in the process. Or?

ELIAS : *Indeed!* – He did *not* do the mission of the extraterrestrials *any favours*. He portrayed extraterrestrials as *inquisitive astronauts*, respectively space travellers, one erroneously regarded as Gods. I advise you not to copy this because we are *not* dealing with some kind of mythos here, but with a *genuine* mythos the SANTINER need, because the knowledge about GOD and about his PLAN takes priority.

- *The voice of the SANTINER is GOD'S VOICE and it has more meaning than CHRIST'S words.* – This is why Jesus said: "*The son of man will come from the clouds after I am gone.*"

A true faith in GOD would *not be secured by a long shot*, if the SANTINER would land in great masses. Even if peace would reign, a spiritual pole reversal would *not* have been performed. One would say: "Well, these are people with an advanced development – but they are *only* people after all". One does not like to be told things by other people and being commanded to do something even less so.

But the mythos, the mysterious, the superiority of the SANTINER counts, because it is based on facts, even if you find it difficult to comprehend this. The SANTINER are your archetype in regards to how people *can* be like if their development has reached a state that makes them the *equal of angels*.

The SANTINER are *genuine* MESSENGERS of GOD and they want to be regarded as such. The SANTINER are human beings from another planet; but they possess genuine insights and they are spiritually highly evolved. Besides, they are also of a *very ethereal nature* and *highly sensitive*. They are able to maintain contact with the WORLD of the SPIRIT with the help of their excellent technology and this enables them to carry out

their ASSIGNMENTS for these SPHERES. They are therefore GOD'S HELPERS sent to Earth.

Question : How can we make it plausibly clear to terrestrial people that the SANTINER act in GOD'S NAME?

ELIAS : There are an incredible number of people here on Earth that longingly wait for GOD to undertake something to save this Earth. This already represents a point of entry for the messages from the SANTINER. The hope for divine HELP increased ever since UFOS *visibly* appeared in 1947. Terrestrial mankind was able to make *hundreds of thousands* of sightings in these few years.

(Comment: Due to the fact that religion plays such a major role, the SANTINER are of immense importance to planet Earth. They demonstrably brought their *theistic beliefs* and they tried to consolidate them here. If we want the support the MISSION of the SANTINER, we have to *promote* the dissemination of their MESSAGES. We have endeavoured with all our might to fulfil this ASSIGNMENT for more than 20 years. We thank all interested parties who help us provide this service.)

An ASHTAR SHERAN – message from *December 1958* to complement this:

“Your mythology reports: ‘The Gods descended’. This is not an invented narration, but in some respect the truth. Our forefathers already visited your Earth. They came to Earth in *spaceships* and *flying orbs*. Mankind on this planet thought they were Gods and expected either help or punishment. One still expects help or punishment from the heights of the firmament. Would one expect help or punishment if everything was in best order?”

January 1974

Question : UFOS are sighted over again for many years. The occupants of UFOS are sometimes described as ugly and monster-like. What can you tell us about this?

AREDOS: Extraterrestrials are *beautiful*, there is no doubt about it, because they were regarded as angels and gods in the past. You must consider that these people travel through space with the help of a formidable technology tied to the most enormous scientific insights. This colossal intelligence can never stem from monstrous creatures. *This is pure nonsense!*

Question : Does this mean that these descriptions of ugly extraterrestrials are untrue?

AREDOS: They are pure *fantasies* and they developed from all those science-fiction descriptions.

Question : How should one apply one's assessment?

AREDOS: *The uglier* these extraterrestrials are described, the more assured one can assume that one is dealing with the *sensation seeking effect of gruesomeness*.

- *But when extraterrestrials are portrait as interesting and harmonious, the likelihood of a sighting increases.*

Extraterrestrials naturally represent an exotic race. We are dealing with a race that does not exist on Earth. But they fit in with your concept of what is *beautiful* just

the same; the way you find great beauties amongst the coloured races.

Question : But so-called UFO experts still assert that *negative* extraterrestrials visit us too. Are there indeed negative extraterrestrials that visit us with evil intent?

AREDOS : *Negative* extraterrestrials do exist, but they are *not ugly* in spite of this. Such creatures visited the Earth in earlier epochs.

- *But ever since the SANTINER from the star system of Alpha Centauri observe and keep watch over Earth, negative extraterrestrials can no longer land on Earth.*

Question : Can it happen that UFOS are piloted by negative extraterrestrials when we are dealing with flying objects that are identified as “*new types*”, that is to say, that do *not* conform with the *usual* shapes?

AREDOS : That is possible.

- *A mothership as carrier must always be present with every UFO visit. The actual UFOS are only companion craft.*

May 1974

Question : One often mentions the *ethereal nature* of extraterrestrials. How are we to understand this?

ARGUN : *Ethereal means that physical matter is less dense. This particularly applies to the flesh and blood of the SANTINER. They are able to dematerialise and rematerialize.*

Terrestrial science is however completely inexperienced in this respect; this is why you cannot comprehend these things. But the things people do not comprehend are dismissed as “*impossible*”.
