Protocol extracts from the *Menetekel* brochures of 1956 - 1975

Theme : **DNA INFORMATION**

Questioners : Medialer Friedenskreis Berlin (Psychic Peace Circle, Berlin)  
 Mediums : Uwe Speer (17) and Monika-Manuela Speer (15)  
 MESSENGERS of LIGHT : AREDOS, ARGUN, ELIAS

The Medialen Friedenskreis Berlin, a Christian/Spiritual community, psychically received the texts to this theme between the years of 1956 to 1975. These transmissions are a part of the *Menetekel*, a collection of 4,500 A4 pages of freshly catalogued protocols, amassed over 20 years. All of these mediumistic messages were left in their original form, even if similar questions were repeated. The work of the two mediums began when they were 15 and respectively 17 years old. The total production of the MFK-Berlin (Medialer Friedenskreis Berlin), the *Menetekel* and the 21 transmissions from the space-brothers are considered the absolute pinnacle of psycho-scientific research. Other spiritual circles have often tried to copy the work of the MFK, but its quality was never achieved. The reproduction and distribution of these rearranged messages and protocols is *explicitly encouraged* and is not covered by any copyright.

---

## Preface by the publisher

The detection of DNA<sup>1</sup>, the chemical makeup of genetic material is one of the greatest discoveries of the 20<sup>th</sup> Century. One was able to verify that certain chemical substances in dead bacteria can be absorbed by living bacteria, whereby their pathogenic effect is transferred and inherited! One identified the chemical substance as *deoxyribonucleic acid*, shortened to DNA. DNA is the bearer of genetic information. One realised in 1953 that DNA looked like a rope ladder and due to its spiral form was called a *double helix*. The strands of the ladder alternatively consist of sugar molecules (desoxy-ribose) and phosphate groups, whilst the rungs are created by two nitrogen bases. A DNA section, with about 1,000 base proeses, is responsible for the characteristic of an attribute and it forms a genetic unit (*gen*). The

---

<sup>1</sup> **Deoxyribonucleic acid (DNA):** Is a nucleic acid that contains the genetic instructions used in the development and functioning of all known living organisms and some viruses. The main role of DNA molecules is the long-term storage of information. DNA is often compared to a set of blueprints, like a recipe or a code, since it contains the instructions needed to construct other components of cells, such as proteins and RNA molecules. The DNA segments that carry this genetic information are called genes, but other DNA sequences have structural purposes, or are involved in regulating the use of this genetic information.

Chemically, DNA consists of two long polymers of simple units called nucleotides, with backbones made of sugars and phosphate groups joined by ester bonds. These two strands run in opposite directions to each other and are therefore anti-parallel. Attached to each sugar is one of four types of molecules called bases. It is the sequence of these four bases along the backbone that encodes information. This information is read using the genetic code, which specifies the sequence of the amino acids within proteins. The code is read by copying stretches of DNA into the related nucleic acid RNA, in a process called transcription.

Within cells, DNA is organized into long structures called chromosomes. These chromosomes are duplicated before cells divide, in a process called DNA replication. Eukaryotic organisms (animals, plants, fungi, and protists) store most of their DNA inside the cell nucleus and some of their DNA in organelles, such as mitochondria or chloroplasts.<sup>[1]</sup> In contrast, prokaryotes (bacteria and archaea) store their DNA only in the cytoplasm. Within the chromosomes, chromatin proteins such as histones compact and organize DNA. These compact structures guide the interactions between DNA and other proteins, helping control which parts of the DNA are transcribed. (Wikipedia)

sequence of the bases is coded (genetic code) with the production of proteins. The production of proteins is important for the cells of an organism, because they control the cell's metabolism (enzymes).

At a length of *4m of DNA per cell*, the DNA is relatively small: In the form of a double helix, it winds itself a number of times around the protein substructures, which in turn are intertwined into larger *nucleotides*. These nucleotides in turn are intertwined into larger units ending up as *chromosomes*. The 23 pairs of chromosomes of man – one simple set from the mother, one from the father – stows away the complete genetic inheritance within the size of a *five thousandths part of a millimetre*! This infinitesimally small core of every cell contains all genetic information for the development of a human being. The multiplicatively intertwined strands of life of the DNA contain the cipher for the construction of the characteristic of the inherited information. When cells divide, *the entanglement of the strands organises itself* into microscopically visible *chromosomes*, to ensure that the stored genetic information is transferred in its entirety to the nucleuses, thereby handed down to the next generation. Thousands of genes have been analysed during the last few years and their position determined within particular chromosomes. Genes can contain mistakes, they are *mutated* and this can lead to genetic disorders. The triggers for these types of mutations are alcohol, nicotine, medicaments and technical radiation etc. – Man, *the creator* of mutations!

Bad Salzflun, February 1997

## **Preface** (By Herbert Viktor Speer, 1966)

Academic science uses the word “information” these days (1966) to express the assumption that every molecule possesses the ability *to accept, to store* and *to abide* by COMMANDS and INFORMATION, respectively take behavioural measures.

The TEACHERS of the SPIRITUAL WORLD emphasise that molecules and atoms, as well as all cells, *actually* do possess this characteristics.

*If this INFORMATION is however coming from the cosmos, there must, logically speaking, also be a corresponding INFORMER present. It does not present a problem to a spiritually minded person to imagine that this INFORMER is GOD.*

The spiritual world informed us about this process about 10 years ago (1956). The spiritual world used the denotation of “INTUITIVE ENTELECHY” instead of the current denotation of “information”.

These accounts were presented as a gift to the spiritual group called “The Greater World League”, London W11, in 1956 for their 25<sup>th</sup> anniversary.

We provide proof here that the SPIRITUAL WORLD voiced its opinion in regards to this problem at a time, when nobody else on Earth *thought about it*.

## **The INFORMATION (1)** (Author: H. V. Speer, with the support of the spirit guide ARGUN)

*The TRUTH can only be found in GOD, because GOD is the TRUTH and the TRUTH is eternal.*

This insight gives man a reason to believe in goodness and to strive for it. Suffering is *not* within GOD'S plan, but the effect of destructive attacks by base, maleficent intelligences. Suffering is therefore *the result of existing contrasts* and it is proliferated through the *unnatural* behaviourism

of all of Satan's followers.

Everything is still a work in progress, *nothing* has been perfected *yet*, this also includes man. Even GOD is continuously evolving, because HE is involved in everything. The aim is not the perfection of life on planet Earth, because the universe is much too expansive for this assumption. The process of life on Earth represents only a *small partial experiment* of CREATION within the infinite universe, because the Earth will fade away one day.

Physical matter would not exist, if it wasn't endowed with perpetual characteristics, because this perpetual motion keeps everything together. This motion however verifies the existence of a *living* GOD, because GOD has been motion right from the start. The universe represents order, but order comes from directives and these come from GOD:

- *Nothing* can stir and *nothing* can develop *without* directives.
- There is *no* meaningful order *without* directives.
- A directive is a law of nature, because it spring from a WILL. – WILL therefore rates *higher* than the law of nature!
- A directive must be directed at *a goal*, at visible motion in this case, at the expression of life.
- But such a directive assumes RATIONALITY. *Without* specific aims, every directive would be *irrational* and therefore worthless.

Physical matter *cannot* issue orders, they must come from a CONSCIOUSNESS, from an INTELLIGENT SOURCE. Physical matter can only *accept* such orders and react according to its organization.

The same applies to the brain: The body does not guide the spirit, the spirit guides the body. The brain's proteins are arranged in a way that allows them to accommodate the non-physical VIBRATIONS of the spirit so that they can be kind of transformed into subtle electric and magnetic impulses. This enormous fact has so far managed to mystify researchers. They had to assume that all processes of consciousness take place within the brain. The reality is that we are only dealing with a *reproduction* of the spirit within the brain. We can therefore say that:

- *An organism, no matter how structured it is, cannot project an expression of life, if the DIRECTIVE does not come from a rational source. Matter is not endowed with rationality – it only abides by it.*

Biological and medical research into life and living organisms verified that a change within the brain also leads to changed reactions. Damaged sections of the brain cancel or misinterpret certain perceptions and physical activities. This fact also dupes the researcher. The spirit can only become effective in *those sections* of the brain that are *expediently* at its disposal. It can for instance not see anything, if it does not have the required optic at its disposal. The soul changes over to a *non-physical* body after its disembodiment (death) and this then separates from physical matter. In this way the soul has once again all the organs it needs for its conscious existence within the spiritual realm at its disposal.

## The INFORMATION (2)

Science calls the *lawful behaviourism* of cells and molecules, as well as atoms, INFORMATION<sup>2</sup> they received from the universe. The careful examination of this INFORMATION is an excellent opportunity *to verify* the existence of an ingenious CREATOR. Strange and incredible as it may seem, even educated people are reluctant to *acknowledge* a creative GOD. But where does this mysterious INFORMATION come from? This is where one must jog the memory of superficial and repressed thought processes. Even an exceptional computer must be provided with information, because the computer cannot process things without these entries. This is *where man* is the informer who can inform the computer based on his human experiences. The computer then utilises the stored data and provides a result by processing it in a technically masterful manner.

Like a computer, a cell *cannot process*, respectively *react without* INFORMATION. Who or what is the INFORMER here that has the required experience to provide meaningful information? The name given to the INFORMER has no bearing. Important and crucial is the fact that such an extremely *experienced* and *ingenious* INFORMER exists. However before INFORMATION can be passed on to cells, one has to admit that the INFORMER *must be in possession of* the KNOWLEDGE about to be passed on. This irrefutably presupposes a CONSCIOUSNESS. – Without CONSCIOUSNESS - no INFORMER!

We have come to an extremely important point here, one that not even GOD'S worst enemy can ignore if he wants to remain *logical* in his thought processes. If science is *unwilling* to accept this point or tries to attempt to *twist things around* here, it can no longer be taken serious.

- *There is no getting away from the conclusion that the great INFORMER must have a universal CONSCIOUSNESS and this conclusion brings us back to the existence of a living GOD!*

We received further informative explanations from extraterrestrial FRIENDS in the mean time. ASHTAR SHERAN for instance said that this GOD is *not* some kind of human being, but a UNIVERSAL CENTRAL CONSCIOUSNESS! Mankind however is not satisfied by this explanation by a long shot; it wants to delve *even deeper* into the mystery GOD represents. One would like to know *how* the INFORMER *came into being*. We also have the right points of reference in this regards. They are also of significance importance for science, but they require a certain amount of *unbiased* logic.

Throughout the whole universe there has never been NIHIL, NOTHINGNESS, because NOTHINGNESS is already a state, a condition. According to logic, *a* state is already something. At the beginning of time, GOD was a DIVINE STATE. HE represents the greatest CONSCIOUSNESS throughout the universe for all existing worlds. HE is the INFORMER for all of CREATION!

- *Consciousness is an intelligent, cosmic process.*

---

<sup>2</sup> **Genetic information:** The complete set of construction plans for all molecules that can be synthesised within a cell. The physical carrier of the genetic information is the genome, respectively the genetic material (in most cases the double-strands of DNA). Each individual strand already contains the complete genetic information of the molecule; the second strand, being a complimentary strand of the first one, has been completely predetermined by the first one. The identical doubling of the genetic information is the basis of the process of inheritance.

But consciousness *also* presumes a *personal* EGO-CONSCIOUSNESS. GOD, many also say Mother Nature, is therefore the greatest and most perfect EGO-CONSCIOUSNESS, an ingenious MIND that *must not* necessarily be attached to a physical body. All the INFORMATION coming from GOD has such an enormous suggestive effect that it must be abided by. GOD’S antagonist however also confers *contra-suggestions*, which can lead to *disturbances* in the effectuations of GOD’S suggestions. GOD however is always the victorious FORCE.

- *CREATION is WILL put into practice.*

### **The INFORMATION (3)**

Science calls *the behaviourism of cells and molecules*, as well as *the behaviourism* of atoms with all their particles, INFORMATION. It seems logic that this behaviourism is *not* due to the intelligence and recorded experience of the respective parts. This INFORMATION springs from a *different* SOURCE, one that is the determining factor throughout *all* of CREATION.

One must therefore assume that the SOURCE of INFORMATION stems from the CONSCIOUSNESS and the PLANNING of a higher AUTHORITY. It matters not whether this AUTHORITY is called “GOD” or “Mother Nature”. At any rate, this UNIVERSAL SOURCE of INFORMATION can never be a “coincidence”. To even contemplate that this is so, reveals *abysmal ignorance*.

The sciences have recently verified that records of this INFORMATION are present. One is however not quite sure about the INFORMER, because one *can neither see nor touch* GOD. The spiritual realm – the *positive* realm anyway – which is far more advanced in regards to INTELLIGENCE, is *better* unformed about this. We can act accordingly.

Man is in awe of the incredible vastness of the universe. He is *even more* in awe of the presence of a WORLD of SPIRITS. It demands such an incredible amount of imagination that one simply prefers to reject it. One tries not to overtax one’s mind by remaining ignorant. Psycho-science should not give up where academic science will no longer participate. Psycho-science penetrates the occult depths where the secrets of divine CREATION are to be found.

The spiritualist is aware that he may ask the spiritual realm for clarifications. This is where he finds his answers. But we have observed that academic science embraces, accepts and disseminates indoctrinations from the spiritual realm – without providing the source of their knowledge. This creates the impression in the community that they are dealing with insights that have been formulated through the efforts of academic science. One will certainly not admit at this stage that one is dealing with psychic messages here.

Inspirations can naturally also be regarded as psychic messages. The word “inspiration” is generally well used. Nobody takes umbrage. But what would the general public say if one would talk about “psychic inspiration”?

Divine INFORMATION is also a *psychic* phenomenon. GOD is the PROVIDER of intuition, the INSPIRER. To attempt to dismantle this INFORMATION, that is to say, dismantle the lawful behaviourism of atoms *into their respective components*, would mean to *dethrone* GOD and adore illogicalness instead! In any case, the people on Earth are intimately connected with the spiritual realm. These processes are hardly ever explained to the public.

The state prefers to find financial means to purchase battleships than to approve one *single Penny* to gain higher KNOWLEDGE!

The battle for the TRUTH must be fought with the most primitives of means.

The promises of communists finds *greater* observance that a genuine indoctrination from the spiritual realm.

GOD can unfortunately *not* depend on the people on Earth, because the majority of the people on Earth have abandoned GOD in order to gratify their vices. However GOD does require HELPERS from amongst the people. There are a number of honest human beings who make an effort and their remuneration will be higher than they can ever imagine.

- *INFORMATION is the way the sciences can gain the insight that GOD is not a human invention!*

### **The INFORMATION (4)**

- *Every cell, no matter how small it might be, receives divine INFORMATION.*

Procreation is the initial, microcosmic beginning of a human being. We once again encounter the LAW that *two concepts* form a *new unit*: namely an ovum and sperm. INTUITIVE MEMORY resides in both of them, that is to say, the divine INFORMATION they both have to abide by, even if on a subconscious level: Due to past experiences (ancestors), the sperm has the INFORMATION *to move forward*. The ovum on the other hand has the INFORMATION *to harden its shell*, once the sperm has entered.

The divine INFORMATION is a LAW, *it compels*. One can clearly see the divine ORIGIN here. A new unit has come into being within the fertilized ovum, one that *intuitively*, that is to say, subconsciously remembers the required divine INFORMATION that tells it *how* to behave. This initiates the building process. – Every new cell created through division now accepts *the INHERITANCE* of the divine INFORMATION.

GOD, the INFORMER, the LEGISLATOR, passes HIS WILL onto every cell within the universe. Every cell therefore possesses a *disposition to receive* and this makes them receivers of divine INFORMATION. This initiates the systematic construction of an incredible heterogeneity, because every cell has *another* assignment and correspondingly, a *different* GENETIC EXPERIENCE.

- *Due to the laws of inheritance, the divine INFORMATION finds infinite opportunities of duplication.*

The verification for the absolute correctness of INTUITIVE ENTELECHY (The LAW OF REMEMBRANCE) is found in the construction of the organic body. The mutational forming of the embryo clearly shows that the assembly of cells takes place according to the inherited LAW of REMEMBRANCE, because it goes through all the stages of organic development. This is the chronicle of its development since time immemorial.

Any interbreeding between man and animal is *impossible*, because the cell do *not* possess any MEMORY in *this* regards. This type of intuitive INFORMATION has *not* been INHERITED, because the INFORMER, ergo GOD, did *not* intend for this blending to take place. HE therefore does not allow it to happen. This provides the evidence that the CREATOR did not direct HIS WILL in that direction. If the formation of forms and species was a *random* affair, the interbreeding between man and animal would be possible taking the intuitive MEMORY into consideration. However as this does *not* apply, we can absolutely assume that all of creation has *not* come about randomly and by pure coincidence, but according to a very specific and meaningful PLAN.

- *CREATION is the result of constantly inherited INFORMATION. GOD is the INFORMER and not physical matter. Matter only comes into being because of the INFORMATION!*

What would Darwin have to say about this insight? – And how would he refute this insight?

All forms and species are defined and absolutely according to plan in as much as we're not dealing with derailments. But creation is after all *an experiment*, whereby the SPIRIT accumulates experiences in order to employ them in *further* experiments.

Man, as a species, can *never* have descended from apes, because in spite of some of the ape's "human" traits, it is still *an animal*. Based on the INFORMATION all cells possess, the cells of apes do *not* have any experience in regards to the human race *and vice versa!* The cells of man do not possess any MEMORY (INFORMATION) in regards to the make-up of apes.

The PLAN for this WORLD did absolutely not allow such a development to take place. If this *had* been possible, an inheritable MEMORY would have been created that would have become *the norm*.

## **The INFORMATION (5)**

- *Instincts later developed from within the intuition of memory.*

Instincts are a qualified form of subconscious, *non-sentient* intuition and also of INFORMATION. The inherent instinct of man has been *replaced* by the rational comprehension of concepts.

- *Instinct is therefore the "umbilical cord" that connects us with GOD!*

Life is not GOD, but GOD is a living ENTITY and GOD *is* life, because the CREATOR is *the instigator* of life, of movement. In spite of this, GOD is an "individual PERSONALITY", because HE represents the highest CONSCIOUSNESS throughout the universe. HIS INFLUENCE on spirit and matter is guided by the minutest of reasons and they can have the greatest effects. All of this takes place with the help of infinite time.

Matter is also something living and it differs from an animated organism in that it is *more sluggish* in its movement. Who will dispute these days that molecules and atoms contain vital movement? Animation and movement are *no* guides in regards to death or immortality. Movement as an expression of life can only be expressed in an animated object, in an object with a soul. Only animated matter, ergo an organism with a soul can be called "alive". The *spiritual content* of an

animated object cannot be refuted. However GOD is the only SOURCE that can animate an organism.

Henri Bergson<sup>3</sup> writes: “Life ultimately found its wishes fulfilled in intelligence and this is where its hopes are invested in”. – All of this sounds good, but these deliberations are not correctly expressed. *How can life express its wishes, if there is no intelligence present in the first place?* – Even when life is not endowed with intelligence, GOD certainly is! HE *guides* all life. HE set HIS HOPES on life!

The origin of matter is certainly not something *metaphysical*. Once we clearly identify a process, it is no longer something metaphysical and it adapts to our knowledge base. Only the things we *don't clearly recognise* retain their metaphysical properties and remain an enigma to a certain point – something that operates in secrecy. The moment we *recognise* a coherency, we lift a veil from the divine FUNCTION. But this is a process that enters our rationality.

Everything that enters our rationality is neither occult nor metaphysical. This is why spiritualism is *not* part of occultism, because it has been verified that it represents *a contact, a connection* to the spiritual world. Spiritualism, that is to say, psycho-scientific doctrine, has already entered the rationality of experts. Spiritualism represents an important component of knowledge.

Every antipathy against metaphysics, in this case also against INFORMATION, is simply *timidity* when faced with this bodacious, divine FUNCTION. Man is not prepared to admit his obtuseness of comprehension, his *helplessness in regards to higher thoughts* and this is why he prefers to simply deny the existence of divine EXCELLENCE. Something that allegedly does not exist does not have to be explained.

We should not allow our search for the TRUTH to be hindered, because we fear one particular branch of science. Spiritualism *is* also a SCIENCE – a PSYCHO-SCIENCE. Just because this science delves into deeply hidden secrets is no reason to abandon, to cease one's investigations.

- *INFORMATION is GOD'S TELEPATHY and it reaches every single atom. The human spirit however shows reluctance to accept it.*

## The INFORMATION (6)

The sciences are at this point in time (1966) knocking on the door of the spiritual realm. One begins to think about, even if with some restraint, about *physical matter's consciousness* and one includes human beings in these deliberations. They are pretty much at a loss in the Soviet Union, because the sciences there are not game enough to indicate that *animated matter* does exist.

We predicted this development, because with the help of our SPIRIT GUIDES, we were able to gain an insight into this mystery *many years ago*. Russian science endeavours to go their *own way*, one that could coincide with the doctrines of Marxist thought. One tries to verify that

---

<sup>3</sup> **Bergson**, Henri: Born in Paris on the 18th of October 1859, died on the 4th of January 1941, French philosopher of Polish-English extraction. Promoter of a spiritualistic philosophy. The basic concepts are: The concept of subjective, non-repeatable, continuous time, the duration (*durée*) and purposeful struggle for survival (*élan vital*). Received the Nobel Prize for Literature in 1927.

**Works:** *Matter and memory* (1896), *Creator, development* (1907)

consciousness is *the result of matter's behaviourism*. One thereby assumes that thoughts are a chemical processes, because one *cannot* show that *electromagnetic* thought waves function as bearers of consciousness. These tests however *irreproachably verified* the transfer of thoughts from consciousness to consciousness via telepathy.

Our *own* experiences and experiments go beyond this and from them we know that telepathy between people on Earth and SPIRIT ENTITIES *and vice versa* does exist, apart from the fact that telepathy happens to be the COMMON LANGUAGE of all *otherworldly souls*. Every soul is its own translator and that ensures that there are no “language barriers” at all. The sciences have named the INFORMATION they found within matter with letters. The name given is DNA and it means: *Information of a chemical nature through code* – in English: Deoxyribonucleic acid. There is also another denotation that is used in regards to the *building blocks of cells*. This denotation is called: RNA – Ribonucleic acid.

We will use these expressions in future as we can assume that the sciences will soon gain further insights in that direction. We will try to compare the latest insights with our own documentations. It is interesting and quite informative to see that the sciences *convulsively endeavour* to gain a result that is *outside* of the field of theology.

The more upmarket newspapers around the world also deal with this theme. Scientific papers deal with an *otherworldly universe* that lies *parallel* to our own. One sometimes admits that the possibility exists where otherworldly human beings could pass through terrestrial human beings *without* them ever feeling anything about it. One should dare to take one more step in that direction and admit that *this could easily end up in spiritual possession*.

One tried to deny the existence of the hereafter with all possible means up to now. All spiritual evidence was malevolently ignored. Through progress within scientific insights we are at least at a point where one does not completely dismiss the possibility of an otherworldly existence. A *rosy dawn* has risen on the spiritual horizon.

One may not make the mistake of believing that matter actually *thinks*. Matter only behaves like a computer, that is to say, like an electronic brain, one that receives the information, acts upon it, but *does not make its own decisions*.

The sciences will *certainly not be successful* in providing evidence that the INFORMATION (DNA) is *a product of matter*. – Herein lays an objective divine PRINCIPLE. If this annoys the sciences, they are free to choose a *different* denotation for divine ACTIVITY. This will however not change the facts by one iota.

The sciences will *on no account be successful* in providing evidence that this INFORMATION (DNA) is *a product of physical matter*. – Herein lays an objective divine PRINCIPLE. If this annoys the sciences, they are free to find a *different* appellation for GOD'S divine ACTIVITY. But this will not change the facts.

- *Whether called GOD or Mother Nature, man will not be able to dismiss the fact that there is a HIGHER POWER involved!*

## The INFORMATION (7)

The sciences must *inevitably* deal with the problem DNA, that is to say, with the INFORMATION. This raises the decisive question of whether it is at all possible that cells contain this INFORMATION *without* having an INFORMER present? The sciences would be a lot happier if they could verify that this INFORMER, ergo GOD, does not exist. One therefore presents all kinds of assumptions in this regards, assumptions one would like to elevate to scientific dogma.

An INFORMER must naturally have a CONSCIOUSNESS, respectively a MIND, because this is the only way he can be creatively active. Experience plays a major role here, because experiences are *combined together*. Mother Nature cannot accomplish such complicated combinations of its own accord.

- Nothing new can ever develop without a *guiding* CONSCIOUSNESS!

This is something the sciences *cannot* ignore.

This problem *doesn't just* deal with the question of whether an INFORMER, who is responsible for this DNA, actually exists, but with the even more important question of *who* combines the amassed experiences? This act of combining within CREATION might be even more important and revealing than DNA. The human mind also renders a *combination of experiences*, however to a lesser degree, but it does *presuppose* a mind!

The sciences continuously come up with the most absurd assumptions that do not coincide with the TRUTH. Whatever is logical is part of the LOGOS. Whatever is illogical is therefore *not* part of it, it has nothing to do with the LOGOS, ergo with GOD.

The sciences mainly take the human condition into consideration when dealing with this question. Mankind has accomplished enormous feats within a short period of time and Mother Nature has nothing that comes even close to this. The contributions in the field of electronics alone are most convincing and most of them have come about within the last 50 years or so. Mother Nature takes *many thousands of years* for certain major changes most of the time. Man creates things eminently *faster* than GOD. This has led to a situation where he has abandoned his place of humility and respect for GOD.

In regards to this aspect, the sciences have unfortunately forgotten that mankind is *guided* and *inspired* by the spiritual realm. Mankind on its own could *never* have produced such results *of its own accord*. We are primarily dealing with objective endeavours of the INFORMER, whilst mankind only plays a secondary and subjective role as the *executing* organ.

Furthermore, the sciences have posed the question of whether creation had only *one* INFORMER or whether creation is the result of *a number* or a lot of CREATORS and INTELLIGENCES. This question can be answered theologically: GOD has HIS ANGELS and HIS HEAVENLY HOST. These INTELLIGENCES are endowed with great POWERS and they are absolutely creatively active. We can add to this the spiritual ORGANIZATION and its INTELLIGENCE can not be expressed in numbers. From a cosmic point of view there are humanities of an unimaginable multitude throughout the universe. Every individual intelligence is however participating in CREATION in one way or other.

As the sciences make the great mistake in all their observations of not considering or believing in *reincarnation*, they cannot comprehend that every human being on Earth has *not just* participated in the enormous progress over the last 50 years, but that they participated in the progress and construction of the intelligent world from the very start of human life on this planet.

- *All of us are our own ancestors and forefathers.*

## The INFORMATION (8)

An eminent brain specialist asserted that the capacity of the brain has certain set limitations. He assumes that all events and experiences are recorded within the brain in the form of “engram recordings” and that they can be scanned after. We find this same process duplicated in an LP, a recording on a disk.

Our experiences tell us differently and they are not based on human assumptions, but on the superior knowledge of our otherworldly TEACHERS who work for the LOGOS. – The human capacity of apprehension is absolutely limitless, because the *whole* universe represents the reservoir of all memory.

It is left up to every individual whether he can imagine a cosmos filled with “engrams”. The fact remains that the cosmos contains VIBRATIONS. Especially human beings have the ability to psychically *scan* the cosmos. Doing this reveals a FREQUENCY one is personally *attuned to*. Individuals are only allocated *one very specific* FREQUENCY for the duration of one life on Earth, it *changes* with every *new* life lived on Earth.

- *Intelligence is therefore absolutely not related to the size of the brain and also not on the convolutions of the brain. Of a decisive nature is the ability to correctly interact with the cosmos.*

The sciences have marvelled at the fact that *bees* for instance show intelligence that indicates an *excellent memory*. The required organs for this are microscopically minute. The same applies to *birds*, they also dispose over a *great ability to remember*. Memory therefore is part of the insight called DNA = INFORMATION. The cosmos receives INFORMATION through the LOGOS (GOD), but also through every sentient and active life form. The fact that a bee, with its micro-brain, can scan a reasonably large area of the cosmos indicates that its *brain activity* is beyond the capacity of its physical brain.

With the cell’s information (DNA) one assumes that a special type of acid absorbs the COSMIC CODE. The information contained within the cell does however not deviate in any way from the arrangement within the cosmos. *The determining factor is the connection between the cell and the cosmic FREQUENCY*, through which the INFORMATION is traced.

The INFORMATION is therefore *not* within the cell, but within the cosmos. The cell traces this INFORMATION through a psychic RAY and stays in contact with this INFORMATION. The same principle basically applies to all creatures and this includes human beings.

The invention of the punched card machine and the computer, which receive prepared information in the form of a code, gave occasion to assume that a similar function occurred in regards to the cell’s information. This is wrong! – The cells do not receive a code that is *introduced* to within the

cell. The acid DNA does not store this code. This is why all insights in regards to the function of DNA are no longer applicable.

- *DNA is therefore not the carrier of a COSMIC CODE, only the carrier, respectively, the conductor of a psychic RAY, one that corresponds with the cosmos.*

This insight is *not* based on assumptions, but the result of arduous, intensive research on a spiritual basis.

We find all the mysteries of life, of future growth, of control and eternal progress recorded within this INFORMATION. This INFORMATION is *the actual* genesis and no theology can replace it. It represents the uncloaking of divine ACTIVITY.

- *This INFORMATION represents the greatest scientific mystery of all.*

## **The INFORMATION (9)**

Science is still trying to solve the riddle of *how* cells are INFORMED about their respective function and behaviourism. It is quite apparent that such an ASSIGNMENT is not simple. This INFORMATION is extremely comprehensive, well absolutely important. Hereto, the continuation of our indoctrination from the WORLD of SPIRIT.

From the SPHERES of LIGHT:

Every cell requires, in order to express activity, INFORMATION, that is to say, a COMMAND from an external SOURCE. –

But who is the actual COMMANDING AUTHORITY?

The embryo for instance, which already represents an agglomeration of cells, does *not* possess any mental or emotional characteristics. These have never been detected and they will never be detected. The views of anthroposophy are therefore incorrect! – The soul does *not* enter the embryo during the fourth month of the pregnancy, but *just before birth*, that is to say, when the actual labour pains begin.

One must imagine that every cell, every atom is invisibly and immeasurably enveloped by a spiritual ENVELOP. This “BUBBLE” contains the unimaginable METHOD of PROCESSING the INFORMATION, but particularly of ABSORBING INFORMATION. As academic science is *unwilling* to acknowledge things it *cannot measure* or *perceive*, it shows no interest in spiritual facts.

Every atom has a vegetative micro-consciousness. Experience streams onto this “consciousness”. This miniscule consciousness also controls the behaviourism of the atom, not unlike the way the heartbeat is controlled by the brain. Because university taught science shows so little interest in anything spiritual, they will always be confronted with an enigma. This enigma could be solved immediately, if one would take the time *to acknowledge* the ROOTS of everything that exists. One is however ashamed to even pronounce the word “GOD”. They prefer to deal with an enigma, with an unknown, with factor “X”.

Matter primarily consists of whole groups of atoms and not individual atoms, meaning an organization of various atoms and cells. Even if individual atoms and molecules possess their own inner movement, they still group together because they are compelled to do so by a *magnetic* force. Their *spiritual* CASING however is very complicated and it works like an advanced, but vegetative consciousness. In order to explain this better one could say: The molecule is *magnetically* animated.

*Protein cells* possess these types of outstanding characteristics. They represent one of the CREATOR'S masterpieces! The *physical properties for man's consciousness*, for the brain, also spring from this basis. The human brain can receive an external telepathic thought, an ORDER that can absolutely reach one's *consciousness*. Man has indeed the ability to decide whether to accept such an assignment or not. – A cell works in a similar fashion on a microscopic level, but it is *incapable of making a decision*, it *must* obey unless there is a DISTURBANCE present.

Because one knows only *very little* about the spiritual FUNCTION, one rejects the immortal part of human beings. One now (1967) tries to deal with cells and atoms, which represent the matrix of human consciousness, in the same way. The spiritual realm is not a university, but we want to give you guidelines that will abridge your research and make you strive in the *right* direction. Showing more respect for spiritual VIBRATIONS can still save you.

In spite of all scientific observations and insights into nature, man will never get around the fact that he will have *to give account* for his life on Earth after his demise. This fact does not fit into the plans of scientists, politicians and also theologians.

## The INFORMATION (10)

The fact that cells receive divine INFORMATION they abide by is for instance verified by *identical twins*. These twins develop through the partitioning of a fertilised ovum into two *independent* ova. As the ovum is however a *uniform cell*, it acts according to specific INFORMATION. Another factor is that even *after* the partition, respectively after the separation has taken place, only *one* INFORMATION is authoritative. – This produces an absolute physical similarity. This process however delivers another very important piece of evidence:

- The identical twins possess two *different* souls in spite of their similarity. There are no indications that the soul is also divided, because every soul is an *individual* entity.

There is a widespread opinion that the human soul is *the product of the parents*. The soul would therefore have to be a new creation. If this theory was correct, it could *not make an exception* in the case of identical twins. The *soul would also have to divide* the way the ovum does in this case.

- This however provides us with the evidence that the soul is *something independent*, meaning, it is complete and it incarnates into a physical body.

*The soul itself is not physical, but COSMIC. It develops within the cosmos through the assembly and duplication of divine LAWS.*

One can never equate the bible's assertion that man was created "in the image of GOD" with the *carnal* body. This similarity only applies in regards to the soul's COSMIC COMPOSITION and

mode of action. One has to take into consideration that man's soul only represents a *minute* "divine SPARK" from GOD'S unimaginable "GIGANTIC COSMIC FIRE". This is the reason why man's creative powers are very limited.

- In many instances human beings act according to divine INFORMATION (DNA), for instance with the act of procreation.
- Human beings cannot mix with any animal and also not with apes, because the INFORMATION (DNA) would no longer be correct. The theory that man descended from apes is therefore *impossible*.

One will now assume that there are mutations that contradict the INFORMATION. GOD has naturally his enemy. We can clearly observe this! DISTURBANCES come from *that direction*, like *all other* DISTURBANCES, they stem from human behaviourism (Smoking, industrial rays, chemical compounds) that can adversely affect the INFORMATION. *Mutations* eventuate in these types of cases, that is to say, in unmeant side effects. However once such a mutation has taken place, it becomes common place, it can *repeat* itself or it becomes the norm!

In regards to our indoctrination it is important that we recognise on hand of the *example of identical twins*, that the doctrine about the INFORMATION is *correct*. We do not have a high opinion of theories; we prefer to rely on praxis and on absolute evidence. This also applies to our research in the field of the PSYCHO-SCIENTIFIC DOCTRINE.

If a computer is supposed to function it must receive a program *from a human being*. It is a similar situation with the INFORMATION. The PROGRAMMING is effected by GOD'S CENTRAL CONSCIOUSNESS. Cells and atoms only abide by this. Multiple cell connections receive more complicated INFORMATION. It therefore follows that there is *more than just* one uniform INFORMATION PACKAGE for the cell. The PROGRAMMING through the CREATOR is unimaginably comprehensive. It covers individual cells as well as whole cell systems and every slightest change within these systems has an immediate effect on the new INFORMATION.

- *No wounds would heal, if this INFORMATION was lacking.*

## The INFORMATION (11)

- *The sciences cannot deny the fact that they stride from mistake to mistake in regards to their insights and that only time will make true insights possible.*

This is the reason why one had no real concept of atoms and their construction before and this also applies to the inherent ENERGY within atoms. One is already aware these days that an atom is comparably so minute that one is virtually looking for a needle in a haystack. This insight must be expanded upon, because this minuteness does react to INFORMATION that *controls its behaviourism*.

But as an atom does *not* contain DNA, it might seem questionable whether this INFORMATION is actually dependent on DNA. Anyway, one should not look for this INFORMATION within

matter, it comes from the cosmos in *spiritual form* and it has an *effect* on physical matter. There seems to be nothing one can object to in regards to this fact.

It seems strange that academic science has an indescribable aversion against pronouncing the word “GOD” or to even *include* it their scientific conclusions.

The psycho-scientific doctrine does *not* heedlessly ignore GOD’S existence. It *presupposes* that CREATION is the act of *superhuman* THOUGHT. The existence of an INFORMER should not be doubted, because the thought processes of man also run along cosmic lines.

One assumed up to now that GOD’S existence could never be verified. One could only assume this existence based on the CREATION we are surrounded by. The progressive research into the microcosm allows us to day (1967) to predict that the verification of a CREATOR (INFORMER) *is absolutely possible*.

Based on these new insights it is difficult to imagine that the views of Spinoza, Marx and Engels are still tenable. These people allowed themselves to be *beguiled by the ignorance* of the natural sciences. They didn’t know the capabilities of the INFORMATION, of DNA.

- *The rejection of a religion must not necessarily indicate atheism.*

Insights in regards to the survival of the human soul is presently still *beyond* the grasp of every religion. Herein lays the cardinal mistake made through human ignorance. The types of eminent natural scientific insights, the way psycho-science has formulated them, demand their “own religion”, one that differs from the *dogmatic interpretations* of so-called “Holy scripture”.

The Soviet Union’s dialectic materialism insists that consciousness is *tied* to physical matter. This is absolute madness and it has been irreproachably refuted through thousands of contacts with souls in the hereafter.

- *The terrible ignorance in the field of psychic knowledge resulted in an avalanche of aberrations.*

Equipped with the right insights, this world could be a different place. People’s interests in this science are unfortunately still insignificant. What is particularly regrettable is the fact that one cannot rap the deriders over the knuckles. They are the ones that influence all of humanity. It is a strange fact that people particularly react to scorn.

We can only hope that the sciences gain ever more insights into the secrets of this INFORMATION. DNA certainly represents the “magic potion” GOD used to create the whole universe. Every rationally thinking human being must admit that ingenious INFORMATION does not arise of its own accord, meaning that:

- *Matter did not create itself in order to be ingenious. Ingenuity is a characteristic of the spirit!*

## **The INFORMATION (12)**

In the USA and the Soviet Union one assiduously endeavours to discover the secrets of the origin of life. All of these efforts deal with the behaviourism of matter. This is where one looks for the

programming, the kind of programming one finds in a computer. That this programming comes from the cosmos is presently (1967) not presumed.

If one takes a freshly cut branch already in bud and sticks it into water, one will find that it will begin to blossom. That wood is capable of producing such a blaze of colour is one of nature's miracles. This can only be achieved through the INFORMATION, that is to say, only through divine PROGRAMMING.

A computer has an enormous amount of electronic contacts and other such devices in order to perform its function. A computer programmer prepares a program to then install it in the computer. But how is it possible that a tiny molecule can perform the same or *even better without* all the enormous complexity of electronics? This mystery can never be a physical phenomenon. This is the absolute hegemony of the spirit who is a million times superior to matter.

The brain cells of human beings and various other animals operate in a similar fashion. The human brain might be "computer organised matter", but it could never function the way it does day after day, without the supremacy of the spirit.

The search for spiritual factors can never come about through the investigation of *physical matter*. Only *spiritual insights* open the door to the most eminent mysteries of life. This field of knowledge has however been very much neglected, it has been *suppressed* in a most infamous way to the point of mockery, even though some quite eminent authors have stood up for it. Even if these attempts and investigations still take some time to complete, one will certainly not be able to blame the spiritual world, because TEACHERS from the spiritual realm have pointed out years ago that the sciences will one day *have to* bear the consequences.

*The INFORMATION (DNA) is the key to the spiritual world, to those regions INTELLIGENCE calls home – and it towers way over physical matter.*

Based on biological research, one will be able to exchange genes in the future. But one will be unable to change anything in regards to divine PROGRAMMING, because it possesses *established LAWS* that come to the fore *over again*.

- DNA is an acid that *promotes the acceptance* of the PROGRAMMING. This acid however *never* brings forth a program *of its own accord*, exactly the way physical matter cannot bring forth the spirit.
- Spirit and matter are *separate concepts* and also *separate substances*. But this doesn't mean that these two substances cannot *cooperate* with one another under suitable conditions.
- The spirit will however always be the dominant partner. The spirit will always reign over matter, because matter is only the *secondary* part of CREATION.

Our SPIRIT GUIDES pointed out that matter does *not* contain mental engrams. These types of spiritual recordings are *nowhere* to be found.

- All spiritual records belong in their natural ENVIRONMENT, namely in the spiritual regions, there where the records of the whole life of individual people are also kept. The bible doesn't talk about the "Book of Life" for nothing.
- The spiritual realm *mirrors* these records within the physical cells. The DNA acid plays a certain role within this process.

### The INFORMATION (13)

During the search for the *origin of life* one has come to the conclusion that matter *cannot* produce its own vitality *without* receiving the INFORMATION to start the process of animation.

Everything science and technology is able to measure these days (1967) is regarded the property of physical matter. One obviously makes crucial mistakes when interpreting and defining what life is all about. These mistakes are blatantly obvious to a spiritualist, because he is aware of the immortality of the soul. The sciences however have not included this fact into their calculations. They continuously try to make room for *different* explanations even to the point of *self deception*. Spiritualists have been accused of suffering from self deception, but the reality is that it is the scientists who suffer from self deception.

It is not possible to verify this INFORMATION at this point in time. It does exist, but one is unaware of any radiation or energy that could be regarded *a factor*.

- *The INFORMATION is a divine PRINCIPLE.*

As man is not in a position to explain and or to verify that GOD is an "ELEMENT of NATURE", he will therefore not be able to explain the mystery of the INFORMATION on hand of *physical* evidence. This therefore means that the INFORMATION within all the areas of *visible* life is *metaphysical*. But it is the very terminology of "metaphysics" the sciences *particularly balk at*.

As one has already highly developed adding machine at one's disposal these days, the comparison to a computer is ready at hand. Man could however create the most sophisticated robot he could imagine, but he would never be able to create a robot that could show AFFECTION, that could LOVE. – As genuine LOVE is a divine SPARK, it can only be introduced by GOD. – The sciences however dare to assert that the human brain *brings forth* all thoughts and their associated conscious processes and emotions.

Let's take LOVE as an example: It represents an enormous domain that creates everything, overcomes anything or under certain circumstance leads to disembodiment. Matter is supposed to make these important decisions over life and death? It comes as no surprise that the sciences come to such conclusions. We should assert a higher claim on the seriousness of the matter.

- *The divine SPARK, namely LOVE, is part of the DNA, part of the INFORMATION, but is has no physical genes or chromosomes.*

The sciences make things deliberately more difficult for themselves through their obstinacy. The path to scientific knowledge could certainly be shorter. All one has to do is to open the door to the spiritual world – the way responsible spiritualists do - with *honest intensions* and the right answers will be forthcoming. But this would mean that scientists would have to relinquish their claim to fame to the spiritual realm. – This tactic damages the standings of doctorates.

- *Humility is lacking everywhere – and there is no positive spiritual HELP without humility.*

The spiritual realm certainly welcomes any attempt to track down this INFORMATION. We are already aware of the latest insights into this field these days. They can only be:

- Spiritual energies rate *higher* than matter, they *guide* and *control* it.
- The spirit is *eternal*, matter however *continuously changes*.

Science naturally assumes that mysterious, unexplored forces still slumber within man and one would like to find out what they are. But one is *unwilling to admit* that these forces represent the capabilities of the immortal soul. But as all denial is after all in vain, it is only a question of time.

## The INFORMATION (14)

Indications that one bears full *responsibility* for one's past deeds after one's *demise* is no scare mongering, but a natural science insight universities gutlessly ignore. One must therefore come to the conclusion that universities must bear full responsibility for most genocide.

It is a mistake to assume that physical matter does anything *of its own accord*. Every movement, even that of atoms and smaller particles, is spiritually *controlled*, respectively *controlled* through divine LAWS. But it is also a mistake to believe that organised physical matter *produces* intelligence. Intelligence is a *non-physical* process. Intelligence is located *outside* of physical matter and it is only connected to it. If one wants to explain what this INFORMATION is all about one could say that this phenomenon is something very close to telepathy.

- *The real INFORMATION within physical matter is telepathy, based on PROGRAMMING that is subconsciously absorbed by matter. It controls its behaviourism.*

In regards to the human body we can also recognise that control *without* consciousness does exist. *Breathing* and *heartbeat* are a part of this. Divine INFORMATION does *not* require a language to implements its ORDERS, they are “conceptual” and are carried out through impulses, respectively through spiritual VIBRATIONS. Human consciousness is cosmic and certainly not within physical matter. An ignorant person is however *duped* by the excellent functions performed by consciousness so that he *believes* that his thoughts and perceptions reside *within the head*.

The *obstinate adherence* to this error of observation is undignified. One does however know the correct process and this could lead to a different way of observation. If all human beings would *correctly know* the processes of their consciousness, they would all *look at themselves differently* and they would also *behave differently* - better.

- *Consciousness belongs to the soul and not the body.*
- *The body is only a kind of consciousness receiver.*

This basic rule must find its way into academic science. An enormous field of knowledge will become accessible due to this fact alone and it is *worth anyone's while* to look into this.

The power of the INFORMATION becomes apparent when one brings *suggestion* into consideration. The will of one person is conferred to another *without* the medium of physical contact. Speech can trigger this phenomenon. Experiments to confer suggestions across a distance of over 1,000km have been carried out in the Soviet Union and these suggestions were only expressed *mentally*. These attempts provide enough evidence to show that man's spirit is *intangible* and no "atomic displacement".

To suspect thought *within* the brain is a *false* concept! It is therefore *not* a requirement that consciousness with all its memories, *vacates the body* when dying, respectively during one's exodus (exit). All that takes place is *a separation from the body*, from physical matter. The actual exodus is only carried out by the astral body. *Nothing* changes within one's consciousness, it remains the way it was before.

Death therefore is *not as problematic* as one assumed before and one still assumes in ignorant circles. Death is normally an extraordinarily simple process; it simply represents the switching off of a function, a separation of the spirit from the body. The body gains complete independence at that moment, it is now only physical matter and it is *exclusively* at the mercy of the *laws of physicality* – unable to do anything else. Man's spirit *also* gains its independence at that point in time and it is now *only* subject to the LAWS of the spirit, it can do nothing else but carry out mental, spiritual activities.

Spiritism maintains that there are *points of contact* at the boundary between spirit and matter where the energy of a terrestrially incarnated person can be utilised by a spirit or a number of spirits to a degree where physical matter can be influenced *somewhat*. This is nothing abnormal, but completely in harmony with the relevant laws of nature – if these do *not* come into play, nothing happens.

## **The INFORMATION (15)**

We asked our otherworldly TEACHERS quite some time ago *whether cancer is infectious*, that is to say, whether it can be transmitted from person to person. The question and answer were published in the brochure *Menetekel*. It states that cancer cells can be found in people's blood. It is a *demonic pathogen* and it can be transmitted from an open wound of a patient to the bloodstream of another person. We can assume from this that cancer must have a direct pathogen. If cancerous cells can enter the bloodstream, one should be able to identify them.

The answer of our otherworldly FRIENDS now (1967) finds confirmation after many years. This virus theory was debated at a congress in Tokyo. Russian and American cancer researchers have achieved concurring results. The cancer virus could be detected in the blood of leukaemia

sufferers. We see our earlier publications verified here. The fact that otherworldly MESSENGERS of LIGHT can make correct predictions even in regards to very complicated fields of knowledge is verified at the same time. Otherworldly entities are naturally far superior in every respect.

Cancer research must however bring the DNA factor to account, because every cell, and this also includes the smallest of viruses, reacts to the DNA-INFORMATION, even if this INFORMATION is not supposed to be acid based. The INFORMATION is divine PROGRAMMING and it applies throughout *the whole* cosmos. All types of viruses also abide by this INFORMATION.

- When tumours arise, the affected cells *lose their association* with the DNA-INFORMATION, that is to say, they *no longer react* to the divine COMMAND. This fall from GRACE unfortunately means chaos!
- As divine INFORMATION is superimposed over the *whole* cosmos, its sphere of influence is certainly not restricted, it must at least reach as far as the divine universe's expanse.

We can analogously ascertain here that all life forms, the way they exist here on Earth, can also be found wherever the same or similar conditions exist. There are naturally situations out there where INFORMATION we are *not* familiar with here on Earth comes into effect. But we can certainly assume that the *same conditions* absolutely produce the *same life forms*.

It is of great pertinence in regards to cancer research that one acknowledges that cancer pathogens do exist and that they are also infectious. Cancer therefore does *not develop of its own accord*. From a spiritual standpoint the question, *in what surroundings* does a cancer pathogen feel most comfortable in, arises. The only answer our research results provide us with is: In a *negative* environment! – Negative environments are focal points for all kinds of diseases, for instance places like hospitals. In addition there are unhealthy behaviours like smoking, drinking to excess etc. We surely don't have to list all the other negative conditions that exist. Cancer rates on par with syphilis in regards to its infectiousness.

It is a great shame that the major churches do not utilise all the psychic contact opportunities. But it is equally regrettable that the sciences also *make too little use* or *no use* at all of these opportunities in regards to important questions. – A certain amount of scepticism is naturally appropriate, but it should *not* be *exaggerated*.

- *As man lives within the cosmos, he has the right to assert a claim to it in a POSITIVE SENSE!*

## **The INFORMATION (16)**

The INFORMATION, as we find it in DNA, does not consist of one word and also not of one sentence, but of a whole CHAPTER.

It *must make sense* to the human mind that chromosomes or other such cells *are much too small*, to be able to accept and deal with a *comprehensive* CHAPTER. The way the spiritual world teaches us seems quite correct to us, namely that the compulsive REGULATIONS and LAWS of NATURE are anchored within the cosmos, but that they can be *traced* by the DNA.

Man can therefore *not* interfere in the LEGISLATOR'S handwork by *changing his* LAWS. The complete BASIC LAW of the CREATOR *is unimpeachable*. GOD'S ALMIGHTY THOUGHT PROCESSES would come to an end, if man was able to interfere here. This is impossible!

We endeavour to find this INFORMATION through our own research within the spiritual sector. We want to help the sciences with this difficult assignment and we want to keep them informed. The spiritual realm calls the DNA-INFORMATION: INTUITIVE ENTELEGY. We also find this denotation appropriate, because cells *intuitively absorb the things* that lead to their entelegy, namely to their further development. The following sentences are from an original revelation of the MESSENGER of LIGHT VERITAS:

VERITAS : An atom would remain *unchanged* in its behaviourism if it wouldn't receive *an impetus* that forces the atom to conquer new experiences, ergo to undertake an experiment. The atom however can never make this decision *of its own accord*. The atom can only behave according to the experiences and the memories of its subconscious, vegetative nature. –

GOD, as a living RATIONALITY and a tireless CREATOR, directs HIS WILL at the atom and forces it to new, active movements that immediately become *intuitive*, that is to say, enter its subconscious memory and are retained by the atom.

Every atom is therefore a movement and simultaneously a memory according to the irrefutable LAW that two concepts build *a unit*, which in turn become *active*. The compelling FORCE of the CREATOR, who spurs the atom into new movement, is the "ELAN VITAL" Bergson talked about, but not really understood.

The fact that atoms and micro-cells do *not* arrange themselves *without a plan*, that is to say chaotically, must surely make sense to everyone. Only Satan with his vassals and followers create chaos. A COMMAND must have an aim, otherwise it is not a COMMAND. It is unthinkable that GOD would direct HIS WILL at a cell, to actually give it a compelling COMMAND directed at a *very specific* target – and the atom or the cell would then *do something against* GOD'S WILL. Unbeknown to the cell, a bodacious piece of PLANNING stands behind these processes. It suffices that the CREATOR has this PLANNING under control.

Once man gains the ability to *group atoms together* or to *change genes*, the new experiences naturally *also* enter GOD'S CONSCIOUSNESS. He profits from every success or failure, because every innovation is always an experiment. If a success is the result, it can be registered within GOD'S PLAN. GOD has made many changes to the human race. The various races verify the fact the GOD has "undertaken a number of experiments" in order to find a *better* from.

- *The final form of human beings on this Earth has not been reached. These experiments are however interfered with by man!*

The MESSENGER of LIGHT VERITAS<sup>4</sup> to this theme:

An organised cell is a unit whose spiritual contents cannot be recognised. One entertains that a law of nature reigns within it. This answer tells us *very little*, because this is just *generalising*. The behaviourism is actually *enormously more complicated*.

The ASSIGNMENT the cell has could fill a whole book. This is the reason why the ASSIGNMENT or the INFORMATION is *encoded*, ergo simplified through a code. The first ASSIGNMENT of this code naturally reads: “LET THERE BE ...” – This is where the ORDER is given to the cell to abide by the INFORMATION. There is a *compulsion to perform*. – Instead of INFORMATION one can also say INTUITIVE ENTELEGY.

There is a mental cosmos *outside of* every atom and every cell, but it is *in coherency* with the core, respectively with matter. It is in some fashion the cell’s “consciousness”. It is naturally not a consciousness in a human sense, because it cannot think, it can only *remember* and *instruct*. The mental exchange is based on a “magnetic connection”. The INFORMATION is recorded on a special FREQUENCY within the cosmos and this is where the ASSIGNMENT comes from. This is where it remains and it is a most extensive COMMAND.

The ASSIGNMENT attached to every such newly created cell multiplies. When a cell undergoes changes, it immediately receives a new ASSIGNMENT that corresponds with the cell on a mental-magnetic basis. These are IMPULSES that are immeasurable. We are dealing here with the minutest of mental microcosm no human mind could ever imagine. A microcosm of enormous potential!

Based on intuitive memory, every atom and every cell knows exactly *what* series of experiences it has behind it. Mutually arranged systems also have their memory, respectively remember their ASSIGNMENT. The INFORMER is the great, mighty universal ARCHITECT and HE expresses HIS WILL. INTUITIVE ENTELEGY abides by HIS ASSIGNMENT. Every atom and every molecule can only behave in a manner allowed and prescribed by its memory. This memory is naturally *not* expressed in words. Next to any visible motion there is also *invisible* motion. The compelling FORCE of the INFORMATION represents the “ELAN VITAL” Bergson mentioned, but *never really* understood.

It is however very important to remember that every COMMAND and all INFORMATION must have *an aim*, otherwise it cannot be an ASSIGNMENT. But as a cell *cannot think of its own volition* – and cannot make predictions, it naturally follows that it must be *subordinate* to a higher

---

<sup>4</sup> The MESSENGER of LIGHT VERITAS is the soul of the German philosopher Arthur Schopenhauer, born 22.2.1788 in Danzig (Gdansk) died 21.9.1860 in Frankfurt am Main. Formatively influenced at the literary salon of his mother Johanna S. born in 1766, died in 1838 in Weimar. Met Goethe, Wieland, the brothers Schlegel amongst others. Discussions with Fichte and Hegel. In 1819, S. formulated his philosophy in his major publication called >Die Welt als Wille und Vorstellung< (The world as Will and Representation). S. connects Kant’s transcendental aesthetics with buddhaistically influenced metaphysics of the will. He rejects Christendom as unphilosophical. He regards the abrogation of will in a disinterested view of the arts as the highest aim of philosophy. His brilliantly written works only began to have an influence around the middle of the 19th century. It influenced Nietze amongst others and also L. Wittgenstein and within the arts R. Wagner. His doctrine of will and motivation was the forerunner of psychoanalytical motives.

**Further works:** “On the Will in Nature” (1836), “The two major Problems with Ethics” (1841).

See: “What VERITAS tells us” from the series of Psycho-scientific frontiers, online at [www.menetekel.de](http://www.menetekel.de)

CONSCIOUSNESS. – GOD plans on behalf of the cell and looks after it. However when the CREATOR’S antagonist works *against* INTUITIVE ENTELEGY and *effectively interferes with it*, the cell is no longer in a position to accurately abide by its divine ASSIGNMENT. This results in the *false behaviourism* of cells and molecules. We are then dealing with a flaw, one that can have dire consequences, particularly because these flaws are also *duplicated*.

The sciences will endeavour *to dispute* the fact that the INFORMER is a living, sentient CONSCIOUSNESS. They will however *not be successful* to banish this extraordinary MIND to the “Moon” or some other locality. The mystery of divine INFORMATION can be unveiled to a *certain point* and this unveiling will *verify* the existence of a *living* GOD!

### **Organ transplantation** (Transmission from the year 1968)

The INFORMER (GOD) must not continuously repeat all HIS COMMANDS in order to vitalise the universe. There is a divine PROGRAMMING in place that has existed from the beginning of time and will exist for all eternity; but it can be continuously supplemented and improved. If one is talking about INFORMATION one must also acknowledge that there is an INFORMER. Logic demands this!

One has paid *organ transplantation* very specific attention in recent times. Heart transplants have been very much in the news. These attention grabbing operations must also be looked at from a spiritual point of view.

This is why we have AREDOS address you directly today.

AREDOS: Every cell is subjected to divine INFORMATION and it *abides* by it and it *forms* accordingly. The human body continuously renews its cells by discarding old cells and creating new ones so that after a longer period of time a *complete exchange* within the whole body comes about.

When a donor heart is transplanted into *another* body, something that has already taken place, a renewal of its cells *also takes place in the new* body, that is to say, the transplanted heart also discards and creates *new* cells and these cells abide by the spiritual INFORMATION present.

Therefore, when the patient survives the initial battle of rejection and the heart continues to function, the whole cell organism of the heart changes; a gradual exchange of the donor heart cells with one’s *own, newly created heart cells* takes place. A situation would then have to arise after a few years where the donor heart has been completely metabolised into one’s own heart. If this is the case, the donor heart has fulfilled its purpose by serving as *an agent* to promote the replacement of this organ.

Next to the well-known rejection process against any foreign body, there is also another obstacle that has not yet *been recognised* by the medical fraternity: Every human being possesses an astral body that is a *complete* replica of the physical body, inside and out. This astral body is intricately enmeshed with the physical body and it naturally has an ASTRAL HEART, but this heart *cannot* be transplanted into another

body. This ASTRAL HEART must *assimilate* with the donated, transplanted heart! An assimilation of the ASTRAL ORGAN with the foreign, physical organ! This is a process that remains hidden from the eyes and ears of doctors. The same applies to all other organs like kidneys etc.

- *After the transformation of the cells has been completed, the patient can no longer be regarded the carrier of an alien body. This also has a lessening effect on the ethics of this whole issue, particularly the way it has been discussed of late.*

The spiritual realm however basically rejects any utilization of *animal* cells. These types of intensions take place *outside of* the divine ORDER! Scientists have unfortunately *no concept* of a divine ORDER!

- *The utilisation of animal cells interferes with the INFORMATION!*

The renewal of cells, the way I have described it, *cannot* take place according to the rules, therefore *no adequate* transformation takes place. One can only assume that the utilisation of *animal* cells is rejected by the ASTRAL BODY so that the patient displays symptoms *the like no doctor has ever seen*.

Even though man's evolution has been through the various animal stages, he has actually *nothing* in common with animals in any form or shape. (Remark: This is quite apparent in the fact that crossbreeding between man and animal is impossible.)

During the development of the pre-human bodies, which took place in the distant past, the bodies were *not* animated by human souls. The ASTRAL BODY was then therefore of a *non-human* composition.

- *Only Neanderthal Man can be regarded as the first human being, even if he was only animated by a primitive human soul.*
- *The INFORMATION within the cells must also be taken into consideration in all cases of organ transplantations.*
- *A heart can only beat when it is privy to the INFORMATION.*

The SPIRITUAL REALM follows these experiments with great interest, but also with some trepidation...

## Questions and answers

Question : The philosopher Spinoza<sup>5</sup> and a few others advocated the opinion that Mother Nature *is* GOD. That all of creation is based on causality. That GOD is the cause of it. CREATION is the result of HIS efforts. Is this formulation correct?

Answer : One has to analyse first whether Mother Nature is *controlled* through a mind and a consciousness that possesses the MIGHT to have a *tabulating* effect on events.

Nobody has ever been successful up to now to demonstrate that mind and consciousness must by necessity be connected to physical matter. The brain might be an organ, but is not consciousness by any stretch of the imagination. The brain can be active *without* consciousness, however consciousness *also* manages *without* a brain. (Comment: It is a known fact in medical circles that mentally completely intact people have shown severe or complete brain loss when a post mortem was carried out!)

The whole body can be paralysed and rendered insensitive in a narcosis, but some patients have managed to see and hear everything from a certain distance in spite of this.

In regards to nature's universality and stupendousness, it is *absolutely not necessary* that GOD has to undertake this enormous task *alone*. HE has HIS HELPERS and mankind on the earth plane also belongs to them! GOD is the FATHER of everything there is and HE created an ORGANIZATION to help HIM.

Nothing is easier than to simply dispute insights and theories. But he, who wants to dispute something, must equip himself with *evidence*, because evidence must be presented in order to prove that one is right. (Comment: Dialectic materialism for instance makes assertions *without* ever proving evidence.)

It is quite conspicuous and argumentative that (perspectively speaking) GOD has drawn a concept from the condition. Condition and concept are two separate things but at the same time *still one*. GOD as condition and concept is therefore a "DOUBLE ENTITY". HE is one, but also two. This is why this fact has become an original and irrefutable LAW. *The oneness* of this DOUBLE ENTITY represents the elementary mystery of nature throughout the universe and throughout HIS CREATION. The two terms of "spirit" and "matter", which in turn form *a oneness within the cosmos*, stem from this LAW. We can see this fact verified in molecules, atoms and electrons.

Question : The sciences begin to deal with this INFORMATION more and more. Can you give us some more information about this INFORMATION?

ELIAS : In spite of all their research, the sciences will not come to any other conclusion than

---

<sup>5</sup> **Spinoza**, Baruch (Benedict[us], German Spinotsa; Dutch Spinoza; born in Amsterdam 24.11.1632, died The Hague 21.2.1677, Dutch philosopher. The most eminent systematician of rationalism and pantheism. His philosophy postulated the identity of God and nature (Monism): God, as the all encompassing nature, is the absolute, eternal substance and man has access to expansion (Matter) and thought (Spirit) from its infinite attributes. In his anonymously published >Tractatus theologico-politicus< (1670), next to a treatise on Descartes' >Principia philosophia<, the only published works during his life time, Spinoza defended the ideas of freedom of thought and of tolerance. He had a major influence on the German idealism and German romanticism.

that a higher INTELLIGENCE dispenses the INFORMATION! It is quite unimportant whether one gives this INTELLIGENCE the name of GOD. It will be left to the sciences whether they want to coin *another* name for it. *What does remain important is the insight* that the INFORMATION stems from an INFORMER – and not from a physical computer. The way this INFORMATION is taken on board is not unlike that of a computer, however in reverse, that is to say, the cell or the atom etc, receive their ASSIGNMENT or COMMAND in an encrypted form. This is how the divine INFORMATION is fed to physical matter in encrypted form.

Question : How do *human beings* perceive such a COMMAND?

ELIAS : Human beings only perceive *the impact* of such INFORMATION. The INFORMATION I am talking about is *not* actually perceived as it were. Details however, like for instance *the ability to think*, are the results of the INFORMATION. – The divine INFORMATION effects that every molecule, every atom, every cell and the minutest of VIBRATION have to abide by an encrypted COMMAND, according to what a divine COMMAND *prescribes*. The divine SPARK however, that is to say, the divine IMPULSE is the “I-point” or if you like, the final stroke in regards to the INFORMATION.

- *Conscious, intelligent life is the result of the INFORMATION. – It represents the perfection within CREATION.*

Question : But there is also negative INFORMATION and it comes from within the realm of the antagonist. Are terrestrial human beings *joint accomplices* when we are dealing with cancer or other negative attacks?

ELIAS : Not always, but quite often. – As you are aware, there is a negative creation and the negative is *also* able to direct its INFORMATION at physical matter. Cancer, leprosy and other severe diseases spring to mind. Man is naturally able to open doors to this negative INFORMATION through an unhealthy lifestyle. To give you an example: The increasing pollution of the atmosphere through poisonous exhaust fumes of automobiles makes people more susceptible to mankind’s scourges.

Question : Can man *influence* his own INFORMATION?

ELIAS : *Under certain circumstances* man is *able* to pass on INFORMATION to physical matter. This particularly applies to his own body. One has undertaken experiments with plants for instance. One mentally concentrated on the growth of various plants. This mental concentration was of course directed at plants at various intensities. In spite of the same conditions like climate etc, the plants reacted to this mental concentration. Various results were recorded. The plants one directed thoughts towards to promote *positive* growth, *fared better* than the one’s one wished the exact opposite. What came into effect here was naturally the divine PRINCIPLE.

Question : Is the assumption that we are dealing here with the principle of healing correct?

ELIAS : Man can certainly imagine that he is feeling better. But there is a difference between imagining that one feels better and giving *oneself* the order to get better. But such an order amounts to nothing if *no* TRUST in GOD exists!

- *Man must acknowledge the divine PRINCIPLE!*

Will is connected to consciousness – and GOD is the GREATEST CONSCIOUSNESS and therefore also the GREATEST WILL! The human consciousness is not identical to the astral body and specifically not with the physical body.<sup>6</sup>

Question : We assume that the astral body can *take control* of the movement of paralysed limbs, if the correct commands are given. Is this assumption correct?

ELIAS : Yes, this is correct. But there must be a divine ASSIGNMENT *attached to it*. (CHRIST could do so.) Faith and conviction can have the same effect; the astral body can then temporarily, respectively representatively control the function of paralysed limbs or severed nerves.<sup>7</sup> You must however be mindful that the will, the desire, the command etc are always ONE, but that they can neither be identified with the physical not the spirit body!

Question : We are fully convinced that research into the INFORMATION is the only way to gain *complete* recognition of the psycho-scientific doctrine. One will then be able to verify GOD'S existence in a *particularly logical fashion*. – Are you of the same opinion?

ELIAS : That GOD can be verified as the INFORMER in this way is correct. Because INFORMATION is *life expressed* through GOD as it were. The effect of the INFORMATION verifies the presence of a *superior* INTELLIGENCE, of a UNIVERSAL CONSCIOUSNESS! This fact already became apparent from the first INFORMATION given to a planned CREATION. It was: “Let there be ...!” – This called the divine PRINCIPLE into being, namely: Compactness, change, construction of atoms around their nucleus, protons and neutrons etc. This was followed by the construction of cells, of inorganic and organic matter.

Question : Is this INFORMATION not also directed at the brain? Wherein lays the difference here?

ELIAS : I must emphasise: The brain is part of physical matter! The brain performs *relay functions*, but *it does not produce thoughts*; it only allows thoughts from one's consciousness to pass through. I emphatically appeal to all scientists within this field:

- *Investigating this INFORMATION is the key to the mystery GOD represents!*

The INFORMATION that originates from the INFORMER is an encrypted pattern that allows unlimited reproduction. This makes it possible to confer the received INFORMATION from one cell to another – the way a magnet transfers its magnetism.

Question : Can man's *thought process be influenced* via the INFORMATION?

ELIAS : To some degree certainly, but thoughts are *mainly* influenced through *inspiration*, that

---

<sup>6</sup> Consciousness is therefore also not identical to the brain. A fallacy that is still prevalent in medical circles.

<sup>7</sup> This is a good explanation for Christian miracle healings.

is to say, thought information reaching one's consciousness. *Disturbed* information *can* however also influence thought. But if the physical matter the brain consists of does not exactly abide by the divine INFORMATION, that is to say, does not develop according to the preconceived PLAN, the *effect* the INFORMATION should have has been *disturbed*. If the brain has been *disturbed*, the thoughts emanating from one's consciousness can only pass through it adversely affected.

Question : Is it therefore possible that all the *negative* thoughts so widely spread all over the world come from the camp of the antagonist and are the result of adverse *inspiration*?

ELIAS : Naturally, but these people have somehow *prepared* themselves for this *negative* inspiration through their inner attitude. They have adjusted, respectively, tuned their "spiritual antenna" towards a "negative" sender. We also consider this type of behaviourism to be *disturbances* within the divine PLAN. The people on Earth unfortunately know very little about these important facts.

Question : Is there a difference between the INFORMATION directed *at a cell* and the INFORMATION directed *at the spirit*?

ELIAS : This question causes me to coin new words. I therefore say: "*genetic* INFORMATION" and "*inspired* INFORMATION". There is a great difference here.

- *Genetic* INFORMATION is dispensed according to the principles computer run by, they are not given encrypted information directly (1967), but indirectly through a perforated strip of paper.
- *Inspired* INFORMATION is dispensed according to concepts, symbols and words. This information generally comes to you along telepathic lines.

Question : We find your ascertainment that thoughts pass through the brain extraordinarily important. Please give us further indications that this is so?

AREDOS : Excuse me for cutting in:

Thoughts *develop within the cosmos* and this on the personal FREQUENCY of an individual. Once a thought is formed – and this happens at about *one hundred times* the speed of light – it makes contact with the brain. One's consciousness, which is of a cosmic nature, sends the completed thought conceptually to the physical brain's central consciousness. This happens because every thought has an affiliation to the physical body.

Thoughts however do *not remain* within the brain, they are immediately *returned* to the cosmic consciousness. They therefore just pass through. If a thought demands a reaction from the body, the brain immediately performs its function as a relay and either brings the ASSIGNMENT to fruition or turns it down.

I will give you an example based on your own telecommunication technology: A long distance telephone exchange operates from within a building full of relays. The human brain works the same way. As you are well aware, the long distance calls do *not*

originate from the relays, ergo *not* the telephone exchange, but from the callers who speak *through* the exchange. This is how you must kind of imagine the principle involved here.

*Every* human being has his *own cache* of memories, conversations, impressions and thoughts within the formidable cosmos. One's consciousness has the capability though to *locate* things. It can *zero in* on the cosmically recorded MEMORY VIBRATIONS through an ACT of WILL. They also run through the brain's relays like a long distance call.

Question : During research into plants, one has discovered that plants have a CONTROL CENTRE that *controls* the processing of solar energy. This initiates a conversion process that produces sugars, proteins and other substances. One tried to replicate this process in a retort, but this was only *partially* successful. One does speculate though that it might eventually be possible to solve the mystery of the CONTROL CENTRES that impart INFORMATION to plants. It would then be possible for people to completely control plants. Would this solve any future food shortages?

ELIAS : One of these days, people will have the power to control the machinations of these CONTROL CENTRES, they will be able to emulate the way photosynthesis works within plants.

Man also possesses such CONTROL CENTRES and they govern the biological construction of the body. These CONTROL CENTRES however also receive INFORMATION from the divine LAW! We can already (1967) influence certain glands so that they react according to *man's requests*.

- Mankind could *live under better* conditions if it were prepared to *acknowledge* the divine ADMINISTRATION; it would then also be *a lot easier to recognise* the divine LAW.

All of these control points, respectively, glands, work not unlike a computer that puts a program into action. The PROGRAMMING however stems from GOD! What is of importance is the duplication process, because all of these "computers" duplicate themselves of their own accord and it does not require any further reproduction. You call this process "vegetative behaviourism".

Question : Can one therefore say that the divine COMMANDS are of a *vegetative* nature?

ELIAS : Yes, this is correct, but scientists shy away from this last hurdle most of the time.

Question : Do the SANTINER have the capability to influence plants' CONTROL CENTRES?

ELIAS : Yes, but in *another* way. The SANTINER group atoms according to specific recipes, that is to say, according to specific INFORMATION they have *delved into*.

Question : According to your present day standard of research (1967), would our scientists not have to *recognise* and also *acknowledge* a CREATOR by now?

AREDOS : If one looks at things correctly one realises that academic science has already reached

a point where they *have to* believe in the existence of GOD unconditionally. The sciences however do *not* follow the examples of theology by adoring a *humanised* GOD; they assume that there is a CREATIVE SPIRIT that does not have the theological name of GOD, but one that still remains *nameless*. One is aware that there *must be* an INFORMER and it would be good if the sciences would give this existence an appropriate name, because they have balked at the name “GOD” for centuries. INFORMATION in Latin is called “INFORMATIO”, meaning “CONCEPT”. This denotation would easily fit into your vocabulary: INFORMATIO DEUS.

Question : Do cells, atoms and molecules have something *akin to a mind* that enables them to receive INFORMATION and to abide by it?

Answer : One cannot really call this process “a mind”. But to receive divine INFORMATION – that is actually a COMMAND - does *not* require a brain. Man can also think, receive telepathic COMMANDS and deal with them either *with or without* a brain. There are cases where this became quite apparent, namely when a skull was opened that revealed *something that could not be called a brain*. The mind still worked perfectly in spite of the kind of destruction present. The whole organism, including all muscles and nerves, are in such cases *solely controlled by the astral body*.

The same process took place when the great healer CHRIST healed the lame and the blind. Through his enormous powers of suggestion, Christ activated the astral body and encouraged it to take control over all physical functions. This resulted in a *premature* psychic seeing or hearing or the taking over of the functions of muscles and nerves.

Atoms and similar cells can receive and store spiritual VIBRATIONS of the highest OSCILLATIONS. They are even able to infinitely replicate this cache, roughly the way a stencil allows infinite duplication.

It is important to remember that all INFORMATION *does not* come from physical matter, but that it actually represents a *spiritual* ENERGY that emanates from a UNIVERSAL THOUGHT CENTRE (GOD). Therefore heed the following formulation:

- *As pure nature, GOD is a UNIVERSAL THOUGHT CENTRE of enormous proportions! This is where all COMMANDS for all of CREATION emanate from.*

Question : Why does GOD then not COMMAND the people on Earth *to be good* and not to wage war?

Answer : This would only be possible if GOD would *once again take away* man’s free will. Due to the freedom of being allowed to make his own decisions, man is not obliged to abide by such COMMANDS.

But what GOD can do the antagonist Lucifer also manages to do. He can also direct his COMMANDS at atoms and molecules and naturally, specifically at the brain. This is how he creates *his own, copied creation*. The antagonist utilises the opportunities the INFORMATION offers on a regular basis. This is where epidemics, cancers, leprosy and many other terrible illnesses come from. Freaks of nature and abortions

also go directly or indirectly on his ledger!

Man however feels *motivated* by the satanic INFORMATION. He might have his own free will and based on this gift he could *simply reject* the satanic INFORMATION, but most people *do not do so*, particularly when we're dealing with atheists. They do *not* abide by the divine INFORMATION, but abide by satanic COMMANDS. The consequences are horrible.

GOD however does not want to put pressure on man. Man is allowed to find the right path on his own accord. The devil however is of a different opinion. He uses coercion *and he's very successful* –at least for as long as man is not so well informed about these mysteries that he can take counter measures.

The INFORMATION is the *most important segment* within the divine CREATION. It would have been *impossible* for you to comprehend this revelation a few centuries ago. But due to the advancements of present day scientific knowledge, you are able to comprehend this process more and more. You should however also *look at the consequences* this brings with it!!!

### **Why should you behave yourself?** (Transmission from the year 1962)

When someone is unaware of his TRUE EXISTENCE, he is spiritually so deprived that he *thinks* and *acts incorrectly* all his life.

GOD however allows you a glimpse through the veil that separates the here from the hereafter, because it is *not* GOD'S WILL that man should remain *ignorant* in this regards. Heaven provides sufficient evidence and this should be good enough for every sensible, normal human being to accept the TRUTH. There will always be *certain* people that will try everything *to destroy* or *to reject as incredible* any evidence of a greater, otherworldly existence.

For as long as your average human being *listens* to these BLASPHEMIES and the defamations of supernatural evidence, he will *not really be able to cope* with this life and will *not be able to make sense* of his existence.

This is the reason why *most* people *believe* that their existence only lasts between the day they are born and the day they depart this world. What is left is nothing more than an endless unconsciousness there is no awakening from. Only a number of churchgoers trust in a resurrection they have no real concept of and that is without a time frame.

There is not one single human being here on Earth that has not tried at least *once* in their life to contemplate this mystery. Alas, as they find no satisfactory explanations for their secret questions, they eventually give up and concentrate on their *visible* existence.

The *harsh fight for survival* and the *merciless environment* people are surrounded by, force them one day to ask the question: "Is it actually worth my while to be *good*?"

Why be good, if being good necessitates the curtailment of many habits, desires, passions etc or beyond that, even demands sacrifices? One feels that one would have to be pretty dumb to allow

all opportunities to live off the fat of the land pass one by, if everything is done and dusted after one's last breath. – This is where people struggle, where they get ensnared in a devilish trap that has dire consequences *after their demise*, because what was thought to be beyond belief before will then become inevitable TRUTH.

- Woe to man, if the *negative* desires retain the upper hand; they will take *superlative* revenge on him in his otherworldly existence.
- GOD'S great ORGANIZATION does not demand ascetic abnegation from *anybody*, but it does demand *account for* all positive *and* negative thoughts and actions from every soul.

Nobody should suffer from the illusion that even the slightest of VIBRATION caused by thought is ever lost within the cosmos. If this were the case, man would not possess the ability to contemplate or to remember.

- He, who is evil, *forfeits any chance of freedom!*
- He, who is good, *acquires this freedom* as a glorious GIFT from GOD, as recognition for his good will and responsible behaviourism!

### **Let there be LIGHT** (Transmission from the year 1958)

There is nothing throughout the universe that could be worse than darkness. This is why the direst fate for anyone one on Earth is to suffer from blindness. But there is however also another form of blindness and that is the blindness of one's ASTRAL EYES.

The otherworldly body at one's disposal after one leaves one's physical body behind is in its construction *very similar* to the terrestrial body. It also has a heart, lungs, kidneys and a brain and also all the other organs the terrestrial body exhibits, the difference being that there is *no digestion* and *no circulation* taking place. All sensory organs are however *fully pronounced*, but their functions are closely linked to the *spiritual development* of the soul. An evil, ill soul is therefore unable to utilise its ASTRAL EYES for years. Such a soul wanders around blindly.

There is only *one* medicine for such a soul, namely FAITH in GOD and brotherly love! CHRIST spoke about an awakening after death. The required explanations are lacking here, because the awakening that CHRIST talked about was the *awakening of one's sensory activities* to their ultimate potency in GOD'S realm, which *surpasses* every possible terrestrial perceptual potential *by far*.

Most people unfortunately live a *thoughtless* and *spiritually blind* existence and never give the *reason for their existence here on Earth* due thought and respect. But there are a number of SEEKERS of the TRUTH that have an *inner sense* that there must be something HIGHER than their earthly existence. These people are searching, but they cannot find the TRUTH, because their environment has *forced* such a lot of doubt on them, that they continue to live in ignorance.

This is why I want to give you a few pertinent tips of what you have to do to find the TRUTH, because I am one of GOD'S authorised TEACHERS, who came here *to help* you:

Man *cannot find anything* in total darkness even with the best intensions, especially if the space he's looking in is of an eternal dimension. Where there is not the smallest of light shining, nothing, absolutely nothing can be found or recognised. This is an absolutely objective experience, something everybody here on Earth can verify.

But GOD, the LORD said: "LET THERE BE LIGHT!" – However I say to you my dear brothers and sisters incarnated here:

*If you want to search for the TRUTH and knowledge about all things, do not search in total darkness, but in the regions of LIGHT!*

- Where there is LIGHT, there is also life. Where there is LIGHT, everything can be seen clearly. Where there is LIGHT, there is also warmth. Where there is LIGHT, there is peace and harmony, there is beauty and progress. The REGIONS of LIGHT are divine.
- The spheres of darkness are regions of death, dread, coldness and aberrations. If surrounded by darkness, man commits one mistake after another, experiences one disappointment after another. Darkness is ruled by decomposition and decay, by stench and chilling horror.

When we talk about LIGHT, we primarily mean *spiritual* LIGHT, because it is actually the *carrier* of INTELLIGENCE and the substance of the divine CREATION that governs physical matter. This is why this spiritual LIGHT cannot be ascertained within physical matter, because it rates *well above* this dimensional world.

- Matter emanates *from within* to the outside.
- The SPIRIT emanates *from outside* into confined matter.
- LIGHT makes *perception* possible and it becomes cognisance within man's soul.

*Darkness prevents any insights and leads to doubt and to disbelief. LIGHT, in any shape or form, is positive.*

### **The meaning of life** (Transmission from the year 1962)

If man would only have *one* life on Earth, that is to say, would no longer continue to live *after* his demise, the human existence here on Earth would be absolutely meaningless. There *must* therefore be an interest present that facilitates and promotes, respectively maintains the human existence in the here and the hereafter. All progress and all development are unthinkable without such an interest.

But *who* could actually have an interest in such a development?

One must always ask the *right* questions in order to receive the *right* answers! A lucid explanation is lacking in all questionable cases, because completely absurd questions are asked in the first place.

People are actually interested!

- *GOD has the greatest INTEREST in the continuing evolution of HIS CREATION, in the fulfilment of the PLAN, in the attainment of an initially set GOAL.*

Man is supposed to be here on Earth *to learn* and to amass a whole series of experiences and insights. It is therefore absolute nonsense to assume that one's physical demise *extinguishes* all mentally acquired results. This would not help the pupil at all. The main reason for this twisted contemplation lies in the fact that people cannot *remember* the life they lived *before* their terrestrial existence, it doesn't matter whether on a spiritual or material plane of existence.

According to common knowledge, man is supposed to emerge from darkness, without consciousness. He therefore *believes* that he must also return to this unconsciousness. He is aware that one must return to whence one came from. This is correct – the difference being that one's consciousness for this life on Earth is extinguished, respectively left behind, for very valid reasons, namely that a newborn citizen of this world is *not burdened by anything* that could *hinder* his progress. The memory of a previous existence could easily tempt him *to take revenge* or *to fall prey to old, negative habits* – or *to lose* his objectivity in regards to his *present* existence.

- *The world of spirit however endeavours to render assistance wherever the lightest opportunity presents itself in order to help and to bring elucidation. – What is meant here is naturally the positive spiritual world!*

These elucidations are however confronted by enormous obstacles: A lot of people fear an existence they are *not completely familiar with*. They are afraid of *something that is uncertain* – and this is why they reject such indoctrinations outright.

- *If people would just make a small effort, they would be able to find out enough information to not have to live with this uncertainty.*

Equipped with good will, life in the hereafter offers great advantages. *Only the negative*, only those that stand in the way of GOD'S PLAN, those that oppose GOD, suffer disadvantages.

You find it difficult to live a righteous existence...

**This is an enormous aberration!**

- The best prerequisites for a righteous existence are the ability *to recognise* negativity and *to avoid* it at all costs!
- You can only conquer negativity by consequently rejecting it. *This is the only way it can be conquered.*
- You should *not fight* negativity, you must completely isolate it and if you do so, it will eventually destroy itself!

## Does life have a meaning? (Transmission from the year 1967)

Well, many a philosopher has asked himself the question of *what possible meaning* the human existence could possibly have. One has asserted that this question cannot be answered. –

**This is certainly an aberration**, because this question can *certainly be answered* if the divine perspective is *taken into consideration*. Philosophers however would like to solve the greatest problems *without* looking at the divine PERSPECTIVE.

If one *would* only live from the day of one's birth to the day of one's demise and this would be the end of it, there would be *no sense in one's existence*. To dare to suggest that such an absurdness existed within GOD'S CREATION would be an incredible underestimation of GOD. Even if one omits the word "God", the concept "nature" still remains. But *nature is naturally identical* with GOD – and who will assert that it is not incredibly intelligent and forward-looking?

The *human* existence naturally makes *more* sense than the existence of all other creatures. If man however lived a meaningful existence, his life on Earth would still be in vain, if he would take his experiences, his self-knowledge and his spiritual maturity to his grave where all the characteristics gained throughout one's life would simply rot away.

*Atheistic* thought actually assumes that such acquisitions can only survive either *in the written word, in art form* or in *cultural values*, whilst man must relinquish them after his demise. That one is dealing with a major aberration here, plainly with an atheistic thought model, has *not been correctly* identified by all the major churches of this world. It therefore comes as no surprise that this has directed mankind along a completely wrong path.

If GOD or nature created a living CREATION in such an incredible way, this enormous effort, no human being neither knows or completely grasps in its entirety, would be completely meaningless if it would not find *recognition*. This is the reason why GOD created man, *not just* on this planet, but on *many* other planets also. People should *admire, acknowledge, perceive and contemplate* the enormous superbness of this CREATION and try *to improve* and *to supplement* it.

GOD did *not* create this superb, comprehensive and versatile CREATION *for animals*. There are certainly animals that also profit by it, but an animal is *incapable* of *philosophising* over creation or of *contemplating* its development and the enormous effort that produced it. The human mind however *can do so*, but the people on Earth unfortunately make very little use of this opportunity.

- *The meaning of the human existence is therefore very clearly defined. It has been cleverly included in the divine PLAN of CREATION.*

What meaning would the enormous effort of UNIVERSAL CREATION have, if a human being here on Earth would only exist from the day he was born to the day he dies? – And if he was unable to know anything about a CREATION that covers the whole universe? This is why the opportunity is there for man to reincarnate in the farthest regions of the universe according to his level of spiritual development.

- *Over eons, man will eventually pass through all of CREATION throughout the universe.*

The highest goal however is *mental, respectively spiritual freedom*, that is to say, *the perception of the spiritual regions*, the so-called hereafter, because an unimaginable CREATION of

SUPERLATIVE BEAUTY also exists there and unfortunately also of superlative ugliness, which however is *not* of GOD'S making.

### **Self-control** (From the SPHERES of LIGHT)

Well, most citizens of planet Earth *are unaware* of the actual *meaning of their existence here on Earth*. Above all, they are unaware of the fact that they are *guests* here on Earth, otherwise they would *behave like guests*. It is a fact however that every human being returns to Earth with a cleared, a razed consciousness in order to grasp an opportunity to evolve spiritually.

- *Every human being must make some contribution in order to progress, they must above all aim their will in a positive direction.*

Many however are of the opinion that they are not required to do so, they feel that people should accept them the way they are. That this is an **aberration** however becomes immediately apparent when one takes *the meaning* of a terrestrial existence into consideration; because the aim is to become *more perfect* and *better* – and *not* to remain the way one is.

- *To improve oneself means to become a HUMAN BEING. This requires strict self-control.*

Psycho-scientists have correctly identified the fact that an aspiring human being requires *meditation* in order to contemplate difficult problems. Many people however do not know *what* they are supposed to meditate *about*. – Well, this is very simple:

- *There is no better meditation than self-control, that is to say, to contemplate one's own self.*

The more often one practises this self-control, the sooner one realises the way *one is*, the sooner one recognises *one's own* shortcomings. But beyond that one *also* recognises the shortcomings of others, which one is then *better equipped to assess* – thereby avoiding a lot of irritation.

Self-control is the best religion that exists, it inevitably brings progress. But one has to be frank in one's assessment of self!

It is apparently of little use when *somebody else* tells you that you have one flaw or another that you should get rid off. However it helps *a lot*, if one admits *to oneself* to having a particular flaw.

One might not inclined to deal with them right away, but after a period of applying self-control, these flaws *continue* to make an appearance until they're *perceived an annoyance* so that one is inclined to get rid of them.

Advice should *never* be given under threats or with force; one may *not force it upon* someone, otherwise it becomes ineffective, because generally speaking, people are pretty stubborn and they immediately balk at any enforced advice.

- *Advice must be presented in a humorous and careful way and one must allow the other party sufficient time to deal with it.*

All of this doesn't just apply to adults, it is also appropriate in regards to children and adolescents. Schools and universities lack meditation classes that teach self-control. Something like this already exists on all the other planets where human life exists.

The cultural level on this Earth is unfortunately of a *particularly low standard*. Just how much money is wasted on nonsensical, meaningless "art"? The means to further people's spiritual development is always lacking. – What kind of planning is this?

We are very pleased about the fact that we have a very humble agent at our disposal here that makes it possible for us to express ourselves. Even if our DOCTRINES are not world renowned at this point in time, they have not been given in vain. One will get back to them in years from now, because one will realise just *how important* and *how pertinent* they really are.

### **About impetus** (Transmission from the year 1966)

Well, man on Earth requires an impetus that spurs him on to *higher* performances. Man is endowed with a certain amount of impetus right from birth. It pertains to the preservation of life and propagation.

But that alone is not enough!

Man would *not* progress developmentally. There must therefore be a target that entices him. When somebody pursues such a target, one talks about *impetus*. Depending on the kind of target pursued, the impetus is either stronger or weaker. Prosperity for instance is such a target – or it can be a man or a woman, maybe the longing for a child. It would take too long to list all desirable targets here.

But you have to be aware that there are HIGHER TARGETS that you are *unable to perceive* here on the earth plane. The churches, respectively the major religions, have endeavoured to point them out. They have not quite succeeded.

Most people on this planet are of the opinion that *amassing money is the best target to aim at*, because it enables one to gain and to buy anything and everything. This might have some validity up to one's physical demise, but man's existence actually last much longer than just to his physical demise. Well, it actually really takes off after one's physical death!

*The churches remain silent in this regards*, because they are not sufficiently informed and they avoid any new instructions. The impetus to inform themselves is *lacking* most of the time. The target that lies *beyond* one's terrestrial existence does *not seem worthwhile* for man on Earth.

You unfortunately lack *an insight* into the spiritual world. One is however *unable* to reach those regions of the spiritual world with stolen or illegally obtained means, which make people extremely happy and content. *No* amount of money will get you there.

There are those who have heard about this, but they relegate these types of reports to the world of fantasy. This might sound extremely fantastic, but it is certainly no fantasy. There are also places on Earth that are absolutely fantastic, this does not make them fantasy, but absolute reality.

Where do these reports about the nature of the otherworldly regions come from? They are *not*

accounts of *terrestrial* people; they come from human beings that live in the spiritual realm. Every human being will one day join them there.

There is affluence and poverty to be found in these regions also. Maybe not quite the way you might imagine it, but it is still of immense importance. No human being on Earth can possibly be *as poor as* it is possible in the hereafter. No human being can possibly be *as incredibly rich as* some are in the spiritual world. The unfoldment of any type of magnificence is possible – but all types of disappointments and retrogression are also possible.

When we look at the life people lead here on Earth, we must unfortunately ascertain the fact that there is quite a major impetus towards reaching the *lower* spheres – and only a *slight* impetus to reach the HIGHER SPHERES. – Where is the logic in this?

One could now assume that the impetus towards a positive development is *very difficult*. This however is not the case. One can *promote* this impetus *very quickly*.

Do not allow yourselves to be confused!

The HIGHER GOAL can be achieved by *everybody*! An alleged death can naturally not be considered a HIGHER GOAL.

### **How can people live in a DIVINE SENSE?** (Transmission from the year 1960)

Well, take a look at the nations of this planet!

There is *not* one nation that does *not* believe in higher, invisible POWERS in one way or another. Even the nations that live a politically enforced atheistic lifestyle cannot extricate themselves from the invisible FORCE of a higher ORDER.

- There is *no one-sided, absolute* UNGODLINESS, because even the most revolutionary atheist fears a higher JUSTICE and a sudden CENSURE by GOD.

Take note, it is man's defiance that wrestles with GOD and the devil.

Christian church dignitaries and representatives are of the opinion that an atheist or a communist must disappear in a spiritual abyss from whence there is no deliverance.

Well, the human race has still no real concept in regards to GOD'S REALM, because you have managed *to falsify* and *to destroy* most of the information GOD gave you. You now do not know how to live according to GOD'S LAWS. You allow yourselves to be guided by the laws of countless sects that would like to *force* their own laws upon you in their fanatical pomposity and arrogance - even though they stem from the brains of lost seekers of the truth.

If you would only know how simple GOD'S LAWS, who signify your whole happiness and your whole blessedness, really are.

- He, who listens to the mind, *no longer* listens to the INNER VOICE of the LORD, because your mind underwent a *one-sided*, a *biased* development and is *not able* to grasp the ABSOLUTE.

I will tell you *how* you can live according to GOD'S WILL so that no harm can come to you:

- Always remember that GOD is the CREATOR of *everything there* is and that HE is LOVE and JUSTICE.
- Treat your fellow man with *kindness* and without distinguishing between race and creed.
- Try as best you can to maintain a *healthy measure* in all things in your life.
- *Take pleasure in your life* and do not lean towards wearing the gown of a penitent.
- Do *not* withdraw from society, but *maintain contact* with your fellow man.
- Do *not* steer clear of the dangers your brother and sister find themselves in.
- Remember that bliss is just remuneration for *good* thoughts and *good* deeds!
- *Avoid any type of intoxication and stupefaction*, because all intoxication eventually passes and leaves enormous evil behind, an evil that ends up in illness!
- Commit to memory the fact that every thought represents a prayer to GOD and HIS REALM.
- Have the courage to withstand any coercion – even if it comes from a church, because all coercion is *ungodly*!
- Do not speak ill of those that have gone home *before you*, because they might be there to welcome you one day!
- Show great respect for the formidableness the angel Lucifer represents, but despise all his negative deeds and inspirations.
- Do not challenge Lucifer through insults, abusive language and suspicions – he will only answer with WAR!
- Avoid the stench of *the spheres of the lost* and stop smoking, because it will be the death of you.
- Avoid drinking alcohol *to excess*, particularly *spirits* in any shape or form, because it has a negative, pathological effect on your brain cells!
- Do not delight in *alleged* masterpieces within the arts that contradict all laws of nature and only represent the derision of GOD and of decency.
- Avoid and despise all *noisy propaganda*, because it abuses your nerves in order to gain an unfair advantage.

Heed all of this, because it makes your life in *this* world, and *also* in the GREAT WORLD beyond the grave, *easier*.

*It pleases GOD to see happy and healthy people.*

## The path to betterment (Transmission from the year 1964)

Well, the reason for man's existence here on Earth is to promote his *higher* development. But where does this development eventually stop?

All of mankind is unfortunately of the opinion that one's *personal* development only takes place up to one's demise and that it will then come to a sudden, absolute stop. This opinion is the **most fateful mistake** a human being can fall prey to.

The path of development is *not* a collective affair; this development is for every individual human being *highly individual* and *endless*. This is why nobody should ever get tired of working on themselves and their fellow man in this regard.

The path of betterment is an *infinite* path, it is universal and it has nothing to do with man's physical demise. This is the reason why it is *impossible* for a human being to be *disadvantaged* through one misfortune or another. The incalculable perspective of an ETERNAL EXISTENCE under various conditions, offer every striving, every individual human being the opportunity to achieve all the things that are positive.

- *You can do without negative pleasures, the negative pleasures of life and soul in your life, they are not part of your HIGHER DEVELOPMENT!*

All insights, memories, talents and experiences acquired during one's life on Earth are *completely* at the disposal of every human being *even after* their disembodiment. Well, one can even have access to them whilst here on Earth. This is why talking about "eternal peace" or "eternal rest" is absolute *theological nonsense*. Death may not be confused with sleep, it should also not be put on an equal footing.

- *Do not mock spook*, because it can be *educational* to you even if it is negative. It is after all a sign that ETERNAL LIFE exists!

Do you believe that your world would have reached its present state in all respects, if the one's that have gone home *before you* did not make an authoritative contribution to the terrestrial development from the hereafter? These otherworldly, respectively disembodied, souls are at the disposal of every human being. This spiritual cooperation one calls *inspiration* is too great for you to imagine.

- *At least 40%* of your technical and scientific development is due to those that have "died" and are now assiduously active on your behalf. He, who is in a position in the otherworldly region to be positively active on your behalf, has found his way into heaven.

*Heaven has no room for the idle and for the spiritually deprived. Heaven demands spiritual activity and the highest performances to support GOD'S creative activity!*

- Those that are *already* aware of what conditions are like after their demise have an advantage! This insight however *obligates one to better oneself!*

No human being is able to improve if he is unaware of his real shortcomings and the gaps in his knowledge. This is why every one of you has to *know exactly where they're at* before they

undertake this journey of improvement, because one cannot start a journey from the wrong end, this would only take one on the opposite direction.

The only possible beginning to human redemption *begins* with *correctness*. Every human being must *educate* himself or herself in regards to *correctness* day after day and hour after hour. You will then recognise just how incorrect you are at every opportunity, yes incorrect down to the last thought that you dare to express *uncontrolled*. Only correctness brings human redemption and deliverance. “Absolution” has never ever improved a human being!!
