Protocol extracts from the *Menetekel* from the years 1956 to 1975.

Theme : **Science, technology and art**

**Addenda 1** from the years 1956 to 1975

The following text to this theme was psychically received by the Medialen Friedenskreis Berlin (MFK)<sup>1</sup>, a Christian/Spiritual community, between 1956 and 1975. The transmissions form a part of the *Menetekel*, a collection of protocols of around 4,500 A4 sized pages amassed over 20 years and they have recently been restructured. All of these mediumistic messages were left in their original form, even if similar questions were repeated. The work of the two automatic writing mediums, *Monika-Manuela Speer* and *Uwe Speer*, began when they were 15 and respectively 17 years old. The total production of the MFK-Berlin (Medialer Friedenskreis Berlin), the *Menetekel* and the 21 transmissions from the space-brothers are considered the absolute pinnacle of psycho-scientific research. Other spiritual circles have often tried to copy the work of the MFK, but its quality was never achieved. The reproduction and distribution of these rearranged messages and protocols is explicitly encouraged and is not covered by any copyright.

My translation: Psychic Peace Circle, Berlin

---

## Preface by the publisher

The natural sciences and the psycho-sciences are distinguished from one another by their contents. Science amongst other things is the process of *methodically carried out research* and beyond that also *a doctrine*, the presentation of results and methods of research. The sciences always begin with collecting, classifying and describing a subject matter; they then proceed with establishing hypothesis and theories.

Science, according to its aim, is either theoretical, that is to say, pure science or *applied* or *respectively practical* science, the way the *Psychic Peace Circle, Berlin* applied it.

To study and to have *theoretical* knowledge about the supernatural is not enough. –To use this knowledge to write books about it, because one *believes* to know more about these mysteries than anybody else is also not enough. – Supernatural truths must be *personally experienced*, that is to say, with one's *own* physical body and one's *own* soul. Only the “inaugurated” are qualified to criticise them and to give account of them. Psychologists or para-psychologists cannot utilise any of their school acquired knowledge, even if they experience supernatural events first hand.

Bad Salzuflen, February 2008

*Years 1956-1958 (incomplete)*

## Existence and perception

The reason why there is so little known about spiritualism is due to the fact that all supernatural psycho-science was combated or forbidden in Germany for *political reasons*. Other nations made greater progress in this field of knowledge.

This is the reason why apostles of the truth find it so difficult to recruit people to accept the truth. Germans have not been enlightened enough in this respect. The greatest obstacle consists in that one is asked to believe in something invisible where one's mind tells one that *where nothing can be perceived, nothing exists*. This is where a decisive mistake is made:

- *Not being able to see something doesn't necessarily mean that it doesn't exist.*

Radio and television exist and nobody doubts the fact that they do exist, even though everybody requires an *apparatus* to perceive, respectively receive it. But we unfortunately do not have any *technical* apparatuses to gain access to the hereafter and this is why one doubts these types of reports.

But we do have apparatuses to grasp the hereafter. They are however not of a technical nature, but they function very well. These apparatuses do nevertheless require a spiritual ENERGY to activate them. Electricity is not enough, it must be *OD* energy. The obverse lifestyle of Western nations called this ENERGY "*OD*", but allowed it to atrophy. This is why there are only a limited number of people who still possess enough *OD* to enable us to undertake a thrust into the hereafter.

- *We call the people who can utilise their over-supply of OD for supernatural activities mediums (mediators).*

Those with enough *OD* energy can convince themselves very easily of the hereafter's existence. But those that do not possess enough of this precious *OD* cannot perceive anything and they can also not understand what mediums are all about. These people consider themselves "*normal*" and they believe that nothing else exists beyond their own perception. The reality is that these people are not as normal as they think they are, because they *lack* one of GOD'S ENERGIES, ergo a gift of grace.

People endowed with GOD'S grace are *a lot better off* than "normal" people, because they can and may believe in the other LIFE and they have the *evidence* in the form of their own personal experience in their hands. It is however now the assignment of these people to tell their fellow men about it and this is the hardest assignment there is. Non-swimmers are reluctant to enter water, even though other swimmers continuously assure them that they will not sink. It was the same at the times of CHRIST.

Please show a little more trust in the invisible, even though there are no *technical* apparatuses yet to make everything invisible visible. GOD'S hand weigh heavily on prophets, that is to say, the medium is deeply saddened about the fact that it is so infinitely difficult to convince less talented people that the *actual* WORLD is infinitely larger than one assumes.

Those with sufficient OD ENERGY are able to establish contact with just a liqueur glass and an alphabet board. Beginners will initially be lied to by base spirits, but they will *recognise in spite of this* that there is also *another* FORM of EXISTENCE and that life does *not* end with one's physical death.

Karl Marx coined the calamitous sentence: “*Physical matter thinks*”. – Physical matter does *not* think, it is a substance that accommodates cosmic intelligence (ergo a soul) and allows itself to be guided by it. Molecules are BEARERS of ENERGY and this ENERGY is also required to facilitate the activities of the spirit.

January 1958

## Shame, dishonour and disgrace

Out of control evil grows exuberantly in all fields of science and technology and in its final consequence, can lead to the destruction of mankind. We are dealing with the ineradicable fact of *dogmatism*, ergo of *being right all the time*. One asserts that to err is human. But do we really require mistakes? – Is there an opportunity to avoid mistakes?

- *Mistakes are of a demonic nature.*
- *The truth is with GOD.*

To end up on a *path* that leads to aberrations is unavoidable for us, if we compromise in any way in our search for the LIGHT and the truth. A scientific mistake has dire consequences. A technical mistake shows the same results. But there is one direction giver that can help us to eliminate any mistake with absolute certainty in spite of this. This universal source of the truth is called GOD.

The sciences and technology are highly motivated *to avoid this* source of the truth and prefer to pursue their *own ways*. Their own ways however lead them to make mistakes more often than not. The results of these mistakes vary a lot and their gravity also varies. The serious consequences are recessive in most cases, that is to say, they must be dealt with by the next generation.

These ungodly aberrations and mistakes are *often* rewarded with *diplomas* and, as a printed dissertation, added to the curriculum. This nonsense is then discovered years later whilst the instigator is already beyond the grave and can no longer be asked to give account by terrestrial human beings.

The representatives of scholarliness presently living on this Earth in these times of aberrations do *not, under any circumstances*, tolerate accusations of so-called human errors. As members of academic dignity they feel beholden to not allow any slur to mar the overall machinations of universities and similar state-run organisations. These people promote ungodly aberrations and they are willing *to defend them* with their body and their soul, they are also prepared *to attack* and recklessly destroy the “dangerous” truth wherever and however possible. These people regard their failures as an inefaceable dishonour and shame. *Even though they recognise the truth*, they do not have the courage to openly acknowledge it. They are devoid of remorse and also feel no shame. With the help of negative inspirations, their school trained intelligence is fully engaged in salvaging their mistakes. Their endeavours unfortunately find plenty of support amongst their colleagues who suffer from similar afflictions and who feel obliged to interfere to maintain the status of their own mistakes.

- *Those that recognised the truth for what it is and still knowingly defend their mistakes out of self-aggrandisement blaspheme GOD in the most despicable way and condemn themselves in the process.*

- *According to the inescapable LAWS of the divine universe, every debt must be atone for – and the above mentioned trespasses make no exception.*

The sum total of presently taught aberrations is incredibly large. This largeness is mirrored in the adversities terrestrial mankind is currently afflicted with. – A mistake may seem extremely intelligent, but it still lacks the foundation of the divine principle at work in spite of this, it is therefore not an insight, but *remains* a mistake even if its consequences have *not yet* been realised.

*Spiritualism* also suffers from the rod of human *narcissism*. The facts of one's continuous existence after one's so-called death are discredited through *false* conclusions and pseudo-truths. This has *nothing* to do with academic dignity!

\* \* \* \* \*

February 1958

### **Spirit analysis is incorrect**

The denotation “*spirit*” forces a derisive smile on “enlightened” people's faces. They immediately think of superstition, self-deception or pathological delusion.

- *Almost all of mankind* would be superstitious or crazy if this was the case. Contact with the WORLD of SPIRIT is *too multilateral* and *has irrefutably taken place for millennia* all over the world.

It is of course very difficult for terrestrial citizens to imagine this WORLD of SPIRIT and in particular the machinations of so-called spirits. Your “normal”, that is to say, your *psychically atrophied human being*, hardly ever perceives anything from the world of spirits, well at least not consciously. The classification between spirit and soul already causes difficulties with your average person. The spirit (gr. *pneuma*; lat. *spiritus*) in its composition is fluid, more ethereal than gas. One also assumes that this invisible fluid can compress under certain circumstances. Therein already lays a great mistake. The analysis of spirits is not correct.

- *The spirit is not fluid, but an absolutely solid body whose solidness can penetrate less solid matter, that is to say, loosely arranged physical matter.*

The *reverse* of what one erroneously assumes is therefore true. Compared to the spirit, the flesh and blood body of a terrestrial citizen is a *very loosely* put together object. The high water content makes the body even looser so that the more solid and immortal spirit can completely *penetrate and fill* the body with ease. Human beings who live beyond our physical perceptions, ergo so-called spirit beings, feel absolutely physical and they see *our material world as somewhat fluid-like*, something that hardly present a hindrance.

Average terrestrial human beings have lost their psychic perception capabilities to a considerable degree. They are *less psychic* than in the past and they can perceive the overall appearance of the universe to a very limited degree. The physical human body is a prison that restricts the soul so severely that it can orientate itself only with the help of its *organic senses*.

Once death occurs, the soul, with its absolutely solid spirit body, leaves the physical body it occupied up to then and the physical body offers no hindrance, because its structure is of a more

diaphanous nature. The diaphanous nature of “solid” materials, this applies to metals also, can be faultlessly proven with the help of an electro-microscope.

Based on the material insights of today’s science and technology one can rightfully assert that human beings in the hereafter (souls) are *ultra-beings*. This means that these ultra-beings already occupy every terrestrial human being and that they guide and control them along magnetic principles until this principle is disturbed to a degree where the magnetic attachment to the physical body is abrogated.

- *Life as such is therefore not an independent principle, but the undertaking or the movement of the soul. Life cannot be destroyed, it cannot be extinguished like a flame. Life can only be separated from a physical, diaphanous body. Life escapes to the cosmos, but it does not come to an end. Life is also not a mass-principle, it is individual but still a part of the universal spirit called GOD.*

The UNIVERSAL LAW of the cosmos states: “*Thou shall not kill!*” To think that this means the extinguishment of an individual life, is incorrect. One can also express this DIVINE LAW in *more comprehensible* words:

- *You may not separate the soul from its physical body. You may not prematurely push GOD’S life-principles into a different form of existence!*

*All of us are spirits!*

There is nothing more concrete throughout the universe than GOD’S EXISTENCE. His spiritual realm occupies second place. Those that tear themselves away from GOD end up losing their MIND.

Ungodly people therefore have a *false concept* of life, the world and of invisible UNDERTAKINGS. No university drummed-in knowledge or academic title protects the spirit from this calamity. Ungodliness equates with a high degree of loss of mind. People who have lost their inner divine spark in one form or another represent a *danger* to the rest of mankind.

\* \* \* \* \*

A number of experts within the sciences asserted that they can, *with the help of tricks*, reproduce *every* phenomena spiritism and spiritualism come up with. This was their best evidence that everything is based on deception or accidental self-deception.

Such counterevidence is completely useless and to be rejected. Just because these “experts” can reproduce spiritual phenomena only with the help of trickery doesn’t mean that they *are* experts in the field of spiritualism. Only once these so-called experts can evoke *genuine* phenomena *without* nifty trickery can they be called experts within this field of knowledge.

Spiritualism is not interested in any way to fool anybody with the help of difficult tricks. Spiritualism absolutely doesn’t need to resort to such shenanigans. Supernatural phenomena eventuate *out of the blue* and they are sufficiently convincing. They convince all those who participate.

But when science invites the best mediums into their laboratories, where *only* sceptics are at work, to test their curiosity paired with their ungodliness, the mediums are fools to accept this invitation,

because they then enter a danger zone that offers insufficient PROTECTION and they fall prey to demons. The curious will be disappointed and exult: “The medium suffered a mental breakdown and behaved hysterically...” etc.

- *No matter how good a medium is, it should never dare to leave its circle. This community circle arduously established its otherworldly PROTECTION with the help of MESSENGERS of LIGHT and this over a long period of time.*
- *Every medium that works on its own is endangered and can fall prey to possession.*
- *The location the medium uses for its work should also not be changed. Every change of location demands the reestablishment of spiritual PROTECTION.*

\* \* \* \* \*

## Questions and answers

Question : The sciences rack their brains over the future food production for an ever increasing population. How do you see this problem?

ARGUN : This problem will soon be no problem anymore, because one has already taken steps to utilise nuclear energy for peaceful purposes. I am talking about those scientists that have the health of the people in mind, ergo the positive side. With the help of radioactive radiation one will be able to irradiate plants through a complicated process in order to achieve a very high nutritional standard.

Question : You mentioned the peaceful utilisation of nuclear energy. But how does one deal with the nuclear waste that is created when nuclear energy is produced in a controlled nuclear reactor?

ARGUN : This is the greatest problem. One still lacks the appropriate apparatuses, but one will eliminate this problem one day in spite of this, terrestrial people on their own will not overcome this, it requires the help of a people that is well advanced of your society.

- *Mankind will receive this help, but only if people are patient and if they cease to explode nuclear devices.*

(Comment: We can see here that ARGUN indicates that help from another race of people is required. These people do however not live on this Earth. A Hamburger working circle received a message that we can expect this help, that GOD will send this help, that is to say, will send us these helpers.)

Question : Are various terrestrial *sciences* and *the arts* also fostered in the sphere of the LAND of SUMMER? Is it a fact that medicine, theology and jurisprudence are not fostered there?

ARGUN : Of course they are – and this is conveyed to people as a great gift through *inspiration*.

Question : Through inspiration? – How come?

ARGUN : The physician or the scientist becomes the *unknowing* medium that receives this inspiration.

Question : What's with *Darwin's Theory of Evolution*? Scientists rack their brains about whether human beings descended from apes. Is Darwin correct?

Answer : Apes are a separate species. Human beings never had any connection with them even though they are similar in many respects. Human beings arrived on Earth through the materialisation of their spirit, ergo the power of their soul to then develop into Neanderthal Man.

- *Neanderthal Man however received something no animal possessed and never will possess, namely a human soul that constantly grows and cogitates over why it exists and who created it.*

Darwin said: "*I gave people a theory and they turned it into a doctrine.*" – Something else: Apes always had different eyes to those of human beings. The eyes of human beings were and are always *more animated* than the eyes of animals or gorillas for that matter. It might not be immediately apparent, but closer scrutiny and comparison with those of apes should allow every reasonably intelligent human being to see this.

- *Apes are a satanic creation. GOD created man in HIS image. – Satan also wanted to have something in his image, because he constantly tried to copy GOD. After many attempts, gorillas turned out to be the most similar creatures.*

Question : What is the pertinence of the races, particularly in regards to GOD'S creative plan?

ARGUN : In regards to the various races we can say that GOD always left lots of possibilities and assignments open for individual things, with everything HE created and will still create. The races here on Earth are therefore there to avoid monotony, to configure the world *diversely*.

Comment: Diversity can also be found in animals and plants. Creation has a profusion of various species.

Question : We read that mixing refreshes the bloodline; whilst genealogists assert that mixing the races is not beneficial and actually a mortal sin.

ARGUN : Mixing the races may only proceed slowly, *very slowly* indeed. You should not interpret the things that I just told you in such a way that it sound that it is man's sacred duty to mix with other races. GOD will arrange things according to HIS will wherever it seems appropriate. This mixing will eventuate *so gradually* that you will hardly perceive it, this is the only way something positive will eventuate from it.

Question : Are you saying that everything that takes place *at a slow rate is positive* – and everything that pushes upwards *rapidly* and *in haste is evil*?

ARGUN : GOD has time on HIS side. A whole eternity. – But HIS antagonist (Lucifer) is afraid that he will run out of time. He wages a futile, fanatical war against GOD and knows deep down that he *must succumb* eventually. – The following must be added in regards to race: It is *conditional to karma* and it is supposed to teach people to live in harmony with one another in spite of their different skin colour. There are more reasons. One of them is:

- *If there were no other races, mankind would be confronted by the fact one fine day, that it has no other opportunity to mix with real outsiders, ergo mix with fresh blood. This would be the demise of mankind, a slow decline.*

GOD prevented this from happening by creating the races. After many, many years people will mix with a *presently hated* race so that a *completely new* type of human being develops. – Life is filled with wonders!

Comment: We can see that the heavenly FATHER is and remains the complete CREATOR.

Question : Does the possibility exist that human souls lived in past embodiments as animals or plants on *another* planet?

ARGUN : My dear friend, as you are already aware, this Earth you live on under the connotation of “human being” is an intermediate level for *higher* developed as well as *lower* developed human beings amongst inhabited planets.

- *The soul of a human being can indeed be reincarnated, but not in a creature of flesh and blood or in a plant, but certainly as human beings on other planets throughout the cosmos.*

GOD would *never* do such a thing, because this would be beneath the dignity of the souls that fulfil their assignment in GOD’S service. GOD loves souls, creatures and plants, but HE groups them according to HIS LAWS in spite of this my friend.

Objection : I gained this opinion from the *Theosophical Society* which asserts that people descended from animals, respectively from plants. But not in reverse.

ARGUN : The soul of any creature can and is reincarnated.

- *Animals do have a soul! Animals also possess their own character and they also end up in the spheres your souls end up one day, all according to character.*
- *Plants however only possess a certain nerve centre that GOD’S wonderful LAWS use to give instructions in regards to reproduction and actual existence.*

Leader : We can count ourselves lucky to have such good TEACHERS from the hereafter to explain everything to us.

ARGUN : My friend, I understand why this question troubles you. But one should not turn this page without reading it just the same, because you can learn from this also. As you know, learning never comes to an end, not even in the hereafter. *GOD also learns something extra from every soul.* This is how the CREATOR’S LAW of infinite eternity works.

Question : I would like to return once more to the question of man’s genesis here on Earth...

ARGUN : Well my friends, human beings neither descended from apes or any other type of original man – as you might like to call them. We are dealing with souls that were sent by GOD for embodiment here on Earth and they – I can surely assert this – possessed a

*higher* degree of intelligence and a *higher* degree of understanding in regards to the arts and culture than you could possibly accept. The Earth has been inhabited by (higher) beings for circa 1.5 million years, *by human beings for about 800,000 years.*

Question : How did the procreation and birth of the first human being take place?

ARGUN : This was probably a divine miracle. You would call it a “phenomenon”. This *materialisation* is a divine phenomenon, a miracle. They came to planet Earth, but the memory of their past was immediately separated from their present after their arrival.

Question : The various races we have here on Earth make exploring human history very difficult.

ARGUN : Yes my friend, the climate and divine assignation gave them their looks and intelligence. *Race is flesh, but soul is soul.* Race and hereditary factors however play a role most of the time. Children often possess some of the character trait of their parents. These souls have something in common and this is why GOD brought them together to *compliment one another.* There are of course lots of exceptions and incongruities.

Question : A lot is presently written about the “*Geophysical Year*”. Various countries organised expeditions to the Polar Regions. Was this influenced?

ARGUN : Oh, yes. – The North and South Pole are regions the occupants of UFOS use to acclimatise.

Question : Does our own existence reach further back than Earth’s ability to provide a viable environment?

ARGUN : That’s the way it truly is. – You find this difficult to imagine, because you are physically affected by the ravages of old age. Imagine being 80 years old and suddenly – out of the blue – you receive a new, younger body. Would the soul worry about having to live as long again? – The soul is *eternally young* and this through GOD’S grace.

### **About the Northern Lights on the 21th of January 1957**

ARGUN : Well my dear friends, what you called “Northern Lights” was truly an optical illusion, you correctly assumed that it took place near Spitzbergen, but you thought that it was a physical phenomenon and not a divine one. Truly, believe me, it was *not* caused by the rays of the sun. Even though you believe this to be so, I have to tell you otherwise.

- *This, for the eye visible, in its beauty unique Northern Light, was not caused by the sun, but a large, divine phenomenon representing the power and existence of UFOS, those flying objects that are engaged for the welfare of planet SHAN in order to prevent mankind from destroying itself.*
- *This was the greatest miracle to happen for quite some time. The myriad of flying saucers made the sky look like a red ocean. It is the prelude to a New Age. It is the beginning of a better, friendlier future. – This Northern Light represented the prelude to the beginning of the Age of Aquarius.*

This year will bring the beginning, that is to say, an expansion of those that would like to journey with you. Those that know what the future holds and believe in the truth and GOD'S existence and in every soul HE ever created. The *Age of Aquarius* will bring common sense, right action and no mistakes. It will bring faith, rights and freedom and harmony and LOVE amongst people. It will truly bring the realisation of what justice is all about. It will bring a new life.

Comment: Professor Dr. H. H. Kritzinger (astronomer) sent us the following explanation to the Northern Light exposition we received from ARGUN that is particularly interesting because Professor Dr. Kritzinger had not read the message we received about it. The well-known astronomer wrote:

*"These seems to be a misunderstanding in regards to the Northern Lights on the 21<sup>st</sup> of January 1957 (Press). We are not dealing with the sun's rays, but with a refraction of its rays from a solid body (physical material, debris)."*

But we already know that this matter stemmed from UFOS.

## Questions and answers

Question : We recently observed a strange looking sky.

Answer : Yes, this was a luminescence produced by radio-active clouds. Hot nuclear vapours wafted across Germany only just recently (*above-ground nuclear tests by the super powers*). – The general condition of Europe's population is not the best. People suffer from particularly severe depression, migraines, loss of appetite or vertigo.

I can tell you that GOD is like a father – actually more than that. A father, if he is a good person, tries to give his children the best possible upbringing. This isn't easy, particularly because there is an evil POWER at work that tries to convert everything positive into something negative – ergo make all results and successes invalid through influences. But a good father will not be deterred by this. He admonishes, he explains and threatens at times and even interferes energetically if required. He does not relent in the upbringing of his children in order to achieve the best. He tries it with kindness or with force, because he does not want to see his children lost. And this is how GOD deals with *his* children – *but far better of course*.

Question : Another Northern Light was seen yesterday, with red and white lightning.

ARGUN : No, *not* a Northern Light, but *radio-active* clouds. Observe the clouds, they are charged with radium. The lightning was a discharge, caused by UFOS.

Question : Do UFOS cleanse our atmosphere?

ARGUN : This is a very severe action.

Question : The Soviets sent another *Sputnik* into space and this on Ascension Day. Can you tell us something about this?

ARGUN : There are various creatures locked inside this *Sputnik*. This is a fact. They serve research.

## Atom bombs – Nuclear tests (Author: H. V. Speer)

All messages from the MESSENGERS of LIGHT and UFO occupants *condemn* nuclear tests that represent a threat to all of mankind. These bombs are not just planned and produced for an eventual war, they are already employed against all of creation on Earth. A war against all of mankind on this Earth has been going on for years. Death is not always immediate, but a drawn out affair in a most dreadful way. The devil, with the help of man, gained a weapon against those created in GOD'S image that he ruthlessly employs.

Why does GOD allow this? – This is what people ask themselves. Why does GOD not produce signs and miracles to warn us? – The CREATOR we call GOD *did warn us*, but HIS admonitions are ridiculed and derided as we speak – until...

- When *Professor Dr. Oppenheimer* committed a sin with his finger on the night of the 16<sup>th</sup> of July 1945 as the prototype bomb (atom bomb) was tethered to the test rig at the airport of *Alamogordo* in the *desert of New Mexico*, a severe storm approached from the South at great speed. The atmosphere was eerie. One could not see one's hand in front of one's eyes with all that rain and sand in all that darkness. An incredible bright lightning lit up the test area, struck the prototype bomb and smashed it to pieces in front of the attendees.
- On the eve of the dropping of the atom bomb on Japan on the 5<sup>th</sup> of August 1945, circa 200 planes began this undertaking. Four of these planes crashed within the first 30 minutes for no apparent reason. Not one single pilot could be rescued.

The MESSENGERS of LIGHT gave us the following psychic message a few days ago:

- *Nuclear means: Death. – Radioactivity means: Fire storm, the destruction of flora and an attack on all human organs.*

The speech given by the philanthropist *Dr. Albert Schweitzer* on the radio is in complete accord with the psychic messages received so far.

In regards to these atom bomb experiments one can say that the scientists and technicians involved do not waste time thinking or worrying about whether they harm the cosmos or other planets, inter-planetary people or inter-planetary creations of fauna and flora in any kind of fashion. *The inter-planetary overall damage is enormous!*

\* \* \* \* \*

The sciences often assert something that they *cannot verify*, but they obstinately stick to assertions in spite of this. Such definitions, hypothesis, theories and analysis are often oafish if not malicious and they endeavour to ridicule the truth. Religion, spiritualism, spiritism, nuclear research, politics etc. are all a part of this.

\* \* \* \* \*

The greatest problem for spiritualistic science is the fact that there are too few people providing the truth with the necessary financial means to make it sufficiently known. As these doctrines have to be comprehensive in order to be understood, the cost are accordingly high. The state and the Church are not interested, because they struggle themselves to hold their heads above water.

## Questions and answers

Question : Do you know whether the Earth's surface floats? Scientists told us that the Earth's surface moves like a skull cap and this without affecting the Earth's axis.

ARGUN : The surface of the Earth moves continuously. Certainly during the course of millennia, otherwise nothing else moves. It therefore doesn't float. "Floating" is therefore not the right denotation for this process.

Question : I am interested in why the sciences like chemistry and physics make such enormous strides whilst the sciences dealing with HIGHER REALMS like philosophy, meta-physics etc. cannot keep pace? They are virtually paralysed.

ARGUN : This is due to people's *self-aggrandisement*. People have lost their belief in GOD because they regarded themselves creative –so *creative* in fact – that they believed to have *trumped* GOD in this respect.

Question : Are our rocket launches a sin?

ARGUN : *No.* – UFONAUTS show a great interest in them. They have their fun with them.

Question : Is sending a dog into space in a rocket a sin?

ARGUN : *In this respect, yes.* – Every vivisection is a sin. The dog's lungs were already damaged during the launch; they were too small for such demands. The pressure exerted on them was too great. The dog suffered, but benign spirit entities were at its side and did the best they could.

Question : The Soviets allegedly plan to send a rocket with a nuclear head to the Moon. We worry about such an experiment.

ARGUN : Don't worry, it will *not* eventuate.

AREDOS : UFONAUTS have powerful magnetic rays at their disposal, they can *deflect* a missile from its course.

*February 1958*

## Scientific forum

Spiritualism *doesn't* deal with "moving tables" or with meetings under red lights or in darkness. There are no citations from the dead or any other secretive cult. Spiritualism is simply a plain, but beautiful *devotion* by candle light and the scent of flowers. The participants arrive in a cheerful, expectant mood and they leave in a joyful and spiritually strengthened mood. It is a shame that the number of participants has to be limited, but there is not enough suitable space available and the mediums' capacity is also limited.

There are unfortunately too many people who have to depend on literature only. These people find these brief publications indeed very edifying, but not all readers believe the things that are offered in such an imperfectly convincing way. This causes us distress, well actually painful suffering. How

fortunate are those that are allowed to receive such an eminent blessing, namely to have a seat at the very source, a seat under GOD'S sun, when they participate in a circle.

What about all the other seekers of the truth? – Should they remain ignorant and filled with doubt, because they do not have the opportunity to convince themselves with their own eyes? – Have they fallen out of GOD'S favour?

No. The blame does *not* lie with GOD'S ORGANIZATION. It lies with priests, parsons and scientists. There are a *myriad* pieces of evidence available for the excellent activities of an otherworldly WORLD. There are *few* disappointments in this field, like for instance when a person goes crazy or becomes possessed. This does not justify an across the board rejection, because the fact that EVIL demands its pound of flesh is part of any truthful religion. These derailments are mistakes committed by people *themselves*.

*Nothing will happen to those that approach GOD with LOVE in their hearts and without fear.*

If the Christian Church or any other religious denomination had negative experiences in this field of knowledge by encountering lurking demons, it is *only* and exclusively due to the *negative behaviourism* of their people.

We held spiritualistic meetings for many years and we virtually formulated a Bible in the process. People regained their health or became stronger. – The mentally insane were healed or found comfort and support. – Thousands gained something to hold onto and became cheerful again. – Demons did at times try to interfere and to destroy us, but we were consequent and, under the PROTECTION and GUIDANCE of MESSENGERS of LIGHT, showed no fear. We thereby managed to overcome all disturbances.

What was it that really caught our eye?

*The mediums improved day after day. – The CIRCLE of FRIENDS in the hereafter grew larger. – All of us received cosmic ENERGY.*

There are scientists that accept this work with a certain amount of restraint and this mainly for the following reason: "The transmissions are good, but stem from the unconscious, ingenious subconsciousness of the mediums who possess an unconscious gift for telepathy. – The hereafter or spiritual INTELLIGENCES are not mentioned.

There is however a slight difference between scientists dealing with the physical sector and psychoscientists and spiritualists. Extensive experiences and co-operation with the spiritual WORLD on an almost daily basis provide a completely different overview than an *incidental flying visit* by a doubting scientist. Parapsychology, carried out as a *laboratory experiment can only* bring precarious successes, because experimenting with the spiritual WORLDS is an *extremely divine* but equally *dangerous demonic* affair. Unintentionally dealing with demons leads to failures and doubts. Genuine LOVE for GOD on the other hand leads to the LIGHT and to true insights.

March 1958

### **Scientists are not dumb** (By Herbert Viktor Speer)

Occultists and spiritualists are often angry with negative scientists, because they do not accept occult insights and often deride them. We ask the question: How should we deal with scientists? – Should we simply ignore them? – Our spirit TEACHER told us: “This depends on individual cases.”

Scientists are certainly not dumb, even if they have a dismissive attitude towards *spiritualism* and the phenomena produced by *spiritism*. Scientists are schooled and trained at universities to deal with an object. They must be able to experiment with objects, test their behaviourism and draw their conclusions from that.

The spiritual intelligence, ergo the soul, is not an object one can experiment with in the eyes of science. When it comes to materialisations, this object is still part of the medium. The substance, the ectoplasm, withdraws back into the medium and not the spirit. Supernatural phenomena like to appear *spontaneously* and this is why it is extremely difficult to repeat them in an experiment. The sciences however like repetition and this at any time, every hour of the day. The legalities involved in spiritualism are however closely related to a Christian or at least a theistic philosophy. Scientist would like to extricate such phenomena from these philosophical conditions.

Some scientists *succeed* in *adapting* to these conditions or they have an excellent medium at their disposal so that true insights are not denied them. But *mediums fail* in most cases and their messages or phenomena do bear the hallmark of being their *own* production.

Are we to condemn scientists for taking the pre-described path of logical considerations? – No. These researchers are often exceedingly excellent in regards to physical things and achieve great results. But mediums are no guinea pigs and their GUIDING SPIRITS can often not accompany their mediums into laboratories.

- *The best opportunity for any scientist to become convinced when attempting to delve into this field of knowledge is to become a member of a good circle.<sup>1</sup>*

But circles fear possible negative emanations from scientists and therefore do not allow them to join them. This is not because they fear exposure, but because they fear the invisible battle between good and evil. A scientist who initially remains neutral to then gradually assimilate with a circle, will eventually be convinced. But the same problems will then also arise for the scientist, namely not being in a position to prevail with his colleagues who will then drop him from amongst their circle of friends.

Our own experiences within the *Psychic Peace Circle, Berlin* show that one cannot blame scientists for being virtual laymen in this field of knowledge – and often also remain so. The material offered to them is *extremely seldom* of any value. Even genuine mediums often fall by the wayside and fail quicker than they assume.

The first priority is to strive for more cleanliness and honesty in spiritual circles, this ensures that the sciences are offered better materials to work with – and this will finally put an end to derision.

---

<sup>1</sup> Professor Dr. Werner Schiebeler was a member of a spiritual work circle for decades.

August 1958

## The science of the spirit

When talking about phenomena one finds that another incredible phenomenon exists, namely the fact that most people know *nothing* about *spiritualism*. There are indeed some who have heard about *spiritism*, but they immediately think of superstitions, spook and ghosts and remember all kinds of horror stories they absolutely place no pertinence in. *Spiritualism is the most important source of all insights* in spite of this. Without the knowledge provided by spiritualism, the terrestrial life of people on Earth is just a hike through complete darkness, a being lost of dangerous proportions. This is why the informed find it simply incredible and devastating that universities have unscrupulously distanced themselves from this factor that also belongs to the empirical sciences.

- *Spiritualism is not your common church religion, but a science based on experiences of great importance. Spiritualism means: The science of the spirit – in contrast to the sciences of matter.*

This is the reason why the experiences gained within the field of occultism cannot be explained or compared with scientific results and formulas. Looking at matter can lead to false conclusions if one assumes a spiritual, respectively intelligent activities behind it. Physical matter on its own can *never* be intelligent. It orders itself according to higher LAWS and is guided by the GREAT LAW, but it is certainly no capable of producing its *own* intelligence or an intellect.

All of these intelligent abilities are of a *spiritual* nature, that is to say, they are *cosmic* and draw their ENERGY from this region. Academic knowledge, in particular university taught knowledge, demands in all instances processes and phenomena that can be *put into formulas*. A science that does not feature chemical or physical formulas cannot really be taken serious. Any assertion of an alleged experience that is beyond measuring or expressed in a formula is invalid and will not be acknowledged. There have been aberrations and mistakes within all these fields of knowledge ever since man walked on planet Earth. Nothing is so perfect that it cannot be improved upon. University taught knowledge also makes no exception here. This turns *yesterday's mockery into tomorrow's seriousness*.

*Spiritualism* is also a science with analogical experiences and traceability. This science also has the right to be incorporated into university taught knowledge and its standard works must be at the head of all faculties. *Spiritualism* is indeed a psycho-science, but it can also be expressed in certain FORMULAS; these are however not FORMULAS that relate to physical matter but to matters of the spirit. The first FORMULA is:

- *For anything to exist without GOD'S spirit is impossible.*

There are however numerous other FORMULAS of eminent validity. Here are some examples:

- *Matter can be measured with matter, but its values can only be grasped by the spirit. Spirit can only be measured by spirit, but the spirit can be perceived by matter.*
- *GOD'S LAWS are not inconceivable LAWS – they spring from intelligence and are therefore also verbal. The language people use is comprehensible and it is also GOD'S language.*

- *Terrestrial man's intelligence is embedded in the intelligent cosmos and it is influenced by the cosmos. Every natural event, respectively every existence only exists once it has been registered by a consciousness. Consciousness is not an activity of matter, but of the divine SPIRIT. Matter is however a parallel creation to the WORLD of SPIRIT.*

October 1958

## Questions and answers

Question : According to an article in a paper, the English "*Spiritual Research Society*" is analysing a colour film by the photographer *Thomas Taylor*. His picture inside the Cathedral at Winchester shows next to the altar also a group of 13 people dressed in clothes from the period of *Elisabeth I*. These people were not present when the photo was taken. What can you tell about this?

ELIAS : Dear friends, I will write through the medium *Uwe Speer* from now on and ARGUN will write through *Monika-Manuela Speer*. The PROTECTION and control provided by the hereafter for our otherworldly GUESTS and PUPILS is now in the hands of FORTUNATIO and MARZELLA.

The photographic coating on plates and films is highly sensitive. This coating sometimes also reacts to radiation and to invisible light. Your eyes however do not do this. There are lots of photos available where spirit beings manifested themselves in their astral state, visible to everybody.

Comment: Instead of being admired and learned from, such photos are being manipulated through clever photomontages and this exposes the supernatural to ridicule and makes it incredible.

Question : Do you know a method that can lend support to such photos?

ELIAS : Yes, *infrared* film material is particularly suitable. Such photos succeed best at *low* temperatures – better still *below* freezing point. Warm waves have a hemming effect on the ethereal rays that emanate from astral bodies and this is why they hardly ever show up on film.

Question : Is it possible to achieve a situation through prayer where otherworldly beings materialise within a circle to a degree where they can be captured on a normal film?

ELIAS : Yes, that's possible, but this requires the presence of a *suitable medium*, one that can deal with such phenomena. It is our hope that the psychic abilities of the Speer siblings will suffice one day to produce such phenomena. In any case, such phenomena cannot be forcibly produced. We train both mediums step by step. Prayers always have special POWERS.

Question : Would it influence the tides here on Earth if we were successful in sending a rocket to the Moon (1958)?

ELIAS : Only if the rocket would release a nuclear bomb or a cobalt bomb on its arrival.

Question : We already heard from you that UFONAUTS are capable of diverting rockets. Can we not assume that they would utilise this capability if the need arises?

ELIAS : Yes, that's correct. UFONAUTS already made fresh attempts to destroy rockets without nuclear heads in mid-air.

Question : We are therefore not dealing with flaws in their construction when rockets explode shortly after take-off?

ELIAS : They were *almost always* design flaws. This was *not* the case only *twice* with the Soviets and *twice* with the Americans.

*November 1958*

Question : Is there a physical limit to the universe?

AREDOS : There is *no* spatial limit to the physical universe, because the universe expands an incredible amount every second of the day. Limits only exist where movement or expansion has come to a stop. This never applies to the universe. This is the reason why the universe cannot be calculated or estimated mathematically or in any other way.

Question : Are any of the other planets of our solar system inhabited by people apart from the bases of UFONAUTS?

AREDOS : The human race is *distributed across the whole universe*, right out to the furthest regions. UFONAUTS only know *a fraction* of all inhabited planets. Extremely different living conditions reign throughout and human beings and other creatures always have to adapt to them. Venus and further planets of this solar system are *intermittently* occupied.

*January 1959*

Question : Medical science is engaged in experimenting with *artificial insemination* (Test tube babies). Do these experiments trespass against GOD'S LAWS?

ARGUN : One believes that children can be born in this way that are free from environmental influences and will therefore be better descendants. We say: *To create beautiful and intelligent people is something positive*. People should however achieve this on their own and in a natural fashion. If they are masters over their base attitudes, pious and noble, their karma will change and this in turn will also change the karma of their offspring.

*May 1959*

Question : Medical science is engaged in solving the problems of *organ transplants*. Do these experiments benefit mankind or are they against Mother Nature?

ARGUN : In as far as they aim at *positive* results – ergo at preserving life – one *cannot* call them preposterous to nature. All due respect to medical artistry!

*July 1959*

Question : Is there a connection between gravity and sunlight?

ARGUN : There are indeed certain interrelationships, but gravity (the law of gravity) also exists without the presence of light.

Question : What force keeps planets together, respectively gives them their spherical shape? Is it the LOGOS or the power of JAHWUS or is it sunlight or light in general?

ARGUN : It is *not* light, rather mainly warmth, let's say heat, namely the heat that emanates from a celestial body. Every celestial body in space was once hot or still is hot even now.

Question : We were once told that the sun is a hollow sphere that is supposed to contain a star at its centre. Can you tell us more about this?

ARGUN : The sun was once a compressed gaseous body. I say *was*! This was eons ago. No planets were orbiting the sun at that stage. But the sun's compression is still strong enough in spite of this. Compare the minute size of the Earth to that of the sun. A tiny granule.

Question : Can you tell us why a ring orbits around Saturn?

ARGUN : Yes, it is made of dissolved moons.

Question : What is the reason for the disintegration of these moons?

ARGUN : Because they were made of a very porous substance. Your rocket tests could also trigger a catastrophe on Earth's satellite.

Question : Why is Saturn the only planet with such a ring?

ARGUN : It is *not* the only one. Only the only one you know with such a ring.

Question : Why do other planets have a number of moons whilst the Earth has only the one?

ARGUN : This has to do with creation. Creation began with an enormous original-explosion. It was the laying of the foundation of the divine universe.

Question : One assumes that the two moons of Mars are a couple of artificial satellites. Can you enlighten us in this respect?

ARGUN : *Phobos* and *Deimos* are two space-stations orbiting around Mars. They were constructed on Mars, consist of metal alloys and were transported into space piece by piece by spaceships, where they were assembled. These space-stations are occupied by the brotherhood of interstellar astronauts.

*January 1960*

Question : The Moon's hidden side has now been photographed. What radical changes will this trigger?

ARGUN : Wait and see. The bomb will go off, however not like a cannon, but as a *time fuse*. A lot of it will relate to the information you received from us. But I can tell you: *A lot of things will be kept from you!*

Question : In different regions, so also in Holland, heavy boulders of ice of undetermined hardness are supposed to have fallen from the heavens. Six different theories were established to explain this phenomenon. What do you know about this?

ARGUN : These heavy boulders of ice stem from spaceships, from so-called UFOS. These large clods of ice are jettisoned over very specific areas. They are supposed to verify to sceptics that extra-terrestrial human existence is a fact and so are extra-terrestrial laws.

*February 1960*

Question : Present day science still love the *theory* of our *lineage from apes*. Is there no irrefutable evidence for the incorrectness of this?

ARGUN : The people on Earth make the mistake of *actually* identifying themselves with the world of animals, no matter whether ape or original cell. This is the reason why people believe that they do not make a mistake when they develop urges and proclivities *within themselves* that actually only apply to the animal kingdom. People therefore behave cruel and instinctively, sometimes up to an inhuman degree.

- *The sciences ought to get rid of this mistake first before they start to look into the origin of man.*

GOD'S antagonist loves to tackle all scientists in order to dazzle them, *because the masses will then listen to these scientists* and believe them. This fact is however part of the end-times. Many amongst you cannot expect deliverance from this situation. But GOD has his plan and the realm of the spirit accurately abides by these guidelines. You cannot reduce the waiting period, but GOD could do so.

Question : We found that otherworldly weather forecasts are not always correct. Where does this uncertainty come from?

AREDOS : We do not want to alarm people unnecessarily. The fact of the matter is that we also find it increasingly impossible to predict the weather accurately. The cosmic radiation belts gradually turn chaotic. You have been aware of the cause of this for quite some time.

- *It is not GOD'S will that balanced cosmic forces are bombarded by human hand. The consequences will naturally not stay away, because there is a LAW of CORRELATION. – Great catastrophes will eventuate!*

Comment:

Why is spiritualism not part of university knowledge? Academic scepticism, afflicted with a considerable amount of arrogance, did unfortunately not have the courage to overcome the general *age old* derisiveness. The fear of disgrace does not stop at committing a blasphemy and this is why academic are seldom genuine prophets. –

There are fortunately quite a number of eminent scientists prepared to campaign for the supernatural truth and go into battle against purely materialistic thought processes. We are pleased that these endeavours are visibly supported by people from other planets. Space is challenging scientific knowledge.

Psychic Peace Circle, Berlin.

March 1960

Question : A new satellite has been orbiting the Earth over the last few days. It is an enigma, because it does not send any radio signals. What is this mysterious object all about?

ARGUN : This satellite was launched into space by the Soviets. It does not emit signals because it is designed to *test materials*. It is only observed to ascertain how durable steel alloys are. It is a forerunner to a manned rocket to the Moon. The Soviets are ahead of the rest on the international space race by two years.

April 1960

### About the catastrophe, the earthquake at Agadir, Morocco

An explanation from GOD'S realm:

ARGUN : One could have foreseen this, namely that this great catastrophe was the result of *the triggering of a nuclear device in the Sahara*. Political science will however never admit that it is to blame. Alas, it is the unadulterated truth, the one we serve in GOD'S name.

AREDOS : We are dealing with the effect of a pressure wave through subterranean cavities. There are cavities of salt lakes under the Sahara that are crusted over and covered by sand. The shifting of water allowed these cavities to develop. The catastrophe was the result of the recessive collapse of these cavities. – All politicians or scientists that doubt this fact should study the results of explosions in underground cavities along the *Maginat-Line*.<sup>2</sup> – GOD admonishes, but people jeer.

May 1960

Question : A lot of people still hold the opinion that the development of the human species went through apes. Why can one not put a definite end to this theory once and for all?

AREDOS : Certain similarities surprise. If people *had not* slid so much into brutishness, they would *never* identify with any animal, also not as part of their pre-creation and pre-development. *Darwin* knew nothing about life on other planets and his successors also do not believe in it. There are however people on a number of planets where there are *no apes*.

Question : The Soviet scientist *M. Agrest* surprised the world at large with the assertion that *Sodom* and *Gomorrah* were destroyed by inter-planetary spaceships. What does he base this sensational statement on, because the Soviets also behaved as if UFOS did not exist?

AREDOS : "*Veritas Vincit*" by ASHTAR SHERAN attracts a lot of interest all over the world. The Soviets are also deeply impressed by its contents. Just wait and see! The Soviets removed everything sensational from it also.

Comment: The brochure "*Veritas Vincit*" was formulated by the Psychic Peace Circle, Berlin and produced and published by this circle.

---

<sup>2</sup> Proliferation of a detonation shockwave through subterranean cavities.

June 1960

Question : Animated by the brochure "*Veritas Vincit*" Soviet science is now dealing with the demise of Sodom and Gomorrah. Was this a nuclear explosion?

ARGUN : No, these were *anti-gravitational forces*. This event was part of the world's destiny, but *not* its fate.

Question : The Russian people and its pundits are well advanced of other nations in many respects. Is this GOD'S will or rather that of evil FORCES?

ARGUN : It is within its schooling. Soviet citizens do not specialise or generalise anything, but they do *promote skilled labour* so they can realise their ingenious ideas.

Question : Does this benefit the general public as we are dealing with *atheistically* minded Russians who progress from a purely material point of view?

ARGUN : Even though this still seems to be a great *if* to you, it is to be expected. We do not despair, because we know that bodacious help is being organised on your behalf. Think of the SANTINER, GOD always has the last word and his heavenly flotilla put it into action. (Sodom and Gomorrah)

Question : How does the spiritual world assess academic laureateship?

AREDOS : The title should confirm the laureateship, respectively the dignity. Academics' dignity *obligates* them *to serve man!* This is the only way mankind can *acknowledge* this dignity. Academics should not use their laureateship to classify and to disrespect the rest of mankind. A *faculty of decency* was not necessary in the past, because decency was a matter of fact prerequisite for all those that studied. This faculty of decency has turned into an *urgent* necessity these days. It should be the *first* semester of all semesters.

August 1960

Question : Through which means, respectively evidence, can science best convince people that life after death is real?

ARGUN : Scientists all over the world place great importance in immortality, but not in the correct sense. There is enough evidence, but it amounts to nothing if ignored. Everything GOD created has its place and its assignment. Evidence of one's survival is also part of this – human beings and souls too. Do you think that the LORD created a whole universe and everything that is beautiful to then allow human beings to die without having enjoyed HIS creation?

- *The whole universe is at the disposal of the soul, the human existence would otherwise be meaningless.*

September 1960

Question : Did the world of the hereafter have prior knowledge of the severe earthquake calamity in China and did it make the required provisos?

ARGUN : You are to blame because this human race caused this turmoil on Earth.

- *The numerous nuclear tests have severely changed the Earth's magnetism and this to a degree where the major air currents are also affected by it. This is therefore not the last catastrophe you'll ever experience.*

Question : Have the scientists responsible for this recognised that the mistakes made go into their debit accounts?

ARGUN : *Some have accepted this*, but have done nothing about it. They will once again receive an enormous blow, it will be a direct hit. Let's hope that they will then finally come to their senses!

November 1960

Question : What is more stressed in *disharmonious* situations, the spirit or the nerves?

ARGUN : The spirit inside physical matter can certainly retain its deportment, because it is not as exposed to contestations as the nerves.

- *The nerves are the register the spirit utilises to function in the physical world.*

Matter, nerves and spirit represent a threesome, because they are linked with one another and they depend on one another. Nerves consist of a substance that is not really of a physical nature, it is rather more related to tele-plasm. Nervous agitation does *not* necessarily damage the physical body, *but it will damage the spirit.*

- *The nerves are the CONDUITS that transport VIBRATIONS to the spirit and vice versa. The nerves are an intermediate substance between spiritual and physical matter, because they are partially ectoplasmic.*

The nerves within an *ethereal bodied* human being are like the threads of a spider's web and oscillate continuously. They are highly sensitive and may not be overtaxed. Physical matter in contrast is coarse and it would be completely insensitive without nerves. It can therefore *never think*, that is to say, be independently intelligent. Intelligence *without* GOD'S ENERGY is *impossible*. It represents a drop from GOD'S ocean.

Question : The spirit is therefore enmeshed with physical matter. Or?

ARGUN : The spirit is *not* enmeshed with physical matter, only *with the brain and the nerves.*

- *The soul however does utilise the blood as a solid base.*

The spirit of a *coarse bodied* human being on the other hand is *lazy* and the body without spiritual support. The nerves are less sensitive and not as ectoplasmic. – Spirit and matter suffer *quicker* when enmeshed with *ethereality* than with *coarseness*. A coarse bodied human being can remove its spirit from the equation and predominantly assert itself within physical matter.

Question : One asserted up to now that ethereality encompasses the *whole* body. Is this opinion incorrect?

ARGUN : This ethereality *only* applies to *the brain and the nerves* through its higher sensitivity.

- *The flesh however always remains the same, it matter not what spiritual development predominates or what diet plays a part. The flesh is subject to the laws of physical inheritance and it can only change through heredity.*

Comment: ARGUN always expresses the opinion of the *whole* TEAM of spirits.

Question : Does this ethereality suffer when people engage in sport?

ARGUN : *Extreme* sporting activities destroy this ethereality. Sport in its extreme form is dangerous to *all* human beings. People engaged in sports require medical advice.

- *One can of course promote one's ethereality by trying to absorb everything harmonic within oneself.*

People are unfortunately *brought up* to be coarse bodied individuals, but this in fact represents a regression. Ethereally bodied human beings are *more in need* of spiritual PROTECTION and they endeavour to receive it through the way they behave.

Question : How does the spiritual realm assess the Olympic Games presently taking place in Rome?

ARGUN : We assess this sporting event as something *positive*. We are however only interested in the *companionable togetherness*, the ambitions of higher performances and the international unity *devoid* of racial hatred. – As you can see, it does work!

*December 1960*

Question : Can music also be detrimental to one's health?

ARGUN : There are two types of music and they have different effects. There is *divinely inspired* music that gives one a sense of security. This music is a gift to you from GOD. – But there are also combinations of musical tones that do not deserve the name “music” at all. This type of noise agitates you and it can eventually make you overexcited. These tonal vibrations are a part of the yobbo problem, because they *destroy youth's harmony* whose souls are still developing and subjected to terrestrial examination.

Question : Does *abstract art* have a right to exist?

ARGUN : Abstract art does *not* spring from LOVE, but from disharmony and violence. This is why this art form is *antagonistic towards GOD*.

Question : Ball lightning often show kobold-like behaviourism. Are these types of lightning controlled by INTELLIGENCES?

ARGUN : Ball lightning are *independent* natural phenomena. It can however happen that this electrical energy is *utilised* by base ENTITIES, as it happens with spook. Positive

FORCES would never do this.

*January 1961*

Question : Could it possibly be that today's *abstract art* has something positive about it that today's average citizen lacks knowledge of?

ARGUN : Really *inspired artists* from the past verified that GOD created in people a veritable image of HIS INTELLIGENCE. But this is certainly not the case with "modern" artists.

Question : Why is it that so-called "*modern art*" is actually taken serious?

ARGUN : This art mirrors the great battle presently taking place. The negative tries very hard to attack and destroy harmonic, natural and beautiful creations. But abstract paintings and sculptures will not remain topical for any length of time under any circumstance. *We are dealing with dabblers devoid of inspiration.* They surmise things because they find sufficient support from negative hangers-on. These no-hopers want to convince the world that they see and reproduce things from deep within. But their own thoughts and character exactly matches the terrible art they produce.

Question : A lot of young people would like to be film stars these days. What do you make of their desires?

ARGUN : It is mostly a dream, with lots of soap but little lather. A good actor must also be highly psychic, respectively very sensitive to be able to inspire others. It does however depend on *positive* inspiration, because everybody is capable of playing the fool.

- *All great musicians, actors and other artists were inspired, that is to say, were spiritually inspired and guided.*

*Heinrich George* for instance inspires his son, without him being aware of it. – This is just play acting for many of them, whereby they sometimes lose their thread. I love comedies and comedians, but not witless attractions. I love true art, but not slapstick comedy. An actor should be a teacher also.

*March 1961*

Question : What does the spiritual realm have to say about rockets sent into space with apes on board?

ARGUN : Rockets launches with humans on board will succeed, but it will cost casualties. But – as I mentioned before – such tests will be a signal to the SANTINER (space brothers). They will intervene, but not the way you might imagine.

- *Rocket pilots, ergo astronauts, will see spaceships in space, actually whole squadrons of them. But whether one will believe them is another matter. They will however have some evidence.*

The spiritual age is getting closer, but the spiritual maturity is still lacking. This is why we have to do everything we can to make up what we neglected to do in the past.

April 1961

Question : Italian scientists managed to propagate an embryo in a test tube. After they found that the embryo was deformed, the experiment was stopped. What stance does the spiritual realm take in regards to such daring experiments?

ARGUN : The spiritual realm does *not* reject scientific or biological experiments. They often help mankind and are inspired by great, spiritual researchers. But scepticism may not degenerate into disbelief. The researcher must however *believe* in divine creation and guidance when performing such experiments.

- *Such an artificially produced embryo can however never receive a soul. It will remain in a vegetative state.*

Question : Could it be possible that a soul from the regions of demons could incarnate?

ARGUN : *No, never.* This is also impossible, because it trespasses against divine LAWS. Human beings belong to GOD, whilst apes are an imitation of human beings and belong to the antagonist. People want so much, but they will *not* achieve *everything*.

May 1961

Question : Why is it so difficult to convince academic scientists of the existence of a spiritual realm?

ARGUN : These academics have a *morbid fear of dying* and they *therefore* look for eternal life within physical matter. They believe that human beings dissolve. They do not know that the soul continues to exist beyond the physical. If the soul was simply a diminutiveness of a *material* nature, one would have *acknowledged* and scientifically verified it *long ago*. But the realm of the spirit is constructed of *spiritual* ATOMS and *spiritual* MOLECULES.

- *We can however not comprehend that the materialisations of otherworldly souls are not recognised as exact evidence. This behaviourism represents a scientific deception inflicted on the whole human race on Earth!*

Question : Why do the betrayers of natural science fear eternal life?

ARGUN : They fear it, because they sense *that they will be judged* and will have to make amends.

Question : When talk turns to the *fourth dimension*, one assumes that space, time, past, present and future find a common denominator, respectively converge at one point. Is this correct?

ARGUN : *No*, that's certainly isn't true. Everything is separated, because there would otherwise be no forgiveness through probation within the spheres. A soul *must* prove its value, namely for the suffering it caused to others. Schooling allows the soul to gain higher spheres. But if time did not exist, justice and forgiveness would also not exist. What would the realm of the spirit then represent?

Question : The occasionally occurring glimpse into the future makes one assume that certain events are already determined, ergo still encounter the present. Is this so?

ARGUN : Certain events inevitably happen from certain causes. If the cause is known, the mind can predetermine what the results will have to be. But what would be the meaning of life in the here and now and the hereafter, if everything would remain as it is? – We sometimes inspire you in dreams in order to warn you. The spiritual realm has to adapt to the terrestrial world in these instances. When we use this form of communication, we use a pictorial language that relates to your terrestrial existence.

Question : The appellation “spirit” is misunderstood most of the time. Can you give us a good explanation for it?

ARGUN : *Spirit is your intelligence, but the soul is your perception.* Both together result in a completely functional soul. A soul can then no longer be separated, because the two supplement one another.

*June 1961*

Question : The idea that all thought processes take place within the brain is still widely accepted. One therefore does not believe in a conscious life outside the brain. How should one explain this?<sup>3</sup>

ARGUN : The brain takes control of the soul’s functions during one’s physical existence. The reincarnated soul behaves relatively passive within the body. One has however erroneously given the *passive soul* the denotation of “*the subconscious*”. The brain returns all its functions back to the soul at death and this moves the so-called “subconscious” into the foreground again. This exchange takes place during the temporary death-sleep.

*July 1961*

Question : Glaring lights are supposed to be damaging to the eyes. How can one protect oneself against this as well lit workplaces are preferred?

ARGUN : Light that is *too glaring* does not promote one’s health. It overtaxes one’s optic nerves. The object must be *well illuminated*, but not the whole room, particularly when using fluorescent lights.

Question : They used a type of *Rameses-technology* in antiquity. Can you tell us something about the way these colossal monuments were built?

ARGUN : Terrestrial mankind should solve these puzzles by *itself*. It will be able to do so once research and the *acknowledgment of spiritualism* with its phenomena have created a foundation for it.

Question : Rocker sciences has indeed developed in line with your predictions. Can you also foresee where it will go from here?

---

<sup>3</sup> Such questions were put to the realm of the spirit by physicians.

ARGUN : There are great prospects that rocket science will become *internationally unified*. If these endeavours succeed, this amalgamation will also have a positive effect in regards to politics.

A lot of effort is put into the PLAN of SALVATION. We only work with the truth and our path is absolutely straight and leads directly to the great target we are aiming for. This is why we endeavour to only give you concrete answers. Seeing terrestrial people begin their journey upwards is also a success for us. Coarseness will begin to rise up first, but it will have become more ethereal when it returns to Earth. This will be taken care of.

- *Astronauts will see miracles that will animate their thought processes and they will have to admit that they encountered one of GOD'S miracles.*

Rocket research will gradually turn into an *unintended* research into the hereafter. The SANTINER are in the process of erecting a very important base on Mars for this solar system. But there is no threat of an invasion of "Martians"!

Question : Is there an opportunity for us assist in the renewal of the terrestrial situation in a better way?

ARGUN : Do not underestimate GOD'S creative powers! HE has succeeded with *everything* so far. And HE will also succeed in separating good from evil. Every circle member and every *reader of the Menetekel* is an instrument in GOD'S hands. *All of you* are therefore important and cannot be ignored. What I am trying to say is that none of you should feel superfluous and this includes those that have already joined us in our REALM.

Question : How can we improve the foundation of our co-operation with you?

ARGUN : You give us LOVE. It is the foundation for the truth and for knowledge. The harmony in our co-operation guarantees the truth. The readers of the Menetekel also love us - and we love them also. The brothers and sisters here on Earth, who think of us with LOVE in their hearts also support us and the work we do through their positive thoughts. – We thank them also.

*December 1961*

Question : Do rooms have an influence on the soul and on harmony?

ARGUN : *Yes, this is something to take into consideration.* There are rooms that were corrupted through one event or another. They must be decontaminated first. We are naturally talking about spiritual CONTAMINATION.

- *A negative environment naturally also produces negative thoughts that are then followed by evil deeds and disharmonies.*

Question : Does this also apply to *abstract* paintings so often seen these days?

ARGUN : *Absolutely!* – Therefore my dear, always seek the beautiful and the positive. The

harmony of the soul is very closely related to the harmony of the environment. One's physical health is also very closely related to the well-being of the soul.

- *Towns will experience great changes over the next years. Things will be build brighter and healthier. Present day humanity finds itself in a stage of advanced development for the New Age.*

February 1962

Question : What does the spiritual realm think of our *space rockets*?

ARGUN : *We have our fun with them.* Let them go higher and higher. The universe prepared its surprises very well. The time is not too far away. Oh, how we look forward to this! – When the time comes where an astronaut can observe the universe consciously and accurately, they will see a lot of materialisations.

- *Materialisations and dematerialisations are easier to carry out in space than within Earth's heavy atmosphere. Earth is a very dense planet.*

Question : Is it true that our solar system moves away from a specific centre?

ARGUN : The solar system, with everything that is magnetically attached to it, moves at great speed *helically* through space.

Question : Can you tell us something about the status of our Moon?

ARGUN : *The Earth's satellite is 1/5 water.* It has a very modest flora, *but only on one side.* The side facing the Earth is made up of cosmic dust, layered very high and sometimes piled up into mountains. The material on the cosmic side of the Moon is exposed to severe cooling. There is a certain flora present there, but *no* fauna, because the lack of water there is severe. The SANTINER *established basis* in some of the oasis, but one cannot see them because they are on the hidden side of the Moon. Terrestrial viruses and bacteria are not transferable, because some of the more important substances possess a *different density.*

Question : Are the moons of Mars artificial?

ARGUN : *Yes.* - *Phobos* and *Diamos* will soon have new neighbours. Work is already in progress. Human beings live in the middle of the cosmos and in the middle of the universe and *not* as individual beings on Earth only.

(Comment: This answer was recently verified by science, because one detected various life forms on meteorites.)

Question : Will it be possible for us to reach another heavenly body with the help of our rocket science?

A. S.<sup>4</sup> : You are not too bad in regards to aeronautics. Your rocker research is relatively good. We hope that we will get along with one another. You will move through space with the

---

<sup>4</sup> A.S. = ASHTAR SHERAN.

help of nuclear power to begin with. We are dealing with a precursor, something we also had to absolve first. We see a little further than you and this is why we know that other propellants will not serve you well. Once your development has progressed, rockets will be a thing of the past.

- *Nuclear development in the field of space travel is not to be underestimated in its early stages. The abuse of this energy is extremely dangerous and does not promise to be successful in any shape or form.*

It is our most intimate desire to see all of us on the same level in regards to our respect for and acknowledgment of GOD, so that we love and appreciate one another – and so we can amalgamate into one large *universal community*. I am always pleased when I am able to say a few words to you so that you sense that *we are here for you*.

Question : Are the materials here on Earth adequate to guarantee *space travel*?

A.S. : Your rockets are reasonably well shielded. Planet Earth is abundantly equipped with useful raw materials. Everything required to guarantee successful space travel is available on Earth.

- *Peaceful intentions must however take priority, because we would otherwise be forced to intervene.*

The fact that you have not yet recognised *how abundantly* GOD equipped this, your planet, is a shame. But if you want to *conquer* space, you make a terrible mistake. Allow time to take its course and things will develop faster than you expect. Don't allow yourselves to be discouraged, because there are no more reasons for it.

- *Day X, when our existence and our divine MISSION will be recognised, is also getting closer and closer. There is no extermination-invasion. The approaching day X means sunshine and not darkness for you. We are not about to attack you, but we want you to meet us half way.*

Question : Can the continuous harvest of oil change the weight of planet Earth?

ARGUN : There is no danger for Earth from *that* quarter. Continuing with nuclear tests however *could* have such an effect.

*April 1962*

Question : *Psycho-science* uses terminologies like “*ethereal*” and “*coarse*” or “*tangible*”. What do these terminologies mean to you?

ARGUN : “*Ethereal*” means *sensitive*. It is a feeling of a special kind of sensitiveness. But *coarse*, respectively *tangible*, means *very insensitive*. – But I would like to emphasise that great caution is appropriate here, because a person with a rough exterior can be very sensitive inside. There are often cases where people look physically very sensitive, whilst they are spiritually *indifferent*.

- *This is why everybody has to be very restraint in their assessment of others. An inflicted mental violation is difficult to heal. Those that are prone to prejudice do not have the right to judge others.*

Question : The sciences still work with straightforward *three-dimensional* values. This methodology doesn't bring them any closer in regards to the hereafter. What should one do to effect a change here?

ARGUN : It essential to achieve one's *goal*. It represents the hub of the matter. This hub can be approached from any side. There are plenty of methods. Everybody constructs their own. This is why one has to say that something is utterly wrong with due care. Something good will always come from it. One can even learn from mistakes and gain an advantage from them. It will therefore not have been in vain. This applies to the here and now *and* the hereafter. Everything has a deeper meaning, even if it isn't always easy to recognise. Mathematical movements cannot be transferred to organic or mental movements.

Comment: Dear reader, when you accurately track all questions and answers, you will undoubtedly recognise the otherworldly INDOCTRINATION. The medium never deals with such problems. The medium's handwrites the answers instantly, without ever being aware of one single syllable. A lot of our questions were asked by *Senior Medical Officer, Dr. H. Gerbis, Berlin*, a member of our team for decades.

Question : One sometimes hears about the "*Law of Seriality*". Is there such a law?

ARGUN : Yes, it has the effect of a magnet. It attracts fortune or doom and it also repels it. Doom is usually stopped by force, for instance by catastrophes that overlap. We have a lot of respect of such chain reactions.

- *Such catastrophes would have a much greater impact without the intervention of the world of spirit. People however completely disregard such help.*

*The rest* of the inevitable calamities usually suffices to make people *blaspheme* GOD and his HELPERS. Because so many calamities take place, they doubt GOD'S existence. They do however forget that there is an ANTAGONIST with his own ORGANISATION and that people are *his assistants*.

Question : What was the cause for the great flood catastrophe in and around Hamburg?

ARGUN : The whole cosmos is in disarray due to the continuation of underground and above ground nuclear explosions. A dangerous low-pressure front developed at a previously unmatched speed. This could not be forecast. Even the spiritual realm was completely taken by surprise.

*May 1962*

Question : Is the construction of *stem or bow thrusters* correct or do other points of view have to be taken into consideration?

AREDOS : The construction of stem or bow thrusters is correct, particularly all types that can be adjusted? The greatest energy comes from the propeller tips that are simultaneously subordinated to the rotation of the centrifugal force. This makes the tips of propellers

produce greatest pressure. The correct thing would be to take the centrifugal force into consideration when adjustments to the pitch of the propeller blades are made, that is to say, the adjustment to the airflow can be greater at the tips, but may not have the same degree of adjustment near the axis, because the energy output, that is to say the air pressure is less.

Question : The belief in evil spirits dominates the minds of primitive tribes deep in the jungles of Brazil and New Guinea and controls their whole life. Is it true that they have to fear spirits?

AREDOS : This fact should provide all scientists on Earth with irrefutable evidence that man's spiritual survival *is* a fact. The same occurrences take place at great geographical distances and this makes any emotional contact between these tribes impossible. But a lot of the souls of the departed have been dispatched to the hereafter through the practise of headhunting. They naturally take revenge on their highly psychic murderers *by haunting them*. Apart from this, we are more or less dealing with evil cult spirits or the souls of cannibals.

Question : Are these aborigines able to drive these spirits away through their customs and traditions?

AREDOS : *No*, absolutely not. On the contrary – they are attracted *even more* so and participate in everything.

Question : Can these haunting spirits also be perceived by European explorers?

AREDOS : Only if they possess a high degree of psychic awareness. But civilisation managed to vitiate this natural ability, well actually almost completely obliterate it.

- *Europeans in general almost exclusively rely on technology and no longer on otherworldly assistance.*

Without their psychic abilities, these native tribes would have succumbed to their environment long ago. They cannot do without this otherworldly assistance, assistance we replaced with technology. They are persecuted by them, but in many instances also receive advice.

Question : What is the spiritual realm's attitude towards magic?

AREDOS : Magic means: *Spiritual opportunities* – particular in regards to the impact of spiritual FORCES on physical matter. The lowers spheres naturally sympathise with the type of magic that extends to unfair or forbidden aims.

- *The HIGHER SPHERES acknowledge the magic that promotes positive things.*

You call it either black magic or white magic. It always depends on the kind of FORCES you want to deal with and above everything else, *what* your aims are.

Question : Lots of people receive telepathic messages these days that allegedly stem from people from other star systems. Are their assertions true?

AREDOS : The sciences recognise that telepathy between people across vast distances exists. The sending of concepts is therefore *cosmic*. Thoughts race through space. But every other type of thought can naturally also race through space. The main essential is that they emerge from consciousness. GOD or an otherworldly soul also possess consciousness and the capacity to think.

There is also telepathy from animal to human being and vice versa. There can also be excellent telepathic connections between people and dogs or between horses and people. All tests guide dogs have to undergo should also take the fact of possible telepathy into consideration. It is therefore appropriate to get guide dogs immediately used to their future protégé so that the telepathic FREQUENCY is correct.

Question : Is telepathy between animals and people *stronger* than between people?

AREDOS : It is *much stronger* between animals and people, because animals are *more psychic*. An animal will naturally understand a human being easier than the other way round.

- *Such telepathy is often erroneously called "instinct".*

*June 1962*

Question : Why is it that today's academics still think that life after death is a superstition in spite of all the evidence?

AREDOS : Since time immemorial, academics' knowledge has been dictated to them by school taught science. This is why most of them lack their own healthy ability to assess things free from school taught concepts and influences.

*August 1962*

Question : *Parapsychology* utilises drugs every now and then in order to penetrate deeper into the psyche. What do you say to these experiments? Can they verify something?

ARGUN : All experiments involving drugs only assert a *minimal* claim on the brain. Most of what takes place come from the ASTRAL WORLD. One does however talk about "hallucinations", because one believes that *everything* takes place within the brain. No drug-induced experiment will be able to wipe away this mistake. *Spiritual experiments* have an advantage here.

*September 1962*

Question : We know from you that *irradiating* the body with *short-waves* is supposed to be beneficial. Does irradiating the body with short-waves also influence the soul?

ARGUN : Yes, sometimes to a high degree. It has a *beneficial* influence, because it delivers the soul from lots of mental ballast.

Question : There are a number of readers asking us whether this or that psycho-scientific book is worthwhile reading. We are often asked to get your opinion on them. Is this possible?

ARGUN : I can unfortunately not read and test everything. But I would certainly like to deal with it if it is of global importance.

*January 1963*

## **Parapsychology (1)**

The Polish medium *Stanislawa Tomczyk* was able to make small objects float in the air by stretching her fingers when in a trance state. The medium did not touch these objects.

In the USA, *Professor I. B. Rhine* was able to accurately verify the existence of psychokinesis (Mental influence on physical matter). In over 100,000 experiments, *Rhine* was able to accurately verify that the soul is a *non-physical* system, but one that can influence matter.

The following experiment was carried out by the English medium *Slade* whilst *Professor Friedrich Zöllner* from Leipzig was present: Two wooden rings, each fashioned from one solid piece of wood, were attached to a sealed piece of string. These rings attached themselves at lightning speed around one of the table legs. One could not have placed these ring around the table leg without detaching the leg from the table first. These rings were *dematerialised* and then *rematerialized* with the help of the medium.

- *People know too little about the machinations of the spirit!*

Parapsychology is already aware that the difference between spiritual and material things is relative.

The human soul sends ENERGIES that can be perceived, but that do not exhibit electrical impulses.

The electrical current impulses of brain cells have *nothing* to do with telepathy, because telepathy managed to penetrate all electrical shielding in a research laboratory in the Soviet Union.

The English statesman *Gladstone* said the following in the 19<sup>th</sup> century:

“Psychic research is the *most important* work undertaken all around the world. It is the most important *by far!*”

We endorse this opinion.

\* \* \* \* \*

*February 1963*

## **Parapsychology (2)**

During a lecture in Chicago in 1893, *Professor S. Coues* emphasised that *levitation* (abrogating gravity) was a priory just as rational as gravity. Levitation was just an energy that was working in the opposite direction to what we are used to with gravity. *Professor S. Coues* explained that the abrogation of gravity was possible decided with the help of spirit beings.

- *Natural science and parapsychology are the mediums capable of revealing a true picture of the world if we do not relegate the world of spirit to the back.*

Parapsychology must extricate itself from the mistake the natural sciences apply in regards to psycho-science. This mistake leads to prejudices that turn out to be barricades that adversely influence all research.

Intellectuals will only abandon their scepticism when academic science openly confirms all phenomena with the help of modern insights.

Spiritual insights are kept secret *because they undermine the prestige of science*. This is the reason why spiritualism is regarded a secret science, respectively a secret doctrine.

All paranormal behaviourism of a medium is violently combated by the broader public, because out and out atheistically minded laymen profess to be experts in this field of knowledge. Doctors and academics can also be laymen in this arena. An expert requires a *genuine* contact.

The mathematician and astronomer *Laplace* said:

“It is not philosophical to deny phenomena because they cannot be explained with the present stand of scientific knowledge.”

\* \* \* \* \*

## Questions and answers

*March 1963*

Question : Art is pursuing directions that the broader public can no longer understand. Can abstract works of art actually still be called art at all?

AREDOS : If the LORD’S creation would look the way abstract artists depict it, creation would be one single chaos. *True* art is a summarised or selected rendering of creation.

- *There is no art and there are no artists where harmony and beauty are not expressed.*

Question : *Psychology* assumes that man’s *subconscious* resides *in the brain*. Is this correct?

AREDOS : The fact that terrestrial human beings use their brains to think is correct. This however only applies during their terrestrial sojourn. After the soul exits the body, the ASTRAL BRAIN takes on this assignment.

- *The actual thought process – or rather the activity of one’s consciousness – is a COSMIC PROCESS.*

The part of the actual thought process that remains in the cosmos is incorrectly called the “subconscious”. The cosmic thought process communicates with the brain. You must remember that consciousness is *not* physical matter. The spirit is also *not* physical matter. But the spirit can *work* with matter. – You are not mature enough to grasp this.

*April 1963*

Question : Are there also certain bacteria and viruses on other planets throughout the universe?

ARGUN : Naturally. They also have a task to perform, like for instance the fermentation bacillus here on Earth.

*July 1963*

Question : Is our rocket research and space exploration on the right track so that the whole cost involved will eventually be worthwhile?

ARGUN : Space exploration will gobble up all the money that is presently used for armament.

- *The most important thing about space exploration will be its associated inventions and discoveries because they will benefit mankind greatly.*

Question : One has allegedly not found a magnetic field in space. The cloud cover on Venus is supposed to be 30km thick. Besides, it is supposed to be 70km thick in the lower region and 100km thick on top. Are these details correct?

ARGUN : Tell me more my friend.

Question : The upper layer of the cloud cover is supposed to be minus 40 C and the lower layer plus 93 C.

ARGUN : I am flabbergasted! My dears, they come up with some ludicrous things. All I can say is that the adopted precision instruments are still very unreliable. They will continue with their research and they will have to amend their previous results.

*August 1963*

Question : Can you tell us something about the present levels of *radioactivity*?

ARGUN : The radioactivity in the Earth's atmosphere is *still very high*. The SANTINER endeavour to bring these levels down. You do not require a Geiger counter to ascertain this. Your general petulance is a sure indicator of high levels of radioactivity. This petulance has a very negative effect on all political negotiations. This is why nuclear tests are *no* peacemakers. High levels of radioactivity foil all good intentions, because the negotiators and those in responsible positions are too agitated to find peaceful ways of communicating with one another. *It is important to mitigate any disharmony.*

*September 1963*

Question : We had some severe earthquakes in recent times. Have these quakes anything to do with nuclear tests or are they part of our Earth's development?

ARGUN : Every planet is subject to physical and geological development. But *these* catastrophes *do actually* stem from subterranean nuclear tests. Experts will say that they happen in earthquake prone areas. I say that this is *not correct*. Inner turmoils naturally become apparent first at the weakest points of the Earth's surface, but this inner turmoil was *forcibly created*. A catastrophic tension reigns within the Earth's core.

Question : People base their view of the world on mathematics. How did this method come about?

ARGUN : Everything is based on LAWS. These LAWS gave mathematics its basic concepts and it was then developed further. But mathematics made a mistake in spite of this. The reality is actually as follows:

- *Everything develops according to LAWS, this applies to the day, the week and also the year. The LAW for this is INFINITY.*

You can imagine this word “INFINITY”, but when you dissect it you’ll find one LAW based on another LAW and so on. This is how you end up with INFINITY.

Question : Can one equate man’s survival after death with a mathematical formula?

ARGUN : The fact is that we do not mathematically calculate life in the spiritual realm. But one *could* express this fact in a mathematical formula. But this isn’t done. – INFINITENESS actually *exists* in the realm of the spirit and this is something that annoys mathematics.

Question : Is it true that a beam of light always travels in a straight line?

ARGUN : One *can also bend* light. The speed of light can also be *decreased* or *increased*. The SANTINER studied these physical processes in detail and incorporated them into their technology. The best specialist from German schools sit in the Soviet Union. They also deal with this problem. Everything of eminent importance was enlisted by the Soviet Union in 1945. The Soviets should not be underestimated. They are a very healthy race and very intelligent to boot. They are certainly not degenerated.

*February 1964*

Question : Is it really true that no human beings could live on Venus?

ARGUN : Not in the way you *imagine*. I am not prepared to comment on this so that no further mistakes are made. It is presently impossible for me to explain something to you that is beyond your terrestrial power of imagination. The first results sent back by an artificial satellite are usually authoritative to the general public. I am not saying that the probe sent to Venus doesn’t work properly but there is a whole series of external influences that still have to be investigated. It is not our intention to attack the sciences. The future will however bring many a surprise.

The words “Venusians” or “Martians” does *not* stem from the SANTINER, ergo not from people from other planets. *You* gave them these names.

- *As far as I know, these people live on a space station in the vicinity of Venus.*
- *There are also two large space stations near Mars. These are actually visible and you think that they are moons.*

I do not believe that the SANTINER ever asserted that they came from Venus. This must be a misunderstanding. I do however assume that they said that they came from *that direction*.

Question : We are interested in whether people could live *directly* on Venus? What is your opinion on the subject?

AREDOS : We are not authorised to answer this question. All I can tell you is that the SANTINER will not tell you anything that cannot be understood by at least some of the people of this Earth.

- *What I am trying to say is that human life exists under conditions you can presently not comprehend.*

The things that do not fit within your scientific insights are simply *rejected as nonsense*. This is why it is better to remain silent about it so as not *to increase* people's disbelief. Nobody will believe a terrestrial human being if he or she reports to have been on board an extra-terrestrial spaceship unless the evidence is as clear as daylight. How could the SANTINER possibly verify to you that human life exists on Venus, but under *different conditions*?

Question : When the SANTINER land on Earth, does their physical state here coincide with their physical state whilst on board their space stations?

AREDOS : This represents the great difficulty. When they come close to Earth they have to *change* their condition or they have to use incredibly constructed space suits.

Question : Can you tell us approximately what that condition is?

AREDOS : The SANTINER *change the distance between their physical atoms*. This alteration does however have its limits. This limit is at the periphery of the fourth dimension.

Question : We know that the SANTINER are presently the only human beings who visit us, ergo space people from other star systems. We also know that they exercise *divine supervision* over us. But what can the SANTINER actually do for us?

ARGUN : They can *spiritually prepare* you so that you acquire the maturity that makes it *possible* for the SANTINER to go hand in hand with you in every respect.

Question : What is the gist of their endeavours?

ARGUN : The SANTINER must *raise* terrestrial mankind from its physical coarseness. This is only possible through prepared spiritual elucidations to begin with.

Comment: We direct your attention to the ASHTAR SHERAN brochure: *Eternal Truth*.

Question : As from yesterday, a Russian cosmonaut is orbiting around planet Earth. Will the public always be informed when a cosmonaut is sent into space?

AREDOS : The Soviet Union sent numerous Cosmonauts into space the public *never* heard about and will never hear about later.

- *Satellites orbit around Earth with dead cosmonauts on board.*

March 1964

Question : Will space research also lead to important spiritual insights?

AREDOS : We certainly count on it.

- *Spiritual possibilities are greater outside the Earth's gravity and outside the Earth's atmosphere.*

Question : According to your statements, people's *actual* thought processes take place in the fourth dimension. How does this process work *without* a brain?

AREDOS : This process is extremely complicated. We are at any rate dealing with a PERPETUAL FORCE active within the cosmos. These are abundantly present FREQUENCIES, as present as the diverseness of fingerprints and the lines on one's palms. GOD holds the keys to *all* these FREQUENCIES.

- *GOD represents the largest COSMIC BRAIN throughout the universe. HE sees and hears with all the eyes and ears of all humanities throughout the universe. HE thinks with all the brains throughout the whole universe and HE is in possession of his own, enormously extensive FREQUENCY.*

Question : Why does it happen then that the physical brain fails, when the spirit is the actual initiator of thoughts?

AREDOS : When physical matter fails, the spirit is handicapped for as long as it is affiliated with the physical body. The spirit is subjected to confinement whilst in the physical body. It must abide by the physical body.

Question : As the immortal soul temporarily loses its mental cache of memories during an incarnation, its GUARDIAN ANGEL should be able to freely dispose over its protégé's cache of memories. Is this so?

AREDOS : The GUARDIAN ANGEL does *not* dispose over the cache of memories of its protégé, but he can intercept its thoughts. Every human being possesses its own *individual* FREQUENCY.

- *When a soul incarnates, it loses access to its old FREQUENCY and receives a new one instead. The cache of memories remains back in the cosmos until the soul has once again access to the old FREQUENCY and will then be able to remember everything.*

April 1964

Question : Are there SPIRIT BEINGS on the sun that are ahead of our own development?

ELIAS : There are *no* CREATURES living on the surface of the sun, because this surface is affected by powerful, fiery eruptions and radioactive radiation.

- *The centre of the sun's envelope however contains a planet. This planet cannot be compared with planet Earth. It is a dead planet. If there were people living on this planet, they would be unable to see the sun, they would only see its light.*

June 1964

Question : Will great inventors always be able to prevail accordingly?

ELIAS : Hardly anything will change in this respect, because negative elements are always ready to attack goodness – even if it is only just emerging. There are enough negative people around that assert that positive people are *too soft, too weak* and *decadent*. But there are also those that are *ashamed* of their feelings, who are *afraid* to participate in any form of festivity or celebration, like Christmas for instance, because they feel sentimental emotions inside themselves they *regard a weakness* and therefore suppress them.

Question : How is it possible that negative people are so successful in life?

ELIAS : There are those that appear to be very robust and initially give an unsympathetic impression. But they are respected just the same, one looks up to them and even glorifies them.

- *One is too little aware of what spiritual maturity is all about and one thinks most of the time that the victorious negative achieves great accomplishments.*

September 1964

Question : Why is it that some people comprehend a lot of things very well whilst some academics on the other hand do not comprehend a lot?

AREDOS : Comprehension actually depends on one's *achieved development*, something acquired over numerous incarnations. It is also down to the relay, that is to say, *one's brain substance* that can hinder things or retard one's mental activities.

But there are a great number of people where everything is in order, but they are *obtuse just the same*. These people will accept everything others already accepted before they do. They for instance accept the sciences, even if they promote mistakes. These people do *not evaluate* things themselves, but only work with established values that do not stem from them. It therefore happens quite often that politicians and academics base their decisions on behalf of criteria that is so ingrained that it is applied to everything.

But there are also simple minded people *without* a great education, they do make use of their *healthy power of analysis*. These people do not have the same criteria at their disposal. Nothing has been drummed into them that they can work with. They have to make their *own* decisions based on their own minds and these are *quite often far superior* to those of the others.

## Psychology

The soul disengages from the brain to a high degree during sleep.

The *deeper* the sleep, the more this applies.

The great independence enjoyed by the soul during sleep gives it imminent access to the cosmic RECORDS deposited in the universe. It actually seems probable that the soul zeros in on MEMORY VIBRATIONS that are *not part of its own* consciousness. The reflections of the zeroed in MEMORY ENGRAMS happens randomly most of the time. But the sleeper can establish spiritual connections to this gigantic, cosmic RESERVOIR. The major dreams of the archetype dreamer furnish sufficient evidence.

What is conspicuous with dreams is that concepts of time and space stop and that the oldest events move into the present. The dreamer's spiritual eyes sometimes see things the dreamer never knew or saw or he believes to be in a landscape that is completely alien to him. He can be involved in the detrimental effects of wars that are very peculiar and belong to long past times. Major dreams can evoke great natural catastrophes from hundreds of years ago, well sometimes even thousands of year ago. The whole, huge ARCHIVE installed within the cosmos, there to serve the human memory, is *not* a subconsciousness installed within the brain.

All human beings acquire their *own* memory reservoir through their CONSCIOUSNESS VIBRATIONS. Their consciousness reacts to their *individual* FREQUENCY, but there are cases where *another* consciousness also selects *the same* FREQUENCY. This is how people sometimes receive memory fragments that are *not* part of their own cache of experiences.

One thing is certain however, namely that scientific mistakes are often made in regards to human consciousness.

### Life force (Transmission from the SPHERES of LIGHT)

From a discourse by the MESSENGER of LIGHT SILBERBIRKE:

“Without doubt, there is a thing called VITALITY. Life only exists because there is an FORCE present that doles out ENERGY that represents its dynamic. Nobody in your world can explain what kind of FORCE you're dealing with. This FORCE is *beyond* the testing capability of scientific instruments, chemical analysis or physical inquiries. – There is “death” as you see it and there is life. The physical world is only *a shadow* of the ETERNAL LIGHT – the spirit.

- *The physical world is the shell – the spirit its content.*

The spirit is what brought life to unconsciousness. It is the thing that made you capable of *recognising yourself*. The spirit is the divine breath of life breathed into man in order to make him a living, *conscious* being. – The spirit makes man divine. It raises him above his ancestral weaknesses. It *distinguishes him from animals* and it makes it possible for him *to serve his fellow human beings*. It is the spirit that makes him *unselfish, altruistic* and enlightens him so that he reaches for the highest he can possibly achieve. It is the spirit that talks in everybody *if* they are willing to listen.

You are *not just* physical! The *spirit* that resides in you makes you divine. You are a part of the MIGHT that created the whole universe and everything in it, part of the MIGHT that controls it and guides it. This COSMIC SPIRIT, this LIFE FORCE is present in every human being. Man is an individuum, a SPARK of the divine FIRE. Man is an important part of the divine INTELLIGENCE a lot of people call “GOD” and I call the GREAT SPIRIT of all living things.

The grave *cannot touch* the spirit *whatsoever*. – The fire of crematorium can *never* destroy the spirit. There is *nothing* in the whole wide world that could possibly extinguish the eternal spirit. You should therefore show yourself worthy of the natural LAW that revealed itself to you and that will stand for ever and ever.

Through the act of death – which is only an act of dissolution of the physical body human beings temporarily occupy – people leave their terrestrial envelop behind. They then utilise their eternal ethereal body from then on. The spirit – call it what you like – slowly prepared itself for its perfection. Death does not mean the end as an individual – on the contrary – death *enhances* this individuality.

Death represents one wrung on the ladder of man’s development.

- *Human beings emerge from death as individuals with an undamaged consciousness and a healthy capacity to remember things. All the capabilities of the spirit and the soul are ready to serve them perfectly, because they are freed from the limitations of the physical body, with its restricting and inhibiting five senses.*

There is no Church that would be powerful enough to ban the truth of the spirit. You no longer live in the Dark Ages where such powers rested in the hands of a few individuals. You live in an age of great enlightenment, where men and women experience freedom, the freedom that is the life of the spirit. This freedom can no longer be denied anywhere. It will continue to grow! – Having to overcome a lot of obstacles is a good thing, because you will gain greater freedom from doing so.”

Comment: SILBERBIRKE is the name of the spirit of a highly developed AMERICAN INDIAN. The high standard of his spiritual development allows us to recognise the insanity of racial hatred. Neither the colour nor the brain decides the soul’s level of maturity!

## **A few facts speak for themselves**

In 1958, the American Press reported about a case of a so-called *Poltergeist*:

Very conspicuous spiritual phenomena took place at the house of *Mr. and Mrs. James M. Herrmann* in *Seaford, Long Island*. All kinds of household effects were thrown around by invisible hands. The case was so newsworthy that a lot of newspapers and journalists dealt with it. Even the general public showed a great interest in these curious events. A container filled with holy water was also treated very disrespectfully.

Comment: The fact that Poltergeister do not show respect for holy water all too clearly shows *which* sphere they belong to.

Such psycho-kinetic events are not a rarity in the USA. The USA is the country from whence spiritism began its journey across the whole world. England was not too far behind in this respect.

In *July 1957*, a little girl caused quite a stir in *Hartville, Missouri*. The nine years old *Betty Jane Ward* turned into the medium of a poltergeist who caused a lot of mischief with her. When Betty and her mother went shopping, merchandise fell from the shelves. The water slushed from buckets whenever Betty was around and the soap never stayed in its receptacle.

Comment: Even if we are dealing with base spirits, poltergeists are certainly that, they also endeavour to verify their existence, but unfortunately in an obtrusive manner. There are spirits who do not shy away from *boxing someone's ear* in order to get their point across. This would certainly be a most impressive way to convince an atheist. Our MESSENGER of LIGHT ELIAS told us that we are often dealing with *child-spirits* here and that they are still physically strong but also unmannerly.

## Question and answers

*October 1964*

Question : The Americans sent a rocket to the Moon. Is this a success?

ARGUN : I can see by your faces that you are pleased when I write with you. The rocket to the Moon was carefully tracked by interplanetary interests. You know that the day-side and also the night-side of the Moon are used as a base by the SANTINER. The SANTINER stationed some of their mobile basis' there. They observed the projectile on its journey. They acknowledge terrestrial man's great technical achievement. One will ascertain later, that is to say when the first manned flight has been successful, that there is more to the Moon than one presently assumes. There are for instance great *uranium deposits*, a lot of *iron ore* as well as *quartz* and also *precious stones* there.

Question : Dear ARGUN, what kind of results will this Moon survey bring?

ARGUN : The Russians will probably send the first manned spaceship to the Moon.

Question : Will the successful American rocket launch increase the tension between the USA and Russia?

ARGUN : I hold a different opinion. The propaganda will be enormous. But this doesn't mean anything, because the Russians and the Americans will have to come to the only possible conclusion, namely *to co-operate* with one another. The costs will otherwise be too great.

Objection : The fact that the SANTINER respect the *technical* achievement is interesting. But the spiritual is neglected on the other hand.

ARGUN : People also find the spiritual via materialism. Here is an example:

- *Insights one initially gained from allegedly hard and solid matter are false. When one gets right down to it, physical matter is unstable.<sup>5</sup> Through the electrical energy relationship of bonding particles – or let's call them scientific corpuscles, physical matter is held together. Their solidness is however only imaginary.*

Question : Does this abrogate the *Soviet Russian Dialectic Materialism's* principle of "Matter lasts

---

<sup>5</sup> Comment: The word "unstable" is new. It cannot even be found in the 'Duden'.

forever”?

ARGUN : Fully and completely! Matter is a *condensation* of the divine SPIRIT, a transformation of divine ENERGY. Only the divine, universal SPIRIT holds everything, and I mean everything, together. IT regulates the distances between celestial bodies and the distance between atoms, as well as the distance between atomic particles.

Question : Will the SANTINER support our attempts to send rockets into space?

ARGUN : The SANTINER do not support these attempts. They wait and see how far terrestrial people progress in this field. The further they penetrate into this field the more understanding and experience they will gain in regards to contact with people from other stars.

- *Terrestrial people will encounter their cosmic brothers through these endeavours.*

Question : Could an encounter here on Earth represent a shortcut?

ARGUN : Everything takes time to develop. This will also take its time. The SANTINER do not want to force anything on you.

Question : What activities are they presently engaged in?

ARGUN : They observe and register everything that you do.

- *They keep a close eye on you so that no Third World War breaks out. They would not allow a nuclear war to happen.*

Question : Does this mean that no encounter ever took place on Earth and that it never will?

ARGUN : An encounter already took place. I *don't* mean *officially*. I am not going to mention names. These reports are stored in the Pentagon. There is a whole series of such reports there. There is a *whole department* dedicated to contacts with extra-terrestrials.

Question : The American public now energetically demands that the government admits the truth, because it realises that the government's report are incorrect. What do you say to that?

ARGUN : The public might just as well demand that taxes are abolished. If the government would admit the truth, it would have to change its whole politics and that is something they find impossible to do. But the day will come when the government *can no longer* remain silent. – You were already close to waging a nuclear war. The extra-terrestrials were also in a state of high alert and this explains the many sightings.

Question : Did *Adamski* have a genuine encounter?

ARGUN : I am not prepared to deal with this. I also do not like to mention this name.

Question : Would a phenomenon like *Fatima* help terrestrial mankind?

ARGUN : Today's mankind is capable of *talking every* phenomenon and *every* miracle *out of*

*existence. It fabricates pseudo-scientific gobbledygook.<sup>6</sup> The Church vigorously participates in spreading this gobbledygook.*

- *The Americans received a number of very important photos from the “Sea of clouds” (Mare Nubium, a region on the Moon). These photos are not released to mankind, respectively the general public.*

*November 1964*

Question : The Christian Churches are still dealing with the dogma of original sin. Can you tell us something about this?

ARGUN : The idea of original sin is indeed a dogma. It is true that there are inherited illnesses and characteristics, but *a sin cannot be inherited*. A sin will stay with the person that committed it. Only this person has to account for it.

- *The dogma of original sin is not a doctrine from the realm of spirit, but an invention by priests who wrote such things down.*
- *Every human being can be without sin if they really want to be!*

The LORD gave you all your senses. It is up to you to utilise them correctly. Church doctrine takes its idea of original sin from the so-called fall from grace. The following can be said about this:

- *The first human beings came from the LORD. HE didn't send them just to this Earth, but to numerous other planets also. He did not damn them and this is why there is no original sin.*

It is certainly not the way the Bible teaches you. Everything runs exactly according to the LORD'S LAWS and they have nothing to do with the Bible. Everything is completely different. Man's history certainly doesn't begin with Adam and Eve. Also not with the eviction from paradise. The history of man begins with a precursor of human development. This is part of the natural sciences and not a fairytale.

- *Human beings were coarse bodied beings to begin with. – The races refined themselves over many thousands of years. There used to be an original man here on Earth and the races developed from that. The various races however developed different levels of intelligence. Human beings became more ethereal later.*

A well-known psycho-scientific work states that there are supposed to be three types of human beings. The first types was endowed with the souls of animals and it then evolved from there. Is this correct?

ARGUN : *No, that's not correct.* – I know where this assertion comes from. This medium was a very teachable student, but he had nobody at his side who could help or correct him. We show a lot of understanding for these mistakes, because we know how they came about.

---

<sup>6</sup> A typical answer by ARGUN, he doesn't beat about the bush.

These mistakes are not always the medium's fault. We would like to erase such mistakes, but we are prevented from doing so because there are *too many fanatics* about.

Question : Does this mean that *we also* make mistakes?

ARGUN : For as long as the circle's composition is good, the PROTECTION is accordingly good also. This is why no other spirit is able to get near the medium. Besides, we also control the medium to see whether it *senses* the APPROACH of another spirit.

- *The PROTECTION for mediums without a circle is always suspect.*

*December 1964*

The world renowned, meritorious psycho-scientist and humanitarian writer *H. K. Iranschähr*<sup>7</sup> assessed the Menetekel with the following words:

“According to the press, this community is one of the most serious and credible organisation within this field of knowledge.”

\* \* \* \* \*

*February 1965*

Question : Has *parapsychology* within the research into the hereafter made considerable progress or are its insights still the prerogative of private initiatives?

AREDOS: This question can only be answered from an *international point of view*. Parapsychological research has indeed made progress in this respect. The press also got to hear about it. The hereafter becomes more understandable day by day. – Political circles, this includes authoritative academics and scientists, stem with all their might *against* these insights and they would like to dismiss the whole affair with a flick of a hand. These scientists, and there are also a lot of *psychologists* amongst them, *hardly know anything about spiritualism*, but they still have the gall to make a *final* judgment about it. Their argumentations represent a *pseudo-science* that has nothing to do with reality and only *pretends* to give the impression of eminent scholarliness. GOD'S antagonist takes pleasure in this.

*March 1965*

Question : What is electricity?

ELIAS : Electricity is an energy that is present throughout the universe and it is connected to the presence of light. There is no electricity where there is no universe but only empty space, because electricity is related to matter and light is therefore a component of matter. Electricity is not produced, it is *attracted* by force. We are dealing with a *magnetic* process.

(Comment: Is one already aware of this formula?)

---

<sup>7</sup> **H. K. Iranschähr** (1884 – 1962) Schriftsteller, Psychologe, Pädagoge, Seher und Mystiker aus Iran stammend später in Europa wirkend, zuletzt in der Schweiz. Er gründete eine “Mystisch-esoterische Schule” und zahlreiche “Lichtkreise” und gab die Zeitschrift “Welt-Harmonie” heraus, ein Wegweiser zu Lebensharmonie und Weltfrieden.

Question : *Professor Einstein* endeavoured to calculate the universe. Can one actually produce and apply a mathematical formula here?

ELIAS : No. Human beings are spiritually as well as physically *dimensional*. GOD however is *super-dimensional*. This is the reason why human beings will *never* be able to comprehend anything super-dimensional.

- *The universe, the way it is today, developed from a number of universes that expanded to such an extent that they merged and amalgamated with one another.*

We can assume that there are other universes that have not yet reached the present universe and that will reach it eons from now. This is the reason why the terrestrial view of GOD is *virtually reckless* if not actually blasphemous. The divine LAW will one day become active where presently absolute nothingness exists and VIBRATIONS with their associated FREQUENCIES will develop then.

Question : One is still relatively unclear in regards to the story of creation. Do human beings descend from *Adam and Eve*?

ARGUN : The sciences still hold the opinion that present-day human beings might have descended from apes. Lots of theories are established and there are pros and cons in this debate. One asserts that human beings display a similar behaviourism to that of apes. But this is a *mistake*!

Humans are *indeed* one of the LORD'S creations. They are supposed to represent the perfection within creation, but they should also *recognise* and *appreciate* the LORD'S creation. This however requires various levels of development, because nothing is ever immediately perfect.

Human beings, in their earlier level of development, were physically coarse, disharmonious and primitive. They were indeed primitive in their outward appearance also, but the LORD *endowed* them with the required mental prerequisites. These mental prerequisites helped them find their way here on Earth.

- *To tell the tale of Adam and Eve is a mistake.*

No so-called mortal sin took place that forced the LORD to banish two people from paradise. No, it was the LORD'S will to secure highly evolved life on *this* planet according to the exemplars on other planets. But something like this does not happen from one day to the next, because to create a globe with its flora and fauna is much too long a process. Every step must be carefully contemplated. The whole development is *spiritually registered* and the divine LAWS are crafted according to this PLAN. Life then comes into being according to these divine LAWS.

It is indeed true that Neanderthal Man was one of the first human beings. It is also true that protozoans existed in the primordial world. But are you aware my dear friends *why* there was an ice-age on this planet?

Question : No. Can you tell us something about it?

ARGUN : One period of development had come to an end and a new one was supposed to begin. The LORD had to draw a line in order to realise the plan. Human beings were too primitive for HIM, because they could not develop their spiritual capabilities within the framework of the primordial world, they were *not ETHEREAL enough*. The weeds grew too tall and the animals were of gigantic size. It was not something that pleased the LORD. The difference between humans and animals was *too great*. Besides, the Earth orbited around the sun differently.

- *A correction to the orbit instantly directed the whole life situation on Earth along new lines. The whole world picture shifted. You have the most beautiful holiday resorts now where there were deserts or marshes in the past.*

The development of this planets history has not been concluded by a long shot. If mankind does *not* act according to GOD'S plan, an enormous correction can *instantly* take place. There are *sufficient* basic prerequisites present for such events. They are beyond the assessment capabilities of the sciences.

- *A change within the magnetic belt around the Earth has immediate and enormous consequence.*

Human thought processes must be trained further. They started to work along negative lines. Even though nobody is aware of it, the LORD sees and contemplates everything. The LORD can remain silent for a long time. But the LORD can also talk and command, if HE thinks it is necessary.

Human beings possess the gift of divine intelligence. This intelligence must however be *correctly applied*. Evil characters would like to make this gift of intelligence their own and this makes them large and cruel. But they forget their immortality in the process and they also forget that it demands account, a form of atonement that remains hidden from you on this planet. The LORD will not be derided!

Question : A proverb states that adversity is the school of wisdom. Can the human race come to its senses only through adversity?

ELIAS : How often did GOD intervene, given you signs and even sent his SON to Earth. But one was not willing to see and also to listen.

- *The things that take place here on Earth are unique throughout the universe.*

Beauty and ugliness are seldom so close to each other than here on this planet. The step from genius to insanity is supposed to be a small one and this absolutely applies to this Earth. You can see how close these contrasts are particularly here. But planet Earth is an eminent planet of redemption just the same.

*April 1965*

Question : We always return to the fact that societal mistakes must be eliminated. Assumptions about the activity of the *subconscious* are part of these mistakes. Where are people's memories stored? Where is the whole mental legacy, people continuously operate with, stored?

ARGUN : Thoughts and all other mental concepts are to be found in the *cosmos* and *not* in people's brains. People living on Earth are however in close contact with the cosmos. The soul is the stage director of the body. When the physical body is no longer viable, it breaks its contact with its stage director.

ARGUN : It is a grave mistake to assume that thoughts and consciousness are produced within man's brain. The brain is *not* a reservoir for one's memories. The brain receives the soul's cosmic thoughts similar to the way a radio receives a broadcast. Beyond that, people have the ability to contemplate, to plan, to compare and to draw conclusions.

- *All these thought processes do not take place within the brain, but within the cosmos. The thought processes' electrical impulses are not identical to thoughts. The brain mainly functions as a relay for the physical body.*

People can love and they can hate, they can bear a grudge and also be forgiving. Do you believe that all these characteristics can *only* be produced by physical matter?

(Comment: It would be impossible for us to establish contact with otherworldly INTELLIGENCES if consciousness and thoughts were *not* of a cosmic nature.)

June 1965

Question : Electricity is present throughout the universe. Does electricity have anything to do with the soul or in general with people's thoughts?

ELIAS : Electricity is very much identical to matter. The following is what truly happens: The sudden change of position of the atoms in regards to one another produces electricity. This electricity still hides secrets the SANTINER are well aware of, but you – fortunately for you – still have no inkling of. We are not allowed to tell you anything about it.

- *Electricity does however have nothing to do with the functions of the soul or its thoughts. Your brain specialists can therefore absolutely forgo these assumptions.*

August 1965

Question : We repeatedly experienced some very severe earthquakes in recent times. Do these quakes have something to do with *nuclear tests*?

ARGUN : Yes, particularly with *underground* tests. Even if these quakes are far from the sites of the explosions, these quakes are nevertheless triggered at the most vulnerable areas of the earth's crust. All people can do is to protest, demonstrate or boycott. The powerful on Earth will however not react.

- *Extra-terrestrial POWERS will magnificently intervene before the world will go to rack and ruin.*

People only obey a major power. Well, there are a number of them. They will therefore have to obey a SUPERPOWER. This SUPERPOWER towers way over any major

power. People deal with an elementary energy and they have no idea whatsoever what that actually means!

Question : The embryo of a human being, from the ovum stage onwards, goes through all the stages of biological development in its own development, ergo via animals, fish etc. and even temporarily displays the formation of gills. Where do these similarities with the animal kingdom come from?

ARGUN : The comparison with the baser animal kingdom is often dragged into the equation out of thin air. Certain similarities certainly crop up, because human beings are organically speaking, virtually on a *parallel course* with mammals. But this construction has a *completely different tempo* and also a different rhythm. The whole arrangement is also different. The formation of gills doesn't indicate anything.

*September 1965*

Question : This year has also seen some severe earthquake. Even if taking the fact into consideration *that there have always been* earthquakes, the question arises whether these quakes have anything to do with nuclear tests?

AREDOS : Yes, that's correct. They are *partially* the result of your subterranean nuclear tests. The Earth's crust is akin to the shell of an egg. Large fissures and cavities can be found under this crust. Besides, the inner pressure isn't the same everywhere. This is where human beings interfere and the enormous forces that are generated flow under the surface in all directions. Scientists would only accept this process if earthquakes would eventuate *immediately after the triggering* of an underground nuclear bomb, they maintain that this quake should therefore not be too far from the epicentre of the explosion. This is a great mistake.

- *A bomb can be triggered in Mexico. The earthquake, as an immediate result, can appear around four years later in Japan or in South America. The amplified pressure, mainly created through radiation, seeks out the weaker areas of the Earth's surface.*

Question : Can such a quake also eventuate in Europe or in New York?

AREDOS : These are not vulnerable points, particularly not New York. But far more dangerous are *submarine quakes* of this nature. There are also many vulnerable points under the oceans.

- *Large scars run along the middle of the Atlantic Ocean and through the Pacific Ocean that have not healed by a long shot. If such a scar would break open along its entire length, an enormous catastrophe would eventuate where not one single creature on Earth would survive.*

Question : How is a calamity of such proportion possible?

ELIAS : When the earth under the ocean breaks open, enormous amounts of water flow inside the glowing mass of planet Earth. The incredible development of steam would blow the whole globe asunder.

- *Such a catastrophe took place once before, it however lies in the distant past, millions of years ago. A planet of your solar system completely dissolved because water entered its insides.*

Such a probability cannot be dismissed in regards to planet Earth's possibilities. This is the reason why terrestrial mankind is closely observed. Extra-terrestrial spaceships uninterruptedly fly their surveillance flights. These are not discovery or joy flights. The SANTINER have a responsible assignment and they are very worried about you.

Question : Nuclear tests have been relocated underground because one wants to avoid contaminating the atmosphere with radiation. Does this avert this danger?

ARGUN : The radioactivity is still very high in spite of this. Firstly flora absorbed these rays and secondly a lot of fish have been affected by it.

- *Scientists want to make mankind believe that the radioactive clouds were flung into the cosmos, but they know all too well that these rays are pushed back to Earth through the power of the sun. This process will draw out for many years.*

Question : A lot of people complain about severe depressions. Are these illnesses connected to this?

ARGUN : Yes, these people naturally suffer from these influences. GOD placed mankind at a crossroads. It is the time of the BATTLE of ARMAGEDDON (biblical).

Question : Has this BATTLE of ARMAGEDDON already started?

ARGUN : It is already marching towards its end. Listen to ASHTAR SHERAN to see what he has to say about it.

Question : Why do academic scientists have so little faith in the existence of a divine REALM? – Why don't they believe in the survival after death?

VERITAS<sup>8</sup>: First of all, there are people that are particularly inclined to be pessimistic. If they happen to be scientists they hold the opinion that it is their assignment to express their pessimism in all scientific faculties. They unfortunately confuse pessimism with objectivity, because: Pessimism is *not* objectivity.

And then there is another big hurdle: Materialistically minded people find it *particularly difficult* to believe in invisible things. These people predominantly experiment with physical things and apply laws that only refer to material things.

But there is a WORLD of SPIRIT next to the physical world in spite of this. This world is considerably larger and it also offers greater opportunities. But the human race living on Earth hardly managed to encroach on this world, because a lot of scientists of world renown are afraid of *being ridiculed by the public*. I allow myself to assert that these people do not possess a solid character, because they lack the courage to preach the TRUTH.

---

<sup>8</sup> VERITAS is the spiritual ORDER NAME of the German philosopher Arthur Schopenhauer.

- *Scientists suffering from conceitedness and smugness are not true scientists in my eyes unless they have the courage to descend to the very depth of an issue in the name of science and research, in order to find the pure truth amongst all the rubbish they find there. – The world can do without them!*

All these people will find out in the hereafter, where their smugness will no longer help them, what they have *really* achieved in spite of their titles and prominence and what they are personally worth, that is to say, spiritually worth.<sup>9</sup> Researcher who shy away from or find occult questions ridiculous, meaning in this case unsolved questions, pull the rug from under all research and in the process also from under the truth. Because: How can other researchers build upon insights that were negated in the first place? How can other researchers make progress when their predecessors retreated out of cowardice or unsubstantiated shyness or what is even worse – *deride the whole affair?*

There is a scientific formula in the hereafter that is absolutely valid, it is: *Nothing is impossible!* – Because the impossible is already a positive concept, even if not visible, it can be invisible, the way suggestion can make something invisible but real comprehensible.

I am not a scientist, but a philosopher and this is why I leave it up to the experts to work out this formula and use the appropriate characters in it.

*Professor Heisenberg* managed to get quite close to the issue, but I am of the opinion that a correction is called for. If a general *world-formula* is to be drawn up, it may not be exclusively concerned with the physical world. This formula must include the *whole* universe. The whole universe is a physical world *and* a SPIRITUAL WORLD!

Something that might seem impossible in your world can be easily possible on another planet. Something that is not possible in one's material existence can be absolutely realised in the realm of the spirit, because where one law does not apply, a supernatural law can come into effect.

Terrestrial mankind still knows too little about CREATION on *both* sides.

- *When people's spirit is directed at the hereafter, the otherworldly will answer them.*

## **Facts speak for themselves**

Twins were observed in the USA with the incredible ability to complement each other's knowledge telepathically. Knowledge gained by one twin was consciously at the disposal of the other twin *without the twin having to learn it.*

- *This case unequivocally refutes the false theory of recorded engrams within the brain and verifies that consciousness with all its memories is of a cosmic nature.*

A certain *Peter van Urk* was suddenly endowed with the ability of clairvoyance after falling on his head so that he was able to place his gift at the disposal of the police in order to solve crimes. Such

---

<sup>9</sup> See brochure "Nachruf" under "Referate und Berichte".

cases are absolutely not unique.

It is on no account correct for the sciences to call these cases “mysteries” and to leave it at that. These cases are absolutely *no* mystery, they are by all means clear. The only true explanation is: *Psychic*.

The sciences denied the existence of telepathy with pathos only just a few decades ago. Those that asserted that such things were real were simply ridiculed. These days, after a lot of rigorous experiments, telepathy has been faultlessly verified. It is empirical. But one makes another mistake now by applying telepathy as the yard stick and explanation for most spiritual phenomena. This is a narrow-mindedness that certainly has no place within the sciences. Engrams for instance can come about through experience.

Where did CHRIST gain the experience to get hold of these engrams?

Where do psychic people get their otherworldly experiences from these days when they report about the hereafter?

Where is the logic here?

\* \* \* \* \*

October 1965

### **Parapsychology (3)**

Parapsychology is a relatively new science. A lot of people still don't know *what* problems this science is actually dealing with. Parapsychology is a science that was only strived for after psychology. Not a lot of people know what this denotation actually means.

This science, just like psychology, deals with the exploration of mental processes in human beings. But parapsychology delves deeper into the mysterious darkness and as it crosses the boundaries of the known natural sciences, it is also called the *psycho-scientific frontier*.

Parapsychology is unfortunately still so underdeveloped that one does not really know what belongs to it and what does not. This is why there is this doubt of whether *spiritualism* is for instance a parapsychological science or whether it actually constitutes its own science.

What is particularly regrettable is the fact that intellectuals hardly know that parapsychology actually exists. We often found that publicly debating scientists, doctors etc. never made a distinction between *spiritualism* and *spiritism*, even though there is an eminent difference between them.

- *These people in particular, namely those that do not know the difference between spiritualism and spiritism, profess to have the last word in regards to the supernatural.*

No surprise therefore that they are so successful with the public, because the broader masses of the world at large, like the press, radio, television and millions of viewers and listeners also have no idea of the reality of all its implications. They simply listen and believe the stories they are *told*. They cannot assess things by themselves.

\* \* \* \* \*

## Questions and answers

*November 1965*

Question : A long time ago, a planet of our solar system is supposed to have been completely destroyed because of the sacrilegious behaviourism of a human race. Is this really true?

AREDOS : That the planet *Mallona* was destroyed during experiments carried out by that particular human race is true. Subterranean explosions opened a weak area under the ocean and this flooded the glowing innards of the planet. The planet exploded like a giant steam boiler.

- *Fragments still orbit around your sun. You call them asteroids.*

Question : The assumption that people from this planet incarnated on our Earth is not that far-fetched, if this is really true. Is this assumption correct?

ELIAS : Yes, that's correct. These incarnations mainly take place in *China*. But they are also spread right across the world - according to their development. This is the reason why there are people on Earth that pursue similar experiment, like the ones that took place on planet *Mallona*, with great assiduousness. Besides, there are plenty on *Mallona*-souls here on Earth dealing with a lot of things and inspiring experts in the fields of nuclear power, rocket science and armament. The influence these people exert is greater than one forebodes. This is the reason why such experiments progress very quickly.

- *Unless common sense retains the upper hand, the Earth could suffer the same fate as that earth-like planet Mallona.*

*December 1965*

Question : Why did the photos of Mars not show any canals?

ELIAS : Mars has a cracked surface.

- *Mars has large and extensive chasms on its surface and they look like canals from a distance, but they are not.*

Pictures only show the borders of chasms and Mars canyons, that is to say, only their periphery. This is unfortunate. Due to the size and comprehensiveness of these extensive chasms, one only gains a better picture from a great distance. Close-ups are useless.

- *Mars is a very old planet, one that is already extinct. It once had life on it. But no human life unless one counts the visitors to the planet.*

Mars will however accommodate life again one day. Mars will also possess a new civilisation one day. The atmosphere will then be different from the way it is now. The greatest problem for life in Mars is water. Mars will however receive water, but not in great measures the way water is present on Earth.

Question : How will life in Mars develop?

ELIAS : Mars will receive an assignment. The human race on Mars will come from the people here on Earth. But this is way in the future. A lot of time will pass before this will be the case. The surface of Mars presently looks very similar to that of the Moon.

- *There are numerous cases throughout the universe where a planet has been used for deportation. Terrestrial people know very little about the plans they will one day put into action. Operation Mars also belongs to these plans.*

Question : Will our technical endeavours suffice to bring this about?

ELIAS : Yes, terrestrial people will probably achieve this, but help from the SANTINER will save them a lot of time. The people on Earth must however be *more responsive* towards the SANTINER, particularly in regards to their *religious* behaviourism.
