Protocol extracts from the *Menetekel* brochures of 1956 - 1975

Theme : **UFO-Contact**

Author: Herbert Viktor Speer

3. Addenda 1969 – 1975

This additional series on “*UFO-Contacts*” mainly stems from the pen of *Herbert Viktor Speer*, the leader of the *Medialen Friedenskreis, Berlin* (Psychic Peace Circle, Berlin). The following texts were left in their original form and this naturally also applies to the psychically received passages introduced by *H. V. Speer* here and there as additional information or explanations. All contents are a part of the *Menetekel*, a collection of 4,500 A4 pages of freshly catalogued protocols, amassed over 20 years. This additional series began in 1961 and ended with the disbandment of the work circle in 1975. The total production of the MFK-Berlin (Medialer Friedenskreis Berlin), the *Menetekel* and the 21 transmissions from the space-brothers are considered the absolute pinnacle of psycho-scientific research. Other spiritual circles have often tried to copy the work of the MFK, but its quality was never achieved. The reproduction and distribution of these rearranged messages and protocols is *explicitly encouraged* and is not covered by any copyright.

Preface by the publisher

Some might ask themselves: Why should one burden oneself with these fanciful imaginations that cannot help us anyway; one should rather keep one's feet firmly planted on the ground of mundane facts when trying to solve one's own burdensome problems.

If all problem phases within the development of our human history had been handled according to this point of view, we would still be waiting for the invention of the wheel. We must find the courage to develop thoughts and ideas that are still utopia these days, but will be part and parcel of our sphere of existence tomorrow. The terrestrial problems we are faced with on a global scale as never before, will then simultaneously be resolved from within this higher space of consciousness. All spiritual reorientation always means the turning away from the fractured foundation of an outdated reality of life and the decampment to a new dimension of life. The old disappears in order to make way for new, illuminating knowledge.

Now that the knowledge about the UFO phenomenon has found its way into the military's deliberations of major powers and partially into the thought processes of science and technology – even if it's under a veil of secrecy and inexplicable – it does not seem amiss to make these scripts available to the broader masses in the hope that the demand for elucidation of these phenomenal apparitions is greater now than in the past.

Bad Salzuflen, October 2009

UFO-Contact

January 1969

Terrestrial people can unfortunately only act according to *terrestrial* yardsticks. The moment something extraordinary appears, logic *fails* because it depends on people's personal experiences.

The UFO problem, now turned into a global problem, is not taken serious enough by the broader population. People's personal experience does not seem to suffice. The moment UFOs increase their speed to a degree that we cannot comprehend, they become unbelievable. The same applies to other extraordinary phenomena. The broader population has only taken an interest in the technical side of these apparitions up to now. But this technology is still incomprehensible to us.

This is the reason why there are a lot of people that assume that UFOs are based on *imagination* or *erroneously interpreted natural phenomena*. This assumption has been largely refuted spiritually. There is no doubt of their existence for us, because we had the good fortune of getting in contact with these INTELLIGENCES from the universe now and again for over 10 years. Communication was fragmentary to begin with, but it continued to improve over the course of time. We can now communicate with these people irreproachably. Our otherworldly GUIDES also help us as they are not inexperienced in this sector.

The brochures that we published found great favour with experts and some were translated into other languages. We can tell you now that the name ASHTAR SHERAN found favour all over the world. His messages reach a so far unattained level from a religious and also a political point of view.

We could unfortunately find out very little in regards to their technology. The extraterrestrials probably do not want to plunge terrestrial mankind into further dangers, something a super technology could conjure up in the wrong hands. This is the reason way we hear from them that we are *not yet mature enough* for these secrets.

Even though we hold a different opinion, we are still extremely underdeveloped in the eyes of extraterrestrials. But if we really think about this we only have to think about our completely muddled political situation. Besides, our animosities and warmongering border on superlative insanity. For as long as we do not change our ways in this respect we will not hear one word about the secrets of their flight technology.

Interested people wrote to us, asking us to ask extraterrestrials about this and that. To ask these questions would however be impossible because we would not receive answers to them. Over the years, we always had our best contacts during springtime. We hope that we will also be able to engage in valuable communications in 1969 also. We will immediately inform our readers the moment such a contact with ASHTAR SHERAN takes place.

One should not simply read the messages from ASHTAR SHERAN, one must *study* them and *think them through carefully*.

UFO-Contact

February 1969

The transmitted messages from the extraterrestrial messiah ASHTAR SHERAN that we received over many years have found comprehensive attention. These messages have indeed coloured the views of lots of authors and UFO experts. The question our readers ask is:

“How does an ASHTAR SHERAN message come about?”

To answer this justified question is not easy, because its understanding requires important knowledge in regards to the occult. But most people know *very little about this* specific sector.

We were originally *no interested* in UFOs *at all*. We regularly conducted our scheduled séances and allowed ourselves to be indoctrinated by our spirit GUIDES.

After our mediums had gained great experience and perfection, we suddenly received a surprise: ASHTAR SHERAN had observed our séances without revealing himself. Our spirit GUIDE simply wrote with the hand of the medium *that we had an EMINENT GUEST present at our séance*, whom we could however not see. This was repeated a number of times without anything to do with UFOs eventuating.

After some time had passed our spirit teacher informed us that were about to receive a very important gift. We racked our brains about this but couldn't find out what it could possibly be. Through the hand of our medium we suddenly received the now *world-famous portrait of ASHTAR SHERAN* at the end of one of our séances. The otherworldly draftsman JOHN SHERIDAN, who had drawn numerous GUARDIAN ANGELS in the past, did however shade the white in ASHTAR'S eyes very darkly. When questioned he answered that he had difficulties with the pencil, as he couldn't reproduce the actual colour of his eyes because *the white* in ASHTAR'S eyes was *bluish*.

We received the first UFO messages a considerable time after. These reports were initially transmitted via our spirit GUIDANCE; they were however constantly attacked by the demonic side, that is to say, interfered with. This interference increased after ASHTAR personally took control of the medium. These interferences and falsification could only be eliminated after a *number of years*.

Perfection and surety are completely irreproachable these days. The ASHTAR SHERAN messages that we mostly receive under the PROTECTION of our spirit GUIDANCE are momentous in their content and they can no longer be surpassed.

If we were asked to *verify* the degree of genuineness of these messages we can refer to our experience, because it is generally known that we have conducted well over 1,000 séances. To break through our established PROTECTION is impossible. We can ascertain with absolute certainty whether we have a *genuine* contact with our spirit GUIDES. These GUIDES secured our absolute trust during the 16 years of conducting séances in a most bodacious manner. These GUIDES would *never* lie to us or pull our legs.

We can however not make an appointment for a UFO contact. We cannot send for ASHTAR SHERAN. These messages happen *purely spontaneously* and they follow one another in rapid fashion.

ASHTAR SHERAN is so important that he is *falsely* represented in a lot of circles. Evil spirit use his name in order to creep in and to get a better hearing. Great criticism and care and attention is appropriate here!

UFO-Contact

March 1969

There are still a lot of interested parties around that believe that extraterrestrials will undertake a *mass-landing* one day in order to collect a number of people from Earth so that they can continue to live on another planet in another star system. This opinion is unfortunately rather widely spread. Our experience with the SANTINER tells us that such an assumption is futile.

- *Terrestrial human beings are removed from Earth only on very rare occasions. One cannot even count on terrestrial human beings being brought to another planet in case there was a UFO invasion.*

Reincarnation, that is to say, renaissance offers an opportunity to live on another, higher developed planet in another star system. The birth on another planet must therefore be *preceded* by one's terrestrial death.

- *Terrestrial human beings do in most cases repeatedly return to Earth, because their development here makes very little progress. They must have acquired extremely high qualities to have the prospect of a life on another planet.*

One has to assume that those friends of UFOs that would like to be picked up must believe in a kind of doomsday, ergo the punishment of irresponsible terrestrial human beings. The thought of punishment cannot be completely dismissed; but such an apocalypse will surely come about *completely differently*.

Something that we have been informed about over again is that the SANTINER seriously contemplate whether to place the Earth under a *protectorate*. Such a decision would however constitute a *last resort* way out of our dilemma, because it would rob us of our freedom. But our freedom is the very thing GOD endowed us with. This is the reason why it is so very difficult to predict what the SANTINER *actually* want to undertake. They still maintain a so-called "soft approach".

We will soon have the prospect of being instructed by ASHTAR SHERAN once again. Such a contact is being prepared as we speak. We will therefore be able to publish a brochure this year also and this will happen as soon as we have the pertinent material in our hands. Such work can however take up to three months before it can be published. We therefore ask that you refrain from asking questions about it. We will inform you through the *Menetekel* the moment we know more about it.

In any case, a development is taking place here on Earth whose backgrounds are known to very few people. ASHTAR SHERAN will voice his opinion then and he will inform us in detail.

ASHTAR SHERAN will probably say something about the so-called BATTLE of ARMAGEDDON, namely the biblically prophesied contention between the UNIVERSAL POWERS of GOOD and EVIL. The start of our contacts already looks very promising.

- *The things that will take place in the near future here on Earth are momentous. This development can introduce a completely new age.*

When international government circles try to conveniently *deny* the existence of UFOs they do so for a reason, namely because *they do not want to end up under the control of somebody else*. Even if they were forced to admit the reality UFOs represent, they would resolutely deny that they are manned by crews. This is why it is doubly important that we deal with the messages from these UFO occupants. Only the fact that they are occupied by pilots makes them actually meaningful to us. They are bound to be incorporated in GOD’S PLAN.

UFO-Contact

April 1969

People in lots of countries have been engaged in the research and clarification of the UFO phenomenon for many years. The conclusion that one can only be dealing with extraterrestrial spaceships immediately influences the human imagination. One has to make a distinction here. The things that emerge from imagination must not necessarily be the truth. But there are truth that sound so fantastic that one begins to doubt them. One cannot expect the layman to assess things like an expert. But in light of the extraordinary seriousness of this issue every individual human being should try to have both feet on the ground. Nobody may get up to mischief in regards to such a serious and sacred issue just to satisfy their craving for recognition or for financial gains.

Extraterrestrials are *not* angels. We are dealing with highly evolved human beings that are *very far advanced* of us. But the leaders of our terrestrial humanity find this conclusion extremely unpalatable and abhorrent. Our terrestrial leaders see themselves as the greatest intelligence throughout the universe. But because they are ungodly – even if they belong to a religious community – they are unaware of the blasphemy they commit.

Just how easy it is to ignore such a blasphemy can be recognised by the expenditure and the fanaticism bloody wars are being fought. If the leading echelon *were really* as intelligent and experienced as they profess to be, such bloodshed and hateful reactions would no longer take place. On the contrary – they thereby reveal their thought processes’ incredible low level, something that has nothing to do with the progress made in regards to the technical development. Ungodliness is not a logically gained A-level!

We regret the fact that it is impossible to verify ASHTAR SHERAN’S existence along these lines. Only a few guests from here and from abroad were privileged to personally convince themselves of the truth.

Let us assume that an eminent politician would be invited to one of our séances. His mental state of mind *might* however be so unsuitable that any *genuine CONTACT* would become impossible. He would say after that he is now convinced that he witnessed a fraud. He would never admit nor comprehend that *he himself* was the cause for the failure.

Let’s now assume that a spiritually forward aspiring guest visits a séance. He would probably experience something that he would not forget for the rest of his life, something that would instil a high level of confidence in him. He would not just believe, he would *actually know!* – But what happens when this guest exposes his experiences to the public? One would say: “The politician was a *matter-of-fact realist* that one *couldn’t* dupe. But the spiritually advanced seeker of the truth, pious

and humble, was *so naïve* that it was easy to pretend anything to him, because *he is prepared* to believe in the supernatural even if he is being duped.”

This doesn't just apply to *Spiritualism*, but also to UFOLOGY.

This connection has been glorious and productive in regards to wonderful new revelations for us over 16 years. We can only verify the truth through the logic and INTELLIGENCE contained within our publications. Our task would be *even harder*, if extraterrestrial spaceships had not been *sighted* all over the world. We hope that this *visible* support *increases* so that the path to peace is made a little easier.

* * * * *

UFO-Contact

May 1969

UFOs have always been mysterious, hardly comprehensible and full of riddles. Their behaviourism seems incredible to us. One has allegedly already spent millions on researching them, but the public only gets to hear that they probably do not exist at all.

But they *do exist*, there is no doubt in our minds at all, because we ourselves are a point of contact for these mysterious objects. We did not have millions at our disposal for our research but we made considerably more progress than the *University of Colorado* USA in spite of this. UFOs present us with a seemingly insoluble enigma just the same. In order to comprehend the occupants of UFOs we have to stretch our thoughts to their limits.

- *We do not deal with UFO sightings. We do not observe the sky and examine reports of sightings. But once in a while we do communicate with BEINGS that call themselves extraterrestrials.*

From our international correspondence we ascertain from time to time that a number of readers have a completely false concept about our UFO contacts. It is very difficult for us to give an accurate explanation, because this process is so complicated that we would have to write a comprehensive reference book in order to explain what is going on here. This process is certainly more understandable to occultists, spiritualists or mystics, because they already possess the required background knowledge.

- *A neutral observer would however not see a noticeable difference between a contact with the hereafter and a UFO contact. The UFO messages happen in the same way. Only the medium can perceive the difference.*

As we mainly have writing mediums at our disposal, the mediums only feel a change to the way their hands are guided. Now if a SANTINER, that is to say an extraterrestrial who is not supposed to exist in the first place and only pretends to be one writes, he would have to be an invisible WRITER of high esteem. In contrast to our excellent spirit GUIDES, he would have to be a wise ANGEL. His messages are characterised by *enormous wisdom* and *human development*. For such an eminent spirit to resort to lying, something that is absolutely not necessary, would flout all religious rules and experiences.

Our spirit TEACHERS also continuously confirm that UFOs exist and that we are in contact with an extraterrestrial. Should we also accuse them of telling pious lies only because we cannot correctly understand the process?

The messages we received from ASHTAR SHERAN so far are bodacious. There is nothing in either UFO literature or all of philosophy and theology that could trump them. Someone from Earth would never have this overview and the experience that we encounter here. These messages will one day turn into the apex of our sciences.

The way we handle this communication consists in the first instance of *automatic writing* during our séances, whereby our spirit TEACHERS and GUIDES assist us.

But our UFO contacts also offer us the opportunity of receiving these dictations through *psychic clairaudience*, something inexperienced physicians like to call “schizophrenia” (split personality). But those that study these ASHTAR SHERAN MESSAGES – physicians also do so – must absolutely realise that this “Schizophrenia” is unique, bodacious and highly intelligent.

Be that as it may, the UFO enigma is occult to us; but we cannot discount the fact that they *actually* exist.

We can count ourselves lucky that we can publish a new ASHTAR SHERAN brochure this year also. Every time we receive a new extraterrestrial message we ask ourselves whether it is actually possible to enhance the content of the message. We do get the impression that the UNIVERSAL TEACHER ASHTAR SHERAN has actually told us everything that is of importance and comprehensible to us.

But ASHTAR managed to enhance his messages to incredible heights!

CHRIST held an impressive *Sermon on the Mount*. ASHTAR SHERAN did the exact same for us. His expositions about the BATTLE of ARMAGEDDON are more than impressive; they are overwhelming!

All people on Earth know that our situation is precarious. But why we ended up in such a situation and how we can extricate ourselves from this situation is explained to us by this GREAT TEACHER, who is part of a divine MISSION, with asperity and clarity.

Our ASHTAR brochures have been excellently acknowledged and translated throughout the world, so that nothing more needs to be said. But this new brochure is not inferior to the ones that preceded it – on the contrary – it probably stands at the apex of all the messages that we psychically received. The explanations are in their original form and they have not been manipulated. This is the reason why their serious warning is not lost on us as human beings.

We can thank GOD from the bottom of our heart that we have such a TEACHER and such a BEING in charge, one that looks after us so caringly.

* * * * *

UFO-Contact

June 1969

The new brochure from ASHTAR SHERAN once again caused a sensation. We are pleased about its success. Even though our edition is not very large, because we only fulfil a certain mission, we still have the satisfaction that ASHTAR'S words are not spoken in vain. We thank all our readers that endeavour to disseminate the truth.

Engineer *Walther Ohr* wrote in an article in the "*UFO-Nachrichten*":

They also speak a forceful language. In other words: *They got closer to CHRIST'S archetype*. Intelligences already exist according to this that have followed in his footsteps and that might perform even "greater things".

The SANTINER, that is to say these extraterrestrial pilots are not just technically and scientifically superior to us, they are also spiritually *far ahead* of us. Their messages therefore also surpass all terrestrial philosophies or religious doctrines. Their language, in spite of its difference to ours, is bodacious and we are constantly surprised about how comprehensibly ASHTAR SHERAN expresses himself.

When ASHTAR'S words are ignored by the powerful on this Earth you'll find that this is based on absolute wilfulness and the refusal to admit their own inadequacies. Those that believe that the *UFO-Report* by *Dr. Condon* (USA) diminished people's trust in our extraterrestrial visitors are mistaken. This *UFO-Report* stirred up a hornet's nest. It triggered a wave of indignation right across the world. One could equally say: "There are no hornets, they only exist in people's imagination." UFO research has now been challenged to deal with this phenomenon *even more intensively*.

Those that read the new brochure ARMAGEDDON recognise the things that actually take place here on Earth. Lots of letters verify to us that our publications represent an *excellent study subject*. A lot of the things we proclaimed 10 years ago have become a reality today. The magnetic train, as described in the brochure "*Not from this Earth, Part 3*" under the title "*Magneto-technological development*" is part of this.

The rectification of the Bible is enormous and comprehensible.

Its miracles turn into reality.

There has not been one terrestrial human being for over 4,000 years who had the mental capacity that *came anywhere near* to that of the great UNIVERSAL TEACHER ASHTAR SHERAN.

ASHTAR messages appear all over the world, most of them are clumsy falsifications that only harm the truth. We warn you about such treatises! Great caution has to be exercised if our source is not mentioned, even when names like ASHTAR SHERAN, ARGUN or ELIAS appear. It is often a case where evil hoaxing spirits misuse inexperienced mediums by *using* these names.

- *One thing is certain, there are **no** end-of-the-world paroles! – All of them are fake!*

UFO activity is constantly on the rise. Germany, respectively Europe, is not at the forefront of these visits, the USA, Australia, South-America, Japan and certain regions within Russia are preferred localities. Extraterrestrial mother-ships, they are well over 1,000m long, find it difficult to land on

the ground. They require solid ground to land upon, ergo a rocky plateau. Landing in the desert is wellnigh impossible, because the sand would be completely swirled about.

Where does an opportunity for such a landing exist? The SANTINER are trying to find this out, but they also possess unmanned, remote-controlled reconnaissance objects.

- *Extraterrestrial UFO flights are not restricted to a number of countries, they are absolutely global. They fly everywhere. This is one of the reasons why it is completely illogical to call them the product of imagination.*

If this was so, the Bible would be largely based on imagination also and we would neither require a religion nor churches.

The naivety of intellectuals and members of governments who offer people explanations is simply incredible.

- *Lies about UFOs are however impressive evidence that peoples are presented with lies that stretch right across all fields of the human existence.*

If one is supposed to be dealing with human imagination of such proportions, mankind can also not be sure about the imagination that the most abominable wars are *absolutely necessary*, because no other path to human progress allegedly exists. This nonsense is so obvious that it unmasked its own stupidity.

Peoples of the world, take a look and see how you are being made fools of!

When we publish these lines, we do not do so based on newspaper reports or known UFO books, but because we have engaged in contact with UFO humans for more than 10 years thereby gaining years of experience in this field. We can therefore absolutely confirm the existence of extraterrestrials and we are not concerned about being seen as nutcases. One might however consider that fact that the extraterrestrial messages directed at terrestrial mankind give testimony of something of the highest quality and intelligence.

- *We cannot be blamed for that fact that the SANTINER do not chose a different way of communicating, it is probably the fault of the human governing bodies that they are not suitable for this.*

The daily newspapers reported a few days ago that a very clearly visible UFO object was sighted over Berlin. This object flew over the Grunewald and it remained hovering over a clearance about 150m from the ground. Its size was around 10m in diameter. A walker took numerous photos of this object. He was however clever enough to not develop these photos himself, he asked the *Berliner Zeitung* to do this for him. The *Berliner Zeitung* ascertained that such an object was indeed on the photos. A number of “experts” were consulted but they only laughed.

We can see what the negative FORCES have already done here. The situation in the supernatural sector is similar. When will the smile be wiped of these blasphemers faces? An expert however warned about such an assessment, because this phenomenon has not yet come to an end.

Let’s assume that one of the major powers becomes 100% convinced that the realm of the spirit exists. One would however never publicly admit this insight and all scientists that deal with this

openly would be eliminated. This is the reason why practical Spiritualism is in the hands of private research that is not supported either by the state or the Church. The sacrifices, financial ones also, that the private sector has to make are a lot greater than one can imagine. We do indeed severely bombard universities with our findings, but we do *not* bombard them with lies, but with the MOST EMINENT TRUTH that universe has to offer.

Day after day we receive letters from people who have been looking for our address so they can express their views on the UFO phenomenon. Nobody on Earth can talk those that have sighted a UFO out of what they have seen. This is something that has been confirmed to us over again.

UFO-Contact

July 1969

The progressing successes within the field of terrestrial space technology can lead to an arrogance towards the space journeys undertaken by extraterrestrials. There are obviously better methods of propulsion than the one we apply here on Earth. Even if we are successful with our methods, we are still way behind the space technology used by extraterrestrials. Terrestrial space travel is expensive and it requires an enormous supply of fuel. The SANTINER however demonstrate that there is one method that is far more efficient.

With all the considerations and discussions about UFOs by experts throughout the world one finds that they cannot extricate themselves from purely *terrestrial* thought processes. The things that seem *impossible* in their eyes are doubted and rejected. The same happens with Spiritualism, even though the SANTINER in particular present us with *exemplars* of spiritual possibilities. The way we think here on Earth, these types of phenomena apparently belong with the rest of our superstitions.

What would one have made of trips to the Moon, something that we successfully carry out these days, decades ago? The sciences then would have considered this as *completely impossible* also.

The scientific book titled “*Kleine Astronomie –die Sternenwelt und ihre Rätsel*” (Little astronomy – the world of stars and its enigmas), publisher: Lebendiges Wissen, Munich literally states:

“One has not even considered here just how this man-made satellite could be safely brought back to Earth from its orbit. This would require an additional rocket full of fuel and it would also have to be launched into space in order to reduce the velocity if one plans to return. Besides, the rocket would require wings in order to glide to a suitable location to land.”

These scientific and technological observations are only 10 years old (1959). A lot of things have changed in the meantime that were thought to be impossible in those days.

In regards to UFOs, the sciences still balk at their super-velocities. The star system *Alpha Centauri*, where the SANTINER come from to see us, is around 4.2 lightyears away. One harbours the greatest doubts about their space-flight technology because of this distance. *Alpha Centauri* is very similar to our own sun.

We have pointed out for years that the extraterrestrials are *not* Venusians. This is the reason why we had to put up with a lot of animosities and adverse letters. A Venus probe has now undertaken measurements that fully support our past assertions. The SANTINER only maintain a mobile space-station *near* Venus.

Something we cannot do today might certainly be possible in a few years from now. But we are absolutely at the beginning in regards to travelling at the speed of light. This is where the extraterrestrials are far superior to us. But our terrestrial arrogance does not allow us to consider the fact that *numerous* humanities exist throughout the universe that surpass our own development *by far*. These humanities see us, the people on Earth, as the *Barbarians of the Universe*, something our wars and our numerous vices veritable verify.

- *The general ungodliness, also expressed through false religions, is one of the main facts that differentiates us from other, highly evolved humanities throughout the universe.*

Our new brochure “ARMAGEDDON” caused a lot of excitement. It is however mainly read by *spiritually advanced* people. We thank all our readers who confirmed the value of this work. We can unfortunately not reply to all of them.

UFO-Contact

August 1969

One gains an interesting overview of the UFO situation when one takes the *international correspondence* we receive about it into consideration.

- Doubters still exist that like to believe what they read, but are unfortunately unable to recognise the delicate differences between truth and fiction.
- And then we have the numerous members of UFO groups who, with their *terrestrial* thought capacity, know *all too well* what the SANTINER would have to do if they wanted to help us.
- There is also a huge number of people beyond that that simply see all of this as crass nonsense without ever thinking about it or draw comparisons. Their assessment is the *easiest* to make because it *doesn't strain their mind*.
- A specific mention should get the group of people who “*logically*” know exactly what ought to be done. The SANTINER would naturally have to stop playing hide and seek and verify their existence of their own accord. This would put a stop to all guesswork all by itself.

Let it be said a priory that all of these letters are in vain. The SANTINER will neither be told anything nor advised on anything. *They instruct* – but see us as an *underdeveloped* human race, one does not accept rational advice from, well actually respectively expects from.

What is this secretiveness we undoubtedly have to deal with all about?

This is actually a long chapter. The SANTINER behaved less secretive at biblical times. This is probably because one simply saw them a heavenly BEINGS – like CHERUBS. Well, one of the SANTINER was thought to be GOD sitting on his throne.

During our 17 years of missionary work within the spiritual sector we dealt with the SANTINER for 10 of those years. We therefore believe that we got to know them somewhat more intimately. The SANTINER naturally require a very large nimbus for their mission. If they were to assert that they are divine beings for instance, the whole world would blaspheme about this and the Churches

would be at the forefront of this. If the SANTINER would say that GOD sent them, people would already take offence about the word “GOD”.

This was entirely different in the past.

At the time of the *Fatima-phenomenon* (1917) that was also down to the SANTINER, mankind's reaction was still different. The appearance of a spaceship was interpreted by the Catholic Church and its believers as a *Mother Mary miracle*.

An infinite number of things have changed in the meantime and one is no longer willing to believe in these types of miracles.

The SANTINER are now confronted with a completely new situation. What are they to do when animosity and mistrust are so prevalent? – The divine nimbus may not be lost. The divine mission must remain the priority. But these facts are immediately destroyed the moment the SANTINER exhibit the kind of *purely human* habits we are so used to here on Earth. The moment they would behave the way one suggests to us from many quarters any nimbus would immediately disappear and they would degrade themselves to something akin to a terrestrial human being. The SANTINER, as GOD'S ENVOYS, may not display any *human* weaknesses, because their development is thousands of years ahead of ours; we feel that this is something everybody should be aware of. We cannot advise them of what they have to do; they know *exactly* what has to be done and also *why*.

UFO-Contact

September 1969

When one takes a close look at the events that take place here on Earth one comes to the conclusion that the extraterrestrial SANTINER ASHTAR SHERAN is the *best informed* human being that we know. ASHTAR SHERAN proved to be a true FRIEND to terrestrial human beings. We have to thank him for all the eminent insights and information that we received. ASHTAR SHERAN forcefully mentioned the BATTLE of ARMAGEDDON.

- *There is no longer any doubt that this BATTLE is being waged. Discontentment, insecurity, brutality and often also irrationality clamour in politics and all the way down to families and in child's nurseries. Potential chaos looms and nobody finds their way out of this confusion and disintegration.*

Those that have read our brochure “ARMAGEDDON” will recognise how correct ASHTAR SHERAN'S words were. This is probably the most important message that we have received so far.

On the occasion of the landing on the Moon we were asked whether the SANTINER *showed* themselves to the astronauts. The SANTINER did not interfere with this enterprise in any way, because a direct encounter might have triggered a shock that could have plunged these brave men into difficulties.

With the return journey, well actually with all sojourns through space, we must remember the fact that there is a huge difference between a terrestrial rocket propulsion system and that of a UFO, alone through their achievable velocities and manoeuvrability. In addition to this comes the fact that UFOs mostly, if not indeed all the time, travel with the help of the *polarity reversal to anti-matter*

by utilising its repulsion effect. (See brochure “Via Terra”) The SANTINER at least acknowledged the terrestrial mission to the Moon.

Something that is remarkable is the fact that the world-renowned evangelist *Billy Graham*, called “GOD’S machinegun”, emphasised in front of thousands of interested people that he believed in the existence of intelligent beings on other planets, *because the Bible contains sufficient clues that the Earth had visitors from other star systems at biblical times.*

The truth pushes through more and more!

Church dogmas and false interpretations, established and made thousands of years ago, must gradually give way to the truth. The fact that we receive genuine evidence in regards to the correctness of our publications, for instance that the sand on the Moon contains a lot of glass spheres, gives us a lot of comfort. This particular message goes back a number of years. But we did mention this in one of our *Menetekel* brochures. We now receive the information from scientists that such glass spheres were found in the dust of the Moon.

We also like to point out that people were *very hostile* towards us at the time we published that *Jakob Lorber* was an *unreliable* medium that didn’t have sufficient PROTECTION in place so that only about *50 percent was credible*. His fantasies, most of them probably stem from otherworldly INFORMERS, have now been corrected through the landing on the Moon.

- *This is evidence for the reason why all individual mediums that are not under the strict control of a long established, secure circle, must be met with scepticism.*

A well-functioning circle is difficult to lead. The participants must have eminent spiritual qualities. Every stranger within a circle can be the cause for a catastrophe.

UFO-Contact

October 1969

Some of our readers hold the opinion that our world situation can only be resolved through the interference of a HIGHER POWER. One asks the SANTINER to utilise their power in order to subdue all the governing parties in all the nations. It is difficult to say whether we are dealing with a pious request here. We are unfortunately not in contact with extraterrestrials at this point in time so that we cannot ask for their opinion. Based on our otherworldly connections we know that a solution by means of applying force *is never the right one.*

We can therefore not imagine that the SANTINER would utilise force unless they are forced to do so. But this would only be the case if their own existence was under threat. Extraterrestrials have been repeatedly chased in order to get one’s hands on a UFO. But all of these chasing manoeuvres have been unsuccessful. UFOs are completely beyond our reach, they are masters in all situations. These chasing manoeuvres can therefore not be regarded as direct attacks on their existence.

It therefore doesn’t look like we can expect an extraterrestrial invasion. The SANTINER will not do any such thing whilst the terrestrial development can still be *tolerated*. This has nothing to do with our own patience, it has come to an end some years ago.

In any case, we are still under constant observation. The SANTINER'S interests is probably intently focused on the conflict in the Middle East. The focus of interest has been on the Jewish people once before.

We like to emphasise once more that we cannot call upon a SANTINER to visit our circle under any circumstances. To present the written questions we received to them is impossible. We are completely unaware about when we will have the next SANTINER contact. Such a contact happens *spontaneously* and mostly when we least expect it.

We also do not believe that the SANTINER would inform us about what they really intend to do beforehand. The Bible states: "*They come like thieves in the night.*" – In our words: *They come as a complete surprise.*

When we read ASHTAR'S last message called "ARMAGEDDON" we cannot doubt his warning words. The signs of the BATTLE of ARMAGEDDON are visible all over the world. The negative powers make an evident appearance.

There is however a certain comfort to be found in all this unrest: There will be no other victor than GOD for a start and besides, evil will actually destroy itself. The negative can never become the victor. Those that side with the NEGATIVE side will perish with this organisation. It is all a question of time and it cannot be measured with the yardstick of our own impatience.

ASHTAR SHERAN is very highly esteemed these days. He has become world-renowned in the meantime. We can count ourselves lucky to have such a FRIEND at our side. We may however not forget that ASHTAR SHERAN is a UNIVERSAL TEACHER who will constantly try to guide us towards a better path through his indoctrinations.

The greatest hindrance to these indoctrinations is the *global indifference* towards HIGHER INTERESTS. Everyone sees their own felicity only in the mundane.

UFO-Contact

November 1969

Scientists and researchers paid by the state are employees of the state; they have to abide by the rules and regulations made by the administration in charge of them. Those that act against these rules and regulations are eliminated or punished. There are therefore no scientists amongst them that are prepared to risk their livelihood and their reputation.

Their personal opinion therefore counts for nothing, ergo it is suppressed.

When such employees arrive at results that do not fit in with the government's ideals they will have to keep their opinion to themselves or it will be declared a *state secret*. In other words: With the help of its staff, the government determines what the people may learn about and what not. The press is also not excluded from this, because a government can also silence the press. This is the reason why it is impossible for the public to hear the truth this way.

This statement does not come from us, it was made by our world-renowned extraterrestrial friend ASHTAR SHERAN. It describes our world situation with a few words:

- *Those that look for the truth should not assume that they find it in newspapers or similar publications.*

Authoritative universities also do not hand out information about a forbidden truth.

ASHTAR SHERAN'S words also refer to the *Condon-Report*, that is to say, the mendacious statement by the *University of Columbia* in regards to UFOs. ASHTAR'S words encompass all research into the hereafter also, they are subjected to the same government imposed taboos.

Those that believe that this *Condon-Report* resolved all issues in regards to UFOs are sadly mistaken. When one disturbs a wasp's nest, the insects swarm about and sting whoever they can. UFOs fly in large formation over locations where troubles are brewing.

When the first aeroplanes arrived on the scene at the start of our century, there were no prophets around that would have dared to think in their wildest dreams about a trip to the Moon. Such an assertion would have been called *sheer nonsense* by the scientific fraternity. The layman-like assessment of today's average human being, who cannot imagine trips by extraterrestrials from one solar system to another solar system, is not different.

Our world has never been isolated from the rest of the cosmos. Extraterrestrials interests in our planet goes back *thousands of years*. We unfortunately still occupy the lowest level of development in the eyes of higher evolved human beings, something that can only be bridged when our interests in spiritual and occult insights *grows*.

In one of his talks ASHTAR SHERAN said the following to this:

“Circumstances on this planet make it necessary for me to prepare a major lecture. I expect that I will endeavour to fully utilise the long established connection with you during the winter of the approaching year. I will try to bring about the clarification to numerous burning questions. I value your friendship and I salute all the co-workers who provide a service of brotherly love by disseminating the universal truth through altruistic commitment.

I will specifically deal with explaining the life and the existence of terrestrial human beings on this Terra. The darkness on this blue planet is monstrous and we, the SANTINER, extremely regret the fact that we have to solely depend on your language in order to make ourselves comprehensible.”

UFO-Contact

December 1969

The UFO problem has not been resolved.

One tried to depict these flying saucers as a *fantasy*; but such a *global* fantasy, one that additionally shows *complete accordance* in its most important points, does not exist. This explanation can only be used to fob off the dumbest of the dumb!

This is not a problem for us as we have been entertaining contact with extraterrestrials for many years. We are however indignant about the fact that certain circles globally try to portrait extraterrestrial UFOs as *non-existent*. However more abhorrent is the fact that one would like to declare those that could verify their clear observations and contacts *insane*.

The impudence shown by this sector is so pronounced because one has not yet learned *to fear* UFOs.

The inconceivable tolerance shown by extraterrestrials does *not fit in* with our world, it is simply ignored.

Even the most serious UFOs supporters could easily be tempted to doubt the whole affair because *not enough happens* according to their opinion. We would like to caution you about making this mistake! It isn't justified.

We may not forget that the UFO problem hasn't just existed since yesterday, it goes back *millennia*. In any case, terrestrial mankind has to be very grateful to people from other star systems for their own development. Extraterrestrials endeavoured to help us in any way they can for millennia. This help does *not* focus on our destructive intentions, but on our *spiritual* development. This spiritual indoctrination and information has become specifically apparent in recent times. ASHTAR SHERAN'S voice gained great importance. The great break-through is unfortunately still missing and this because the means to achieve it are not available.

Even the people who determined the content of the Bible have been duped by the UFO phenomenon. The result of this was that a religion developed that does *not* comply with the facts and it has therefore turned into an elemental calamity for all of mankind. It isn't specifically the Christian faith only, but all other religions affiliated with the Christian faith and the texts of the Old Testament.

- *The UFO problem is more stupendous and decisive than one could ever have imagined. It is important for the whole future of mankind.*

All our readers will concur that we are on a completely wrong spiritual path, one that does *not* conform to our planned, divine development. It can therefore not equate with our salvation, even if we *erroneously* believe that CHRIST already saved us. Extraterrestrials do not believe that terrestrial mankind has been redeemed through CHRIST. On the contrary – we find ourselves in a situation that is more perilous than ever before.

We await ASHTAR SHERAN'S indoctrinations with great anticipation, because he has already proclaimed his arrival. We will then see what he has to tell us this time around. The tasks, respectively activities of the SANTINER have not abated. Extraterrestrial spaceship continue to fly over all dangerous military installations, rocket launch sites, nuclear centres and other bases. We should be glad about the fact that this type of development here on Earth is being *monitored*.

We can also not assess *what form* the SANTINER'S help will take. Help is absolutely guaranteed, because they do not lie to us, they simply hold a mirror in front of us and tell us the whole truth.

Only FRIENDS can be prepared to do such a thing.

UFO-Contact

January 1970

UFO *contacts* are far *more important* than UFO sightings.

If one has the impudence to doubt global UFO sightings and to declare that they are completely bogus, it comes as no surprise that one deals with UFO contacts exactly the same. One certainly want to avoid any HIGHER CRITICISM. One believes that one can afford to twist the facts for as long as there is no direct threat involved.

Even though one tries to portrait the UFO problem as a fantasy, there are still a number of authoritative personalities in eminent position who make *positive* statements about the UFO problem - in spite all the contestations.

Our UFO messages are also exposed to severe criticism. The assessment by experts is however positive and finds global attention. All readers of our messages will confirm that the ASHTAR brochures stand at the apex of all UFO messages. ASHTAR SHERAN isn't just an extraterrestrial friend and ambassador, but also an important TEACHER and PHILOSOPHER; we would be hard pressed to find a better one. His messages and explanations penetrate deep into our religions. The whole view of the world appears in a different light. One has to completely discard all traditions and prejudices if one plans to follow ASHTAR'S explanation.

The knowledge gained is very significant. ASHTAR'S doctrines should be incorporated within university knowledge. This would represent the *best* peace-movement imaginable. This actually answers one of the questions that is often asked, what do the SANTINER really want from us? It is of course only about establishing *peace* here on this planet.

One cannot claim that the people from the press are particularly knowledgeable because one would otherwise not encounter such a scornful revilement of Ufology in the papers. To assume that the press represents the guarantor of the truth is a grave mistake. On the contrary – the press is co-responsible for the strife this world is in. It is also co-responsible in regards to Ufology. The consequences of twisting the facts are not yet foreseeable and we cannot imagine what they could be because we still know too little about these extraterrestrials.

Strange as it may seem, but the SANTINER talk very little about themselves – but rather a lot more about us. We always had certain difficulties with the language in our UFO contacts. The SANTINER lack certain expressions and this is because they are not in our vocabulary. This makes it impossible for them to teach us the way they would actually like to teach us. ASHTAR SHERAN once mentioned that our languages here on Earth are subjected to an enormous amount of abuse and that this does not indicate that we are spiritually progressing. One can connote more than 50 percent of all the conversations that take place as nonsense, respectively as senseless additions. We actually found that ASHTAR SHERAN expresses himself very factually and comprehensibly. He does not utilise paroles or empty phrases.

As ASHTAR SHERAN announced a new message we are naturally particularly curious and eager to find out what he has to say this time. We hope that our patience is not too severely tested for too long. We will once again endeavour to bring his words to the public as quickly as we can. We thank all our friends who show commitment to this problem.

UFO-Contact

February 1970

A lot of UFO followers have asked themselves whether the SANTINER'S planning coincides with our concepts. Is the SANTINER'S behaviourism suitable to improve our world situation?

We can say here that the planning is correct, even though one gets the impression that nothing special is happening. The UFO question can only be contemplated from an international or maybe only from a *cosmic* point of view. The UFO problem can no longer be ignored. Something that has been started must be pursued to the end.

Two phenomena are at the forefront: On the one hand we have all the *numerous sightings* and on the other hand *excellent contacts* that can virtually be regarded as divine messages. It is beyond question that UFOLOGY has the number one problem of this world in its sights. No power on Earth is capable of arresting this development. Whatever one undertakes can *only delay*, but never eliminate this issue.

We presently deal with UFO contacts once again. But those that believe that these contacts are simple, that one only has to record what is being said, are mistaken.

- *No outsider can begin to imagine the difficulties involved with such transmissions. They enlist all the ENERGY of psychic abilities and lead to complete exhaustion. This is the reason why we can engage in a UFO contact only once a year, it roughly stretches across eight weeks.*

Sightings have not decreased, on the contrary – flights take place and things are explored as never before. All flights to the Moon were accompanied. Astronauts saw, photographed and filmed UFOs, that is to say, extraterrestrial spaceships. The American government would like to keep this fact under wraps and this is why the recordings made by astronauts are taboo to the public at large. One no longer reacts to pertinent requests in order to not have to be forced to tell more lies.

The largest UFO study group in the world grabbed the initiative now to produce a documentary. England also followed this example. How long will it take before objective knowledge about UFOs reaches the broader masses of the population?

The PLANNING is therefore absolutely correct and it is only a question of time. Something that has to be absolutely taken into account is that most sighted extraterrestrial spaceships are *remote-controlled* and that the mother-ship is beyond our field of vision. The SANTINER avoid direct encounters with terrestrial human beings because they know that each and every human being on Earth is a carrier of dangerous bacilli.

ASHTAR SHERAN, this eminent universal teacher whose 11 messages already attracted global attention and translation into a number of the world's languages, already touched upon and explained the BATTLE of ARMAGEDDON in 1969. It has already become quite obvious just how right he was. This world has never experienced such a process of fermentation, one that encompasses all of human life. One has to seriously study the messages from the SANTINER in order to understand our world situation, things will then become a lot clearer.

Ufology gradually expands its sphere of influence and clears all mendacious church dogmas and false religious ideas away. This is a divinely ordained, perfectly planned and well organised HELP for a human race that would otherwise be lost.

UFOLOGY occupies the highest rung on the ladder. *It represents our salvation and our future!*

UFO-Contact

March 1970

The age of “conquering space” brings the side effect with it that the problem of extraterrestrial spaceships can no longer be ignored. All endeavours to avoid the facts become increasingly more

ridiculous. The way leading personalities make such fools of themselves in the public arena in such a way is actually really embarrassing.

Nasty comments are *particularly prevalent* in Germany.

When reading foreign newspapers one encounters a *higher* level of open mindedness. The documentations there are *more objective*. This awakens the suspicion that German “experts” tend to adopt a superior attitude. In any case, the bulk of the population is not so easily duped. The few contortions of the truth and excuses are confronted by hundreds of thousands of sightings and observations that cannot be called wishful thinking or hallucinations. Hallucinated photography does not exist. Besides, all these pictures are so similar that they must surely dispel all doubts.

The UFO problem is *not* something new. The “*LEGISLATION received on Mount Sinai*”, the “*Star of Bethlehem*” and last but not least the “*Miracle of Fatima*” indicate that we had extraterrestrial visitors.

The fact that there is so little interest shown in extraterrestrial landings is appalling, they must have an absolutely different reason than just observing and visiting us so intensively. Mount Sinai produced the *COMMANDMENTS*, Bethlehem a *Message of Peace* whilst Fatima gave us *Admonitions*. We are dealing with major messages these days, but they are unfortunately not yet taken serious by mankind’s leaders. The main motive of UFOs is and remains *indoctrination*, ergo the message.

Church taught religion and politics contrived to make the average citizen so mistrustful that he or she is no longer capable of forming their own clear adjudication. The UFO problem is *more* than politics and *far more* than church religion. We are best equipped to assess how incredibly real these contacts with extraterrestrials really are. If this wasn’t so we would be dealing with SPIRIT ENTITIES. But our invisible THOUGHT CARRIERS, with whom we have been in constant contact with *for 18 years*, would not dupe us in such an intelligent fashion. This would represent a backward step in the development, something that is simply unthinkable.

Those with some knowledge of biblical texts can recognise that these extraterrestrial messages show religious characteristics. Things are not different these days. We should however not fail to appreciate just how much we are entrenched in our old concepts. *Prejudice* occupies the number *one* spot. We must not allow ourselves to be influenced by prejudices.

- *The future belongs to open-minded people!*

We get the impression that the SANTINER’S endeavours are very much supported by the WORLD of the SPIRIT.

All the numerous letters from all over the world verify just *how much* our work is appreciated. We thank all those that are interested for the recognition they give us. We are unfortunately so overburdened with work that it is impossible for us to send a reply to those that have written to us.

With our increasing experience and new insights gained with our own space missions we will gradually begin to understand these extraterrestrials better. We must begin to comprehend that they dispose over means that cannot be equated with our own terrestrial yardstick.

These UFOs are incredibly fast, a lot faster than we could ever imagine!

UFO-Contact

April 1970

It becomes clearer all the time that the messages from the SANTINER are correct. Scientific insights verified the things we *predicted* years ago by taking the long way round.

There is for instance the fact that astronauts saw extraterrestrial spaceships on the Moon. They also encountered these flying objects during their journey. Severe censorship laws do however make it almost impossible for the public to be informed about it.

There is no doubt that these extraterrestrial flying objects are treated as a “*Secret Command Concern*”. What is also typical is the alleged disinterest in this problem in order to dupe the public. As we have had contact with various SANTINER for well over 10 years, we can no longer be duped. We know all about the game that is being played.

Particularly the very last message that we received this year gives us once again information about the existence of extraterrestrials. I regards to the genuineness of some UFO contacts we can only advise people to give *no credence* to all the reports that talk about “monster-like creatures”. The SANTINER are beautiful and harmonious beings. They are certainly not our enemies, but our brothers from space. We cannot blame these people for not being too impressed with the way we act here on Earth and for using a sharper tone now when they talk to us.

No matter how reluctant governments are to admit that this ancient problem still exists, they will not be able to solve it without admitting that a HIGHER POWER guards over us.

Abominable messages from abroad reach us that we can certainly not take serious. Even though the Earth has reached a stage that is similar to that of Sodom and Gomorrah, an apocalypse will *not* eventuate. The worst that could happen to us would be an extraterrestrial invasion designed to install a terrestrial protectorate. This would however be akin to *incapacitating* the terrestrial human race. Whether this will happen is still uncertain, but it is possible. There is not chance that this will happen if the peace efforts of the major nations show results.

The trips to the Moon will not have come to an end. There will be many more of these types of expeditions. The SANTINER said: “*We will wait until we meet in space.*” This meeting has already taken place and it will not be the last one. We have to wait and see how governments react in the future. They cannot ignore the UFO problem with the help of lies and by remaining silent.

Europe is not flown over as frequently as in the past these days. South America shows a concentration of extraterrestrial activities. A lot of flights are however also observed in Mexico.

Due to the malicious behaviourism by governments in regards to UFOs, the financial means are unfortunately so minimal that one cannot expect a radical elucidation of this subject. The extraterrestrials told us: “*We are kind of depending on an ‘underground movement’, because there is no honesty here on Earth.*”

This is the reason why we ask all *honest* friends interested in UFOs to help us so that the truth can gradually percolate through. We work beyond our capacity on this issue that is so dear to our hearts. Our means are less than modest. But we will keep our readers informed in spite of this.

UFO-Contact

May 1970

Now that the air defence forces of the USA take a cautionary stance in regards to dealing with the UFO question, private UFO research gained an enormous impetus.

A truth, the like the Bible already recorded, cannot be disputed. The mistakes made mainly consisted in that one always tried to interpret all cohesive phenomena with the help of religious dogmas. Our religions are however not capable of doing this because they lack the objective truth.

Television recently decided to also change its course. One is now filming large series' that deal with the UFO problem. UFO occupants are no longer monsters who visit us, but normal human beings. But one still prefers to depict them as enemies, something that does not comply with the truth.

These extraterrestrials have not given us an ultimatum up to now. There would indeed be sufficient reasons for them to do so. We can gather from all of their messages that they offer us their spiritual help. The military's technological development has reached such proportions that the extraterrestrials had to change almost all of their intentions. They know all too well that appearing on masse would lead to a global catastrophe. This is one of the reason why they behave very guarded and do not undertake anything that could be construed as being aggressive. All decisions made by the extraterrestrials are being reviewed by INTELLIGENCES from HIGHER SPHERES.

The high degree of defence capability of the major nations make them feel so confidence that they feel they could even deal with an invasion from space. But this a mistake! One forgets that the extraterrestrials have various powerful means at their disposal. These powerful means could under certain circumstance immobilise the largest configuration of armaments:

- *There is gravity to begin with, something they have complete control over. By simply flying overhead they can make the largest buildings collapse and this without using one singular bomb. They cannot be shot at either, because they are protected by their own magnetic field and it deflects anything it encounters.*
- *Beyond that they also dispose over the opportunities of anti-matter whose enormous forces we are still not familiar with. One could in theory destroy a whole heavenly body with the help of anti-matter.*
- *Apart from these powerful means they have a third opportunity, namely the paralysing of people's consciousness. With the help of special rays they can paralyse a whole army.*

They will however not be inclined to utilise these weapons. They have never threatened us with them, but only mentioned them.

The intellect is also a weapon that is utilised here on Earth. The masses can be influenced through false indoctrinations or propaganda to such a degree that they will accept evil for good and good for something abhorrent. Those in power certainly do not have our trust.

Extraterrestrials can also powerfully influence us with the help of their intellect. They can also have success in this respect. In any case, they announced that they will fight a non-violent battle for our souls. Their enemies are all the mendacious and falsely informed Churches and the perverted

thought process of certain elite groups.

As the SANTINER are vastly superior in every respect, there is no reason to doubt the success of their mission. It is just a question of time. The SANTINER will reform a lot of things here on Earth.

UFO-Contact

June 1970

The UFO problem is *not* a sign of the times as many assert, but a *divine MISSION*, one that goes back a number of millennia. All the continents on Earth have been visited by extraterrestrial spaceships. Wherever a kind of cultic religious culture appeared, extraterrestrials turned up to proselytize. Ancient cultures still exhibit the influence by extraterrestrial intelligences.

The UFO problem has once again come to the fore. South and North America are now mainly being flown over by UFOs at this time. As this problem cannot be talked out of existence, a lot of scientists are now dealing with these apparitions. This has led to a situation whereby the whole UFO situation is embroiled in a dispute between pundits. It is a well-known fact that a dispute between pundits is never about nothing. This is also the case here, but we are best qualified to assess this situation, because we have been in contact with the SANTINER for around 15 years. It is unfortunately very difficult to verify the validity of these contacts to atheistically and negatively minded people.

Television has also shown an interest of late in this subject. We do however have to warn people about this, because the press, radio and television are on no account interested in the objective truth, they first and foremost seek sensationalism and entertainment. The following facts verify how careless one deals with this: The *Zweiten Deutschen Fernsehen ZDF* allows an adventure series to run that deals with an invasion by extraterrestrial people. A series of 10 episodes allegedly dealing with this problem scientifically, started at the same time. One tries to verify with this presentation that it is possible for other human beings from other star systems to visit us.

Professor Heinz Haber explained that evidence suggests that the *Maya* were able to predict a solar eclipse to a fraction of a second with the help of a sun dial. This measured reading could be verified in 1,000 years from now and if it is found to be correct one would then know how long an orbit of the Moon around the Earth takes. As if this was not enough he went on to say that: "The UFO problem only appeared after the First World War, after the first atom bomb fell from the sky." Every human beings knows that the first atom bomb fell during the Second World War. One actually tries to insinuate thereby that UFO believers are dumb.

This scientific presentation also based its findings on the speed of light, ergo explaining that this fact alone made it impossible for human beings from other star systems to come to us. The so-called "light-barrier" has already been refuted by the discovery of so-called tachyons, they do not encounter any limits in regards to speed, that is to say, they are so fast that it is impossible to measure their velocity.

Be that as it may, the SANTINER have a propulsion system that allows them to visit us on a *continuous* basis.

Professor Haber also tries to tell us that human beings descended from apes. He does however admit that there must be other human races out there in the universe, that there could be no logical doubt about it. We now ask *Professor Heinz Haber* how all these brothers in space came into being if the

people on Earth descended from apes. He might be able to explain this the next time around. We know from experience that the ape theorists are atheists. What else can one expect from these people?

UFO-Contact

July 1970

As we expected, the UFO problem is not abating, it constantly grows. The abundance of events paves the way for the truth. Those that deal with UFO research must inevitably be convinced of the absolute existence of extraterrestrial flying objects. Those that still doubt this after have not orientated themselves sufficiently.

The fact that this world is governed by an atheistic clique has been absolutely verified. The same clique utilises its powers to attack UFO research, because they are not enamoured with the whole Ufology tendency. It becomes ever more apparent that these people classify all extraterrestrial visits as antagonistic.

Ridiculing the whole thing has been the tried and trusted means up to now, but Ufology has passed this stage a long time ago.

We can only find out what extraterrestrials actually want from us through contacts. These informative contacts have been going on for more than 10 years. We found out that these extraterrestrials come to us as wholesome, open minded friends of human beings. Our contacts with the SANTINER have been specifically more intense recently, they try very hard to improve our terrestrial standard. We can unfortunately not disseminate this extensive contact in the usual way, because it is too comprehensive. We do however hope that we find a suitable publisher who can make this work accessible to the public.

Ufology is not a hobby, but a universal concern that occupies first place in all questions in regards to humanity. Every terrestrial visit was therefore always been seen as a religious event. They were so-called "visits by the Gods". The Bible reports about *angels* and *cherubs*. Even if they are not angels or cherubs, they are certainly divine MESSENGERS who have to fulfil a divine peace mission. We will only be able to get really more intimate with Ufology from this point of view.

One has to accept the fact that our religions have been built upon *false* foundations, because the observations and interpretations in those days did *not suffice* to comprehend the truth.

Scarcely one of our readers can really imagine just how difficult it is to support the dissemination of Ufology. These endeavours are opposed by the whole might of church religions who dread the moment the mask of hypocrisy is wrenched from their faces.

How great the interest of UFO followers is, is verified by the fact that all ASHTAR SHERAN brochures are totally out of print. Excerpts from ASHTAR SHERAN have recently appeared in Canadian journals. The circle of dissemination expands. Even if it is more arduous and time consuming, this way is certainly preferable to a more forceful solution.

We hope that our readers will also have an opportunity to acknowledge the comprehensive contacts that we entertain with the SANTINER. Our co-production produced something that can be comprehended by all our readers. Something that we hear from the reliable REGIONS of the SPIRIT

is that it is mainly a case of awakening a *general interest* in Ufology and the realm of the spirit.

Old, negative concepts that are simply called “superstitions” must be cleared away in order for COSMIC THOUGHT PROCESSES to gradually take their turn.

UFO-Contact

August 1970

Worldwide UFO research verifies the fact that mankind has been *led astray* and *lied to* in a most reckless fashion. This doesn't just apply to UFO research, but includes all other areas that deal with the human existence.

The question arises: Does mankind have a right to the truth? Major means for information like the press, radio and television flatly deny people this right. We had our own experiences in this respect:

- The press made *false* reports about the work that we do.
- Television knowingly interpreted our work *incorrectly*.
- We were *lied to* and all the promises that were made were *not* adhered to.

This is how one tries to influence and *to enforce* a false opinion upon the public at large. A typical example offers a series of lectures called “Brüder im ALL” (Brothers in SPACE) by *Professor Haber*. We know about the blatancy involved in making and broadcasting this television program. Genuine UFO researchers and UFO experts cannot laugh about this, because this problem is much too serious.

Every genuine spiritualist must feel sorry for *Professor Haber*. Spiritualists know that the wanton and malicious twisting of facts attracts negative KARMA. But these people unfortunately have no inkling about this; they are probably not even aware of the law of causality, of cause and effect. Participating in one single séance would really shake them up. But none of these public relations people has ever been able to last all the way through a séance with their absurd questions. We know that they covet entry by lying, that they pursue a very specific concept in order to ridicule the whole matter or to depict it as fraud or religious nonsense. The public at large is presented with something that does *not* conform to the truth. This is how the masses are kept ignorant. The truth does not get a say and if it does once in a while, it is unfairly attacked and eliminated.

For how much longer is this going to be like this?

We depend on the SANTINER'S help and we cannot thank them enough for still being here in order to observe our malformation. We have been in contact with these extraterrestrials for over 10 years. We correspond with them and we know the kind of sacrifices they make in order to help us. But one enormous problem exists that one has not been able to resolve so far: Planet Earth is a *redemption planet*. All interventions in the process of redemption are virtually impossible, because each and every intervention contradicts the LAWS of the CREATOR. Extraterrestrials will find a way to guide terrestrial mankind in the right direction in spite of this. We do not know what they intent to do, but we know that they will certainly not abandon us.

We encourage *Professor Haber* to take a look in the Bible. He should also read all about *Fatima*, a possibility might then exist that he will begin to doubt his own explanations.

UFOs no longer have to be verified, because they have been verified a *thousand times over*! Only our contemporaries who *exclusively* depend on the interpretations of the major publication media will still doubt this fact.

UFO-Contact

September 1970

Almost everybody knows that “Flying Saucers” exist. But most people still don’t know whether they can believe these reports. This fact confirms how great the lack of logic is.

Ever since the end of the Second World War, newspapers are consistently full of these sightings report. Millions have already been spent on UFO research.

Is all of this happening because of imagination?

Those that believe this truly lack a considerable portion of logic.

UFO research is now indispensable. But governing bodies refuse to look this fact in the eyes. The fact that extraterrestrials were seen as Gods have been eternalised in the Bible. They are no longer seen as Gods these days, they are looked upon as *enemies*. This is no surprise, because when somebody disposes over *greater* powers he will always be the enemy of the weaker – well that’s how it works here on this Earth.

Scientists are absolutely correct when they hold the opinion that extraterrestrials do *not* come from within our solar system, ergo not from our neighbouring planets. Through our contact we heard that the stem from a *neighbouring solar system*. Scientists do however not want to accept this, because the distances involved are too great. There are no reasons to doubt the hyper-velocities the SANTINER have at their disposal just because terrestrial science is not familiar with the laws of gravity and hyper-velocity. At any rate, a considerable envy abounds about the fact that we do not have access to the magic of extraterrestrials. This envy is expressed in the way this problem is being *vilified*.

The scientific fraternity unfortunately continues with making the mistake of trying to measure extraterrestrial facts with *terrestrial* comparisons and yardsticks. This is completely absurd! It is akin to measuring the equator with a ruler. Extraterrestrial flying object utilise extraterrestrial opportunities. The abbreviation for these flying ships should actually be “EFO”, because we are dealing with “Extraterrestrial Flying Objects”.

The sciences have not managed to liquidate the UFO problem during the last 20 years, because their flights cannot be prohibited. Spaceships are sighted all over the world and their characteristics completely coincide with one another. It is however very unfortunate that the numerous science-fiction writer give this eminently interesting and important phenomenon the reputation of being pure fantasy. We are in any case dealing with *religious* events and this can be verified on hand of the example of the *Apparitions at Fatima*. The more difficult the situation on Earth becomes, the *more comprehensive* the UFO problem will turn into.

The SANTINER will not abandon their mission, they will find ways to raise our own level of awareness.

We may not lose our patience. Impatience always acts against progress. To *recognise* the hour of decision is of great importance to every positively thinking human being. One has to know *which* side one is standing on.

The SANTINER represent help sent by GOD. GOD alone knows when this help becomes more active. But when one compares the New Testament with today's situation one knows with certainty that the *Hour X* is close at hand. At any rate, contact with extraterrestrials has been established.

UFO-Contact

October 1970

When dealing with the question of whether our UFO contacts are genuine there is one lucid answer: All ASHTAR SHERAN brochures are totally out of print and we received as many thank-you notes as the number of brochures that we published.

Our messages have not been completely unsuccessful; they positively inspired a lot of important people.

Our brochure "*Not from this Earth (3)*" states:

"Well, a vast network of tracks have been laid (on the home planet of the SANTINER). Their trains reach enormous velocities and they sometimes carry this speed into bends along the tracks. These trains cannot collide and nobody can make them derail. They run along a kind of track. This track is fairly wide, nearly as wide as the train which is also very long. These are actually not rails, but a broad band, kilometres long, that consists of synthetic materials provided with a coat of alloy in its surface. The train hovers about 5cm above this band. The train is magnetically propelled forward."

These brochures were published in 1957.

Now, *after 13 years*, a train utilising the same principle exists in Japan.

A super train without railway tracks, utilising the same principle, is being built between Hamburg and Munich, it is going to be fully operational in 1978 and expected to reach speeds of around 400km/h.

This is how extraterrestrials influence our technological development, namely by giving us the necessary tips; mobile sidewalks are also a part of this.

When we leaf back through our brochures we find lots of such suggestions that are now part of the reality here on Earth. If we were to take *more* notice of the extraterrestrials and see them as true friends, we could receive enormous *support* from them. But we would have to accept their justified criticism. This is however one issue that is the *Achilles heel* of governments.

The realm of the spirit also made many predictions that have already been fulfilled. ELIAS answered questions put by the stage director on television by saying:

“England will have to wait for quite some time before it can join the EEC (European Economic Community). The prerequisites for the unification of Germany will be in place in about two years.”

This situation eventuated through an agreement with the Soviet Union.

This filmed contact was actually also broadcast in the GDR (German Democratic Republic). What a miracle! – The fact that we can fully trust our spirit GUIDES is verified over and over again.

ASHTAR SHERAN warned us about nuclear tests about 10 years ago. We published his words in our brochures and also in the *Menetekel*. Did one believe us? – ASHTAR SHERAN said:

“Every nuclear test triggered above the surface of the Earth is followed by enormous, diluvia-like catastrophes that can travel up to 20,000 km (practically right around the world) causing terrible devastation; not to mention earthquakes.”

These words are recorded in our archive and they can be referenced.

What do those that commit war crimes do? They show *no regard* for the rest of humanity!

UFO-Contact

November 1970

When something to do with “*extraterrestrials*” happens on Earth, our work circle is almost always informed. But we are also asked to reveal what is correct amongst it. We can unfortunately not answer all enquiries and assumptions. It is also not possible for us to find elucidation for all the incongruities presented to us via our contacts. Even though it is very difficult to publish everything to do with this, we are very well informed indeed.

Fictions in this field of knowledge are particularly difficult to deal with, that is to say, rumours that do *not* comply with the truth, but are formulated in such a way that one *could* regard them as the truth. They are a malady that could ruin the reputation of all of Ufology. Even experts fall prey to these fictitious accounts.

We do however believe that our readers have learned enough through our publications to be able to make a relatively clear-cut assessment.

An example:

Amateur radio operators are supposed to have *listen in* on conversations by astronauts during their *Apollo Missions*. These Moon landing astronauts are supposed to have told Houston that they had come in contact with “Flying Saucers”. These conversations were supposedly kept from the public. One of the conversations amateur radio operators were able to listen in on by targeting their radio signals literally states:

“...these little things are gigantic, they are enormous...
All three of us are here, we saw a few visitors...
I say that there were other spaceships around...
They stand aligned at the far end of the crater’s edge...
The relay has been activated. – My hands shake so much that I cannot...
They alighted on the Moon and they observe us...”

This alleged conversation was published in lots of periodicals and it found world-wide interest amongst those that are interested in UFOs. The question is: Is there any truth in it?

We endeavoured to analyse this conversation with the help of our opportunities.

Result: *This conversation is fiction!*

The fact remains that all terrestrial space travellers have been escorted by extraterrestrials, but the extraterrestrials tried as *best as they could* to not alarm the astronauts. The alleged parade on the Moon *never* took place and such a conversation *also never* took place either.

Explanation:

NASA always included the possibility of an encounter with extraterrestrials in their planning. A specific signal was agreed upon, ergo a code that only NASA experts would understand. The astronauts would never have talked in clear English about it. Besides, these men are prepared and qualified to such a degree that their hands would not shake under any circumstances, even if they were to encounter an extraterrestrial spaceship. Those that entertain the thought that the hands of these trained people would shake have no idea about the preparation undertaken for such a project.

- *These were therefore not amateur radio operators, but wiseacres trying to spread a weighty rumour on a global scale.*

These explanations have nothing to do with the fact that UFOs *actually* exist and that they also land on the Moon. All those interested in UFOs know this. These types of rumours should really be better scrutinised before they appear in any trade journal.

UFO-Contact

December 1970

If our means allow it, we will amalgamate and publish the transmission from the SANTINER and the MESSENGERS of LIGHT in regards to the UFO problem next year.

As we have heard, a lot of our brochures have been *translated* and disseminated in various countries. Reputable journals also publish extracts of our important chapters.

The television series "*Invasion von der Wega*" included our publication about UFOs' *anti-matter* propulsion system in their plots.

Our messages gained global attention. We can say that we considerably influenced and orientated all UFO research.

Just how inexperienced and ignorant those journalists that dare to blaspheme about the UFO problem are is incredible.

- When we questioned a reporter we found that he *didn't know anything at all* about the "*Miracle at Fatima*" and he could not find his way in the Bible.
- The chief editor of a major newspaper was not even familiar with the word "*Spiritualism*".

But these “pacesetters of the truth” attack all those that deal with the HIGHER problems the sciences regard as “*hot potatoes*”.

Whenever we have contact with extraterrestrials we directly fear a drumming, because we cannot understand their restraint. The SANTINER obviously avoid using force but this is seen as a weakness.

In order to push the UFO problem as far away as possible everyone endeavours to depict extraterrestrials as *dangerous enemies* and *villains*. This is how one wants to direct the public’s interest in the *wrong* direction. Therefore no salvation and rescue through extraterrestrials – salvation is *only* possible through politics as far as they are concerned.

The SANTINER are all too aware of what is going on here on Earth. We heard from them that they *allegedly prevented* a nuclear war. The major powers do not seem to be all that certain about *what kind of powers* they are dealing with. The secret information from their astronauts are co-responsible.

Strange as it may seem, but UFOs are presently flying more frequently over *South America* and *Japan*. These flight do not abate. No matter how hard one tries, these flights cannot be abnegated. It is actually completely impossible to deny the existence of this phenomenon, because it makes a *daily* appearance somewhere. One can no longer assert that these are hallucinations because there are *too many* people that have seen “Flying Saucers”. One cannot say that millions of people suddenly *hallucinate in unison*. This issue is certainly important enough to keep the *General Secretary of the United Nations* constantly informed.

In order to get an idea about the power of UFOs one only has to think about some of the colossal building of antiquity or the force required to part the Red Sea and the river Jordan.

The Churches are presently still against the SANTINER, because they are worried about their *prestige* and their glorified dogmas. These GODS are *not* welcome and governments feel the same way. Any extraterrestrial criticism is presently not desired – but the SANTINER go ahead anyway.

UFO-Contact

January 1971

There is hardly anything else on Earth that is reviled as much as the word “GOD” and everything to do with it.

The base ENERGIES and POWERS are constantly lurking in order to pounce immediately whenever something comes up in this direction. This is the reason why the only otherworldly SOURCE of the truth has been *persecuted* and *derided* for millennia. GOD’S antagonist approaches superficial or dumb people in order to misuse them for his own purposes. This is a fabulous but also a fantastic phenomenon.

From the moment UFOs and their occupants have come under the suspicion of possibly acting within a *divine* MISSION, they have been subjected to the same persecution. As is the norm, one grabbed the same means: One tried to *ridicule* the whole affair, one talked about *imagination* and *hallucinations*. But as sightings take place on a daily basis one can no longer successfully operate with these arguments against the abnormal. UFOs *may therefore not exist*, particularly not with

human occupants that have to fulfil a *divine* ASSIGNMENT. Divine MISSIONS –even of an extraterrestrial nature – *may not exist either*, because the Dialectic Materialism will simply not allow it.

But the equations made by wiseacres come to nothing. The more one fulminates *the more numerous* the appearances by extraterrestrials. It is a deplorable fact that there is *no serious* publisher out there who is willing to support the endeavours of our extraterrestrial BROTHERS.

Let us assume that one single SANTINER would fall into the hands of terrestrial human beings. The SANTINER described the possible result to us. All governments around the world would keep such an event *completely secret*. Each government would endeavour to take advantage of the knowledge extraterrestrials have *for itself*. The captive would *never be released*, he would experience a *painful death*. This is the reason why the SANTINER have the duty of care to destroy themselves and their spaceships if there should ever be a danger of being captured by terrestrial human beings.

A lot of people imagine that the issue with UFOs has come to an end, they are however very much mistaken. The SANTINER are extremely active and eminently interested in any further development of the situation here on Earth. Our latest information is most informative and it describes the whole situation.

Our readers who have read our brochure from ASHTAR SHERAN would have realised a long time ago just *how true* every word therein is and *how correct* ASHTAR is with his explanations and admonitions. The BATTLE of ARMAGEDDON is in full swing and it shows all the details the negative FORCES utilise: Hatred between nations knows no boundaries. Racial insanity is increasing and today's ungodliness is not far from being the same as that in Sodom and Gomorrah. *Sodomy* is already lecture material. The SANTINER knew this a priori. The point in time when we can expect an extraterrestrial protectorate is not too far away.

We receive a lot of alleged psychic messages and SANTINER messages. Almost all of them are falsified and they only spread mistrust, fear and unrest.

- *Messages that contain threats belong in the waste paper basket.*
- *The SANTINER are not our enemies, but our divine FRIENDS.*

UFO-Contact

February 1971

It is surely not worthwhile to copy something worthless. Those that copy money usually copy the more valuable notes. The same applies to ASHTAR SHERAN'S messages. These messages are being increasingly *falsified*. We receive a lot of these falsifications, partially from *Switzerland* and partially from *Italy* – probably because our brochures have been translated into their respective languages. The threats these alleged "SANTINER messages" contain are hard to believe. We can only recommend that you simply ignore or destroy all messages with threats of retaliation and revenge. It could be that these falsified messages stem from the *lower* SPHERES of the realm of the spirit and that this is why they are taken serious by some. We are indeed also aware that the realm of the spirit is *not just* inhabited by Saints.

If these messages of doom and gloom were correct, calamities would have affected us *a long time ago*. The SANTINER do not threaten, they *teach*. In spite of the superlative armament through numerous nuclear bombs, the nations and peoples on this Earth would *not* have a *chance* if a punitive action would take place. Their weapons as well as their spaceships are far superior to anything that we have. We were able to find out the things that take place on board a spaceship. This information is probably seen as nonsense or its publication does not promise the desired turnover. We will however try to keep our readers informed in the usual manner, namely in the form of our brochures.

- *UFO sightings have not decreased, experts estimate that there are at least 100,000 observations per year.*

It might well be that authoritative offices did not believe in the existence of extraterrestrial spaceships because of all that misinformation. But this should no longer apply these days. The flyovers by extraterrestrials can no longer be denied. The only plausible explanation is that one tries to *conceal* the truth from the public.

Scientists and authors have in the meantime picked up and finally accepted our publications. It deals with the following statements that we published in our ASHTAR brochures:

- The Star of Bethlehem was a UFO. Its occupants delivered a message of peace to the people on Earth.
- UFOs flew over the location where CHRIST'S crucifixion took place and they devastated the area around it.
- The Red Sea was parted by extraterrestrial spaceships with the help of anti-magnetic forces. The flow of the river Jordan was also arrested.
- GOD did *not* appear on Mount Sinai, an extraterrestrial mothership did. Its occupants endeavoured to bring universal LAWS to the Jewish people. The Ark of the Covenant contained falsifications of these LAWS.
- The rock sealing the grave of Jesus was moved through extraterrestrial forces.
- The ascension of CHRIST took place in a UFO.
- Sodom and Gomorrah were destroyed when extraterrestrial spaceships hurtled over them.
- The "*Miracle of Fatima*" was *not* a solar miracle, but the sighting of a large UFO.
- The prophet Jonah was *not* swallowed up by a whale, but fished up by an extraterrestrial mothership in the shape of a cigar.

UFO-Contact

March 1971

All the numerous letters from here and abroad clearly tell us that Ufology is *not* on the decline, but that it is spreading further afield. The SANTINER boost their deployments.

Our latest contacts with extraterrestrials furnished a number of explanations about *anti-matter* that is utilised by the SANTINER as an energy supply. We ascertained since that these explanations are nowadays globally noticed with great scientific seriousness. In our brochure "*Not from this Earth (1)*" we published the following in 1957:

The propulsion system of Flying Saucers.

These flying saucers utilise cosmic rays, but particularly solar or light energies. They move faster than the speed of light. But once a flying saucer enters the Earth's atmosphere and makes contact with the prevalent air resistance, these enormous speeds are certainly reduced considerably.

Light consists of all kind of bundled rays, visible and invisible. The SANTINER virtually filter some of these rays and utilised them with their complicated equipment. These specific rays give them a speed that surpasses the speed of light in space.

The brochure "*Not from this Earth (3)*" proclaims:

The sun consists of a light bubble that contains a solid star within its cold zone. This light bubble is relatively thin.

This explanation only attracted a mocking smile when it was made. Things have already changed these days. Our brochures gained an unanticipated boost to their values ever since people began to deal with anti-matter. One probably rightly assumes that there are stars out there in an extremely hot state that, through the presence of anti-matter, exhibit radiations in the form of enormous amounts of light. The sun therefore also consists of emanations produced through the process of anti-matter. One is also aware that our solar system is hurtling through space at an incredible speed.

The sciences do not feel obliged to reveal the sources of their insights and this is why our publications remain unmentioned.

If one contemplates this further one finds some interesting comparisons: The flying disks of the SANTINER also emanate a luminous aura. We could be dealing with the same emanations of anti-matter as we find with our sun.

The ignorance displayed in regards to the SANTINER is more than just plain brutishness. It is a *crime against terrestrial humanity*, a humanity who *could* gain the highest insights if it would show *friendship* instead of animosity.

We are presently formulating a new ASHTAR SHERAN brochure, we however still lack a few important contacts. We dearly hope that we will be given this opportunity. We cannot give you a predetermined date of their appearance. But we ask for your patience, something we also have to have ourselves.

Further ASHTAR SHERAN brochures have been published in the meantime in *French*. We have *absolutely no* financial connection to these publications. We are however convinced that the SANTINER are GOD'S helping hand.

UFO-Contact

April 1971

The phenomenon of flights by extraterrestrial spaceships is certainly not a sign of the times that started after World War II. Extraterrestrial spaceships have visited planet Earth for millennia. Our present day technology allows us to look at these flights through different eyes. They were seen as

“divine miracles” as there were no technological comparison opportunities in the past.

The occupants of extraterrestrial flying objects still have the same objective: They want to bring us closer to the truth. They understand the truth to be:

- *The immortal existence of the human soul, the presence of a WORLD of SPIRIT and the absolute existence of a SPIRITUAL PLANNER with his ORGANISATION.*

All of these messages are similar to one another. They were first recorded in the Bible and have continued ever since via the “*Messages of Fatima*” and last but not least, the ASHTAR SHERAN messages that gradually find their way throughout the world.

The descriptions by contactees that have seen these extraterrestrial visitors state:

“Their heads had a very high cranium with large, unusually beautiful eyes. They seemed friendly. Their noses were long and narrow, their mouth small and the chin pronounced. The lower part of the face was pointier than our faces. They wore white uniforms with broad black bands that crossed the shoulder and the chest. Their stature was small, like that of one of our 14 year olds.”

(Extracted from UFO-Nachrichten, UN no. 175, March 1971)

This description is absolutely correct and it verifies that this sighting was *genuine*.

We, from the MFK, have indeed never seen an extraterrestrial, but our otherworldly FRIEND JOHN SHERIDAN transmitted *psychic* illustrative material instead. These presentations coincide with the published depictions.

The psychically drawn portrait of ASHTAR SHERAN has become world-renowned amongst experts. The head of ASHTAR SHERAN, the extraterrestrial UFO commander, is pictured on the brochures “Not from this Earth (1) (2) and (3)”. Besides, the photocopy of this most excellent drawing has been duplicated and disseminated a thousand times over. The head depicts the high forehead as well as the very pronounced chin and the white garment. – One should however notice that this drawing and description was *already published in 1957*. This psychic drawing portrait was also published in the “*UFO-Nachrichten*”. We are pleased about the fact that people’s personal experiences completely coincide with our psychically received information.

Our brochure “*Not from this Earth (1)*” states:

Question : What kind of reception will ASHTAR SHERAN’S portrait receive in our world?

ARGUN : Quite a varied reception indeed. – Many will be overcome by the imposing and awe-inspiring countenance of the commander-in-chief of the Ufonauts. Many will find it strange, particularly his peculiar eyes, but they would be absolutely enraptured if they could see these eyes *in colours*.

Question : Why were the eyes drawn so darkly?

ARGUN : They are somewhat deep set, roofed over by the high forehead and ASHTAR’S eyeballs are not snow-white, but display a *somewhat bluish tint*, whilst his eyes, endowed with large pupils, are of a *deep blue*, of an inscrutable colour. Seen from the front, this gives his countenance a kind of spacious openness.

The colour of the skin is *bronze* and in spite of its brownness, it is almost diaphanous. His hair is a *deep brown*, nearly black, interspersed with light brown streaks. Space people *do not have beards*. It has been a fashion to have long hair for quite some time, whilst their women’s hair is usually cut a little shorter because one likes to emphasise their nobly formed neck.

14 years have passed in the meantime.

The above mentioned sighting stems from the year 1959.

We are quite sure that there are no large racial differences amongst the SANTINER – as they like to call themselves.

We now possess a *second* portrait drawing and it shows ASHTAR SHERAN face on. This portrait also attracted great attention and it was also published in foreign language books. Only complete ignorance in regards to this field of knowledge can make people show a derisive smile. The reality is that this problem is serious enough in itself.

Extraterrestrials want to avoid turning into a feared enemy of terrestrial mankind at all cost. If these endeavours, namely to avoid a catastrophe, are called a ridiculous fantasy, we can only be dealing with *illogically* thinking wiseacres who no longer regard anything as sacred. We are after all dealing with beings that are far superior to us and this demands that we must respect them. Mankind's authorities fight again everything that could be rated *above* them.

Through the planned discrimination against Ufology its insights lag behind by at least 10 years. Important statements and publications of this kind are *initially ignored*. One only finds out years later that there is something to them *after all*. This waste of time does not promote our cause and it stands in direct contrast to our own endeavours to conquer the universe. If we didn't make an overall effort to publish our UFO messages ourselves, these excellent impartations from genuine contacts would gather dust in a desk drawer.

We personally experienced how infinitely difficult it is to publish a major work in German; one is *not* interested in the truth, one is only interested in opportunities of *making money*.

The group interested in UFOs in Germany is still rather small. But the group of car owners and holiday travellers incredibly large. Most people can still not comprehend that these UFO messages reach us via *spiritual* avenues. This has nothing to do with spiritistic meetings. It is the *language of the universe* and years of training the brain to gain the right FREQUENCIES. A radio must also be tuned to the correct frequency in order to receive a specific broadcast. The brain of human beings is infinitely superior to any radio, but it also utilises a TUNING process. Telepathy between two terrestrial human beings also happens in the same way.

Our UFO contacts come about in *two* ways:

- *One option is via the brain guiding the hand of the writing medium.*
- *The other option is that the brain of the medium receives the text verbally.*

Besides, our spirit GUIDES help us.

UFO-Contact

May 1971

Esoterics generally do not have the reputation of having a normal, sound mind. They deal with the paranormal and that *does not fit in* with an “already enlightened” world.

But as UFOs, those extraterrestrial spaceships, also belong to the field of esoteric, the majority of the world's population does not take them serious. This theme is rejected *on principle* in *Germany*. Things look different in the *USA* and in *Japan*. One does not encounter such resistance in *South America* as one finds in *Germany*. UFOs do indeed fly over the regions of *North* and *South America* more often, but the scepticism expressed through the *derisive behaviourism of journalists* largely promoted this. We experienced that major publishers flatly refused to deal with the UFO theme, because it is allegedly not interesting enough. There is no money to be made when the press discriminates against this problem.

This fact prevents a global elucidation, something that is decidedly important for the whole development of terrestrial mankind.

As a point of contact for extraterrestrials, the MFK, Berlin is absolutely obliged to see this problem as a MISSION and to do everything it can to spread the truth. We therefore depend on the understanding of our friends of spirit and our readers to accept our way of dissemination. We can also not be bribed into giving up this MISSION.

The compilation of these UFO messages is enormously difficult. This is the reason why we probably publish our next ASHTAR brochure no sooner than the second half of this year. Something that we can certainly already gather is: *The SANTINER are horrified over what has developed during the last years.*

A major conference took place in the meantime. This Earth is now subjected to a *countdown*. Just when this *countdown* comes to an end depends on the further development of terrestrial mankind, respectively on its leadership.

We heard that the negative represent a majority *on this planet*. Due to the fact that the negative *glorify* violence, the situation does not look all that rosy. – The negatives are however a minority when taking the vastness of the universe into consideration.

The BATTLE of ARMAGEDDON is in full swing. There are unfortunately only a few that are prepared to make sacrifices on behalf of this battle, because most people are completely addicted to materialism. They unfortunately have no idea just how far they have fallen into the trap set by GOD'S ANTAGONIST. The few resources at our disposal for this MISSION basically come from amongst the less well-off who show *more* understanding for the enormously dangerous situation *all of us* find ourselves in.

There are millionaires amongst those that are interested in esoteric. But there is *not one* amongst them who entertains the idea that the whole UFO-MISSION is an esoteric affair of enormous importance. This carelessness is incredible.

The fact that the SANTINER make their own choices in regards to *whom* they want to confide in is understandable, because politicians, the press and millionaires are *absolutely not dependable*. They wait for other people to retrieve the chestnuts from the fire *for them*. We do however not know whether GOD condones this. We stay on the ball, something we have done for 20 years. The truth about UFOs must prevail.

UFO-Contact

June 1971

For as long as people exist here on Earth, life after death will be a fact. This fact has been revealed to people through the numerous manifestation of their “departed” friends or relatives. This important continuance of one’s existence has always been disputed and maliciously discriminated against in spite of millions of pieces of evidence.

The situation with Ufology, respectively UFO research, is not different. These phenomena also reach back *millennia* and have appeared over again. In spite of all the sightings, numbering in the hundreds of thousands, one continues to simply deny their extraterrestrial existence – or one invents primitive explanations for them. Mankind is downright lied to in a way that no longer makes sense. The whole situation on Earth, with all its wars, could be considerably more peaceful and sound if mankind was *better* informed about such things.

We could tell you a thing or two about how difficult it is to spread the truth in this way. Even people that are convinced of the existence of extraterrestrial spaceships, and dispose of the required financial means, are *not committed* to spreading the truth. They wait until *others* make sacrifices. The SANTINER are not in a position to finance the dissemination of the COSMIC TRUTH.

Terrestrial thought processes are guided by insights gained by the sciences. These *terrestrial* yardsticks are also used to measure cosmic and extraterrestrial things. But one cannot utilise *terrestrial* thoughts when it comes to answering *extraterrestrial* questions. Mankind still listens to what the sciences have to say about it and those that do not want to contemplate this themselves allow themselves to be guided by its decisions. When certain phenomena do not fit into the terrestrially restricted framework, they are simply renounced.

One still hears the substantiation from scientific quarters that the speed limit has been *determined* by Einstein’s theory. There exists no greater speed than the speed of light according to this *theory* (!). Scientists therefore reject the existence extraterrestrials, respectively the place of origin of UFOs, because the distance to another solar system is too great. Velocity and gravitation are still largely unexplored fields of knowledge. Spiritualism is equally still in its *initial stages* in regards to the truth.

One must procure *solid* yardsticks before one begins to assess anything with such earnestness. One can also not judge other people without knowing them *intimately*. The same applies to Ufology and to Spiritualism; both of these fields are therefore still *occult*. To make fun of the occult is *unfair* from a scientific point of view.

One also endeavours to make *technical* contact with extraterrestrials by assuming that they – like we here on Earth – use radio signals. The financial expenditure in this respect is enormous, but without success.

- *The SANTINER do not utilise radio signals, because they have researched telepathy better and placed it in their service.*

Journalists explained to us that they do *not* possess expert knowledge when it comes to reporting about UFO questions. Enough said – or? – But journalists nevertheless express their *own* opinion

and *it is forced upon* their readers.

UFO-Contact

July 1971

The UFO problem has not been filed away yet, on the contrary – this global event becomes ever more important in its relevance. A film of 17 episodes was produced in England that deals with the UFO problem. This series is now also broadcast in Germany. But extraterrestrials are unfortunately once again depicted as dangerous enemies. – This absolutely reflects *human* thought processes.

Terrestrial mankind's important leaders cannot become comfortable with the thought that beings exist apart from us that hold *greater* powers in their hands and that are mentally *far* superior to us.

One is not happy to only persecute and discriminate against GOD with all available means, one also persecutes everything that happens under divine ORDERS. No surprise then that all of us have to live on a redemption planet, because we probably do not deserve to live on an advanced planet anyway.

The SANTINER – as they like to call themselves – will naturally come into their own someday. Either a new religion will establish itself or the SANTINER see no other way but to take the reins out of our hands.

Elucidation is pushed ever more forcefully in order to guide us towards a better path. Most people are unfortunately not capable of understanding their type of elucidation because they never concerned themselves with spiritual processes. The sciences did not believe in *telepathy* a few short years ago. One is nowadays aware that telepathy knows no boundaries, well, that it actually penetrates all materials, including lead. Those that contemplate this carefully will also understand that the SANTINER also utilise spiritual, universal possibilities *to communicate with us*.

When we published the brochures "*Not from this Earth*" a few years ago, one complained about the fact that extraterrestrials selected *our circle of all circles* to communicate with. The SANTINER, according to the rules of logic, would have had to call upon the pope or the President of the United States *first*. This is also an absolutely *human* thought process.

Today's terrestrial people do *not* enjoy the trust of the SANTINER. They know that they cannot afford to be captured, because one shows no consideration in this respect. It has certainly been established that the first Caucasians travelling to the inner regions of Africa ended up being cannibalised by primitive natives.

All the numerous statements by the SANTINER were difficult to formulate because our human thought processes get in the way. This is the reason why we placed everything that we know about the SANTINER within a comprehensible framework. A piece of work emerged from this the like one will not find anywhere on Earth. Nothing was invented, things were just made more comprehensible.

We hold the opinion that the description of life on a mothership was described as real as possible. All our readers will understand that this type of publication (Self-production) meant extra, strenuous work for us. We would have rejected this additional burden if we had not been dealing with such an *extraordinarily important contribution* towards solving the world's problems.

Publishers didn't dare to touch this subject, because they are not part of this MISSION and probably because they were not convinced about the genuineness of these messages that were being dealt with here as a subject under discussion. Those versant with UFOs will understand us.

Cosmic Giants

(A new brochure in three parts)

Based on exact psychic information from the SANTINER and our MESSENGERS of LIGHT TEAM, you will experience a voyage through space inside a mothership. No other description can get closer to the truth. Indescribably educational and interesting. Of the highest level.

The UFO problem is a "problem about Gods" because it goes back millennia. We classified and clarified everything that can be said about it. We *constructed* a plot in order to give our readers a graphic overview and we incorporated all pertinent statements made by extraterrestrials.

The huge demands placed on our mission of elucidation practically overtax us. We therefore ask our readers to take that into consideration when a typing error we managed to overlook appears in a manuscript. We do however not want to waste one single day to make this important work accessible as quickly as possible to our interested readers. This is how we manage to fulfil all the numerous wishes of our readers.

The fact that extraterrestrial flying objects exist is beyond question.

Absolutely objective evidence exists that cannot be talked out of existence.

We ask our readers to place their trust in us in regards to this as before. Apart from the background story, all details have been composed from our contacts. The designs of these brochures were *approved* by our spirit TEACHERS. We acknowledged the following words with particular satisfaction:

"A NEW BROOM is already at work and it will sweep all errors away."

The UFO problem should thereby gain more and more prominence.

UFO-Contact

August 1971

People have been arguing about the question of whether a hereafter exist or not for millennia. The question of *whether a hereafter exists* has been adequately clarified in our time. The *Japanese* made a considerable contribution towards this from their own research results. The use of a *Psychophon* was demonstrated in Austria. This technology cannot be blamed for the fact that it answered the questions put by the experimenters from a "subconsciousness". The result of this must surely shock the whole world.

The situation with the UFO problem is similar: Most newspaper readers still do not know whether UFOs actually exist. Journalists very cleverly know how to avoid answering this question. We know from experience that young journalists have no inkling at all about these things, but they proudly present their own brutishness in spite of it. As sightings of UFOs are numbered in the *hundreds of thousands* and as some of them present accurate information that is sometimes accompanied by

photos, this question has surely been clarified sufficiently.

The American Pentagon had been asked for its opinion up to now. The answer could not be given, because it would have had consequences that did not fit in with the government's concepts. But in order to avoid this unpalatable issue one decided to make the public believe that this theme is closed and that the government is no longer interested. But this is not the end of a problem that has existed for millennia and that influenced our culture. The UFO problem is actually getting stronger. The occupants of extraterrestrial spaceships are not enemies; but as they are *higher evolved* than us, they naturally also occupy a *higher level*.

We wrote a book about it and it is spread across three brochures. Its content, reading like a novel, is based on teamwork between the SANTINER, the TEACHERS from the world of spirit and those that ask questions during our séances. This effort produced a work the like the whole world has never seen before. Its truth content is extremely high. Life on board a spaceship is clearly described. It represents a factual report one can trust.

During one of our recent séances we asked what this extraterrestrial help actually consists of and what we can expect from it. We learned that this extraterrestrial help is mainly of a *messianic* nature at this time, that is to say, designed to *elucidate*. But this does not exclude further actions. The possibility of the Earth being placed under an extraterrestrial protectorate is also on the cards, particularly if the course of our historical development continues the way it has.

We unfortunately had to experience just how difficult it is to publicise the truth: Even publishers that are familiar with our mission have let us down.

The first edition of the book "*Cosmic Giants*" has been published in the meantime. Hundreds of thank-you letters prove to us that the argument, that one could not expect that all copies would be sold, was invalid. The enthusiasm shown is enormous. This book, if published by a major publisher, would surely have been a huge success. We therefore urgently remind you to order it in due course as we expect that it will be sold out in no time at all.

UFO-Contact

September 1971

Certain governments feel threatened by UFOs. As the extraterrestrials undoubtedly have *better* means at their disposal they are quite obviously seen as one's enemies and accordingly observed. Enemies of governments must not necessarily also be the enemies of the people. On the contrary – they can even be friends!

This is how the UFO problem pans out.

The fact that journalists side with governments is deplorable, but they do *depend* on their governments and on their good-will after all.

We have been engaged in our UFO contacts for 20 years in order to correctly assess this. This is the *only* source where we receive a clear insight from. All we can do is to ask all our friends all over the world to believe us, but we do have sufficient evidence that the extraterrestrials communicate the truth to us. The things that have to be said about this truth have been published in our series of ASHTAR SHERAN brochures. These brochures found extreme attention.

There might be a number of readers out there that criticise the fact that we do *not* have our brochures published through general publishers. The following has to be said about this:

- We are *not* a publisher in the general sense of the word.
- We have *no* connection with any public sale and distribution network and we do *not* seek an income.
- Our work is a mission that we do *not* fulfil for business purposes, but *took upon us voluntarily out of love for the truth*.

All of these might be reasons *why* extraterrestrials preferred to deal with us. Those that do not comprehend this will also not comprehend the MISSION extraterrestrials are engaged in. We unfortunately hear the same question over again: “*How much do you earn from these brochures?*” – One does not understand our answer, because one assumes that there are no people out there that make sacrifices for a cause *without* remuneration. Payment for our work will be forthcoming in a different sector.

That we constantly receive hundreds of thank-you notes from all over the world that give us a constant fresh impetus, are verifiable facts. We thank all and sundry for their *ideational* support. *We throw the first stone and other idealists draw the circles*. The translations that have already been published in other languages verify that these circles really exist.

Our editions are naturally not large, but they cause a lot of work in spite of this. Particularly through the processing of lots of tape-recordings that contain lots of fragments of our psychic contacts; they cannot simply be transcribed, they have to be meaningfully assembled together like a jigsaw puzzle.

Our latest protocol about extraterrestrials titled “*Cosmic Giants*” is a work that spans 20 years of intensive research. We did everything we could to create as accurate a picture as possible. The true importance of this work will probably be recognised only much later. But friends of UFOs will already enjoy reading it. They will only truly understand Ufology after this lecture. These brochures are also suitable to inform outsiders so that they also take an interest in this problem. Adolescents can also learn a lot from it and hopefully reflect upon the subject.

UFO-Contact

October 1971

Television still deals with the UFO problem. Extraterrestrials are still being *ridiculed* or depicted as dangerous fiends. This represents the typical human thought processes that have been prevalent for thousands of years. The viewers are supposed to be amused by the beastliness on show.

One great mistake is made in regards to the assessment of extraterrestrials: The SANTINER are certainly not just visitors to our Earth. They are neither guests nor cosmonauts on a journey of discovery. These extraterrestrials are *still observers* of this Earth. They record their observations, register certain events, take pictures and carry out measurements. If they do occasionally land on Earth they do so for a very short time only. To call extraterrestrials “visitors” is therefore wrong. A visitor comes as a friend or he has been invited.

Governments still see the SANTINER as mysterious, dangerous enemies. They were *not* invited by any government, they are *pursued* and *shot at* instead. The SANTINER do not have slightest inducement to approach us in friendship. This is the reason why it is of utmost importance that they establish contact with us. We know what they have to say to us. We should not be surprised if they keep away from us if we do not take notice of what they have to say.

Those in the military that believe that one can confront extraterrestrials with weapons are mistaken. Extraterrestrials are immune against all missiles because they have a very powerful energetic field around themselves that deflects all types of matter. Those that doubt the existence of UFOs have never *extensively* informed themselves. The following information is part of it:

- *Appearance* and texture of UFOs.
- *Light phenomena* associated with UFOs.
- Appearance of a phenomenon one calls “*angel’s hair*”.
- Incredible velocity and manoeuvrability actions of UFOs.
- Residual traces and annulment of electrical functions on Earth.

One should also read, compare and contemplate the reports about the so-called *Miracle of Fatima*. The Bible also gives sufficient information about the appearance of UFOs at biblical times.¹ Legends about Gods can also add more information.

Those that follow all of this do not require an official confirmation about whether UFOs exist or not. All serious studiers of UFOs should be aware by now that the depiction of these phenomena as “hallucinations” or “mirages” is an infamous blasphemy. Hiding behind all of these discriminations is nothing else but *fear*. This fear is absolutely justified, because things are happening here on Earth that *provoke* punishment. The fact that extraterrestrials are so tolerant is quite incredible.

Our latest brochures “*Cosmic Giants*” communicates a very accurate account of the facts. Those that read these brochures need no other explanations because they are informed.

A lot of readers and friends of UFOs complain that all of this takes too long, they should guard against thoughts of revenge. Revenge can turn into a boomerang. The SANTINER are not materially *far* superior, but also mentally and spiritually. They know exactly what they have to do. They have known their MISSION for millennia and they adhere strictly to the DIVINE PLAN.

UFO-Contact

November 1971

One can naturally advertise one’s own work, but it is far better to have others voices have a say. This is why we bring you a book review here that does *not* stem from our pen. The critic about to speak is A. Wörner, *544 Mayen*. He is a well-known colleague at the editorial office of the magazine

¹ See protocol: “*The Bible*”.

UFO-Nachrichten.

“A *psycho-scientific research group*, in Berlin has been publishing contact reports since 1957 about the extraterrestrial SANTINER with ASHTAR SHERAN as their leader, amongst other things. In three brochures, the first two are presently available, one can now find out about a co-production between extraterrestrial thought-bearers and the *Berlin research group* established in 1970, something no Ufology follower should miss out on. The knowledge on offer has been turned into an adventure story under the direction of the SANTINER, it’s about a German speaking journalist who is picked up by a disk at the side of the road and brought to a 600m long spaceship. Once there he receives all sorts of interesting information about terrestrial mankind and the intentions of the SANTINER. They declare that they felt competent and responsible for our Earth for millennia. A kind of “High Command” as it were.

To say that the information given here completely brings down an already shaky view of the world is no exaggeration.

Many amongst those that have read a lot about UFOs and possess the fantasy and a talent with the pen could write such an adventure story, ergo produce *science fiction*. The first brochure however contains a backup against a false assessment, a truth signet. It says:

‘Only *one* real miracle exists and it is human beings. Dear Mr. Berger, when one of our flying objects hovers closely above a pond it might happen that all creatures within it are magnetically pulled out of the water. When this flying object effects a change within it magnetic field, all of these creatures naturally fall back to Terra.’

We know from *Frank Edwards* book “*Flying Saucers – a Reality*” that the water of a lake flies up in the air when a UFO flies over it. It had also become a known fact that the well-known national newspaper “*Die Welt*” published an extensive report on the 17th of August 1971 about my ufological activities and that it chose large letters for the title:

‘THE FISHING IS PARTICULARLY GOOD WHEN UFOS APPEAR.’

What happened?

One day in June 1971 an excited young man, who has always regarded the UFO ambitions of his wife *Ursula* with scepticism, stood in front of me in my office at 8am. Last night – as almost every night before – he had once again been on the *Laacher See* (near Koblenz on the Rhine) fishing in a boat rented from the friars of the *Maria Laach* Cloister. The fish were not biting until a UFO slowly flew across the lake from the South to the North. The fish suddenly jumped about the waters’ surface like crazy and he managed to make his greatest catch ever. We now also believes in UFOs! The fisherman “spoilt” by UFOs is *Walter Welsch*, co-owner of the *Esso-Service Station* in Mayen, Koblenzerstrasse 147. *Walter Welsch* thereby turned into truth signet No. 2 for the extraterrestrials on that night on the *Laacher See*.

But the coherences reach much further:

There is the happenstance to begin with that the brochures “*Cosmic Giants*” were packaged into a journalist’s adventure story after discussions in Berlin. And there is also the happenstance that the real journalist of the newspaper “*Die Welt*” to whom I had casually told the *Welsch* story was quite amused and turned it into one of his headlines. This sceptic thereby inadvertently beat up the advertising drive of the SANTINER who were interested in seeing the UFO headline with the fish catch the attention of the readers. The advertising campaign of the SANTINER continued inconspicuously like a chain reaction. The report by “*Die Welt*” induced other newspapers to conduct interviews or reprints up to the end of September 1971. Amongst the papers were:

- *Die Rheinische Post*
- *Westfälische Rundschau*
- *Neue Weltschau*
- *Wuppertaler Stadtanzeiger*

The vision of the jumping fish inspired them to produce as many as 300,000 papers. This is more than any individual national newspaper in West Germany when added up.

The adventure story “*Cosmic Giants*” by the SANTINER dated March 1970, in the final analyses ended up being the prelude to a well measured advertising campaign in West Germany about the existence of UFOs. After all the numerous reports of sightings in Western Europe, particularly once again over the regions of West Germany, the editors of the *UFO-Nachrichten* journal demanded a summary table from the UN in October 1971, this must be seen as supporting evidence. Those that so gloriously understand the psychology and technique behind advertising on a terrestrial level find that their statements also and more than ever reach the quality of our highest intellectual demands.

According to statements made within the “*Cosmic Giants*” brochures, they possess the most horrific weapons to subdue us – but they ply their trade like a salesman canvassing a new article in lots of newspapers, so the whole thing turns out kind of *congenial* – even to fearful minds.

A. Wörner

“Appendix: I posted this report on the 11th of October 1971 at around noon. Mr and Mrs. *Welsch* saw a garish-white telemeter disk with a diameter of around 2 metres underneath a low-lying rain cloud south-west of *Mayen* at 12:30. I myself saw two lightning fast UFOs on the evening of the same day from *Pillig*, one to the West and the other to the North towards *Mayen*.”

A. Wörner

The event with the fish is naturally excellent UFO evidence, one only has to read the Bible attentively in order to find the same phenomenon:

Luke 5, 4 - 6: When he finished speaking he said to Simon, “Push the boat out further to the deep water and you and your partners let down your nets for a catch”. “Master” answered Simon “We worked hard all night long and caught nothing, but if you say so I will let down the nets”. They let them down and caught such a large number of fish that the nets were about to break.

(Comment: CHRIST was aware of the effect of UFOs!)

UFO-Contact

December 1971

If certain quarters imagine that they can get rid of the global UFO problem with a few excuses and twisting of facts, they make a grave mistake, one that will soon be revealed as such. UFO sightings are *not* decreasing, they are *increasing*. Due to all that information from all over the world we are constantly being updated. As we have an additional contact opportunity to best inform ourselves, we are in a position to gain an overview to some extent.

Brazil is presently being very intensely observed. UFO discusses and remotely controlled objects fly in and out on a daily basis. Other countries are also being preferred. This is why countries are traversed across that have not seen any UFOs in recent times.

Disked shapes UFOs presently also appear over *Yugoslavia*. Their number is quite considerable. It might be a case where they observe autumn manoeuvres by the military. These extraterrestrial spaceships were also captured on military radar screens. This is why these apparitions are no longer seen as hallucinations in *Yugoslavia*. Prominent scientists no longer doubt that they are dealing with extraterrestrial flying objects.

UFOs are also sighted in *West Germany*.

One can gather from this that UFOs appear more frequently all over the world. It will only be a question of time before one definitely admits that the world is visited and observed by extraterrestrial flying objects.

UFOs do not come here for the own pleasure. The fact that they make such an effort visiting Earth means that they naturally have a serious agenda. *This* is however *hardly* mentioned. One tries to communicate with extraterrestrials by constructing huge instruments. Lots of radio signals are sent into space and one hopes to receive an answer.

Why all this nonsense? We already maintain relatively well-functioning communications with extraterrestrials. But because one is *not interested* in *spiritual* experiments or because one doubts their validity, *these* results are hardly taken notice of.

Extraterrestrials try very hard to enlighten us human beings and to save us from a catastrophe. We are of the opinion that the communication part is *the most important* facet of the whole thing. Of what use is it to see a UFO fly like a bright star in such a fantastic fashion if we think that it is impossible in the first place?

Extraterrestrials pursue the intention of *talking to us* and they do this in a way that offers them the best opportunity under the given circumstances. Well, they even include the realm of the spirit. UFO messages are being received by *spiritual circles* all over the world. These messages vary according to the quality of the circle and the mediums, particularly so because *base* spirit beings can also participate by *pretending* to be extraterrestrials.

The ASHTAR SHERAN messages occupy first place, but they too are being falsified. The *original contacts* already impressed the world. These contacts reach back 20 years and they are built upon *faith, trust, brotherly love* and *friendship*. Human logic recognises the value of these impartations.

We are not a publishing company. We do not have the marketing opportunities via the book trade. This is why we publish the *original messages* via *stencil duplication*. We have unfortunately no longer control over printed translations.

UFO-Contact

January 1972

We are pleased that we were able to publish the work "*Cosmic Giants*" in all its *three parts*. This work contains the results of *20 years of contacts* and research. All that one must know about "*Flying Saucers*" can be found in these brochures. The Bible is indeed *considerably corrected* and deisms explained, but this changes nothing in our FAITH in GOD, it is virtually *confirmed* by it.

Those that contemplate this in a fashion will have already realised that there is only *one* solution for us as terrestrial human beings, namely to *adopt* the UNIVERSAL FAITH, something priests have been reluctant to do for millennia.

- *The immortality of the human soul is a fact that extraterrestrials want to teach us and they are prepared to make incredible sacrifices to achieve this.*

Thousands of UFOs fly across our world in order to inform us. They have been trying to communicate with us for thousands of years. All of this to enlighten us that human beings *survive* their physical demise.

Planet Earth is in danger! This is not something one should mock, because the majority of mankind knows nothing about the indescribable inventions and preparations undertaken to destroy the Earth and all life on it. We are unfortunately *forbidden* to report about this, because we have a different mission to fulfil, a mission we may not deviate from one iota.

The extraterrestrials helped us with the layout of the text of our brochures; our otherworldly TEACHERS also participated. No terrestrial living thing can achieve more. The SANTINER naturally expect to be successful doing it this way. We therefore have an urgent plea: It is extremely important that these books, who are so elucidating and instructive, are given and read by answerable people. We are however not in a financial position to carry out this action all by ourselves. We do send free examples to important addresses every day, but the burden of doing so is beyond our financial means. We have to do everything we can to promote the work of divine INTELLIGENCES whilst publishers are not a part of it. We therefore call upon all positively minded people to help us with this. Various readers have agreed to do so without actually having been asked by us.

The three brochures "*Cosmic Giants*" are a completed work, the like no terrestrial science-fiction writer could write, because he or she does not know the truth. All the discussions taking place within the spaceship are the results of our circle's work. All details have been *psychically* acquired, recorded on tape and meaningfully formulated. There is nothing here on Earth that could be compared with this, *no* fantasy, *no* written word, *no* money making scheme, *no* craving for attention, but only the truth in concentrated form.

We formulated the whole thing in a way that *all* human beings, adolescents also, can readily understand it. The books contents are neither boring nor uninteresting, but full of wisdom and life.

Those that read these books will understand themselves and comprehend the meaning of life.

We receive enthusiastic thank-you notes every day. But thank-you notes, even if they are ever so well intended, do not help us one step forward. We live in the year of Saturn, namely 1972, and we have to fight if we want to win and survive the BATTLE of ARMAGEDDON.

UFO-Contact

February 1972

Even though years have passed since the public at large showed an interest, the UFO problem is still eminently in the news. One tried to depict these flying objects as *figments of imagination*, but those that seriously deal with them will find the confirmation that they are dealing with *reality*.

These flying objects have not been flying individually of late, they fly in *formation* and they carry our manoeuvres. But to draw certain conclusions about their intentions from their manoeuvres is completely impossible. Not even we can find things out through our contacts. But we know that they are *not* our enemies and that they do not want to become our enemies. As these extraterrestrials represent a kind of cosmic police force, they will be constantly active and this until all threats of global destruction and the annihilation of mankind have abated.

We endeavoured to make our knowledge in regards to UFOs publicly comprehensible. We sieved through all contacts and prepared them accordingly. There are however still a number of readers that have not completely comprehended our work.

We want to explain this here one more time:

Our three brochures titled “*Cosmic Giants*” have been excellently assessed. Expert wrote to us telling us that we are dealing with the best information that exists in this field of knowledge anywhere on Earth. This assessment pleased us very much.

Now to its content:

- The spaceship was described *according to details furnished by the SANTINER*.
- All questions and answers asked and given on board the spaceship are the result from what we *developed during our circle's evening*; they stem from psychic work. The SANTINER and our otherworldly TEAM participated in this spiritualistic, psychic work. Our circle asked questions concerning this matter and the answers we received were recorded on tape the moment the medium read them out aloud.

One can therefore confidently assume that the whole depiction is as realistic as possible under the existing circumstances. We are proud of this work that is based on 20 years of intensive and difficult endeavours. Its content surpasses the value of the Bible by far. It is also instructive and highly interesting and it must also be taken serious from a scientific point of view.

It will naturally take some time before this important truth pushes its way to the fore. But as it stems from the HIGHER REGIONS we do not doubt its success. Its advantage is the fact that it can also be understood by laymen and adolescents. Something remains stuck with every reader and this gives them the opportunity to think about it. If they are then fortunate enough to sight a UFO, they will find that such an event will turn into a great adventure for them.

A number of UFO researchers unfortunately make the mistake of *seeing everything through the eyes of terrestrial human beings* and to *assess things with a terrestrial mind*. One should not forget that one is dealing with *extraterrestrials* and that they are *miles ahead of us*. Extraterrestrials naturally think and reason different from us, but their adjudication is indeed *more correct* and *more reliable* than is the case with us.

The salutation used by the extraterrestrials is:

PEACE ACROSS ALL FRONTIERS!

UFO-Contact

March 1972

Ignorance and inexperience in the field of parapsychology has led to prejudices that managed to spread right across the whole world. This is why one does not want to believe in ghosts and spirits and also not in extraterrestrial visitors who come to us in so-called UFOs in order to observe us. Only a small circle of private researchers is unremittingly searching for the truth. The means

available to do this are so small that it is not even worthwhile mentioning them.

In spite of the fact that it is quite obviously possible to verify the fact that UFOs come to us with an extraterrestrial MISSION and that they also manage to communicate this, one still wants *to suppress this with all available means*.

If somebody believes that UFOs will gradually disappear from our field of vision or from our imagination, he or she will find that the fact prove the opposite. Flights by UFOs continue to increase. *Formation flights* alarm certain quarters of numerous governments but they certainly keep quiet about it.

Our UFO contacts, an addition to our séances, endured for the last 20 years. We are constantly being informed and we gained an enormous overview over the phenomenon. One repeatedly tried to ridicule us, but the eminent INTELLIGENCE perceptible within our scripts confirm the credibility of our contacts.

UFO contacts are however *much rarer* than our monthly realised séances that we conduct with our otherworldly TEACHERS. We have become so well-known in the meantime that we receive information from all over the world, some of it is genuine, but some is often apocryphal. We can naturally also ask our otherworldly TEACHERS questions in regards to UFOs. They are also excellently orientated.

There is no doubts that extraterrestrials are *responsible for a lot of the miracles described in the Bible*. It has also been established in the meantime that GOD *never* talked to *Moses*. GOD also never gifted the Jewish people a country. These specific religious aberrations have caused a lot of unrest and the shedding of a lot of blood throughout the world.

In order to bring the world back on its right tracks, it is imperative that we take the indoctrinations and messages from the SANTINER serious, that we test them and then incorporate them in our scientific thought processes. There will be no peace if we do not take this action and the danger of global destruction will continue to exist. This must be acknowledged by all interested parties, because it is *the most important* thing that we have to attend to here on Earth at this point in time.

We experienced how dreadful the situation in this field is only just recently: The work "*Cosmic Giants*", created in co-operation between the SANTINER, SPIRIT TEACHERS and the MFK team, containing everything terrestrial human beings must know about this phenomenon, was irresponsibly ignored by those publishers that could have distributed it. We made an infinite effort to publish it in three separate brochures because our TEACHERS from the hereafter ask us to. Our readers may decide for themselves whether we're dealing with cowardice in regards to the truth or whether making money was the decisive factor. It doesn't really matter whether we're dealing with the esoteric, research into the hereafter, occultism or Ufology – honesty is *lacking* right across the board.

UFO-Contact

April 1972

The truth often requires an enormous amount of time to prevail. Ufology makes no exception in this respect. Government circles might have thought at one time that these phenomena can be hushed up, but that is a great mistake. On the contrary – Ufology makes *progress*. We have been preferentially dealing with individual flights by extraterrestrials up to now. But they fly in larger

formations these days. These formations in particular have in the meantime helped a lot to change the attitude of newspapers. A lot of the newspapers seek the advice of experts in order to better orientate themselves.

There is however no sense in speculating.

One believed in an imminent invasion by extraterrestrials a few years back, because this endeavour was actually announced by the extraterrestrials themselves. But they have abandoned this plan because the rapid development on Earth made them recognise that this endeavour was no longer expedient or promising success.

The SANTINER also mentioned that planet Earth could expect that a *protectorate* would be established. All speculations in this respect are also inappropriate. We heard from our otherworldly teachers that such measures would be as a *last resort* only.

- For as long as there is the slightest chance that terrestrial mankind changes and pursues *more peaceful* intentions, such a coercive action will never eventuate.
- But if the situation arises where people on Earth consider initiating a nuclear war causing the end of the world, it will be stopped by the SANTINER.

One has to consider the fact that the SANTINER do nearly nothing *of their own accord*, almost everything they do is part of their ASSIGNMENT. This ASSIGNMENT undoubtedly stems from the realm of the spirit with whom they are in *very close* contact with.

The SANTINER have various options, particularly in the field of *technically supported telepathy*, so that they should really be regarded as the REPRESENTATIVES of a divine ORGANISATION. This is not new, it is already recognisable in the Bible. Those that doubt this fact should compare Ufology with the Bible, because this is where they find confirmation. The birth of JESUS was already popularised through extraterrestrials. Similar phenomena followed. The *Miracle of Fatima* also confirms an interference by extraterrestrials.

One unfortunately likes to falsify extraterrestrial messages. We got our hands on messages that were supposed to stem from our own séances. Not one word of it is based on the truth and the name of ASHTAR SHERAN was vilified in the worst possible way. We are not in a position to gain a complete overview over all these falsifications. We can however promise our readers that our messages, published in our brochures and the *Menetekel*, represent the absolute truth. The guarantee we table is the 20 years old friendship we cultivate with otherworldly entities who helpfully supported us in our search for the truth.

The fact that we do not have our messages and brochures professionally printed is due to our concern that the number of interested parties is too small to cover the costs.

We do however throw the first stone – and others can draw the circles.

Things do progress slowly *but surely*.

UFO-Contact

May 1972

Even though the UFO problem has been acute for around 20 years, terrestrial mankind's leaders adamantly refuse to admit the existence of extraterrestrial UFOs. UFOs have however sufficiently verified their existence. We know *what* they are and *who* controls them.

Some scientists are nowadays convinced that UFOs are absolutely real and extraterrestrial. One has been trying of late – in spite of considerable costs – to send radio signals and satellites into space in order to establish contact with extraterrestrial human beings. One acts as if such contacts had never been established before.

Our hairs stand on end when we hear about this nonsense. We have been engaged in contacts with extraterrestrials, who call themselves "SANTINER" in our language, for 20 years. Attempts to send these radio signals costs millions. But no government has ever provided finances for *improving* existing contacts that are much more fruitful and reliable. What is certain though is that mankind's leaders on this planet fear the truth like the plague.

The truth however remains the truth and nobody on this Earth can arrest its progress.

We have been relying of the meagre help from private people for 20 years, we don't even want to mention our own sacrifices. We thank all those that supported us, even if in a most modest way, so that we could just stay on the ball.

Dishonest newspaper reporters and other deceitful authors have invaded the Ufology sector in order to arrest the progress of human beings. But there are a number of places here on Earth where genuine UFO contacts take place in spite of this.

What basically distinguishes a *genuine* contact from science-fiction?

The most important form of communication throughout the universe is *telepathy*. This option of communicating has been enormously neglected here on Earth. A genuine UFO contact is naturally based on *this* foundation. But as one's own capabilities do not suffice to conduct longer conversations, it has to be meaningfully supported. The SANTINER do indeed have telepathy enhancing apparatuses, but they do not suffice when it comes to communicating with us.

There are however human THOUGHT-BEARERS (souls) in the hereafter that are prepared to help us. These SPIRIT TEACHERS and MESSENGERS of LIGHT place themselves at our disposal in order to build a communications bridge. They are able to receive the messages of the SANTINER extremely well to then pass them on to terrestrial mediums. This is how genuine contacts come about. They can be related through a *talking medium*, but also through a *fully-automatic writing medium*. We from the MFK, Berlin are adapted to and trained for automatic writing. This is how almost all our scripts came about and they are therefore genuine UFO contacts.

The SPIRIT TEACHERS function as translators. It might be a case where they translate the language of the SANTINER into our native tongue. We already received well over 1,000 pages this way. Their content is *logical* and awesome.

So why all this nonsense of telegraphing drawings into space?

An excellent form of communicating already exists. All one has to do is *make an effort!*

UFO-Contact

June 1972

The governments of almost all larger nations know with relative certainty that UFOs are of *extraterrestrial* origin. But as these flying objects have not started to directly attack us one finds it appropriate to ignore their existence as much as possible. UFO experts in various departments of defence still see UFOs as enemies in spite of this. This is the reason why they represent an important factor in the defence's secret plans.

Are they really dangerous enemies? – What brought this about?

All previous observations correspond with one another in one substantial point, namely: They are *far superior* to our own flying objects. Having come to this conclusion it no longer matters whether their intentions are good or evil. Governments know that these flying objects are controlled by extraterrestrial intelligences, but sometimes also automatically guided, which in turn also presumes a viable intelligence.

Any technology that is superior to ours is naturally regarded as *hostile*. The mission these extraterrestrials have to carry out does not enter the equation. *It doesn't even matter* if they had received an assignment from GOD personally; terrestrial mankind's leaders bat for a *different* side.

Nothing can therefore be done about this animosity. No normal human being on Earth is capable of changing this situation. The danger is acute because one is prone to say: What can extraterrestrial people do if they want to *help* us here on Earth? All they can do, based on our *terrestrial* discretion and thought processes, is to apply superlative force and the result is: Extraterrestrials are dangerous enemies in the eyes of all government on Earth.

Our readers know these extraterrestrials better than the UFO experts that advise various governments. But we cannot circumvent one fact, namely that nothing will ever change in regards to this animosity, it remains and it is highly acute. There are indeed a number of bans in place, for instance to not attack UFOs, but only because one fears that one might challenge a superior opponent. These bans are certainly not proclaimed out of tolerance.

A particularly displeasing malady consists in the fact that the messages of the SANTINER are *not taken serious* by governments, but dismissed as science fiction. There are admittedly a vast number of reports that are nothing else but science fiction. A lot of messages from other countries misuse the name of ASHTAR SHERAN. Messages are disseminated in Canada of late that bear the name "*Ashtar Command*". Even though these messages appear in English, they are of a style that we cannot equate with that of ASHTAR SHERAN. We are unfortunately not in a position to test everything, because our contacts to do this do not suffice. All we can do is to concentrate on the new.

Comment: It is vitally important that the three brochures "*Cosmic Giants*") are being distributed. Some copies were sent to eminent government agencies. We formulated all explanations about the UFO's mission in a way that they can also be understood by young people. Apart from scientific explanations these books also contain religious instructions the like cannot be found anywhere else on Earth. – Knowledge in concentrated form.

UFO-Contact

July 1972

The enormous importance flights by extraterrestrial spaceships have for us can be explained quite easily. These spaceships have influenced the development here on Earth for millennia; they determined the most important elements of our religions. We can ascertain that the “*Miracle of Fatima*” was not a miracle, but an action carried out by UFOs. Comparisons with today’s sightings undoubtedly verify this.

That there are still people out there that doubt the existence of UFOs provides the best evidence that they have neither dealt with sightings nor with the Bible. They judge the subject willy-nilly.

Just how important flights by UFOs really are in regards to improving our own level of development is shown by the following facts: Almost all spiritualistic contacts have been influenced by extraterrestrials. This manifestation is *international*. Hoaxing spirits also always try to usurping people’s interest in UFOs by telling incredible stories, respectively by pretending to be extraterrestrials. These hoaxing spirits are unfortunately believed most of the time. They particularly like to misuse the name of ASHTAR SHERAN.

We receive messages in the mail that were transmitted to other circles and they contain threats or dates for landings that certainly do not coincide with the truth; they only cause unrest or panic. But we can clearly recognise just *how important* this extraterrestrial mission really is, because it is heeded to such a degree that even hoaxing and lying spirits want to get a hearing this way. We know from experience that these base spirit beings always intent to cause chaos; they are influenced by the devil. This however also tells us that when it comes to UFOs, UFOs do *indeed* have a divine MISSION. There is no doubt about this at all, because the SANTINER admitted this themselves. But the behaviourism of otherworldly INTELLIGENCES that do *not* side with GOD’S organisation verifies through its intentions to disrupt and to disturb, that a PLAN of SALVATION is present here.

Extraterrestrials are therefore not just treated in a hostile manner by terrestrial mankind, but also by the base otherworldly WORLD, because we are dealing with a divine ACTION. Something we are convinced of is that the SANTINER – as already assumed – are in fact *saintly*.

We heard from Italy that the SANTINER are called “LITTLE SAINTS” there. This could be just about right and it makes the whole issue even more interesting. It is generally known that they already played a meaningful role in the Bible. We know from *Moses*, *Ezekiel*, *Elijah* and other prophets that the SANTINER, given the name of “CHERUBS”, have always endeavoured to provide us with an objective religion.

The incredible insecurities prevalent in this world in regards to faith are the decisive reasons for the worldwide misery.

We are convinced that an improvement of the world’s situation can be achieved through the religious instructions given by extraterrestrials. This makes the messages from our friend ASHTAR SHERAN even more valuable. His admonitions and indoctrinations are so high grade that they *far surpass* the Bible’s accounts, particularly through the fact that they are absolutely *current*.

UFO-Contact

August 1972

The UFO problem remains as is.

Extraterrestrial flying objects are still sighted in almost all countries on Earth. We could never be dealing with hallucinations, because *all of mankind* would have to be in the grip of a wave of hallucinations. Observations are on par everywhere. There are hardly any deviations.

Those that *seriously* deal with UFOs find sufficient evidence for their extraterrestrial existence. One may however not make the mistake of comparing UFOs solely with our terrestrial experiences. They occupy a position that deviates considerably from our own terrestrial experiences. This also applies to UFO pilots, we cannot and may not equate them to our own thought processes. Therein lies the mistake made in regards to this problem.

Journalists *often* file *negative* reports because they have *no experience whatsoever* on this subject, but they *still* believe to be very clever and superior. A conversation with a journalist revealed that he thought that he was entitled to voice his opinion openly *without* actually having the professional knowhow. One can see just how frivolously one assess such an extremely important problem. As UFOs have an absolutely *occult* character they are equated with *negative* occultism.

The greatest errors in reasoning mainly consist in that one has drawn scientific boundaries that could never be correct. UFOs travel at *multiple* speeds of light. This circumstance makes them *incredulous* in the eyes of science. They only rarely react to terrestrial radar facilities. This borders on magic. Besides, UFO occupants try to avoid all encounters with terrestrial people if at all possible.

There are therefore enough reasons to deny that UFOs exist.

But this does not eliminate them from our world.

Those that feel a need to gain solid evidence for the existence of UFOs should intricately deal with the "*Miracle of Fatima*". This phenomenon contains all the details that we can still observe with UFOs these days. We would otherwise have to assume that 80,000 people were mistaken, that all of them hallucinated.

What is conspicuous is that the major publication media like the press and television have not yet dealt with the "*Miracle of Fatima*", respectively compared it with today's sightings, because this would surely convince all sceptics. Conclusion: *One does not want evidence*, one wants to achieve the opposite. The opposite is important because one urgently requires it *to cement* the current power situation.

But it is also a mistake to exclusively look at extraterrestrials from the perspective of the Bible. Even if extraterrestrials endeavour to bring us closer to the true FAITH in GOD – something they have always done – they still remain a *superior human race*. They are therefore never something akin to angels. The fact that extraterrestrials were incorporated into the Bible millennia ago happened due to *lack of experience*. One should really be able to understand the SANTINER better these days, because we are capable of travelling to the Moon *these* days.

One of the most important facts is and remains telepathy, something the SANTINER utilise to make themselves understood. We managed to collect some very good experiences from this field of knowledge via Spiritualism. We can indeed conduct a contact with the SANTINER very well, but it must be also be *desired* and *operated* by the SANTINER. We *cannot* nominate when.

UFO-Contact

September 1972

The truth cannot be extinguished, no matter how hard one attacks it.

This applies to one's faith in GOD as well as Ufology. We received a very drastic example of how powerfully one attacks Ufology in order to *keep* the truth from nations, because political and economic interests are at the *forefront*.

Our ASHTAR SHERAN brochures have become known by experts all over the world. These unique and excellent messages and elucidations have been translated *into various global languages*. A flood of letters convinced us that they had been thoroughly studied and appreciated. We have never gained any material benefits from these publications up to now. *We throw the stone and others draw the circles*.

Here is an impressive fact of how one deals with things connected to UFOs: Some time ago a number of our ASHTAR messages were translated into *Portuguese*. A reputable major publisher in Brazil "*Livraria Freitas Bastos S. A.*", *Rio de Janeiro* received our permission to publish these messages. We received the following answer in English word by word shortly after:

Dear Sir!

We refer to ours of October and yours of November 4, 1971, to inform you that unfortunately the book from "ASHTAR SHERAN" it will no more be published by us reasons of certain paragraphs that would not be approved by our Federal Censorship.

Regretting those circumstances, we remain.

Translated:

- The book from ASHTAR SHERAN cannot be published *because a number of paragraphs do not allow its publication. It didn't pass the censorship*.

Conclusion:

- The Brazilian government guards against such elucidations because they *conflict* with its totalitarian power. Governments decide what its peoples may learn and what not. Lies are *allowed*, the truth is *forbidden*. Only the methods of governments vary, their endeavours are otherwise the same everywhere.

Those that know ASHTAR SHERAN'S messages know that all of them are directed *against* war. We are also informed by ASHTAR SHERAN where all the nonsense in the Bible eventuated from. *This* nonsense is however perpetuated and protected.

All our readers will now understand why we formulated all our knowledge about the SANTINER and their mission novel-like in "*Cosmic Giants*". A factual report would have brought us a lot of

troubles. Publishers are unfortunately not well enough informed to be able to assess this material correctly.

Guided by directives from the WORLD of the SPIRIT we took the trouble of publishing this enormously important knowledge ourselves.

It is in the SANTINER'S interest to have the messages "*Cosmic Giants*" spread as far and wide as possible. We hope that our readers support us in this. We are certainly *not* dealing with science-fiction here, even if one does get a strong impression that it might be.

UFO-Contact

October 1972

Communications and measures taken by governments as well as the attitude of the world's press verify the attention lavished on the UFO problem. The majority of this activity takes place in secret. One endeavours to allow *as little* as possible to reach the public. Major newspapers simply reject the most important evidence on the grounds that they have reported about this often enough in the past.

The UFO problem is treated like a dangerous secret weapon. Governments are generally speaking not too sure about whether they should fear UFOs or whether they are simply being observed without anything decisive happening after all.

This behaviourism puts the onus of UFO research –as has always been the case – entirely on itself, that is to say, in the hands of laymen, interested parties and people with private initiative. All research costs money. But research that is suppressed and persecuted in such a perfidious way naturally costs *even more*, because the support from the major publication media is not there.

UFO research in particular is to blame that we have not progressed on single step in our research into the hereafter financially speaking. UFO research consumes all available financial means. This naturally brings an enormous retardation with it and the advantage is with the powerful. One should consider the following: *Millions* of financial means are spent trying to initiate communications with extraterrestrials. The methods used border on the *ridiculous*. A reliable form of communication has existed for many years – well it already existed at biblical times! All our UFO brochures have been formulated in this way. But one is determined to establish communications by hook and by crook *technologically*, namely through radio telephony.

Extraterrestrials did however not develop radio telephony, but a far better system, namely *telepathy* with the corresponding amplification. This fact is unfortunately not accepted, because terrestrial science is completely backward and absolutely inexperienced in this field of knowledge. There is no better form of communication for our contacts with extraterrestrials; it is based on 20 years of experience. The path to this form of communication went via Revelation Spiritualism; it was developed to its highest form.

In order to describe this process of communication once again to our readers and to interested parties we give the following explanation: Extraterrestrials, who have been observing us for millennia, guard against being taken prisoner or the loss of one of their spaceships, because this would lead to a global catastrophe. They do however send their thoughts that travel at multiple speeds of light and cannot be stopped by any physical barrier. Their range is *unlimited*. Their thoughts are amplified

through a telepathy amplifier.

There are only a limited number of people psychically gifted enough to receive these thoughts. But when they are mixed with other thoughts, even one's own, a jumble of thoughts eventuates that no longer allows the recognition of a meaning. These mediums are then declared insane.

We do not want to expose ourselves to this situation. We do have very good mediators, namely our spirit TEACHERS. These GUIDES receive these extraterrestrial messages on our behalf and translate them immediately. The messages are written down by the medium during our séances, read aloud after and recorded on tape.

UFO-Contact

November 1972

After more than 100,000 UFO sightings have been documented, one has to wonder why there are still people, actually the majority, that do *not* believe in the existence of UFOs. These people are influenced by their Church and the daily press, ergo falsely orientated. Based on the extremely terrible behaviourism of many powerful government representatives, one has to assume that these negative people also think that the UFO phenomenon is pure fantasy.

UFOs have been *real* for millennia. These spaceship did indeed influence our culture, well actually corrected the religions here on Earth. To analogically contrive limited knowledge is a great mistake. UFOs and their crews *cannot* be explained with *terrestrial* standards. An analogy in regards to UFOs does not exist. There is a difference between the development of terrestrial mankind and those people that come to us from an alien solar system.

- *The applied analogy for the purpose of interpretation and explanation leads in a totally wrong direction. This is the main reason why UFOs are interpreted as a fantasy.*

Let's take their speed under the magnifying glass of analogy: Terrestrial science established boundaries in regards to velocity and the human control of velocity. Any comparison must come to grief when confronted with the reality UFOs represent. There is probably no limit in regards to velocity, because we experience the miracle of having the SANTINER race through the cosmos at incredible speeds. These UFOs travel so fast that the human eye is incapable of registering them. We have to assume that we on Earth do not have an apparatus capable of registering the speed of a UFO in full flight.

The absolute superiority of extraterrestrials is denoted through two things:

- *The SANTINER possess rays that can paralyse the human brain. This method is a weapon that we cannot avoid.*
- *We cannot keep up with them, because they are faster than any flying object that we possess here on Earth.*

There are two types of UFO research: One is the *sighting* of flying objects that are registered all over the world and the other is *communication*. The messages from the SANTINER are very highly rated, but the powerful of this world deride them.

- *We had an opportunity to talk to government representatives. They are only interested in their own person, that is to say, their own welfare. They thought that spiritual messages should give them information about the positions in government they could occupy and who their adversaries are. Anything beyond that was of little interest.*

We have been receiving messages from the SANTINER since 1957. We did not target such contacts – as we didn't even know that they existed. These contacts developed of their own accord. Fragments of extraterrestrial news popped up in the middle of our psychic séances. We took note of them and took the communications further.

The name of ASHTAR SHERAN has gained a global reputation in circles of UFO experts. His messages are of such a high standard that lots of newspapers showed an interest. Universities, scientists and other leading personalities deal with these messages. But the world is *so falsely informed, influenced and repressed* that the means to thaw this thick ice are missing. But we cannot lose our courage; we cannot give up our contact.

UFO-Contact

December 1972

It is strange indeed that some scientists ridicule something at the beginning because it must be impossible according to their opinion to then assert later that they already knew about it for some time and that is was nothing new to them. Those that laughed about UFOs up to now laugh on the other side of the face now, because there are places where *UFOs fly across a thousand times and more a month*.

The UFO phenomenon takes on larger proportions. But to think of a UFO invasion is a premature speculation. It *isn't only* about the evidence that extraterrestrial flying objects *actually* exist, it is rather more a question of *why* they appear here in such large numbers.

Communication is at the foreground as far as we are concerned. Contact is communicating with them in a language we are familiar with.

A whole series of UFO brochures we published verify that it is easily possible to communicate with extraterrestrials even if some scientists laugh about it. By doing so they verify that they are incapable of looking over a certain horizon, namely the one that was instilled in them at their respective universities. Assumptions achieve nothing here; it is all about *practical* experience and this is something we possessed for 20 years.

We managed to learn a lot and we ascertained that the Bible is certainly not the valued Book of all Books. On the contrary – UFO phenomena were interpreted as “divine miracles” therein.

But this doesn't explain everything. The question of *who* are these extraterrestrials and *what* do they want still remains. How can we classify them as living beings? Are they ANGELS, GOD'S MESSENGERS, HUMAN BEINGS, UNIVERSAL MISSIONARIES or ADVENTURERS? – Extraterrestrials do not give us any information; they remain silent in regards to this question. We therefore ask our spirit GUIDES that are at our disposal.

- *According to them we are dealing with ethereal bodied human beings from “Metharia”, a planet within the “Alpha Centauri” solar system.*

This assertion was met with derisive smiles to begin with, but one has recently found out that this solar system does indeed have a planet that orbits near Alpha Centauri's Dark Sun. Alpha Centauri's second sun provides sufficient light and warmth for this planet and according to astronomical calculations, it is about the size of Earth.

The distance of 4.2 lightyears must not shock us, because we must not calculate things with our allegedly known limitations. UFOs fly faster than we can ever imagine. Besides, the inhabitants of Metharia have large spaceships at their disposal, they serve as their motherships and this provides them with in-between-stations.

We also learned that we are dealing with people who, based on their excellent connectivity to the realm of the spirit, carry out their MISSION as GOD'S MESSENGERS, respectively GOD'S APPOINTEES. Their MISSION is called: "Save planet Earth." This assignment *cannot* be carried out with weapons or with force, because terrestrial human beings are supposed to develop *individually* and *not* turned into slaves or robots. Our divinely endowed freedom is regarded as sacred by extraterrestrials; it is taboo as far as the SANTINER – as they like to call themselves - are concerned.

We are pleased to ascertain that UFOs appear in such great numbers that one can no longer dispute them without being ridiculed. The coming year will be very interesting in this respect.

UFO-Contact

January 1973

UFOs have not just appeared in this century; they have been around for millennia.

The Bible gives very definite accounts of this in lots of places. One has to consider however that the historical reports in the Bible have been abridged from century to century, so that a lot of evidence no longer exists today. One probably removed those accounts that one could not comprehend.

The messages received were always at the forefront of all UFO contacts in antiquity. The Bible reports: *GOD then spoke to people*. This is still so these days. The SANTINER however do not say that GOD talks to us, but that they talk ON BEHALF of GOD.

Contacts at biblical times verify that extraterrestrials had no language difficulties. They conversed in the traditional language of the region. We are also surprised these days that the SANTINER talk to us in our world's languages. They therefore had an opportunity to learn our languages.

In contrast to earlier contacts, communication nowadays is a lot better because our vocabulary has become more extensive. The SANTINER have now more words at their disposal to communicate something to us. Their leader ASHTAR SHERAN has repeatedly maligned the fact that our world's language do not suffice when it comes to telling us something that might also be important in spite of this.

The significance of the ASHTAR SHERAN contacts that we originally published have not yet been sufficiently acknowledged, because the general ungodliness in this world is unimaginable extensive.

The whole Bible comes to naught when compared with the statements made by the SANTINER.

We do not deal with sightings or with landing manoeuvres, but only with communicating. We know that the SANTINER will tell us very little about their flying objects; to investigate them is therefore impossible. But we can converse with the SANTINER very well. Whether one is prepared to believe us is another story. The future will help us by bringing the evidence that our contacts are correct.

We can count ourselves lucky to actually have an otherworldly TEAM at our disposal that helps us with our communications. We will not leave one stone unturned in order to find out more about the SANTINER next year also.

Reports about UFO sightings that reach us from all over the world verify that the flights undertaken by the SANTINER are increasing. It is quite possible that a stage will be achieved one day that allows extraterrestrials to prevail here on Earth. Extraterrestrials naturally have different laws: They do for instance not utilise force unless the Earth is in serious danger.

Communication still takes pride of place. But the content of these contact severely criticises politics. We must therefore be very careful indeed so that this mission is not foiled. Our UFO contact accounts reach *universities, Church offices* and even the *highest government departments*.

We would like to thank a few interested parties here, those that have shown a commitment to the UFO mission.

The dissemination of our contacts is nowadays much, much more important than the constant repetition of untrue biblical texts. An improvement of religion is only possible through constant UFO contacts. These contacts are the source of objective information.

UFO-Contact

February 1973

Even though one still tries to get rid of the UFO problem one does not make progress in this respect. UFOs fly ever more frequently and they prefer areas that could represent a danger to the Earth. The population's interest is also slowly growing.

The situation in *Brazil* improved things in our favour. Lots of villages, some major cities amongst them, have been flown across by UFO formations. Besides, a large extraterrestrial mothership was sighted and it drew the attention of large sections of the population. The UFO phenomenon is therefore perfect.

We managed to publish a number of ASHTAR SHERAN brochures – summarised in book form – in Brazil. This book is comprised of 254 pages. Its title is:

“A VOZ DOS EXTRAPLANETARIOS – ASHTAR SHERAN”

This Portuguese translation is regularly sold in all Brazilian bookstores and it was even *positively* discussed on television. This is one more success recorded by the SANTINER who raise their voice warningly and who want to be heard. Our spirit GUIDANCE always emphasised that together we *throw the first stone, whilst others draw the circles*. Germany unfortunately always lags behind

because *material* interest are too much in the foreground.

A reputable publisher in *Rome* is showing an interest in printing the three brochures "*Cosmic Giants*". We hope that it will be sold in all bookstores there also.

The extraterrestrial messages from the universal teacher and UFO-Commander ASHTAR SHERAN have been translated into the following languages:

- English
- French (extracts only)
- Italian
- Portuguese
- Dutch.

Just how enormously important these messages are is verified by *all the forgeries* that appear everywhere. Everything from *our* source is absolutely genuine. MESSENGERS of LIGHT, they have worked with us for more than 20 years, arrange these contact with extraterrestrials. We do not require a radar or a radio connection. Contact takes place via spiritual psychic abilities trained over many years. It represents the best possible form of communication that exists. Attempts at ESP by the Russians also have the purpose of universal communication that could reach other planets.

Even if all of this seems very occult, it does not change on iota of its reality. Enormous opportunities are still at the disposal of terrestrial mankind. They can be *more easily* accessed once academic science is prepared to acknowledge the core truths of Spiritualism.

It is however clearly apparent that terrestrial knowledge does not suffice to comprehend anything extraterrestrial. One unfortunately continues with making the mistake of looking at them from an *all too terrestrial* point of view. Scientists that only know their *physical* laws of nature are of the opinion that the velocity of objects travelling through space is *limited*. The sciences do presently not know the possibilities of *teleportation*, *dematerialisation* and the *effects of anti-matter*. When today's telecasts, films and novels mention an anti-matter propulsion system, you'll find that its description is based on our messages. In regards to UFOs, we hold the sceptre in our hands.

UFO-Contact

March 1973

We had various UFO contacts since 1954 and they improved year by year. These contacts happen via Spiritualism with all its possibilities of communication. The positive BEARERS of CONSCIOUSNESS from the hereafter are therefore also involved.

Our contacts with extraterrestrial are *not* unique. Messages that draw the attention to the extraterrestrials' MISSION are received in this way in *Brazil* and also in *Japan*. One drawback however consists in the fact that a lot of authors have utilised this field for their narrations and novels and thereby *distort* the actual reality. As our circle is regarded as exemplary by experts, we continuously receive all sorts of news and questions in regards to UFOs. We are for instantly asked how one can best distinguish between fiction and genuine UFO contacts. The following has to be taken into account:

- Extraterrestrials are *not* monsters. They look very *harmonious*.
- The skin colour is akin to a *suntan*.
- The eyes are *somewhat larger* than ours, not unattractive, but *very* expressive.
- The men's hair is *long*, down to the shoulders.
- The women's hair is *shorter*.
- The garments men and women wear are a tight fit.
- Their height is between *140 and 160 cm*, not taller. This is the absolute norm. We are dealing with fiction when other heights are mentioned.
- Their gait is swinging, probably due to a different gravity ratio. An extended visit on the ground is not very well coped with and this is why their visits are short-term.
- Communication is possible, because they speak *English, German and Latin* reasonably well, but with an alien accent.

The fact remains that extraterrestrials, who call themselves "SANTINER", are a kind of UNIVERSAL POLICE FORCE. They already displayed these characteristics at biblical times.

- There is a probability that there are also *negative* UFO occupants next to the SANTINER, because planet Earth is under the protection of the SANTINER. A lot of authors try to demonise the SANTINER in spite of this.

The Bible – when correctly understood – offers Ufology excellent subject literature. We were asked why the SANTINER called themselves GOD or JAHVEH when they landed on Mount Sinai. We answered this once before by saying that the SANTINER welcomed the fact that the Israelites saw them as GOD and his hierarchy; because this promoted better obedience. They still think that it is important to be regarded as GOD'S MESSENGERS. They do indeed have a MISSION to fulfil, namely to prevent total chaos here on Earth. This MISSION suffices to call demonic POWERS, hell's helpers, onto the scene in order to prevent this mission. Every psycho-scientist and seeker of the truth will understand this very well.

This makes any discrimination against the SANTINER comprehensible, because its aim is *to prevent* all divine HELP for planet Earth. To find that specifically politicians and various scientists, those who are politician's sidekicks, place their services at the disposal of the negative FORCES is absolutely logical, when taking the BATTLE of ARMAGEDDON into account. The only objection raised against UFOs consists in that one put a *limit on speed*. But UFOs verify that placing an artificial limit on achievable velocities is nonsense. There are considerably higher velocities than the speed of light, for instance with telepathy.

UFO-Contact

April 1973

Latin America is presently ahead of the rest in regards to UFO sightings. Not only small objects fly across South America, but also *projectiles of enormous dimensions*. If it wasn't for the public seeing more and more of these objects, the governments there would continue to remain silent. It is enormously important to familiarise oneself with extraterrestrial messages so that the public doesn't draw the wrong conclusions.

As the press, influenced by governments, always depict UFOs as the worst kind of enemies, it comes as no surprise that a lot of people fear UFOs. When people fear something they *flee*.

A lot of people are happier when UFOs are declared figments of people's imagination. These people do however not realise that huge sections in almost all countries would have to have gone insane, if they are prepared to accept that all of these figments of their imagination of this type as the truth. This is too absurd to even mention.

Certain academics have a very specific view in regards to what extraterrestrials *should do* according to their opinion. All of these assumptions, that can naturally never be fulfilled, stem from people's low standing, something we experience on a daily basis.

The SANTINER give us a clear object-lesson in how one has to behave when confronted with a dangerous enemy. *They disconcertedly avoid all direct contentions*. But this distancing themselves from us is unfortunately misinterpreted here on Earth. We are not dealing with cowardice here, but with DIPLOMACY. *Terrestrial* diplomacy on the other hand has an intimate relationship with open animosity.

This journalist induced fear factor led to a situation where everybody immediately flees the scene when a "Flying Saucer" attempts to land. This naturally exclude any positive physical contact. But these direct contacts could be very important if they would verify that the UFO messages received by spiritualists are genuine.

Not every spiritually, respectively psychically received contact is elementally genuine. But when we are dealing with a *qualified* psychic circle, the opportunity for communicating with extraterrestrials naturally exists. This type of communication is not really something extraordinary, because we are dealing with the *original form of communicating*, the predominant form throughout the universe. Our scientist are however still far from accepting the fact that consciousness, with its capabilities of thinking and perceiving, is *not* found within the cells of the brain.

- *The brain is just a relay station, ergo a locating station, within the processes of exchange between the body and the soul.*

In spite of all the unpleasantness in regards to this UFO issue, the name of ASHTAR SHERAN has become world-renowned through our publications. We naturally have to admit that we only receive the "bricks" and that we have to work out the "mortar" ourselves so that these bricks can be put together to form a usable handiwork.

Only a few people supported us with their limited means. Extraterrestrials hold them in high regards, because they know that some less-well-off people made a *real sacrifice* on behalf of the salvation

of this humanity.

UFO-Contact

May 1973

The UFO contacts that we entertained for around 20 years produced an enormous flood of letters from our circle of readers. We can gather from them what one makes of this situation. The more UFOs appear, the more one expects an action from them that is supposed to represent a kind of chastisement like Sodom and Gomorrah.

Our long association with the SANTINER provides us with a better assessment of the situation. A tribunal dealing with mankind's responsible leaders *hardly seems an option*. The moment the SANTINER attack us – and they are bound to win – they turn into our *enemies*. But this is *not the intention* of these extraterrestrials, they will always seek the *friendly* way.

The same questions pop up over again: “Why don't the extraterrestrial land in order to talk to us face to face?” This question can also be answered very quickly. Extraterrestrials are excellently informed about our mentality and development. They therefore know the risks involved in such an attempt. All they endeavours to raise the terrestrial level consciousness would fail and cause consequences like a global nuclear war. We must therefore be *more patient*, because the reformation on Earth is a *slow* process, completely planned and excellently cogitated.

Just how real the MISSION of the SANTINER really is can be garnered from the widespread attacks against all UFO reports all over the world. Only a group of *positively* thinking people can support this MISSION.

We published the best information about extraterrestrials in the three brochures “*Cosmic Giants*”. Almost all letters that we receive confirm this. Foreign publishers contacted us in order to find an opportunity to largely spread this information in book form. But as we are faced with major crosscurrents, we have to have a lot of patience and show good will here also.

Readers have asked us whether this report is based on the truth. They wanted to know where the material for it stemmed from. We can say to this that *almost all dialogues present within the information are based on the truth, because we had these conversations during our contacts*. Our spirit GUIDES participated in these conversations and adopted an ASSISTING ROLE. The description of the UFO ship also seems to be very close to the truth, because we used all details for it the way they were reported to us.

We are not a publisher in the usual sense of the word. This is why we issue our information about extraterrestrials as individual manuscripts. These first editions represent the first stone hitting the water. *Other interested parties and publishers then draw ever widening circles*. Even though we are not the financial beneficiaries, we still managed to gain their worldwide dispersal because of the manner suggested by our spirit GUIDANCE.

Our editions are small. We can also *not* undertake *reprints*. We therefore suggest that all those

interested in the three brochures place their order as soon as possible, because the brochures written in German will soon be out of print.

UFO-Contact

June 1973

When a well-known psychologist asserts out of ignorance that UFOs do not exist, that the whole thing is due to “mass-hallucinations”, a lot of journalists *immediately* take note of this assertion in order to spread it all over the world.

This does not help the truth one little bit!

Those that fall prey to these press reports do not have an own opinion.

What is astonishing is that even intellectuals do not react differently. The UFO problem is actually not that difficult to understand. The UFO phenomenon has not just cropped up in our days, it goes back millennia. The whole development of our world have been influenced by UFOs. Lots of UFO sightings and encounters were described as biblical miracles due to lack of knowledge. The main reason for this was the *bright luminosity* of extraterrestrial flying objects. How should one react during a time when astronautics was still completely unknown?

The following features should make the UFO problem comprehensible to everyone:

- UFOs are extraterrestrial spaceships of *various* sizes and forms.
- Their propulsion system is based on *anti-matter*, they are extraordinarily manoeuvrable.
- A luminosity appears when their aggregates are energised and it includes the whole spectrum of solar light.
- Their velocity is incredibly high. They can also remain stationary. It is possible for a UFO to remain one metre above the ground for hours.
- When a UFO lands, burn marks are left behind.
- The nearness of a UFO interferes with all terrestrial electrical equipment and it brings about a change of magnetism. A larger UFO can shut down whole power supply systems.
- These objects can displace large amounts of water. Even a small UFO of 5m diameter can draw fish and other water creatures out of the water.

These few features suffice to make this comparison possible. The “*Miracles in the Bible*” can therefore be explained; the “*Miracle of Fatima*” also. Every scientist with a bit of common sense can come to exact conclusions here.

UFOs are unassailable because they create their own force field around themselves. Every meteor

or every projectile can be deflected. When a plane enters the functional space around a UFO it will crash, because all its electronics will fail.

The speed UFOs travel at is greater than the speed of light. This proves that the speed of light does *not* represent the absolute limit of velocity. But because we *lack* the corresponding experience, we cannot *mentally digest this*. This is the only reason why a few scientists cannot make any progress with the up to now valid calculation formulas and therefore regard the feasibility of such journeys impossible.

The notion that UFOs do not land on Earth is not true. UFOs of a *smaller* design land on Earth on a daily basis. But one is very careful and one leaves the opportunity to retreat always open. One thing that stands out is the fact that UFO occupants do not want to be captured. In any case, extraterrestrials are mentally and technological far superior to us. No eminent scientist likes to admit that human beings exist that are far superior to us.

The interest extraterrestrials show in us is to do with our human progress. They come here as our TEACHERS and NURTURERS, but we hinder them in their MISSION wherever we can. They will however not abandon their intent in spite of this.

UFO-Contact

July 1973

Concerning the UFO problem, the Swiss hotelier *Erich von Däniken* caused a lot of furore. The thought of the possibility of extraterrestrial visitors to our Earth was made known everywhere through his books. The SANTINER should actually be pleased about this, because his books reached editions of almost 10 million exemplars.

The magazine "*Der Spiegel*" reported about this and asked what makes such a publishing success possible. *Däniken* asserted that he has supernatural perceptions and that he already knew as a child that UFOs existed.

But what does the reality look like?

Our brochures "*Not from this Earth*" appeared in *May 1957*. This factual report caused quite stir and it triggered the *Michalek-Fraud*. We successively published a new brochure every year that reported about the existence of extraterrestrials.

Our brochure "*Veritas Vincit*" came out in *1959* and it rectified the explanations about the spaceship phenomenon on Mount Sinai and the Ezekiel reports in the Bible.

ASHTAR SHERAN messages also followed over the next years. These brochures were translated into various world languages and disseminated as printed books in *Italy, France, Brazil* and other countries.

We demonstrably know that *Erich von Däniken* read some of our brochures, because some of our readers sent them to him. *Däniken* drew and formulated his sensational material from this source. The supernatural perceptions therefore come from the *Psychic Peace Circle, Berlin*, where this material was original formulated.

In all our publications, some of them also appeared in the *Menetekel*, we always emphasised that these extraterrestrial visits were part of a DIVINE MISSION and *not just* visits by inquisitive human beings from another star system. We thereby lend support to theistic religion and we underlined its truthfulness and necessity.

Things are completely different with *Däniken*, he wrecks this type of religion, because *no indication whatsoever* is given that we're dealing with a DIVINE MISSION. This is not in the interest of extraterrestrials, because this completely nullifies the *gist* of their intentions.

Readers who corresponded with *Erich von Däniken* reported back to us that *Däniken* does *not* believe in life after death, that he was *not* an occultist, *even less* of a spiritualist and can therefore not talk about extrasensory perceptions at all. This is called "*pirate copy*" or "*plagiarism*" in the vernacular.

The *Econ-Verlag* who publishes *Däniken's* work writes in the addenda:

"The publisher will endeavour to list the works that were at the author's short-term disposal during his travels and whose bibliographical date could not yet be exactly determined in later editions."

This has *not* yet happened. But the documents, that is to say our documents, were not just short-term, but actually *permanently* at the author's disposal.

We have no objections in regards to the success of his books if they would at least *support* people's faith in GOD, because this is what the SANTINER who informed us are interested in.

UFO-Contact

August 1973

We are indeed *objects of study* from the point of view of the SANTINER. People from Earth were picked up and observed in biblical times too. These studies played a part in finding out of how one could best live on Earth, respectively exist here. The physical condition of the SANTINER is different from that of terrestrial human beings!

The sciences partially reject the possibility of extraterrestrial visitors. *Terrestrial* yardsticks and insights were used to come to that conclusion. The fact that UFOs do come to us clearly indicates that terrestrial yardsticks *are incorrect as far as the cosmos is concerned*.

The thought that human beings exist that are *far advanced* of our development is unappealing. Certain scientists do not like to hear this. Other leaders of mankind are also not enthused about it. The battle being waged against UFOs has not come to an end by a long shot.

There are quite a number of people that were guests on board a UFO, but they guard against revealing their adventures to a government agency or to turn to a newspaper. They know all too well that one will emphatically declare that they are *schizophrenic*. There is certainly no shortage of doctors that would *confirm* that this is so.

We received a lot of inquiries immediately after our brochures "*Cosmic Giants, Part 1-3*" came out. One wanted to know whether what was being reported was based on the truth and whether a journalist had actually been on board a spaceship. We do have our specific experiences and are

therefore not able to answer these questions. Telling the whole truth could destroy our mission. We therefore ask our readers to desist from asking questions in regards to this. We do have our DIRECTIVES and we abide by them.

What we can tell you is that a considerable portion of this narration stems from our spiritualistic séances. Our MESSENGERS of LIGHT, with whom we entertain contact, gave us lots of information and we know that, based on their high standing within the realm of the spirit, they told us the truth.

We ascertained that the ASHTAR SHERAN messages, printed in various languages in other countries, *are being attacked by the antagonist*. Hoaxing and also lying spirits are at work trying to ruffle the credibility of these messages. This fact should make all interested parties listen attentively. Such attempts do however only underline the credibility of these reports!

The SANTINER show great patience. We do unfortunately not have this patience, we are the ones that are up to our necks in it, but we cannot accelerate anything in any way. The SANTINER are also involved in the BATTLE of ARMAGEDDON. We can however not ascertain the role they play in it. All we know is that they represent a kind of COSMIC POLICE and that they want to disseminate divine DOCTRINES. This was already the case numerous millennia ago.

Through our technological progress here on Earth we are now in a better position to understand these visitors. This was not possible in the past, because one knew nothing at all about space travel and the whole phenomenon was explained as a “*divine miracle*”.

Even if we assume that the SANTINER are *not* angels, we find that they are without doubt the bearers of a DIVINE MISSION and it matters not whether they do this out of their own initiative or under orders.

UFO-Contact

October 1973

Scientists have been cogitating for years about how extraterrestrials would communicate with us. One naturally also referred to telepathy. One has been endeavouring, especially in the USSR, to get a grip on telepathy scientifically and also technically ever since.

Our UFO contacts do *not exclusively* consist of telepathic transmissions. Our highly developed *automatic* writing mediums make it possible for us to forego a translator to begin with and also to leave the telepathic reception to our otherworldly friends, because they are telepathically well advanced of us. Our otherworldly GUIDES receive the messages from extraterrestrials telepathically to then forward them to us undistorted. This is a bodacious way to communicate, but it is not comprehensible to those that have no knowledge about Spiritualism or ESP research.

The BILD newspaper (Axel Springer Verlag) writes the following about us:

“Bild am Sonntag” 10/11 June 1973:

“Whatever one might think of *Däniken*, he came up with some rather interesting hypothesis, but he did not proclaim any irrevocable ‘truths’. *Speer* on the other hand proclaims his insights as the truth and this differentiates him from *Däniken*.”

One must naturally also be able to verify a truth.

We can do this! – Even in front of the eyes of scientists.

We do not publish assumptions and also no hypothesis, but the *objective truth*, it is incontestable. This is the reason why our contacts have become known all over the world. We do not seek a profit, we fulfil an assignment, that is to say, a DIVINE MISSION.

UFO-Contact

November 1973

The moment people undertake their own deliberations in order to explain or deny the existence of UFOs, their *mundane thought processes* get in the way. The corresponding experiences to make a comparison are simply lacking.

- *Only the SANTINER can give us references that comply with the truth.*

The battle over UFOs has been going on for decades – and it is impossible to prove that extraterrestrial flying objects *do not exist*. Hundreds of thousands of sightings *confirm* their existence.

There are unfortunately still a lot of people that derisively smile when it comes to UFOs. The behaviourism is proof that lots of people still think *illogically*. Exact UFO research represents an important part of ESP research these days.

One should not allow oneself be deceived by titles when it comes to all these considerations. The title “professor” is no guarantee for the objective truth. On the contrary – scientific experts are so handicapped by what they studied that they would also like to explain the unusual with their drummed in yardsticks.

- *The communication with the SANTINER is only possible with the help of positive, otherworldly spirit beings. But one has to place every sentence under the microscope in these cases also so one can ascertain what is genuine.*

Our ASHTAR SHERAN contacts contain no fantasy, but rather more *logic* instead!

A natural open-mindedness is more important than an imagined superior attitude.

UFO activities are constantly increasing here on our Earth.

Those that are interested in ASHTAR SHERAN’S transmissions gain an enormous overview over all affairs on our Earth. ASHTAR SHERAN is a UNIVERSAL TEACHER of the format of a great MESSIAH.

Even church officials agree with this!

That these messages are directed towards the powerful of this world is of great significance and importance. We are dealing with genuine UFO CONTACTS that might just overtax the human ability to comprehend.

UFO-Contact

January 1974

UFOs have been sneered at and portrayed as fantasy, but one has not been able to erase them from the agenda for years. Reports are filed all over the world on a daily basis. The question is: Why all this squabbling over a phenomenon that is *so significant* for us here on Earth?

Those that still doubt the existence of UFOs are really beyond help. The sum of evidence is complete. The largest newspapers around the world continuously report about new sightings; they got rid of an old taboo a long time ago.

Turin, 4th of September 1973:

Mysterious, unknown flying objects were observed in northern Italy. A so-called flying saucer flew over Seis, South Tyrol. The colour of the UFO was between very bright and dark. It looked very small and alternatively also like a huge fireball.

The same observations were also reported by the pilot of a sports machine as well as members of the air force and a pilot from the airline *Alitalia*. The control tower in Turin and radar experts at the military airport *Mortara* also reported these observations.

Similar reports appear daily and now also in newspapers with the largest editions. We have here a plethora of observations by reliable and responsible people. To still attempt to talk about “deranged” human beings who apparently imagine these UFOs is absolute nonsense. The truth is being delayed, but it will push through, because it is in front of us every day.

It is a less known fact that the sciences sometimes come up with costly mistakes. But there are *thousands* of such cases in spite of this. One example: Space research sends probes on their way to explore the universe. Such a probe recently flew past Jupiter in order to send measurement via radio signals back to Earth. As one assumes that such probes will continue onward into space and that they might be perceived or intercepted by other humanities, one added a plaque that depicted a drawing that was supposed to draw attention to our human race here on Earth. It proclaims our existence on planet Earth.

Just how absurd and unscientific this plague is can be recognised by every ufologist that deals with this phenomenon more closely.

- *Extraterrestrials are not reliant on such fatuous indicators of our existence. They have known us and our planet for millennia! The SANTINER register everything.*

What scientists have come up with here is incredibly naïve. They should rather take a look in the Bible or read our brochures that in the meantime also exist in various other languages. We assume that these contact reports are completely unknown to them or that due to their university induced scepticism they regard them as science-fiction.

We are a research team that devotes its time to researching the psycho-scientific truth out of *idealism* (not fanaticism). We categorically reject science-fiction, because this type of literature is based on lies.

The SANTINER are beautiful people and highly intelligent; one can find a description of them in the Bible with *Lot*. Genuine contacts also verify this. The SANTINER were looked upon as ANGEL

in antiquity also. *Science-fiction on the other hand turns them into MONSTERS.*

UFO-Contact

February 1974

The naïve approach to the UFO problem by alleged “experts” defies description. UFO sightings are still explained with the same old arguments. Old nonsense is *rehashed over again* and such explanations make the readers *insecure*.

- Weather balloons *do not change colour* and *do not disappear* at an instant.
- Meteors *do not fly upwards* and also *do not fly a zigzag course*.
- The crews of large airliners *do not hallucinate*.
- Hundreds of thousands of UFO observers are *not psychopathic*, ergo looking for their salvation in their own fantasy.

The press and its informers must think that people are very dumb, they would otherwise not feed them such nonsense. If one were to give these alleged UFO experts credibility, no one on Earth would dare to sit in a plane, because there is the danger that the crew is insane or that it hallucinates. This goes against one’s sense of security.

There are however facts available that represents absolute evidence. The “*Miracle of Fatima*” is a paradigm in this respect. This phenomenon, *simultaneously* admired by around 80,000 people, happened at a time when all presently applied explanations were impossible.

Once again a few passages from the original protocols by the Vatican:

13th of September 1915:

“Not a cloud in the sky. But an oval ball of light is moving in front of thousands of eyes from the East to the West, it glides slowly and majestically through space and it emanates a blinding, but pleasant brilliancy. Once it reached the place where it had appeared before, it could no longer be seen. After a quarter of an hour, the same ball of light once again climbed up into the sky and disappeared towards the East.”

13th of October 1915:

“The rain stopped at an instant and the heavy mass of clouds quickly spread apart. The sun appeared at the zenith like a *silvery disk* that one could look at without effort and danger. It began to rapidly spin around itself like a Catherine Wheel. It successively shone in all the colours of the rainbow and scattered flames of light and sheaves of fire in all directions. Heaven and earth, rocks and people were successively bathed in yellow, green, red, blue and violet light. The sun stood momentarily still. It then resumed the light spectacle.”

This extensive description goes even further. All details coincide with today’s sightings. The things that were observed in *Fatima* have been re-observed in all regions of the world. Journalists write that one is dealing with “electrical light phenomena” that is taking place within the Earth’s atmosphere. There are naturally cases of light phenomena, but all of these phenomena were *constant*; they didn’t fly *a course*. And then there is the fact that these light phenomena did not produce so-called “angel’s hair”.

The protocol from *Fatima* however reports:

“Something akin to white flowers or snowflakes fell from the sky, whatever it was never reached the ground, it disappeared at a specific height. This apparition repeated itself later a number of times and this in front of hundreds of thousands; it was also photographed.”

UFO-Contact

April 1974

All newspapers around the world have repeatedly reported about UFO sightings for well over two decades. But one continuously reads that the relevant authorities talk about “mirages”, “imaginings”, “hallucinations” and “space junk”. But it has been impossible to get rid of this global theme in spite of all these pretences.

- *Ufology is a phenomenon that cannot be unravelled with weak excuses, as it is also not possible to do the same with all other supernatural phenomena.*

In as far as the sciences are concerned, its experts still base their calculations on the *theory of relativity*, ergo on the absolute limit enforced by the speed of light. The time factor then becomes the stumbling block. But as UFOs do exist, they should rather contemplate whether the boundary placed on velocity might contain a flaw. We are however certain that a scientific flaw exists here. *Newton's* theory on gravity is also incorrect. One already assumed that this was the case and one therefore applies the most modern means to get behind this secret.

The UFO phenomenon had become so acute that the literature dealing with it grows ever more comprehensible. But as far as we can gather from this literature, we find that it gets lost in a jumble of speculations. It is an unfortunate fact that alleged UFO experts verify through their theses that they have no inkling about the reality of the subject matter. *Erich von Däniken* did indeed embrace this theme, but he is not able to publicly defend himself successfully against attacks from scientists. But *absolute* pieces of evidence exist that extraterrestrials in UFOs have actually visited planet Earth and no scientist can doubt or refute them. Why does one not talk about them instead of using all sorts of assumptions as anti-theses?

Our direct contacts, even if they happen on rare occasions, have an enormous advantage: We hear *the truth* this way and we disseminate it by making large sacrifices and with idealism in our hearts in regards to the *objective truth*.

One impediment stands in the way of Ufology, namely the analogy: We cannot solve the problem with assumptions based on our *terrestrial experiences*. Based on this analogy we cannot even understand the mentality of other races and nations and it is even more unlikely that we will ever understand the mentality of the SANTINER. They think differently from us and their technological experiences are also different.

The NASA engineer *J. F. Blumrich* did indeed refer to the prophet *Ezekiel* in order to prove that extraterrestrial spaceships visited our Earth in the distant past, but his analogy fails because of our terrestrial human thought processes. It is certainly utter nonsense to compare UFOs with our combustion engines. UFO are *not* propelled by energies we are familiar with. A lot of their techniques are also based on supernatural possibilities.

- *ASHTAR SHERAN* once emphasised that the development of the *SANTINER* would still be in its infancy without magic.

We also know from our extraterrestrial friends that we subjected to lots of fallacies and that they *arrest* our development.

- Light does *not* travel in a straight line, it is *bent* and this changes its optic perception.
- Radioactive decay can also not be used as a timer when it comes to dealing with *gigantic* timeframes.

UFO-Contact

April 1973

Latin America is presently ahead of the rest in regards to UFO sightings. Not only small objects fly across South America, but also *projectiles of enormous dimensions*. If it wasn't for the public seeing more and more of these objects, the governments there would continue to remain silent. It is enormously important to familiarise oneself with extraterrestrial messages so that the public doesn't draw the wrong conclusions.

As the press, influenced by governments, always depict UFOs as the worst kind of enemies, it comes as no surprise that a lot of people fear UFOs. When people fear something they *flee*.

A lot of people are happier when UFOs are declared figments of people's imagination. These people do however not realise that huge sections in almost all countries would have to have gone insane, if they are prepared to accept that all of these figments of their imagination of this type as the truth. This is too absurd to even mention.

Certain academics have a very specific view in regards to what extraterrestrials *should do* according to their opinion. All of these assumptions, that can naturally never be fulfilled, stem from people's low standing, something we experience on a daily basis.

The *SANTINER* give us a clear object-lesson in how one has to behave when confronted with a dangerous enemy. *They disconcertedly avoid all direct contentions*. But this distancing themselves from us is unfortunately misinterpreted here on Earth. We are not dealing with cowardice here, but with *DIPLOMACY*. *Terrestrial* diplomacy on the other hand has an intimate relationship with open animosity.

This journalist induced fear factor led to a situation where everybody immediately flees the scene when a "Flying Saucer" attempts to land. This naturally exclude any positive physical contact. But these direct contacts could be very important if they would verify that the UFO messages received by spiritualists are genuine.

Not every spiritually, respectively psychically received contact is elementally genuine. But when we are dealing with a *qualified* psychic circle, the opportunity for communicating with extraterrestrials naturally exists. This type of communication is not really something extraordinary, because we are dealing with the *original form of communicating*, the predominant form throughout the universe. Our scientist are however still far from accepting the fact that consciousness, with its

capabilities of thinking and perceiving, is *not* found within the cells of the brain.

- *The brain is just a relay station, ergo a locating station, within the processes of exchange between the body and the soul.*

In spite of all the unpleasantness in regards to this UFO issue, the name of ASHTAR SHERAN has become world-renowned through our publications. We naturally have to admit that we only receive the “bricks” and that we have to work out the “mortar” ourselves so that these bricks can be put together to form a usable handiwork.

Only a few people supported us with their limited means. Extraterrestrials hold them in high regards, because they know that some less-well-off people made a *real sacrifice* on behalf of the salvation of this humanity.

UFO-Contact

May 1973

The UFO contacts that we entertained for around 20 years produced an enormous flood of letters from our circle of readers. We can gather from them what one makes of this situation. The more UFOs appear, the more one expects an action from them that is supposed to represent a kind of chastisement like Sodom and Gomorrah.

Our long association with the SANTINER provides us with a better assessment of the situation. A tribunal dealing with mankind’s responsible leaders *hardly seems an option*. The moment the SANTINER attack us – and they are bound to win – they turn into our *enemies*. But this is *not the intention* of these extraterrestrials, they will always seek the *friendly* way.

The same questions pop up over again: “Why don’t the extraterrestrial land in order to talk to us face to face?” This question can also be answered very quickly. Extraterrestrials are excellently informed about our mentality and development. They therefore know the risks involved in such an attempt. All they endeavours to raise the terrestrial level consciousness would fail and cause consequences like a global nuclear war. We must therefore be *more patient*, because the reformation on Earth is a *slow* process, completely planned and excellently cogitated.

Just how real the MISSION of the SANTINER really is can be garnered from the widespread attacks against all UFO reports all over the world. Only a group of *positively* thinking people can support this MISSION.

We published the best information about extraterrestrials in the three brochures “*Cosmic Giants*”. Almost all letters that we receive confirm this. Foreign publishers contacted us in order to find an opportunity to largely spread this information in book form. But as we are faced with major crosscurrents, we have to have a lot of patience and show good will here also.

Readers have asked us whether this report is based on the truth. They wanted to know where the material for it stemmed from. We can say to this that *almost all dialogues present within the information are based on the truth, because we had these conversations during our contacts*. Our spirit GUIDES participated in these conversations and adopted an ASSISTING ROLE. The description of the UFO ship also seems to be very close to the truth, because we used all details for it the way they were reported to us.

We are not a publisher in the usual sense of the word. This is why we issue our information about extraterrestrials as individual manuscripts. These first editions represent the first stone hitting the water. *Other interested parties and publishers then draw ever widening circles.* Even though we are not the financial beneficiaries, we still managed to gain their worldwide dispersal because of the manner suggested by our spirit GUIDANCE.

Our editions are small. We can also *not* undertake *reprints*. We therefore suggest that all those interested in the three brochures place their order as soon as possible, because the brochures written in German will soon be out of print.

UFO-Contact

June 1973

When a well-known psychologist asserts out of ignorance that UFOs do not exist, that the whole thing is due to “mass-hallucinations”, a lot of journalists *immediately* take note of this assertion in order to spread it all over the world.

This does not help the truth one little bit!

Those that fall prey to these press reports do not have an own opinion.

What is astonishing is that even intellectuals do not react differently. The UFO problem is actually not that difficult to understand. The UFO phenomenon has not just cropped up in our days, it goes back millennia. The whole development of our world have been influenced by UFOs. Lots of UFO sightings and encounters were described as biblical miracles due to lack of knowledge. The main reason for this was the *bright luminosity* of extraterrestrial flying objects. How should one react during a time when astronautics was still completely unknown?

The following features should make the UFO problem comprehensible to everyone:

- UFOs are extraterrestrial spaceships of *various* sizes and forms.
- Their propulsion system is based on *anti-matter*, they are extraordinarily manoeuvrable.
- A luminosity appears when their aggregates are energised and it includes the whole spectrum of solar light.
- Their velocity is incredibly high. They can also remain stationary. It is possible for a UFO to remain one metre above the ground for hours.
- When a UFO lands, burn marks are left behind.
- The nearness of a UFO interferes with all terrestrial electrical equipment and it brings about a change of magnetism. A larger UFO can shut down whole power supply systems.
- These objects can displace large amounts of water. Even a small UFO of 5m diameter can draw fish and other water creatures out of the water.

These few features suffice to make this comparison possible. The “*Miracles in the Bible*” can therefore be explained; the “*Miracle of Fatima*” also. Every scientist with a bit of common sense can come to exact conclusions here.

UFOs are unassailable because they create their own force field around themselves. Every meteor or every projectile can be deflected. When a plane enters the functional space around a UFO it will crash, because all its electronics will fail.

The speed UFOs travel at is greater than the speed of light. This proves that the speed of light does *not* represent the absolute limit of velocity. But because we *lack* the corresponding experience, we cannot *mentally digest this*. This is the only reason why a few scientists cannot make any progress with the up to now valid calculation formulas and therefore regard the feasibility of such journeys impossible.

The notion that UFOs do not land on Earth is not true. UFOs of a *smaller* design land on Earth on a daily basis. But one is very careful and one leaves the opportunity to retreat always open. One thing that stands out is the fact that UFO occupants do not want to be captured. In any case, extraterrestrials are mentally and technological far superior to us. No eminent scientist likes to admit that human beings exist that are far superior to us.

The interest extraterrestrials show in us is to do with our human progress. They come here as our TEACHERS and NURTURERS, but we hinder them in their MISSION wherever we can. They will however not abandon their intent in spite of this.

UFO-Contact

July 1973

Concerning the UFO problem, the Swiss hotelier *Erich von Däniken* caused a lot of furore. In all our publications, some of them also appeared in the *Menetekel*, we always emphasised that these extraterrestrial visits were part of a DIVINE MISSION and *not just* visits by inquisitive human beings from another star system. We thereby lend support to theistic religion and we underlined its truthfulness and necessity.

Things are completely different with *Däniken*, he wrecks this type of religion, because *no indication whatsoever* is given that we're dealing with a DIVINE MISSION. This is not in the interest of extraterrestrials, because this completely nullifies the *gist* of their intentions.

Readers who corresponded with *Erich von Däniken* reported back to us that *Däniken* does *not* believe in life after death, that he was *not* an occultist, *even less* of a spiritualist and can therefore not talk about extrasensory perceptions at all. This is called "*pirate copy*" or "*plagiarism*" in the vernacular.

The *Econ-Verlag* who publishes *Däniken's* work writes in the addenda:

"The publisher will endeavour to list the works that were at the author's short-term disposal during his travels and whose bibliographical date could not yet be exactly determined in later editions."

This has *not* yet happened. But the documents, that is to say our documents, were not just short-term, but actually *permanently* at the author's disposal.

We have no objections in regards to the success of his books if they would at least *support* people's faith in GOD, because this is what the SANTINER who informed us are interested in.

UFO-Contact

August 1973

We are indeed *objects of study* from the point of view of the SANTINER. People from Earth were picked up and observed in biblical times too. These studies played a part in finding out of how one could best live on Earth, respectively exist here. The physical condition of the SANTINER is different from that of terrestrial human beings!

The sciences partially reject the possibility of extraterrestrial visitors. *Terrestrial* yardsticks and insights were used to come to that conclusion. The fact that UFOs do come to us clearly indicates that terrestrial yardsticks *are incorrect as far as the cosmos is concerned*.

The thought that human beings exist that are *far advanced* of our development is unappealing. Certain scientists do not like to hear this. Other leaders of mankind are also not enthused about it. The battle being waged against UFOs has not come to an end by a long shot.

There are quite a number of people that were guests on board a UFO, but they guard against revealing their adventures to a government agency or to turn to a newspaper. They know all too well that one will emphatically declare that they are *schizophrenic*. There is certainly no shortage of

doctors that would *confirm* that this is so.

We received a lot of inquiries immediately after our brochures "*Cosmic Giants, Part 1-3*" came out. One wanted to know whether what was being reported was based on the truth and whether a journalist had actually been on board a spaceship. We do have our specific experiences and are therefore not able to answer these questions. Telling the whole truth could destroy our mission. We therefore ask our readers to desist from asking questions in regards to this. We do have our DIRECTIVES and we abide by them.

What we can tell you is that a considerable portion of this narration stems from our spiritualistic séances. Our MESSENGERS of LIGHT, with whom we entertain contact, gave us lots of information and we know that, based on their high standing within the realm of the spirit, they told us the truth.

We ascertained that the ASHTAR SHERAN messages, printed in various languages in other countries, *are being attacked by the antagonist*. Hoaxing and also lying spirits are at work trying to ruffle the credibility of these messages. This fact should make all interested parties listen attentively. Such attempts do however only underline the credibility of these reports!

The SANTINER show great patience. We do unfortunately not have this patience, we are the ones that are up to our necks in it, but we cannot accelerate anything in any way. The SANTINER are also involved in the BATTLE of ARMAGEDDON. We can however not ascertain the role they play in it. All we know is that they represent a kind of COSMIC POLICE and that they want to disseminate divine DOCTRINES. This was already the case numerous millennia ago.

Through our technological progress here on Earth we are now in a better position to understand these visitors. This was not possible in the past, because one knew nothing at all about space travel and the whole phenomenon was explained as a "*divine miracle*".

Even if we assume that the SANTINER are *not* angels, we find that they are without doubt the bearers of a DIVINE MISSION and it matters not whether they do this out of their own initiative or under orders.

UFO-Contact

October 1973

Scientists have been cogitating for years about how extraterrestrials would communicate with us. One naturally also referred to telepathy. One has been endeavouring, especially in the USSR, to get a grip on telepathy scientifically and also technically ever since.

Our UFO contacts do *not exclusively* consist of telepathic transmissions. Our highly developed *automatic* writing mediums make it possible for us to forego a translator to begin with and also to leave the telepathic reception to our otherworldly friends, because they are telepathically well advanced of us. Our otherworldly GUIDES receive the messages from extraterrestrials telepathically to then forward them to us undistorted. This is a bodacious way to communicate, but it is not comprehensible to those that have no knowledge about Spiritualism or ESP research.

The BILD newspaper (Axel Springer Verlag) writes the following about us:

“Bild am Sonntag” 10/11 June 1973:

“Whatever one might think of *Däniken*, he came up with some rather interesting hypothesis, but he did not proclaim any irrevocable ‘truths’. *Speer* on the other hand proclaims his insights as the truth and this differentiates him from *Däniken*.”

One must naturally also be able to verify a truth.

We can do this! – Even in front of the eyes of scientists.

We do not publish assumptions and also no hypothesis, but the *objective truth*, it is incontestable. This is the reason why our contacts have become known all over the world. We do not seek a profit, we fulfil an assignment, that is to say, a DIVINE MISSION.

UFO-Contact

November 1973

The moment people undertake their own deliberations in order to explain or deny the existence of UFOs, their *mundane thought processes* get in the way. The corresponding experiences to make a comparison are simply lacking.

- *Only the SANTINER can give us references that comply with the truth.*

The battle over UFOs has been going on for decades – and it is impossible to prove that extraterrestrial flying objects *do not exist*. Hundreds of thousands of sightings *confirm* their existence.

There are unfortunately still a lot of people that derisively smile when it comes to UFOs. The behaviourism is proof that lots of people still think *illogically*. Exact UFO research represents an important part of ESP research these days.

One should not allow oneself be deceived by titles when it comes to all these considerations. The title “professor” is no guarantee for the objective truth. On the contrary – scientific experts are so handicapped by what they studied that they would also like to explain the unusual with their drummed in yardsticks.

- *The communication with the SANTINER is only possible with the help of positive, otherworldly spirit beings. But one has to place every sentence under the microscope in these cases also so one can ascertain what is genuine.*

Our ASHTAR SHERAN contacts contain no fantasy, but rather more *logic* instead!

A natural open-mindedness is more important than an imagined superior attitude.

UFO activities are constantly increasing here on our Earth.

Those that are interested in ASHTAR SHERAN’S transmissions gain an enormous overview over all affairs on our Earth. ASHTAR SHERAN is a UNIVERSAL TEACHER of the format of a great MESSIAH.

Even church officials agree with this!

That these messages are directed towards the powerful of this world is of great significance and importance. We are dealing with genuine UFO CONTACTS that might just overtax the human ability to comprehend.

UFO-Contact

January 1974

UFOs have been sneered at and portrayed as fantasy, but one has not been able to erase them from the agenda for years. Reports are filed all over the world on a daily basis. The question is: Why all this squabbling over a phenomenon that is *so significant* for us here on Earth?

Those that still doubt the existence of UFOs are really beyond help. The sum of evidence is complete. The largest newspapers around the world continuously report about new sightings; they got rid of an old taboo a long time ago.

Turin, 4th of September 1973:

Mysterious, unknown flying objects were observed in northern Italy. A so-called flying saucer flew over Seis, South Tyrol. The colour of the UFO was between very bright and dark. It looked very small and alternatively also like a huge fireball.

The same observations were also reported by the pilot of a sports machine as well as members of the air force and a pilot from the airline *Alitalia*. The control tower in Turin and radar experts at the military airport *Mortara* also reported these observations.

Similar reports appear daily and now also in newspapers with the largest editions. We have here a plethora of observations by reliable and responsible people. To still attempt to talk about “deranged” human beings who apparently imagine these UFOs is absolute nonsense. The truth is being delayed, but it will push through, because it is in front of us every day.

It is a less known fact that the sciences sometimes come up with costly mistakes. But there are *thousands* of such cases in spite of this. One example: Space research sends probes on their way to explore the universe. Such a probe recently flew past Jupiter in order to send measurement via radio signals back to Earth. As one assumes that such probes will continue onward into space and that they might be perceived or intercepted by other humanities, one added a plaque that depicted a drawing that was supposed to draw attention to our human race here on Earth. It proclaims our existence on planet Earth.

Just how absurd and unscientific this plague is can be recognised by every ufologist that deals with this phenomenon more closely.

- *Extraterrestrials are not reliant on such fatuous indicators of our existence. They have known us and our planet for millennia! The SANTINER register everything.*

What scientists have come up with here is incredibly naïve. They should rather take a look in the Bible or read our brochures that in the meantime also exist in various other languages. We assume that these contact reports are completely unknown to them or that due to their university induced scepticism they regards them as science-fiction.

We are a research team that devotes its time to researching the psycho-scientific truth out of *idealism* (not fanaticism). We categorically reject science-fiction, because this type of literature is based on lies.

The SANTINER are beautiful people and highly intelligent; one can find a description of them in the Bible with *Lot*. Genuine contacts also verify this. The SANTINER were looked upon as ANGEL in antiquity also. *Science-fiction on the other hand turns them into MONSTERS.*

UFO-Contact

February 1974

The naïve approach to the UFO problem by alleged “experts” defies description. UFO sightings are still explained with the same old arguments. Old nonsense is *rehashed over again* and such explanations make the readers *insecure*.

- Weather balloons *do not change colour* and *do not disappear* at an instant.
- Meteors *do not fly upwards* and also *do not fly a zigzag course*.
- The crews of large airliners *do not hallucinate*.
- Hundreds of thousands of UFO observers are *not psychopathic*, ergo looking for their salvation in their own fantasy.

The press and its informers must think that people are very dumb, they would otherwise not feed them such nonsense. If one were to give these alleged UFO experts credibility, no one on Earth would dare to sit in a plane, because there is the danger that the crew is insane or that it hallucinates. This goes against one’s sense of security.

There are however facts available that represents absolute evidence. The “*Miracle of Fatima*” is a paradigm in this respect. This phenomenon, *simultaneously* admired by around 80,000 people, happened at a time when all presently applied explanations were impossible.

Once again a few passages from the original protocols by the Vatican:

13th of September 1915:

“Not a cloud in the sky. But an oval ball of light is moving in front of thousands of eyes from the East to the West, it glides slowly and majestically through space and it emanates a blinding, but pleasant brilliancy. Once it reached the place where it had appeared before, it could no longer be seen. After a quarter of an hour, the same ball of light once again climbed up into the sky and disappeared towards the East.”

13th of October 1915:

“The rain stopped at an instant and the heavy mass of clouds quickly spread apart. The sun appeared at the zenith like a *silvery disk* that one could look at without effort and danger. It began to rapidly spin around itself like a Catherine Wheel. It successively shone in all the colours of the rainbow and scattered flames of light and sheaves of fire in all directions. Heaven and earth, rocks and people were successively bathed in yellow, green, red, blue and violet light. The sun stood momentarily still. It then resumed the light spectacle.”

This extensive description goes even further. All details coincide with today’s sightings. The things that were observed in *Fatima* have been re-observed in all regions of the world. Journalists write

that one is dealing with “electrical light phenomena” that is taking place within the Earth’s atmosphere. There are naturally cases of light phenomena, but all of these phenomena were *constant*; they didn’t fly *a course*. And then there is the fact that these light phenomena did not produce so-called “angel’s hair”.

The protocol from *Fatima* however reports:

“Something akin to white flowers or snowflakes fell from the sky, whatever it was never reached the ground, it disappeared at a specific height. This apparition repeated itself later a number of times and this in front of hundreds of thousands; it was also photographed.”

UFO-Contact

April 1974

All newspapers around the world have repeated reported about UFO sightings for well over two decades. But one continuously reads that the relevant authorities talk about “mirages”, “imaginings”, “hallucinations” and “space junk”. But it has been impossible to get rid of this global theme in spite of all these pretences.

- *Ufology is a phenomenon that cannot be unravelled with weak excuses, as it is also not possible to do the same with all other supernatural phenomena.*

In as far as the sciences are concerned, its experts still base their calculations on the *theory of relativity*, ergo on the absolute limit enforced by the speed of light. The time factor then becomes the stumbling block. But as UFOs do exist, they should rather contemplate whether the boundary placed on velocity might contain a flaw. We are however certain that a scientific flaw exists here. *Newton’s* theory on gravity is also incorrect. One already assumed that this was the case and one therefore applies the most modern means to get behind this secret.

The UFO phenomenon had become so acute that the literature dealing with it grows ever more comprehensible. But as far as we can gather from this literature, we find that it gets lost in a jumble of speculations. It is an unfortunate fact that alleged UFO experts verify through their theses that they have no inkling about the reality of the subject matter. *Erich von Däniken* did indeed embrace this theme, but he is not able to publicly defend himself successfully against attacks from scientists. But *absolute* pieces of evidence exist that extraterrestrials in UFOs have actually visited planet Earth and no scientist can doubt or refute them. Why does one not talk about them instead of using all sorts of assumptions as anti-theses?

Our direct contacts, even if they happen on rare occasions, have an enormous advantage: We hear *the truth* this way and we disseminate it by making large sacrifices and with idealism in our hearts in regards to the *objective truth*.

One impediment stands in the way of Ufology, namely the analogy: We cannot solve the problem with assumptions based on our *terrestrial experiences*. Based on this analogy we cannot even understand the mentality of other races and nations and it is even more unlikely that we will ever understand the mentality of the SANTINER. They think differently from us and their technological experiences are also different.

The NASA engineer *J. F. Blumrich* did indeed refer to the prophet *Ezekiel* in order to prove that extraterrestrial spaceships visited our Earth in the distant past, but his analogy fails because of our

terrestrial human thought processes. It is certainly utter nonsense to compare UFOs with our combustion engines. UFO are *not* propelled by energies we are familiar with. A lot of their techniques are also based on supernatural possibilities.

- *ASHTAR SHERAN once emphasised that the development of the SANTINER would still be in its infancy without magic.*

We also know from our extraterrestrial friends that we subjected to lots of fallacies and that they *arrest* our development.

- Light does *not* travel in a straight line, it is *bent* and this changes its optic perception.
- Radioactive decay can also not be used as a timer when it comes to dealing with *gigantic* timeframes.

UFO-Contact

May 1974

We can count ourselves lucky that the SANTINER are so good natured, they would otherwise have destroyed our world a long time ago. The power to do this is in their hands.

The UFO phenomenon has not diminished for years, sightings actually increase all the time. It won't be long before UFOs have concentrated around our globe to a degree where they are safe from us.

Even if newspapers do *not* report them daily, daily sightings take place in spite of this, they are also registered by the authorities.

One of the most frequent excuses consists in that one mentions that "radar equipment showed nothing". Radar equipment *can show nothing* if UFOs have their force field switched on. Radar radio waves can then not be reflected from the object and the projectile cannot be grasped.

The SANTINER do not just intent to showcase their flying abilities, they also want to get in contact with us. This desire to make contact with us is unfortunately not taken serious by the powers that be. Logic tells us that it is nonsense to say that such kinds of contacts do *not exist*, just because one is *unable to establish them oneself*. There are a number of well-functioning places that receive messages from ASHTAR SHERAN and their content is very similar to one another. But genuine UFO messages are unfortunately not disseminated enough. Our whole life on Earth is too much in the grip of materialism. Making money takes *first* place; one is even prepared to kill masses of people for it.

- *To deal with the UFO problem requires a strong dose of idealism, because the moment one publishes one's findings one is attacked from all sides.*

The major publishers have distanced themselves from this theme, because they do not want to wage this battle. Something that particularly annoys mankind's leaders is the fact that UFOs play a *messianic* role. One does not want anything to do with any religious message of salvation; the words "GOD" or "divine" are already taboo.

We find the same with *Spiritualism*. This doctrine, supported by self-discovery and practical

experience, is *absolutely taboo* and *exposed to persecution*, because this experience based doctrine is the most conclusive amongst all the other religions here on Earth. Spiritualism is therefore absolutely dangerous to mankind's leaders in regards to their own behaviourism. All researchers that furnish evidence are being heckled. This particularly applies to UFOs, because this evidence can sometimes also be seen by the public.

The UFO phenomenon virtually established the Bible. We are however dealing with descriptions from ignorant, that is to say, uneducated people. Reinterpretations then led to a religion that does not conform to the truth, but is sold by priests and fanatics as the "absolute truth".

When terrestrial mankind hopes for a change to the present world situation they will find that this salvation can only come about through the SANTINER. Major revelations come from these sources and they influence our church-dogmatic thought processes. Just how powerful these thought processes are programmed within us is verified by letters from churchgoers who cannot let them go, no matter how hard they try and who only believe their priest's words – and most of them are dead against this.

UFO-Contact

June 1974

The Second World War undoubtedly called extraterrestrials back onto the scene. The utilisation of nuclear bombs disquieted the SANTINER and it induced them to observe processes here on Earth more closely. Ever since UFOs appeared, reports about them have increased exponentially and a comprehensive range of literature about them has already come into being.

UFO literature is naturally mainly controlled by the desire to make money. There are therefore only a few books amongst them that contain something credible. Fantasy takes pride of place. Science-fiction books are a dime a dozen. But what is correct? It has to be said that: All types of fiction are allowed in literature. Authors can construct their narrations in such a way that one gets the feeling of dealing with a real, factual report. They do not have to mention that one is dealing with fiction. This unfortunately leads to a situation where this opportunity is sorely abused, because UFOs *do indeed fly and are being sighted*. This lends support to fiction and it becomes credible.

We had contact with extraterrestrials now and then for 20 year and during the first years of our psychic work we thought that they were hoaxes. We then had to admit that they were *actually genuine*. The messages we received in those days were amazing in their content and they conveyed some important insight to us.

Our UFO contacts are unfortunately seen as fiction by some atheistic journalists and television personal. We have to emphatically stress here that we reject all such methods. Our messages are rendered *faithfully*, that is to say in their original form. We categorically reject the dissemination of our work as science-fiction.

As experienced spiritualists, speakers and mediators for the realm of the spirit we think that this MISSION is too serious and too sacred to abuse.

We appeal to the common sense of people who have the future of this world at heart.

We can unfortunately not summon the SANTINER. We depend on them to announce their presence

of their own accord – and this unfortunately happens all too seldom. But when they do, they convey a text to us that is literally out of this world.

We presently experience a rather long interval. This might be the calm before the storm. We know that the situation on this planet is very, very serious.

The belief in help from the SANTINER is very much impaired by false proclamations. Books exist that report about journeys to other stars systems, radio contacts and visits by *terrible monsters*. All of this is utter nonsense and it adds to mankind's insecurities. Monsters would not be inspired to a degree where they would possess their kind of technology and where they would undertake that kind of mission on behalf of an objective FAITH in GOD. One should think about this.

The extraterrestrials known to us are externally angelically beautiful to behold. Their mental attitude is overwhelmingly *positive* and *morally exemplary*. All of these are characteristics that GOD'S antagonist is not too fond of. In his hatred he wants to destroy mankind in order to cause GOD an enormous amount of damage.

All of this is not a fairy-tale, it is part and parcel of the absolute prerequisites for HIGHER INSIGHTS and the further survival of all of terrestrial mankind.

UFO-Contact

July 1974

Ufology, that is to say, *the research into extraterrestrial spaceships* has to deal with one major general difficulty: Namely generalisation. There are undoubtedly sightings of UFOs that are *actually* based on illusions or atmospheric phenomena, but there are of course *also genuine* UFO observations. But as one intends to abnegate *all* sightings and contacts if at all possible, one tends to *generalise* almost all such phenomena. Even the best of sightings are *principally* depicted as illusions.

The general public is not in a position to analyse each and every case. They must be able *to depend* on other people's reports!

We had an opportunity to talk to some of these reporters. *They have no inkling of what Ufology is all about!* A well-known journalist who wanted to report about UFOs and actually also did, said to us:

"It isn't common practise and it isn't actually demanded that reporters are informed about everything or that they observed things first hand. Reporters only have an assignment to write about it."

This means nothing else than that reporters do *not* write the facts as they stand, but *only their own opinion*. Just how this opinion looks like can be read in the papers on a daily basis. Only well informed intellectuals can free themselves from general prejudices to then decide themselves what is correct and what is not.

Our *terrestrially based* thought processes that are a part of our experiences are amongst the most dangerous prejudices. We *lack* extraterrestrial experiences. This is the reason why we are not capable of assessing UFOs and their MISSION. This however works both ways. Extraterrestrials also have their prejudices: They have *different thought processes*, their *upbringing is different* and

their *environment is also different* from ours. But they have *overcome* the kind of negative behaviourism that we still consider *necessary, a long time ago*.

We had lots of contacts with the SANTINER over the last 20 years. Communication is difficult because it fails due to our mentality and our thought processes. The SANTINER criticise our behaviourism. But when we release this criticism, opponents immediately arrive on the scene and let loose with their mockery, because they cannot deal with justified criticism. Their basic attitude is also *typically terrestrial* when they say:

“If the SANTINER actually exist, they should really verify their existence by smashing everything so that changes will have to take place.”

To kill and to destroy everything is the typical *terrestrial* reaction.

We know nothing else.

Extraterrestrial are well aware of this and therefore *keep their distance*, because their thought processes are *more positive* than ours. One has only just recently admitted that it is actually possible to entertain *psychic* contact with occupants of UFOs.

One hears about spiritual contacts one is supposed to have had with extraterrestrials. A lot of these contacts were *hoaxes perpetrated by the base WORLD of SPIRIT*. The magician *Uri Geller*, who caused quite a sensation, asserted that he is guided and influenced by extraterrestrials. But this is a mistake, because *Uri Geller* was *telepathically* controlled by *otherworldly beings*, namely by INTELLIGENCES from the world of the hereafter.

UFO-Contact

August 1974

Whether somebody believes it or not, our planet is under HIGHER CONTROL. This planet is constantly observed and guarded. Colossal arrogance balks at the idea that authorities here on Earth are being criticised.

The layman who doesn't know what's going on asks himself: “*Why does one not interfere when one can see that a lot of things on Earth go wrong?*” – The answer is easily given: Extraterrestrials think *more positive* than we do and they *abhor* murdering people. They despise all violence and all inhuman brutality. We are dealing with *real* human beings here! Are we the same?

A lot of UFO contacts have taken place *throughout* the world during the last 20 years. The best contacts up to now were the associations with the extraterrestrial leader ASHTAR SHERAN. His name became world famous and caused lots of discussions. He was *revered* and at the same time also *discriminated against*. All of this bears witness to his phenomenal personality.

What is our reputation in the eyes of extraterrestrials?

The answer is devastating: *We* are seen as the monsters and *not* the other way round!

The hatred between nations here on Earth is unparalleled. The leaders and experts in charge of war machinery are *ungodly creatures* and one has to ask oneself the question of how was it possible for them to gain access to this planet? If you find a leader of mankind that states that he is a god-fearing

Christian or that he believes in Allah, you will find that he is a hypocrite who thinks that nothing is sacred but the devil himself. These people have been waging a cold war against GOD and all of his creation with the help of the taxes they collect from ordinary citizens.

Who will assert that terrible wars are *condoned* by GOD?

Who will endorse nuclear bombs?

Who will think that the preparations for the global destruction of all life are okay?

These are findings extraterrestrials come across *every day* – and this is why they try to prevent the total derailment of a comprehensive human race. ASHTAR SHERAN reported about this in more than 20 brochures and he lectured and also warned us. These brochures have indeed caused a global sensation, but they were hardly seen as extraterrestrial messages. We continue to emphasise that they *are genuine*! There would still be another option if this was *not* the case there, namely that they stem from otherworldly TEACHERS or ANGELS, something that would not diminish their value at all. But GOD’S HIERARCHY never lies!

We remind you of one of our *Menetekel-revelations* we published over 10 years ago. ASHTAR SHERAN had this to say:

“All atom bombs have a range of over 20,000km. Their effects are mirrored in the destruction of the Earth’s atmosphere. Enormous accumulations of water within the layers of the atmosphere trigger catastrophes that can appear 10 to 20 thousand km from the actual explosion centre. The destruction of crops, terrible cyclones and devastating earthquakes bear witness to the law of causality, CAUSE and EFFECT.”

We haven’t had direct contact with ASHTAR SHERAN for quite some time. But we would like to know what he would say about our terrestrial situation *now*. Is ASHTAR SHERAN back on his home planet? We unfortunately do not know this. The fact remains that we are flown over by all types of UFOs day and night. We are therefore still being observed and hopefully also protected. Who else would look after us and protect us? For instance our ungodly leaders of mankind, these hypocrite?

UFO-Contact

September 1974

UFOs represent a problem to scientists and technicians. All terrestrial experiences fail in regards to the UFO enigma. One considers the possibility that a spaceship could bridge the distance between two solar systems in a relatively short time quite impossible. These doubts induce scientists and journalists to *reject* the idea that UFOs are extraterrestrial flying objects. One therefore *arduously* tries to find a *plausible explanation* whereby one utilises or invents *completely illogical* explanations.

This does not get rid of the problem.

UFO sightings continue to increase. The majority of flights are presently concentrated in *South America*. *Mexico* is a close second. It is an obvious fact that flights by UFOs are considerable more numerous than the ones that are being observed. A UFO turns invisible the moment it flies faster

than the capability of the human eye and it can then only be registered by measuring devices. The fact remains that extraterrestrial spaceships have their own force field and can therefore *not always* be detected by radar installations.

But to present spaceships as hallucinations or illusions is more than a bad joke. The reality of their existence is beyond doubt. They are also not something new, they already appeared in the Earth's atmosphere at biblical times. They certainly do not come here out of curiosity, but on behalf of a very important MISSION.

Almost all contacts with them have the same content:

World peace on this planet, the acknowledgment of the CREATOR and respect for his LAWS.

Their object of their MISSION already became apparent thousands of years ago. The legislation, recorded in the Bible, indicates that these extraterrestrials are the MESSENGERS of a DIVINE POWER. *This in particular* is open to attack by GOD'S ANTAGONIST who tries everything to interfere with this MISSION. No surprise then that UFOs are disowned, derided and ridiculed. Their DIVINE ASSIGNMENT is attacked and this is mobilised in hell in order *to prevent* higher insights and indoctrinations.

The incredibility of church doctrines contributed to the fact that most people do not believe that spiritual REGIONS exist where people continue to live. Extraterrestrials have however emphatically pointed out that *these* insights are important and that not human race in the cosmos can live in peace *without* these important insights.

We continually receive these types of indoctrinations and warnings.

The misfortune of this world is actually based on *ignorance and aberrations*.

We will not publish an ASHTAR SHERAN brochure this year, because we have not had contact with the SANTINER. We will however publish a highly newsworthy book next year that deals with the LAWS of HEAVEN. With the help of extraterrestrials and our otherworldly GUIDES, we will accurately explain and publish the LAWS of HEAVEN that apply to the whole universe.

It is entirely their own affair, when the governments of the major powers want to keep the UFO problem a secret. Private UFO research is so widely meshed and pursued with such earnestness that all interested parties will be able to inform themselves. We must however warn them about science-fiction.

UFO-Contact

October 1974

We established that most UFO contacts throughout the world completely coincide with one another in one specific point:

All of these contacts state that the occupants of UFOs come from the star system we call Alpha Centauri.

Astronomers doubt that this assertion is true. All we can say about this is that astronomers adhere to a dogma that is incorrect. The speed of light is not a yardstick for extraterrestrials. These people from a different star system gained insights that we cannot yet comprehend, because our development ran and runs along *completely different* lines. Our spiritual level of progress cannot be compared to that of the SANTINER at all.

There is one further accordance in the contacts with extraterrestrials, namely:

The message about interference by the SANTINER.

It is being proclaimed that extraterrestrials will *not always* remain as calm as one falsely assumes. The SANTINER will not actually attack us; but they will *immediately stop* a probable nuclear war between nations. They never said anything about what happens after such a stop. It could happen that the SANTINER place the whole Earth under their protectorate. But this is still in the distant future.

The fact is that the SANTINER from the planet *Metharia*, in the star system of *Alpha Centauri* can indeed immediately arrest a nuclear war in its tracks. They tested this already by shutting down terrestrial power stations. All electrically powered motors and equipment can also be put out of action. People's will, ergo mind can also be *lamed* to a high degree as well.

We know nowadays with great certainty that the SANTINER are exceedingly ahead of us in regards to spiritual concerns. In the brochures "*Not from this Earth*" we published in 1957 that the SANTINER can transfer their thoughts *technically*. This assertion was received with a sceptic smile and some journalists cynically criticised it. One has in the meantime ascertained that this assertion *is probably true*. ESP research, conducted all over the world, made this probability the subject of its research and it is financially supported by the state.

The *Sword of Damocles* therefore hangs above the Earth. It can suddenly whiz down on us. This is not an empty threat, but a certainty that is revealed through all UFO contacts. It is therefore even more incredibly that the governments and military experts continue with their insane behaviour without consideration in regards to the world's population that is not, for better or for worse, at the mercy of the SANTINER, *but military experts* whose insane and ungodly hustle and bustle virtually challenge the *Sword of Damocles*.

Through our world-renowned spiritual séances we are in a position to introduce and maintain genuine UFO contacts. Our UFO admonitions are unfortunately not taken serious by lots of government departments, they think that they are dealing with science-fiction. This is however a dangerous mistake, one that will come back to haunt them. We are not crazy, we are *beholden* to the truth. *This* is the difference.

UFO-Contact

November 1974

In spite of the severest anti-propaganda one has not been able to subdue Ufology. The daily facts refute all discriminations. One can truly say: "*And yet they fly!*" One does not have to contemplate about the intentions of extraterrestrials for too long. We are adequately informed. This naturally doesn't fit in well with the opponents of UFOs.

The Bible informs us that the extraterrestrials pursued the same intentions in biblical days. They want to help mankind to reach a better, higher level. Nothing has changed in this respect; they still pursue the same goal these days.

In order to find out what the SANTINER want from us, we have to communicate with them. This communication already existed numerous millennia ago. The Bible tells us about it. Our ability to communicate is also excellent these days; it is unfortunately doubted. But one has to deliberate about *who* these doubters are: They are *atheists* and *adversaries of progress*. They are the ones that want to continue with *fishing in muddy waters* and those that are *not concerned about the demise of all of mankind* for as long as *they* are alright.

We know through our contacts that we are continuously and intensively observed. Extraterrestrials are indeed very humane and tolerant, but their tolerance must surely also have its limits. We cannot agree with those that think that nothing will happen in the near future. We contemplated this question very thoroughly and taken everything we heard from extraterrestrials into consideration. We can therefore say: "*These extraterrestrials are invincible.*" Even a nuclear war cannot affect them. These extraterrestrials have *absolute* control over the situation.

The SANTINER are in possession of a weapon that no other invention can ever trump. They will desist from using this super weapon to the very last moment. They have mapped and explored the whole planet in the meantime. They now know exactly how and where they have to employ their weaponry when things turn serious. Their plan of action has been defined.

We are dealing with so-called *teletection* to begin with. This word must surely have been adapted to our language terminologies. *Teletection* was already employed during CHRIST'S crucifixion. It was only a small, but at least a very impressive action in those days. The ground was churned up and an enormous hurricane affected the area. A hurricane also raged when the Israelites were pursued by the Egyptians as they crossed the sea. The river Jordan was also parted in the same way.

One further weapon is *telepathic paralysis*. When the SANTINER visited the house *Lot* lived in, the more rebellious were paralysed by the SANTINER and this to such a degree that they were incapable of carrying out any action or think judiciously. Their aggression was completely eliminated.

- *We heard through our UFO contacts that the paralysing of the mind can be realised to an unimaginable extent.*

This allows the conclusion that potential war criminals on Earth will never get to the chance to apply their superlative atom bombs, because such an aggression against terrestrial mankind would be immediately prohibited.

What would happen if GOD did not have his LAW and ORDER POLICE to defend and to protect his creation?

UFO-Contact

December 1974

There is only one single argument in regards to UFO research that is of importance, namely their velocity. Scientists that feel competent enough to deal with the UFO question always use the same

objection, namely that it is *absolutely impossible* to traverse the kind of distances UFOs are supposed to conquer. Multiple speeds of light are simply ruled out. Analogously, there is also the fact that extraterrestrial flying objects cannot exist because the planets of our solar system cannot be inhabited by human beings. All other assumptions and explanations fail when confronted with this explanation.

The question is whether this limit placed on velocity is correct.

Nobody on Earth can verify that *multiple speeds of light* exist. Even travelling at a speed akin to the speed of light seems hardly possible.

Just how can one explain UFOs?

We must not cling to the science's limited beliefs to begin with. Our sciences stick with the known physical laws of nature and their experiences gained from experiments. When answering this question we must proceed with the notion that we are *not* dealing with terrestrial human beings, but with people from *another* solar system. We must acquiesce to the fact that *these* people possess *more* experience and that they are therefore also *technologically far superior*. We cannot dismiss the idea that these beings dispose over some SUBSTANCE that makes their travelling speed possible. One also has to assume that human thoughts are *a lot faster* than the speed of light.

What ENERGY is at their disposal?

We naturally had an opportunity to ask extraterrestrials questions. They informed us via our SPIRIT GUIDE that they *travel with the help of anti-matter*.

What do we know about anti-matter (1974)?

We know that it exists. Further experiences with it do not exist. Government agencies publicly deny the existence of UFOs and the science also behave as if the non-existence of UFOs *was theoretically verified*.

We had numerous visits from reporters in regards to Ufology. One naturally asked us the question of whether UFOs can be somehow verified. There are of course numerous passages in the Bible that indicate their existence. Faith in God also plays a role. But we think that the "*Phenomenon at Fatima*" represents the best and safest evidence. These apparitions, very accurately protocolled, *provide the best evidence of their existence*. It is simply impossible to give another explanation. It is completely explicit and conclusive. We are surprised that the sciences overlook this fact, well, *that they don't even take it into account*.

ASHTAR SHERAN has attracted people's attention. If one does take notice of him, then only because his messages to the people on Earth are *eminently logical and comprehensible*. He speaks the unadulterated truth. One can understand why this truth is *not palatable* to the powerful on this planet. But the *forewarnings* expressed by ASHTAR SHERAN must be taken into consideration.

Journalists do not like the idea that human beings are supposed to exit in space that are extremely superior to us. Even more disconcerting is the idea that these human beings *visit us on a continuous basis*. The powerful on Earth do not possess one single flying contraption that come even close to a UFO.

UFO-Contact

January 1975

When witnesses want to make a statement, they can only do so within the framework of their remembrances that they call upon as a yardstick. The witnesses whose reports are in the Bible can therefore never talk about spaceships, because terrestrial spaceships did not exist in those days and reports about them never eventuated. The witnesses from the past therefore reported as follows:

Exodus 13, 21:

During the day the LORD went in front of them in a pillar of cloud to show them the way and during the night he went in front of them in a pillar of light so they could travel night and day.

Exodus 24, 9:

...and they saw the God of Israel. Beneath his feet was what looked like a pavement of sapphire as blue as the sky.

Ezekiel 1

4: I looked up and saw a windstorm coming from the north. Lightning was flashing from a huge cloud and the sky around it was glowing. Where the lightning was flashing, something shone like bronze.

15: As I was looking at the four creatures I saw four wheels touching the ground, one beside each of them.

16: All four wheels were alike, each one shone like a precious stone...

18: The rims of these wheels were covered with eyes...

Ezekiel 10

1: I looked at the dome over the heads of the living creatures and above them was something that seemed to be a throne made of sapphire. (I clearly heard them call the wheels "whirlwind")

There are still people around that do everything possible to attack Ufology. These doubter never ever looked in the Bible. The extraterrestrial envoy ASHTAR SHERAN once told us:

"Even though the situation is very clear to us – it is extremely abstruse to you. The majority knows nothing about our existence, a smaller section doubts us, a number of people misunderstand us and a tiny remnant believes in us; and then there are a handful of people who unscrupulously profit from our mission."

There are people who can get their hands on millions, *but they are unhappy and spiteful against everybody in spite of this*. – And there are also people who get their hands on the most glorious messages and evidence about life after death – and they behave exactly the same. GOD could therefore fulfil people's *every* wish and it *still wouldn't* change their character if it is basically discontented and negative.

The fact that UFOs visit us on a daily basis is indeed a great gift from our CREATOR. We shouldn't rack our brains about it, but recognise that GOD has not yet abandoned us. For as long as these extraterrestrial flying objects come to us, the Earth is not lost.

We are presently engaged in the completion of a further ASHTAR SHERAN brochure. A number of questions and answers also appear in the Menetekel. May these lines already constitute an extract for our readers. Letters from our readers confirm that no other UFO book exists anywhere in the world that deals with the UFO problem as *precisely* as is the case with our publications. This is due to the fact that ASHTAR SHERAN personally talks to us. He bluntly tells us the truth.

UFO-Contact

February 1975

People are making a great mistake when they believe that nothing happens in regards to UFOs. Things are progressing *step by step* according to plan. Sightings continue to increase. We know that some of them are *reconnaissance flights*. Contacts are also increasing and the public takes more and more notice of them.

CHRIST taught in a simple style. The Christian religion developed from the truths that he told. – ASHTAR SHERAN, the SANTINER, teaches in his own style and his messages outshine the Book of Books.

The messages that we receive from extraterrestrials are being translated and disseminated across the world more numerously. The ASHTAR SHERAN messages that we published in our manuscripts can now be purchased in book form in *Brazil, Italy, and France* and in all book stores.

The circles continue to expand.

We wait with anticipation for the point in time when the major Churches *have to* deal with this. It is high time for mankind to be confronted with the ABSOLUTE TRUTH, because the world can no longer exist without it.

We like to thank all our readers and interested parties here for the trust they have shown us. We also like to thank those that supported us because they understood the situation that we are in.

ESP research, gaining *more importance* day by day, also includes UFOLOGY; because all extraterrestrial contacts are of a *spiritual nature*. The SANTINER send their messages through *amplified telepathy* and they are received by our spirit GUIDES who transmit them to us *via automatic writing*.

WHAT IS TRUTH? – The new ASHTAR SHERAN brochure is extraordinary in its content. Any commentary is superfluous, because all of ASHTAR SHERAN'S messages are extraordinarily exceptional and always cause a sensation around the world. Our brochures have been endowed with the seal off the objective truth for more than 20 years.

ASHTAR SHERAN is a universal teacher and he is akin to a messiah.

CHRIST taught the truth.

ASHTAR SHERAN is doing the same, but his messages are *even clearer, more understandable* and *more current*.

ASHTAR SHERAN is the MESSIAH *of our time!*

UFO-Contact

March 1975

The UFO problem has not yet been cleared from the table. It still exists after all these years. There

are however groups at work that try everything they can to hush up the existence of UFOs. The arguments that one lists are *so naïve* and *so ridiculous* that one wonders why these people and their opinions are actually mentioned in newspapers.

One cannot resent the SANTINER for not being willing to establish official contact with the people on Earth but this is certainly not evidence that they do not exist. We are repeatedly and warily asked *how* we establish contact with extraterrestrials. We already and often answered this question in the past and we don't mind repeating this explanation again:

- Our spiritual séances are conducted by our spirit GUIDES. GUIDING SPIRITS are *otherworldly* mediums that establish contact with *terrestrial mediums*. This is how good communications come about after years of practise.
- We ask all questions orally and aloud. The faintest whispering is indeed immediately understood by our SPIRIT GUIDES, but not necessarily by our circle's participants.
- All questions and answers are recorded on tape.
- The answers happen via the writing medium, whose hand is *kinetically guided*, *very spontaneously* and without hesitation.
- The original text is written down on sheets of paper of 70cm to 50cm in size. The text consists of letters that are about 5cm in size. We receive about five DIN-A5 pages of typewriter written text during the duration of a two hours long séance.

Thus far the sequence of our contacts.

We *cannot summon* extraterrestrial when we want to deal with questions about UFOs. We can only rely on happenstance; extraterrestrials might sudden engage in our psychic transmissions. When this happens, our otherworldly GUIDE passes the answers from extraterrestrials on to us. They act as mediators, translate the extraterrestrials answers and psychically written them down in the aforementioned fashion.

Everything seems clear to this point until wiseacres ask: "*Who guarantees that the GUIDING SPIRITS are not duping us?*" – All the knowledgeable know that hoaxing and lying spirits exist. They are rated as demons and they appear in the thousands. But the answers that we receive in the described way are of such a high standard and of such extraordinary value that it would be *completely illogical* to see them as the answers of demons. GUIDING SPIRITS work within a divine MISSION. They would absolutely guard against stooping to hoaxes, they would be immediately ousted from their SPHERE to a lower one.

- *The quality of the content decides the WHERE FROM.*

We know that extraterrestrials appear in the same fashion in lots of private circles. When we read some of these messages we immediately realise whether the alleged extraterrestrials are in reality hoaxing and lying spirits that have their evil fun with the participants of a specific circle. They can do so even better when they find that one accepts their nonsense at face value *without testing* the psychic transmissions. Just how naïve some circles are is incredible! – The GUIDING SPIRITS of these profane circles are not better either, because they always only represent *a mirror image* of the terrestrial work circles. This is why *Spiritualism* finds it so difficult to establish itself.

UFO-Contact

April 1975

UFO flights are being recorded with ever greater accuracy. The interest in them continues to grow. We find it interesting that our earlier information about UFOs gradually find confirmation these days, whilst one derided and ridiculed them in the past. One observed how a human being was sucked into a UFO for instance, whereby the UFO was at least 8m above that person.

So-called ANGELS HAIR also plays a major role. Astronauts from the *Apollo 11 Mission* photographed UFOs on the Moon. One of these photos shows a UFO with linear emissions that grow longer and longer. One regards this as an emission of some fluid. But we are actually dealing with the typical escape of so-called ANGELS HAIR.

The blaspheming gradually abates and one begins to contemplate whether human-like creatures exist *after all*. It is mainly about *acknowledging* the superiority of extraterrestrials. The moment this happens one must inevitably ask oneself whether our penchant for warfare actually makes sense.

UFOs do not just monitor the Earth, they also bring us *very* important messages. Our UFO brochures verify the eminent intellect of extraterrestrials.

Here are a number of expositions by ASHTAR SHERAN:

“Those that do not want to acknowledge the formidable THINKER, PLANNER and CREATOR terrestrial mankind calls “GOD” in no way abrogate the effectiveness of his coercive laws of creation. Conditions and circumstances here on Earth provide clear evidence for the *violation* of the divine laws of nature and for the fact that GOD’S antagonist is still seen as *fairy-tale* fantasy. Terrestrial laws must be *adapted* to the laws of nature.

The universal creatures called “*human beings*” received their *personal freedom* and their *free volition* from the CREATOR according to his LAWS. This however makes all human being responsible for their own thoughts, actions and behaviour. They must hold the CREATOR’S gift of freedom and free volition *sacred* and *not* abuse it for their own advantage. One can indeed consider the idea of *unlimited* freedom here on Earth, but it could logically speaking only end up in one outcome, such a freedom could only mean *anarchy*. But those that infringe upon and violate the freedom of innocent people are a dangerous instrument of satanic forces. If this happens between nations it ends up in war.

As freedom is part of the divine, every war is in contrast demonic, ergo ungodly, that is to say, the most powerful weapon within creation in the hands of the *antagonist* that is *completely misjudged* by terrestrial human beings. People are indeed urgently warned by the regions of the realm of the spirit and people from an extraterrestrial world through messages containing the absolute truth. But whether they accept these warnings, take them serious and abide by them is completely left up to them.

Human beings constitute a part of their CREATOR’S characteristics. Equipped with this eminent insight that we found in our brothers and sisters, we are deeply affected by the wonderful augustness of all functions found within the human spirit and the human body.”

ASHTAR SHERAN knows that our salvation can only lie within an objective indoctrination.

UFO-Contact

May 1975

There are undoubtedly humanities out there in the universe whose development is way ahead of ours. The SANTINER confirm this to us daily. We have known for 20 years that the SANTINER actually exist, because we have had uninterrupted communication contacts with them. We are not to blame if one does not take this serious. Anyhow, a lot of governments are aware that UFOs exist. It must be in their own *interest* to impose a taboo on the whole affair. We cannot override this taboo.

ASHTAR SHERAN, the well-known leader of the SANTINER, sufficiently verified his eminent intelligence. We published over 20 of his brochures and some of them have been translated into many other languages. We know from the SANTINER that they abhor violence. But they are still capable of destroying our world and everybody on it in a very short time. This might be the reason why the USA imposed a taboo on UFOs, that is to say, *nothing can be officially confirmed*.

Here is another message from ASHTAR SHERAN:

A considerable mistake is made in regards to the assessment of freedom. Freedom *is as sacred* as GOD. It is therefore *not* an agreement and *not* an arrangement. Freedom is however tied to the divine LAWS, particularly to the LAW of JUSTICE. One's freedom comes to an immediate stop the moment this LAW is trespassed against. But as freedom is as sacred as GOD, it is treated with the same kind of *hostility* and *mockery*.

Atheists understand freedom to be a kind of NEGATIVE FORCE. They only know the freedom to do whatever *their* will or the will of another (negative) intelligence dictates, even if it is directed at creation itself. The concept of freedom is therefore conceived *differently* from those that believe in GOD; because the last mentioned prefer to abide by the divine LAWS. Atheists on the other hand only abide by terrestrial, *civil* legislation.

The divine LAWS in contrast apply to *all* human beings, well actually to all humanities throughout the universe. They can however be trespassed against like any civil law because of our *free* volition, but not without serious consequences. The consequences do however reach *way beyond people's physical existence*.

The Last Judgment is incorruptible!

The divine truth is therefore no fantasy, no superstition, no philosophy, but a *question of conscience* that does not please atheists and this is something they want to avoid at all cost. This is the reason why the ungodly justify their behaviour through the "DIAMAT" (Dialectic Materialism) and *unprecedentedly distance* themselves from the generally accepted objective truth.

All the knowledge, wisdom and understanding that you gained during your unfoldment ought to be unreservedly offered to those that have nothing of any of this; this might help them gain the freedom of their spirit, their mind and their body – things that are still being kept from them.

The spirit is created to be *free*; because it constitutes a part of the universal GREAT SPIRIT and it stands *beyond* all human imposed restrictions. It is only subjected to the natural LAWS of the universe *that forms the framework* wherein the spirit can express itself.

ASHTAR SHERAN is not a priest, but we are already aware that the SANTINER brought us a positive religion: They *proclaimed the Commandments* on Mount Sinai.

UFO-Contact

June 1975

The UFO problem remains unchanged. One is *officially* aware that UFOs exist, but the taboo in regards to them is still in place. We were interested in finding out why it is so difficult for us to make progress in this matter.

Even though an interest in UFOs exists worldwide, *no unified* research effort is being made. Those interested in UFOs are a mixed bunch. There are lots of specialised directions. One group shows an interest in *UFO technology* whilst another group shows an interest in *the MISSION* of extraterrestrials. And then there are those that expect miracles, they wait for *GOD to clear the air with a thunderbolt*. Further groups are interested in *extraterrestrial communication contacts*. But each group only concentrates on *their* interests and they are not interested in what other groups do. But as the UFO problem is not dealt with *as a whole*, it seems that only a few people have fun with the subject at any given time. This naturally makes the main task of the SANTINER much more difficult.

If one now tries to find out what the SANTINER have achieved so far one finds that the communications contacts are in *first* place. Our knowledge has been considerably enhanced through them. We now look at biblical events that have been completely misinterpreted with different eyes. Our contacts with the UNIVERSAL TEACHER ASHTAR SHERAN take pride of place. He is the most important contactee and he utilises spiritual opportunities to communicate in order to save us from a terrible downfall.

It is unfortunately extremely difficult to convince mankind's leaders of the truth. This aforementioned separation of groups is a great hindrance and nothing positive eventuates from it. Based on our correspondence we are well informed about the specific wishes of these groups. When they hear about contacts of communications for instance they want to know:

- *How* do extraterrestrials travel?
- *How* does their *technology function*?
- *How* can people *dematerialise* and then *re-materialise*?
- And besides, is there *gold* on their home planet and similar questions.

Nothing is mentioned about how our level of education can be *raised*. One is rather more interested in what kind *weaponry* and other kind of *destructive agents* are available.

We gather from this that terrestrial mankind is indeed a *belligerent* people, one that is mainly interested in *egotistical materialism* and *lethal brutality*. No surprise then that the SANTINER are not too enthused about us. We are quite obviously dangerous and insincere enemies. This is not an empty accusation, it has been verified through repeated attacks on UFOs.

It might be a case where our UFO contacts can no longer take place because – as we have already announced – we will *cease* our main activity in the field of spiritualistic research. This is the reason why we suggest to all our readers to show a *specific* interest in our *latest* UFO brochure “*What is Truth?*”.

It will probably also no longer be possible to pursue the dissemination of our contact reports. There are only a few copies left. The German language editions of ASHTAR SHERAN'S brochures are completely out of print.

UFO-Contact

July 1975

Any dispute about "Flying Saucers" is always about their velocity. One always argues that their trip to Earth would consume too much time. This calculation of time is always based on our terrestrial experiences. A scientist will never entertain the thought that extraterrestrials could have *different* experiences and insights in regards to velocity and energies.

We read a whole series of UFO books in the meantime and we can classify them in two groups:

- On the one hand we are dealing with pure *fantasy* and it has nothing to do with reality.
- On the other hand we are dealing with people's *own* contemplations about how it *could be*. Comparisons between nuclear energy and cosmic energy fields are made. One finally comes to the conclusion that one could be dealing with the application of anti-matter.

The reference to the utilisation of anti-matter does however stem from us, respectively from our UFO contacts, because *nobody talked about it before* our publication. We can only point out that great scepticism is in order in regards to such publications. Most of these fantasies about UFOs stem from the USA. Reports from *South America* are more *objective*, because *a lot* of sightings are made there also. The interest is naturally greater where newspapers report UFO sightings more often.

The Churches are on principle *against* everything extraterrestrial. One does not allow their religious attitudes to be troubled by this.

Genuine and good reports are rare. Extraterrestrials are not all that talkative. On the contrary – they behave *rather reserved*. We naturally endeavoured over again to gain an insight into the way they propel themselves. Only our great friendship with ASHTAR SHERAN provided us with a few rare insights. They turned out as follows:

- Extraterrestrials utilise the natural magnetic energy of anti-matter for their flying, respectively their gliding objects.
- They possess an aggregate that creates a magnetic field that circles around the UFO like a protective mantle. The stabilisation happens through the utilisation of the centrifugal energy that is created by this aggregate.
- The velocity of UFOs relies on the cosmic energies of magic. Magic is that specific ENERGY that surpasses the speed of light by far. Magic is the ENERGY that makes dematerialisation and re-materialisation possible in the first place.

These are things that we did *not* investigate. The famous Brazilian medium *Mirabelli* delivered proof in regards to the transfer of matter beyond the speed of light. Our scientists avoid the issue because they have no inkling about what MAGIC is all about, they always rejected it as humbug.

Extraterrestrials are not inclined to give us this type of information or to have us look at their plans. Terrestrial people's inhumanity has been demonstrated to them often enough. We can count ourselves lucky that they do not see us as their enemy and attack and destroy us. There are plenty of reasons for them to do so.

Curiosity and lust for sensation do not help us, only our *respect for GOD and his creation* will. Why should one be interested in creation, if one is not interested in the CREATOR? *–It is dealt with accordingly.*

Hats off to the SANTINER! They criticised our false and illogical religion and corrected it accordingly.

UFO-Contact

August 1975

Communication is the most important thing in all contacts with extraterrestrials. Contact with ASHTAR SHERAN is always an adventure. This name has become so well-known in the civilised world that imitations appear everywhere. His name is abused the way money is abused also. We are however pleased that ASHTAR SHERAN selected our circle.

There are bound to be a number of mediums that believe that they are capable of establishing contact with ASHTAR SHERAN. They are however so egotistical *that they would not admit to have fallen prey to hoaxing spirits*. We have recently seen quite a number of such messages. All we can say to this is that such communications, disseminated under the name of ASHTAR SHERAN, *do not possess an extraterrestrial standard*, but clearly indicate that one is dealing with *terrestrial* thought processes. Those that want to be absolutely sure should rely on our scripts under the designation of "MFK", respectively "*Medialer Friedenskreis*" (Psychic Peace Circle, Berlin). These publications are absolutely reliable.

Here is an extract from our tape recordings. We are dealing with an original recording from one of our séances:

ASHTAR SHERAN:

"I am pleased about the fact that I have *otherworldly* support that *psychically translate* my expositions. This message concerns terrestrial mankind:

Evil and the villainous will now reveal themselves. Those that serve the devil will help him unleash his greatest trump, namely the most inhuman use of force in every possible form and manner against GOD'S creatures, the people on this Earth.

- *In his battle against his own creator, it is Lucifer's aim to remove the creatures called human beings from this planet of redemption by destroying their physical bodies. All spiritual developments intended by the creator will then be temporarily prevented through this until the next reincarnation.*

There are no creatures – Lucifer also belongs amongst them – that could trump its own CREATOR, the formidable ORIGINAL SPIRIT, in spite of this; only the insane could imagine something like this.

Life is indestructible, even in its individual particles. One can therefore not extinguish a life, one can only bring about a separation between life (soul) and matter (body).

- *But human beings must not put asunder what GOD amalgamated through incarnation.*

Human beings must therefore *not kill* their fellow human beings or themselves, that is to say, forcibly separate the soul from the body. The consequences for those that do this are *very, very severe* in the realm of the spirit. Those that know the truth will think carefully before committing such an act and cast such an intent far from them.

GOD created husband and wife to promote the redemption process during an incarnation.

But what do the people on this Terra do? They destroy their planet of redemption and provide a service to GOD'S antagonist in the process, something we just cannot comprehend. There are no opportunities left for the salvation of the soul once Terra is destroyed – and those that participated in this crime *are lost forever*, because Lucifer will no longer let them escape from his claws. This is not fantasy, but *real* reality – a *dreadful future*.”

UFO-Contact

September 1975

As the production of the *Menetekel brochures* **comes to an end** on the 1st of January 1976, the UFO contacts will also no longer be published. We therefore publish a number of things from our contact folder:

The disregard of conscience

“Conscience regulates and determines right from wrong. All human beings have such a conscience. But *free* self-determination can ignore conscience. All human beings however know whether they do right or wrong in spite of this. It is purely the concern of each individual that is not afflicted by a mental illness, ergo every normal human being. Everybody is in possession of an unmistakable MONITION.

Based on my knowledge of the LAWS of the SPIRIT I can assert that every human being is in possession of an unerring yardstick in regards to their thoughts and actions. One's conscience is an implacable guide for everything one thinks, says and does, perfect, independent, instinctive, at every opportunity whatever the problem might be.

Your own thoughts, your own conscience tells you without hesitation whether you act correct or wrong. You would like to smother it at times and try to placate it at other times, but you always know DEEP WITHIN YOU what the situation looks like.

Your own conscience can however be trained so that it works *even better*. We have made this training our MISSION, because Terra is still very immature from a spiritual point of view. Terra even lacks an interest in its own SPIRITUAL DEVELOPMENT.

Schools that train one's conscience, something that we have, unfortunately do not exist on this planet. When a person has a negative attitude and *blocks* all positive admonitions, the GUARDIAN ANGEL assigned to that person by GOD'S realm of the spirit (as is the case with all human beings) can achieve very little. People have to be *open* to the LAW of GOODNESS and they must also strive for HIGHER and BETTER things *of their own accord*. All spiritual support is in vain if the conscience of the protégé is unresponsive. The GUARDIAN ANGEL actually addresses its charge's conscience, he thereby addresses its positive core.

The sense for what's decent and good can be *atrophied* in a highly educated person just the same as in a less educated person. A highly regarded professor can, *in spite of* his enormous knowledge and great proficiency, *be very negative*. He does not have to have a positive conscience. There are even highly educated academics on this Earth that try to convince themselves that they *don't* have a conscience and that they can therefore do the things that other recoil from unencumbered.

“*Neanderthal Man*” already had a conscience, he could already distinguish between good and evil.

There is *no inherited* conscience. Conscience is present the way consciousness or one’s instinct of self-preservation is present. But there is such a thing as *inherited wickedness*. This is something people find difficult. When their conscience warns them and they ignore it, they only regret things *after*.

Being of good-will is also decisive. There is no conscience without empathy, regrets are also interrelated with this. Without good-will and without empathy one’s conscience is completely switched off. There are people on this Terra that manage to suppress their conscience over again. Their conscience only represent an uncomfortable ballast to them.”

UFO-Contact

October 1975

Admonishing words from ASHTAR SHERAN:

“The infallible development and order within space, something your sciences in a *guessing* fashion regard as the highest order and lawfulness and denote with the word “COSMOS” – in contrast to chaos, disintegration and destruction – would not allow life, a soul and a body to develop that possess the capability to realise GOD, if this creation is not planned and created as the “COSMOS”. You yourselves are these incomprehensible sinners, because you and your fellow human beings subordinate yourselves *to chaos instead* of the COSMOS.

This planet is *not* the only planet that features human life. *Our* existence on another planet and our bases on other planets provide the proof for this fact. There are however terrestrial human beings that do not believe in us.

- *Do observe the sky and you will discover our spaceships.*

Man’s origin is in his *spiritual* LIFE, ergo in the REALM of the LORD, within the habitat of *spiritual* MAN.

- *Before human life began on this planet, human life existed on other planets for an infinitely long time; because the physical aspect – apart from a few exceptions – is the same everywhere.*

Planets are certainly of various densities and this for organic life also. The Earth on the other hand possesses a *special density*. We therefore experience great physical difficulties the moment we physically alight on your planet. This is the reason why we are not interested in living such a life.

- *This planet was certainly not occupied by a single pair of human beings to begin with. You can therefore eliminate the unreasonable story of “Adam and Eve” from your mind, because this type of concept only confuses the issue.*

The development of the animal kingdom followed lots of other epochs of life.

- *The ancestry of human beings from the animal kingdom is not a given. It only seems so.*

To compare the animal kingdom to man’s existence is *illogical*, because animals have – without one single exception – a differently running development, a different aim and not the kind of mind *that people* possess. Fauna and flora are the organic levels of development that had to verify that the era for human beings had finally arrived.

- *All organic life here on Earth - as well as on other planets - only happened through materialisations according to spiritual TEMPLATES. The material is, in your words, a kind of “ectoplasm”.*

Human animosities amongst one another already developed about 30,000 years ago. It started at the time when human intelligence began to emerge, ergo the development of *rational* thought. The knowledge and

thoughts of “Neanderthal Man” started to vary. Some eventually improved more than the others, their knowledge and their possessions grew. Avarice and envy of people’s heightened abilities, knowledge and possession began and this eventuated in bloody battles.

- *The real season for wars has always been an envy of the mental superiority of others and this has remained like this to this very day and this without acknowledging the soul and assessing its value. The moments of stress are brought about by the egotism of individuals.”*

UFO-Contact

November 1975

From our contact folder:

ASHTAR SHERAN:

“One *does not believe* in GOD’S LAWS, because one does not believe in a LEGISLATOR, but only in human beings’ alleged ability to reason. This is the reason why GOD’S LAWS have very little binding meaning. We are *not* dealing with prophesy, *not* with INSPIRATION, *not* with a VOICE from the hereafter and *not* with human contemplation, but with the HEAVENLY LAWS our forefathers received from the SANTINER. Those that do not believe this can also not believe in the existence of the great INFORMER.

All *terrestrial* laws deal with punishment and penance. The *divine* LAW make no exception here either. Philosophy however asserts that these LAWS were conceived based on political and social considerations. This is not just a mistake, but an *atheistic lie!*

Terrestrial mankind undoubtedly only obeys when animated by fear. This is why the divine LAW of the LORD must also be feared. But the LAW of the LORD *not only* apply to one’s terrestrial life. On the contrary – it actually comes into full effect only *after* one’s terrestrial life. The eminent TEACHER CHRIST forcibly indicated this.

GOD’S LAWS do not just concern people’s behaviour the way GOD envisages it, his LAWS are *more* than terrestrial laws because they are a part of the laws of nature. But those that act against the laws of nature will feel the full brunt of the LAW of CAUSE and EFFECT and nobody will be able to avoid the consequences. *Speculations about mercy do not exist here.*

We, from another star system, *recognised* the antagonist, his negative thought processes, his actions against the ORIGINAL SPIRIT and CREATOR, his attitude towards creation and this human race (something that is not yet the case with terrestrial human beings). We comprehend that his inspirations and his numerous spirit HELPERS influence the greatest portion of the terrestrial human race to such a powerful degree, that these people fully and erroneously agree that matter rates higher than the spirit and that the order within creation is therefore repealed; creation is being attacked on numerous fronts and this animosity is raised to the level of an absolute law of nature.

The LAWS of LOVE and harmony are *disregarded* on Terra and thereby overridden. All the LAWS of the LORD are being abused and turned into their opposite through constant bloody wars and their affiliated destruction.

Terrestrial mankind is not ashamed in any way to challenge nature and to abuse this planet of redemption.

Our extraterrestrial existence is simply denied even though our spaceships are sighted *daily*.

Terrestrial mankind is *not supposed* to make better deliberations. This could indeed happen once one *comprehends* our existence. *This* behaviour is also subject to the “LAWS of CAUSALITY” as you call it, namely the consequences of cause and effect.

I warned you 10 terrestrial years ago to forbear your nuclear tests. I explained the enormous water and climatic catastrophes that will eventuate from them to you. One only made fun of this. You are however engaged in a war against everything that exists on Terra.”

December 1975

We would know very little about this phenomenon if there was no communication with extraterrestrials and it would be the same situation as was the case with “*Fatima*”, the whole thing would be misinterpreted.

The SANTINER do not fly across our globe for fun.

They are under deployment!

All the SANTINER that visit us have a great assignment to fulfil. One is guessing to and fro, asking oneself what their assignment might be. But one does not have to contemplate this for too long, because the SANTINER have revealed themselves in this respect. They perform an honourable service *to protect terrestrial human beings*. Our world situation would surely be *more terrible* and *more negative* if UFOs didn’t fly across our sky. The purpose of this phenomenon is to considerably curb our lust to destroy things.

Newspapers blasphemed considerably more about UFOs only a few years ago. But this didn’t succeed in chasing UFOs from our skies. On the contrary – flights are steadily increasing and these flying objects are of *numerous* types, sometimes even large mother-ships the way they were described as a “cloud” in the book of Exodus.

We have entertained communication contacts with the SANTINER for 23 years. Nobody can imagine what this actually means. One *blasphemed* about this and one made our situation *untenable everywhere*. Things only changes after newspapers become more careful about what they printed. Our contacts are nowadays published in numerous languages throughout the world. Indeed a success for the MISSION of the SANTINER, for ASHTAR SHERAN.

The brochure “*What is Truth?*” wherein the actual meaning of UFO flights across the sky is explained, would be a very recommendable Christmas present.

- *Those that intent to do the MISSION of the SANTINER a great service ought to participate in the distribution of such an important truth. – A peace action without equal.*

“*We cast the first stone, others will draw the circles*”, were words from our spirit GUIDANCE who had placed themselves at the disposal of the SANTINER as translators.

- The End -
